1. Introduction

1. A Mutual Fund is a type of pooled investment in which money is collected from various investors to invest in securities like stocks, bonds, money market instruments and other assets
2. The objective of the document is to guide the users through the Mutual Fund order journey in the application. This document will cover Mutual Fund transaction types – Purchase, Redemption, Switch and Systematic Plans
 - a. **Purchase** refers to the process of investors signing up and committing to invest in a Mutual Fund. Investors would receive the units for the money invested. Purchase is divided into two parts i.e. Fresh Purchase - When User is investing in new folio and Additional Purchase- When User is investing in Existing Folio
 - b. **Redemption** refers to the process of returning of an investor's holding value based on the number of units sold by the investor
 - c. **Switch** refers to the process of transferring the investments from one fund scheme to another fund scheme for the investor
 - d. **Systematic Plans** refers to the process of orders like SIP, STP and SWP on specified Day/Date until end date of Systematic Plan
3. Mutual Funds order journey in the system consists of below steps for the user to perform the investment transaction
 - a. **Order Capture & Submission** - This step consists of the customer selecting the securities for transaction (Purchase, Redemption, Switch, SIP, SWP, and STP) and inputting the amount/units for the transaction. These transactions will be initiated from PMS
 - b. **Authorization of Orders** – Once orders are submitted, the supervisor will approve before routing the orders for execution to the product processor. For scenarios where risk deviation is present the same will go initially to Circle /Zone Head, additionally
 - c. **Order Routing** – After approval, the system will route the orders to the product processor for execution
 - d. **Settlement** - This process is to update the holdings of customers after receiving the trade file from the RTA

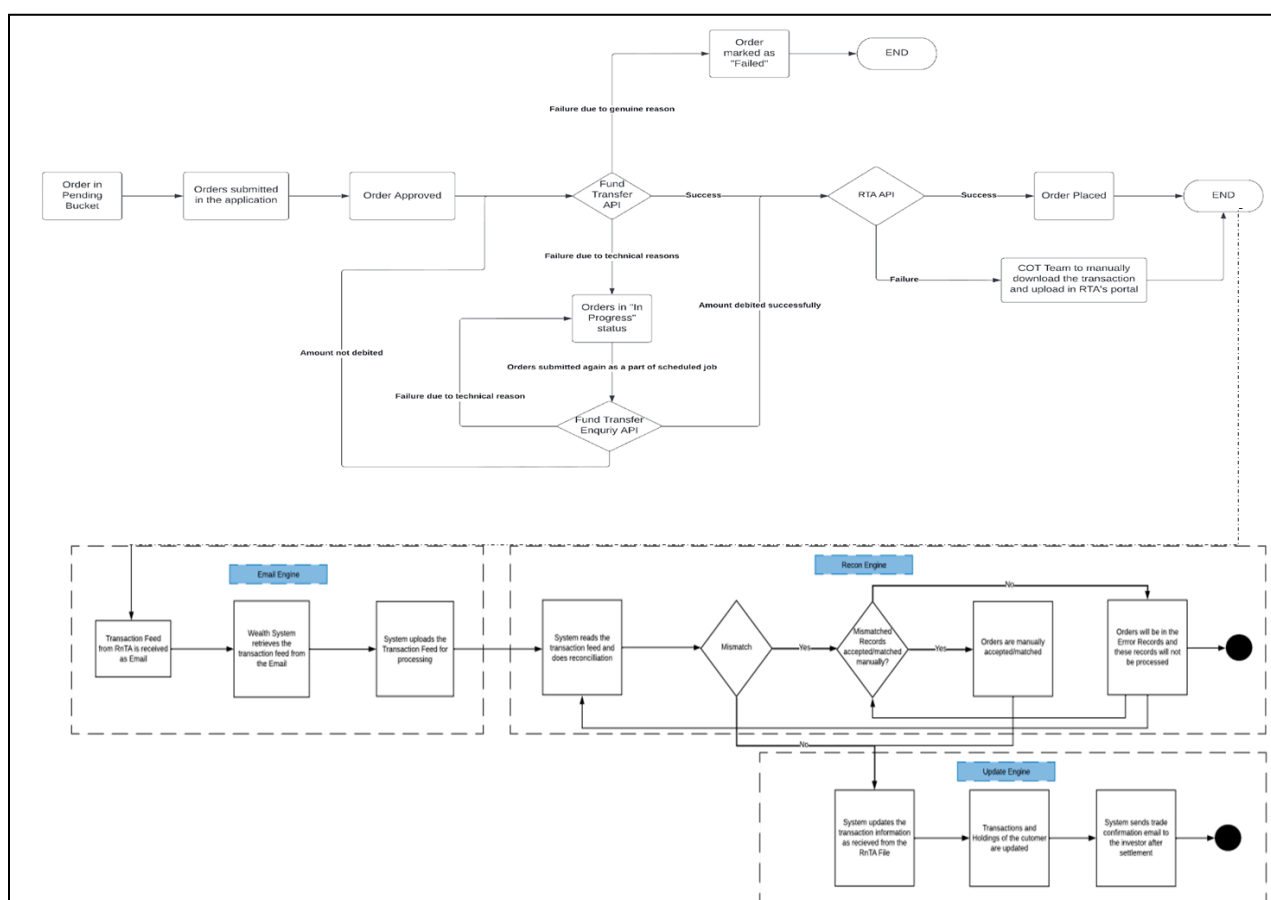

2. Prerequisite

3. Flow Diagram

The below flow diagram illustrates the journey of order capture till settlement.

Journey of Order Capture till Settlement

6. Switch

6.1. Login

Login details have been explained in the Purchase section (Refer to 4.1 Login section in the Part 1 document)

6.2. Product Selection

Product Selection Navigation, Product Search, Filters have been explained in the Purchase section (Refer to 4.2 Product Selection section in this document)

1. Product Selection screen will have two sections for the customer which will be in collapsed mode
 - a) **Existing Holdings** - The existing holdings section will display all the existing mutual fund holdings of the customer for each folio. If Customer has invested in the same fund using multiple folios then the same security card will be displayed multiple times with the folio number as displayed below. Cards will be displayed with Security and Folio Combination

Existing Holdings (Please tick to transact)

☒ Mirae Asset Emerging Bluechip Fund - IDCW			
INR IDCW Enable Moderate	Last NAV	Current Holding Units(*)	Market Value
Return : 0.00%(1M), 0.00%(3M), 0.00%(6M) 0.00%(1Y), 0.00%(3Y), 0.00%(5Y)	10.000000	100.0000	1,000.00
Invest A/C Number - Customer Name - Signing Folio Number			
Condition 223423			
BRI69095894F0177 - KASNO - Principle			
to Sign			

Screen: Existing Holdings

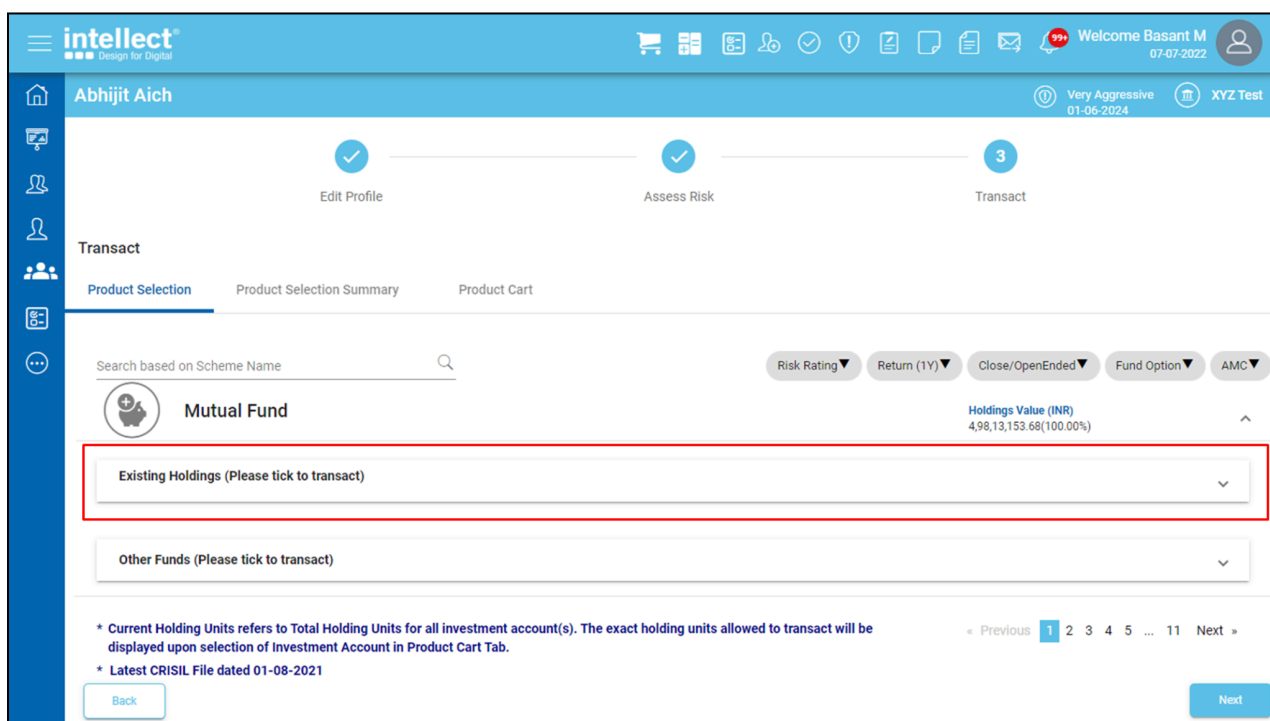

- b) **Other Funds** - The funds which are displayed here are the approved funds for transaction by the organization. The approved fund list will be uploaded separately by the operations user. (Refer Annexure for Scheme Master file upload)

Other Funds (Please tick to transact)

☒ SBI Magnum Equity ESG Fund Regular Growth INR IDCW Enable High Return : -21.90%(1M), -28.00%(3M), -22.10%(6M) -22.20%(1Y), -41.30%(3Y), -46.90%(5Y)	Last NAV 20.654200	Current Holding Units(*) 0.0000	Market Value (Branch CCY-INR) 0.00
--	-----------------------	------------------------------------	---------------------------------------

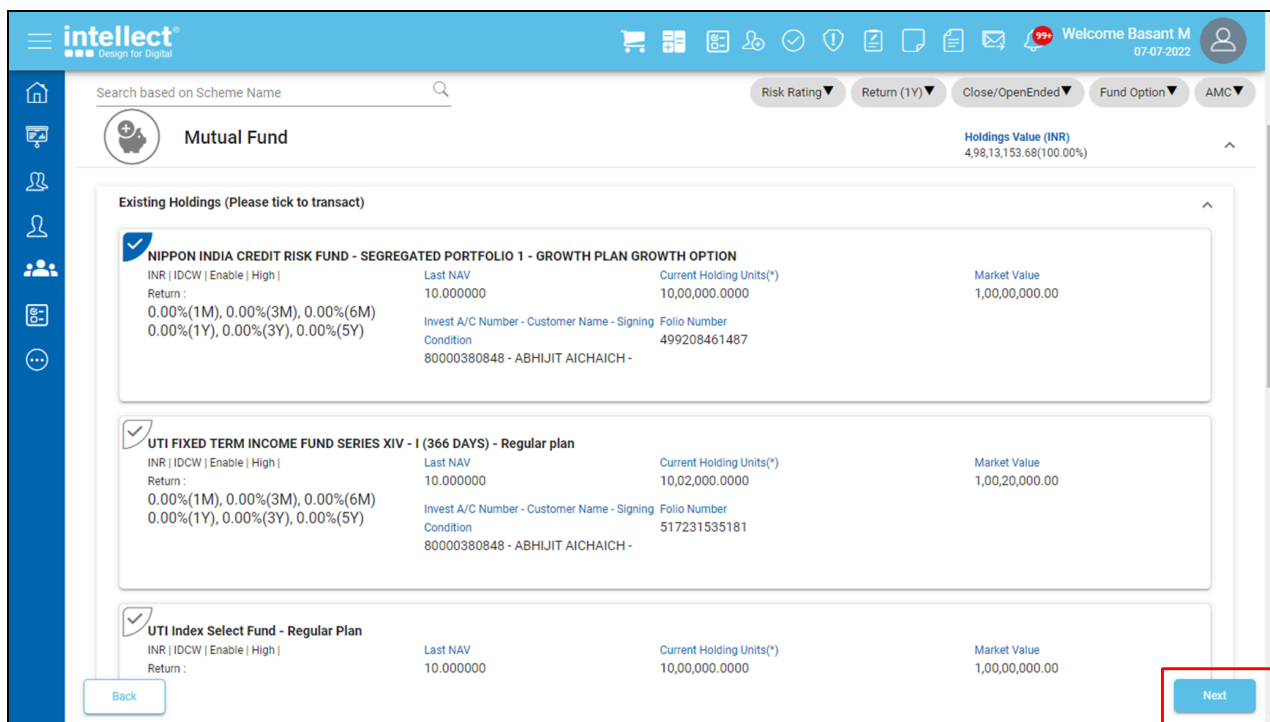

Screen: Other Funds

- For the Switch Orders, User clicks on the existing holdings or other funds to select an existing security from which the switch can be carried out. Switch transactions can be carried out from the existing holdings or Other funds both.

Screen: Select security from Existing Holdings

- User clicks on the Existing Holdings section, selects the desired securities and clicks on Next button to proceed for the Product selection summary screen

Screen: Mutual Fund – Product Selection

- If Customer has invested in the same fund using multiple folios then the same security card will be displayed multiple times with the folio number. Cards will be displayed with Security and Folio combination. Hence for each card Units and Current Market Value will be displayed as per folio

6.3. Product Selection Summary

Product Comparison, Product Additional Details in Overlay details have been explained in the Purchase section (Refer to 4.3 Product Selection Summary section in this document)

- User lands on the product selection summary screen. User will be able to see the securities which were selected in the Product Selection screen
- User clicks on the transaction dropdown of the selected security. Selected transaction type will be Switch and the User enters the Switch out amount. User has the option to select toggle between a unit based or Amount based order or a full switch tab is available as well.
 - If unit based is selected, User will enter units and amount will be calculated basis the latest NAV
 - If amount based is selected, User will enter amount and units will be calculated basis the latest NAV
 - If full switch is selected then all units and Amount will be populated
- User will click on the “Next” button at the bottom right of the screen

Screen: Input Switch details

- User will be able to see the validations while placing the Switch transaction on min Switch amount/quantity as maintained for selected security. (Refer Validations section)
- If the customer does not have a risk profile or the risk profile has expired, the system prompts the user to select “Yes” or “No” option. If the user selects “Yes”, the system returns to the product selection screen and allows only redemption transactions. If the user selects “No”, the system returns to the product selection summary screen and the user needs to perform risk profiling for the customer to proceed further

Risk Profile Alert

Risk Profile **Invalid**. Do you want to proceed? Please choose:

Yes - Proceed with Redemption/Transfer selection only. System will auto-remove all subscription/switching selected on screen as these requires a valid Risk Profile

No - Return to current screen. No selection will be auto-removed and you may proceed to perform risk profiling for customer

Yes No

Screen: Notification to User when Customer does not have Risk Profile or Risk Profile has Expired

- If the Switch In Fund Risk profile is equal to or less than the Customer Risk profile then no warning message will be displayed and User can complete the order journey (applicable for Purchase and Switch transaction type)
- If the Switch In Fund Risk Profile is only 1 level up from the Customer Risk Profile then the system will give a warning display to the User prompting him to confirm the same. All securities where there is a mismatch would be shown in the pop-up message. (Applicable for Purchase, SIP, STP and Switch transaction type)

High Risk Alert

ALERT! Selected product(s) has (have) Higher Risk than the Customer's Risk Appetite as an Investor.

Customer Risk Profile: Conservative

Product Name	Product Risk Class
SBI Mid cap fund	Aggressive

Customer agrees that State Bank of India has not provided any recommendation or advice on this(these) product(s) and that any transaction that he/she decides to proceed with is being made by his/her own choice and at his/her own risk.

Together with the acknowledgement of this alert, a Client Directed Transaction(eCDT) will be filled up and signed by the customer.

Cancel
 Confirm Notified to Customer

Screen: Risk profile deviation Confirmation

- If the Switch In Fund Risk Profile is only 2 levels up than the Customer Risk Profile ($PRR = CRR + 2$), then the system will give a warning displayed to the User prompting him to confirm the same. All the securities where there is a mismatch would be shown in the pop-up message. (Applicable for Purchase, SIP, STP and Switch transaction type). In the above scenario when the User will submit the order for authorization then the Order will go first to Circle head/ Zonal head for approval and after they have approved the order will go for further authorization to the Supervisor
- If Switch In Fund Risk Profile is greater than Customer Risk Profile +2, ($PRR > CRR + 2$). For Example- customer risk profile is Very Conservative then he cannot buy a product whose risk profile is Aggressive and Very aggressive. System will display a hard stop and should not allow transactions in this security through the User office
- In the Product Selection Summary screen, the User can review the securities selected. If the User wishes to add any securities, they can click on the "Back" button to navigate back to the "Product Selection" screen
- User clicks on the "Next" button to navigate to the "Product Cart" screen

The screenshot shows the 'Switch In Scheme Details' screen. At the top, there are fields for 'Switch-out NAV' (10.000000), 'EURN No.' (6788012), and 'Mode of Transaction' (Email). The main section contains 'Switch-In Scheme Name' (UTI FIXED TERM ...), 'Currency' (INR), 'Switch-In Units' (1000.0000), and 'Switch-In NAV' (10.000000). Below this is a 'Switch-In Amount (INR)' field with the value 10,000.00, and a 'Dividend Instruction' dropdown menu. A 'User Remarks' field is also present. A central alert box with the title 'Alert' asks 'Are you sure you Want to Continue?' with 'Yes' and 'No' buttons. The bottom of the screen features a navigation bar with buttons for 'Scheme Info', 'Order Info', 'Document Upload', 'Deviation', and a 'Next' button.

Screen: Display of Confirmation screen

11. After providing confirmation, the Order gets saved in the system and the status of the order changes to "Pending"

This screenshot shows the same 'Switch In Scheme Details' screen as above, but with a different alert box. The alert box, titled 'Alert', displays the message 'Order saved in WMS with Reference no. 1809' and has an 'Ok' button. The background form fields and navigation buttons remain the same.

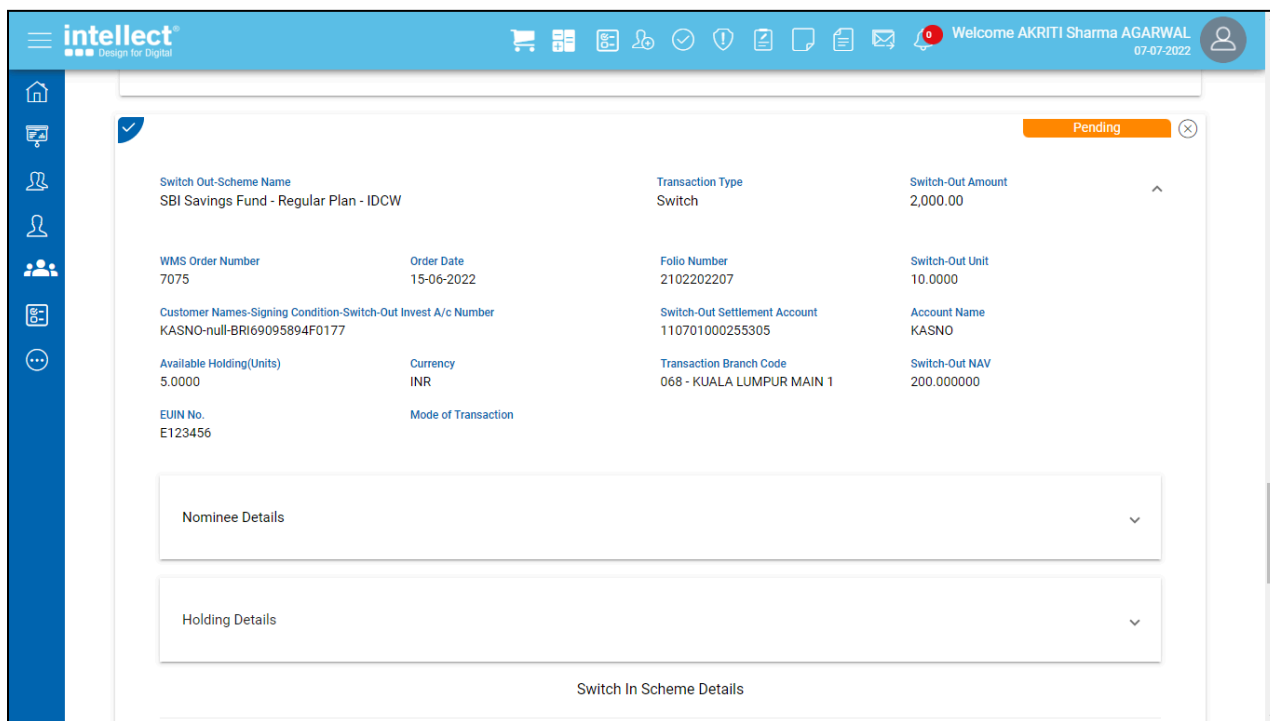

Screen: Save Order Details

The screenshot shows the Intellect user interface with a blue header bar. The header includes the Intellect logo, a navigation menu, and a welcome message for AKRITI Sharma AGARWAL dated 07-07-2022. A 'Switch' tab is active. The main content area displays three rows of order details, each with a 'Pending' status indicator in an orange box. The first row shows a 'Systematic Withdrawal Plan' for SBI Savings Fund - Regular Plan - IDCW with a SWP Amount of 66,666.00. The second and third rows show 'Switch' transactions for the same fund, with Switch-Out Amounts of 2,000.00 and 9,000.00 respectively. A red box highlights the 'Pending' status of the second row.

Scheme Name	Transaction Type	SWP Amount	Status
SBI Savings Fund - Regular Plan - IDCW	Systematic Withdrawal Plan	66,666.00	Pending
SBI Savings Fund - Regular Plan - IDCW	Switch	2,000.00	Pending
SBI Savings Fund - Regular Plan - IDCW	Switch	9,000.00	Pending

Screen: Order Status Changes to Pending (Collapsed view)

The screenshot shows the Intellect user interface with the same header as the previous view. The main content area displays the expanded details for the second order (Switch transaction for SBI Savings Fund - Regular Plan - IDCW with a Switch-Out Amount of 2,000.00). The status is 'Pending'. Below the transaction details, there are sections for 'Nominee Details' and 'Holding Details', both with dropdown arrows. At the bottom, there is a 'Switch In Scheme Details' section.

7. Systematic Investment Plan- SIP

- The process will consist of below steps:
 - SIP Instruction from the Transact Journey
 - Placing the SIP Orders (Installments) – SIP Installment Orders will be placed by the Product Processor after receiving the SIP Setup from Wealth System
 - Cancellation of SIP Instruction
- There will be two terms that will be used in this section SIP Instruction and SIP Order (Installment)
 - SIP Instruction - Refers to the SIP setup
 - SIP Order - Refers to the installments paid for the SIP setup

7.1. Login

Login details have been explained in the Purchase section (Refer to 4.1 Login section in the Part 1 document)

7.2. Product Selection

Product Selection Navigation, Product Search, Filters have been explained in the Purchase section (Refer to 4.2 Product Selection section in this document)

- Product Selection screen will have two sections for the customer which will be in collapsed mode
 - Existing Holdings** - The existing holdings section will display all the existing mutual fund holdings of the customer for each folio. If Customer has invested in the same fund using multiple folios then the same security card will be displayed multiple times with the folio number as displayed below. Cards will be displayed with Security and Folio Combination

Existing Holdings (Please tick to transact)

☒ Mirae Asset Emerging Bluechip Fund - IDCW			
INR IDCW Enable Moderate Return : 0.00%(1M), 0.00%(3M), 0.00%(6M) 0.00%(1Y), 0.00%(3Y), 0.00%(5Y)	Last NAV 10.000000	Current Holding Units(*) 100.0000	Market Value 1,000.00
Invest A/C Number - Customer Name - Signing Folio Number Condition 223423 BRI69095894F0177 - KASNO - Principle to Sign			

Screen: Existing Holdings

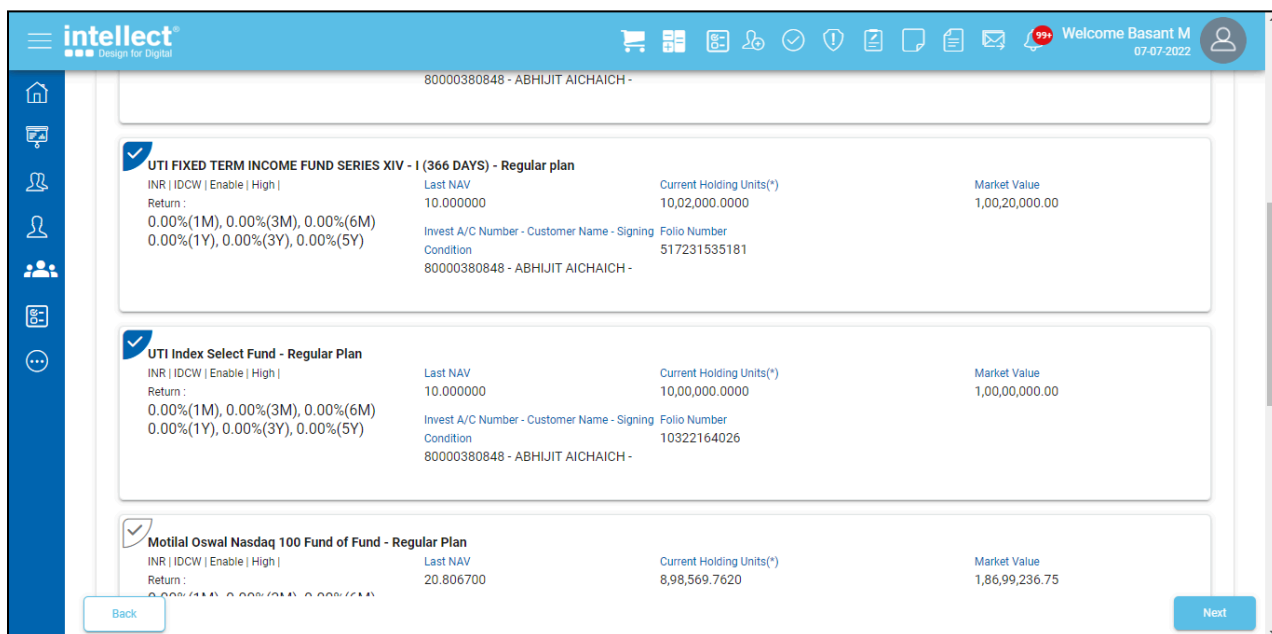

- b) **Other Funds** - The funds which are displayed here are the approved funds for transaction by the organization. The approved fund list will be uploaded separately by the operations user. User will get the option to select a new folio or existing AMC folio when the fund is selected from this section. (Refer Annexure for Scheme Master file upload)

Other Funds (Please tick to transact)

☒ SBI Magnum Equity ESG Fund Regular Growth			
INR IDCW Enable High Return : -21.90%(1M), -28.00%(3M), -22.10%(6M) -22.20%(1Y), -41.30%(3Y), -46.90%(5Y)	Last NAV 20.654200	Current Holding Units(*) 0.0000	Market Value (Branch CCY-INR) 0.00

Screen: Other Funds

2. User selects the desired securities from Existing Holdings or Other Funds and clicks on the Next button to proceed to the Product Selection Summary screen. SIP transactions can be carried out from either existing holdings or other funds section

Fund Name	INR IDCW Enable High	Last NAV	Current Holding Units(*)	Market Value
☒ UTI FIXED TERM INCOME FUND SERIES XIV - I (366 DAYS) - Regular plan	Return : 0.00%(1M), 0.00%(3M), 0.00%(6M) 0.00%(1Y), 0.00%(3Y), 0.00%(5Y)	10.000000	10,02,000.0000	1,00,20,000.00

Screen: Select SIP transaction

3. User will be able to see the validations while placing the SIP transaction on min SIP amount/quantity as maintained for selected security. (Refer Validations section)
4. If the customer does not have a risk profile or the risk profile has expired, the system prompts the user to select “Yes” or “No” option. If the user selects “Yes”, the system returns to the product selection screen and allows only redemption transactions. If the user selects “No”, the system returns to the product selection screen summary and the user needs to perform risk profiling for the customer to proceed further.

Screen: Notification to User when Customer does not have Risk Profile or Risk Profile has Expired

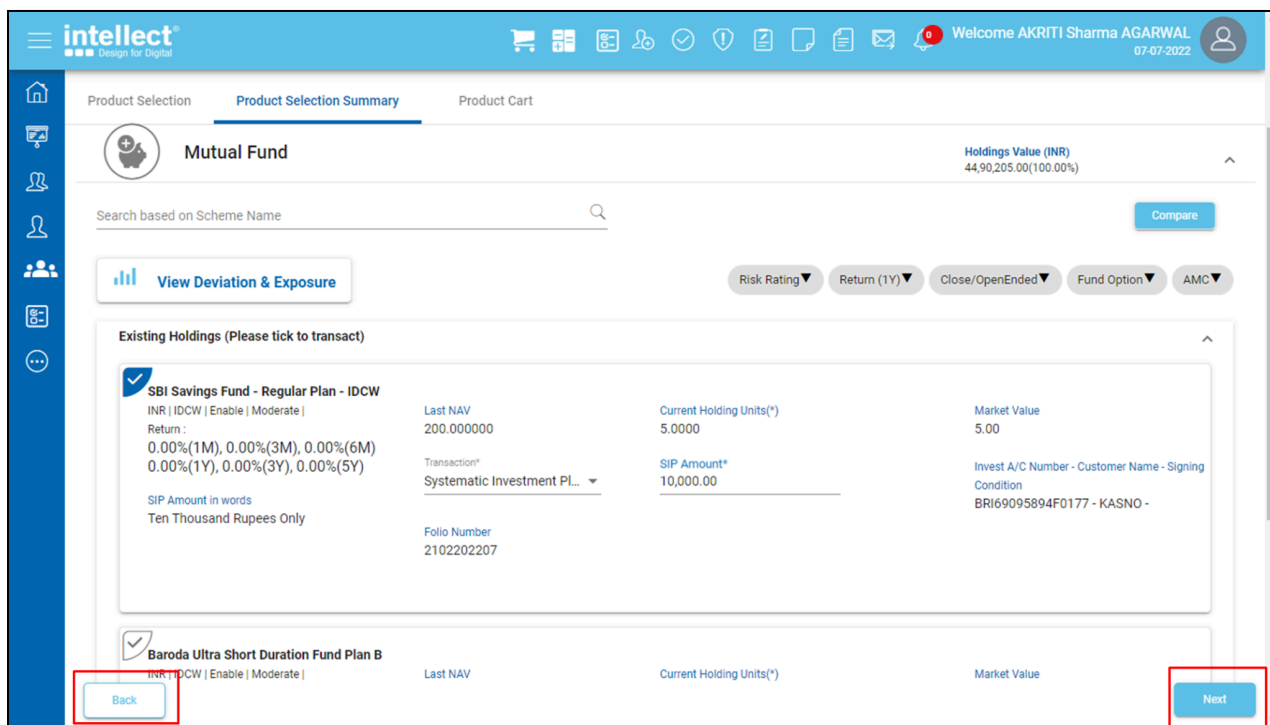

5. If the Product Risk profile is equal to or less than the Customer Risk profile then no warning message will be displayed and User can complete the order journey (applicable for Purchase, SIP, STP and Switch transaction type)
6. If the Product Risk Profile is only 1 level up from the Customer Risk Profile then the system will give a warning display to the User prompting him to confirm the same. All securities where there is a mismatch would be shown in the pop-up message. (Applicable for Purchase, Switch, SIP and STP transaction types)

Screen: High Risk Alert Notification

7. If the Product Risk Profile is 2 levels higher than the Customer Risk Profile (**PRR=CRR+2**), then the system will give a warning to the User prompting him to confirm the same. All the securities where there is a mismatch would be shown in the pop-up message. (Applicable for Purchase, SIP, STP and Switch transaction type).
8. In the above scenario when the User submits the order for authorization then the Order will go first to Circle head/ Zonal head for approval and after they have approved the order will go for further authorization to the Supervisor

9. If Product Risk Profile is greater than Customer Risk Profile +2, (**PRR>CRR+2**) For Example- customer risk profile is Very Conservative then he cannot buy a product whose risk profile is Aggressive and Very aggressive. System will display a hard stop and will not allow transactions in this security
10. In the Product Selection Summary screen, the User can review the securities selected. If the User wishes to add any securities, they can click on the “Back” button to navigate back to the “Product Selection” screen
11. User clicks on the “Next” button to navigate to the “Product Cart” screen

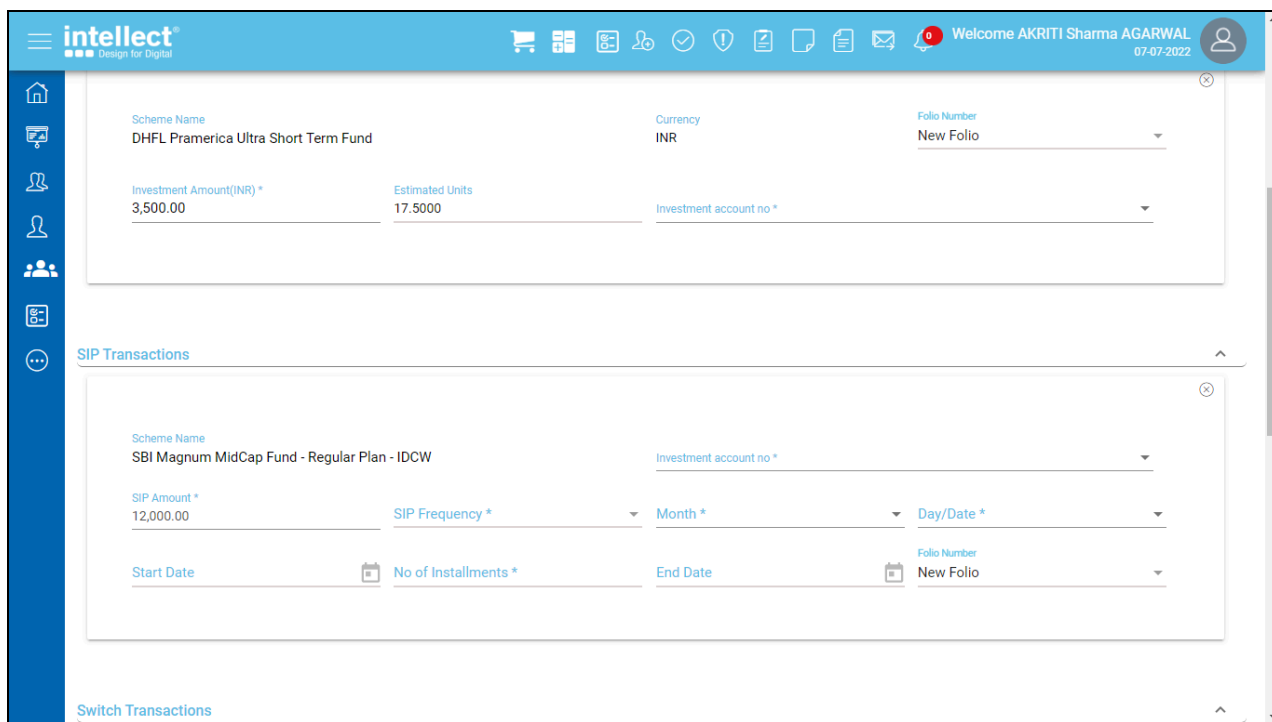

The screenshot displays the 'Product Selection Summary' screen. At the top, there's a navigation bar with 'Product Selection', 'Product Selection Summary' (active), and 'Product Cart'. Below the navigation bar, the 'Mutual Fund' section is visible. It includes a search bar labeled 'Search based on Scheme Name' and a 'Compare' button. A 'View Deviation & Exposure' button is also present. The 'Existing Holdings (Please tick to transact)' section lists two funds: 'SBI Savings Fund - Regular Plan - IDCW' and 'Baroda Ultra Short Duration Fund Plan B'. Each fund entry shows details like 'Last NAV', 'Current Holding Units(*)', and 'Market Value'. At the bottom of the screen, there are 'Back' and 'Next' buttons, both of which are highlighted with red rectangular boxes.

Screen: Summary of Securities Selected by the User

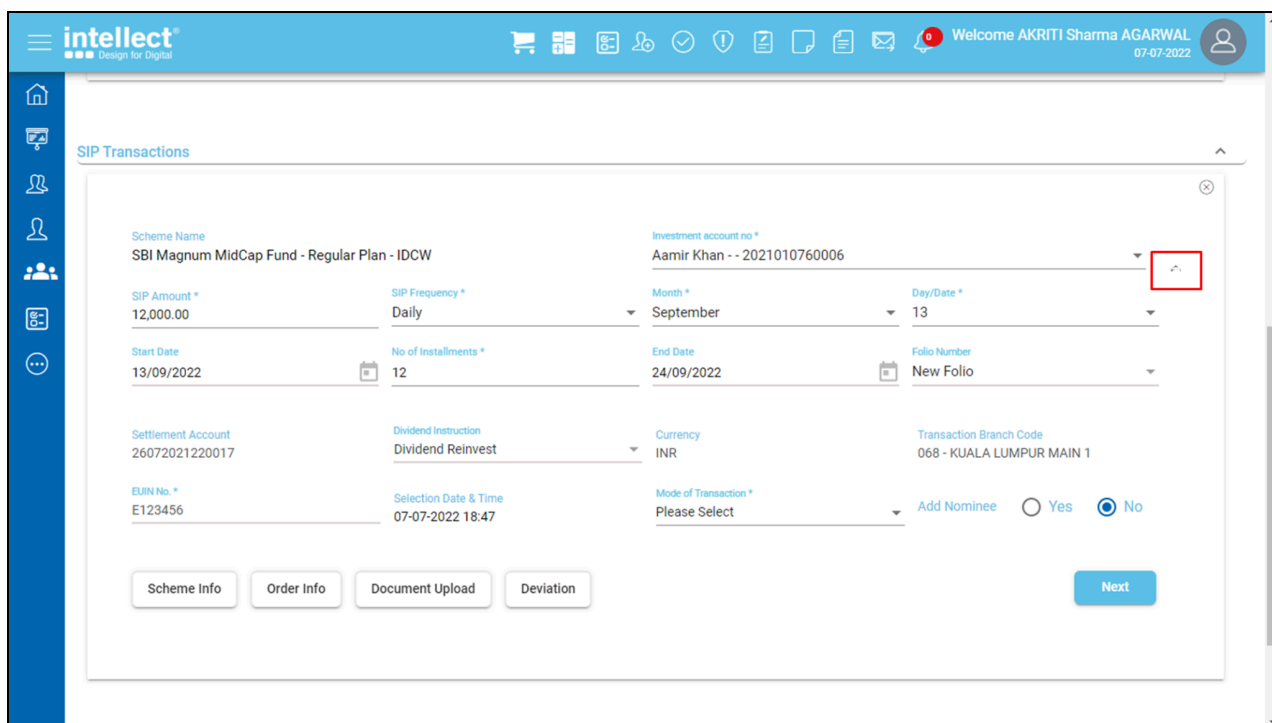

7.4. Product Cart

1. User will land on the Product cart screen after clicking the “Next” button in the previous screen. All the orders in the order cart by default will be in collapsed mode. Orders are grouped by the Transaction Type. All the SIP Orders can be viewed under “SIP Transactions”

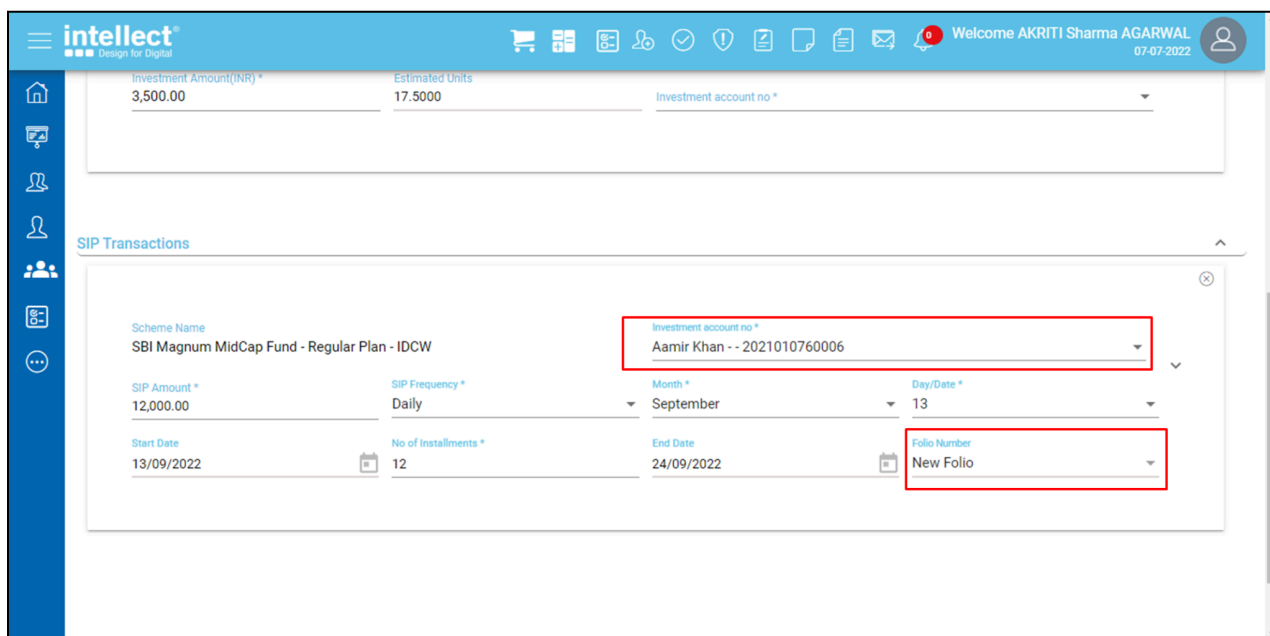

Screen: SIP Order Product cart

- User clicks on the Dropdown on the order card and it will be expanded. The below fields will appear on expanding the view

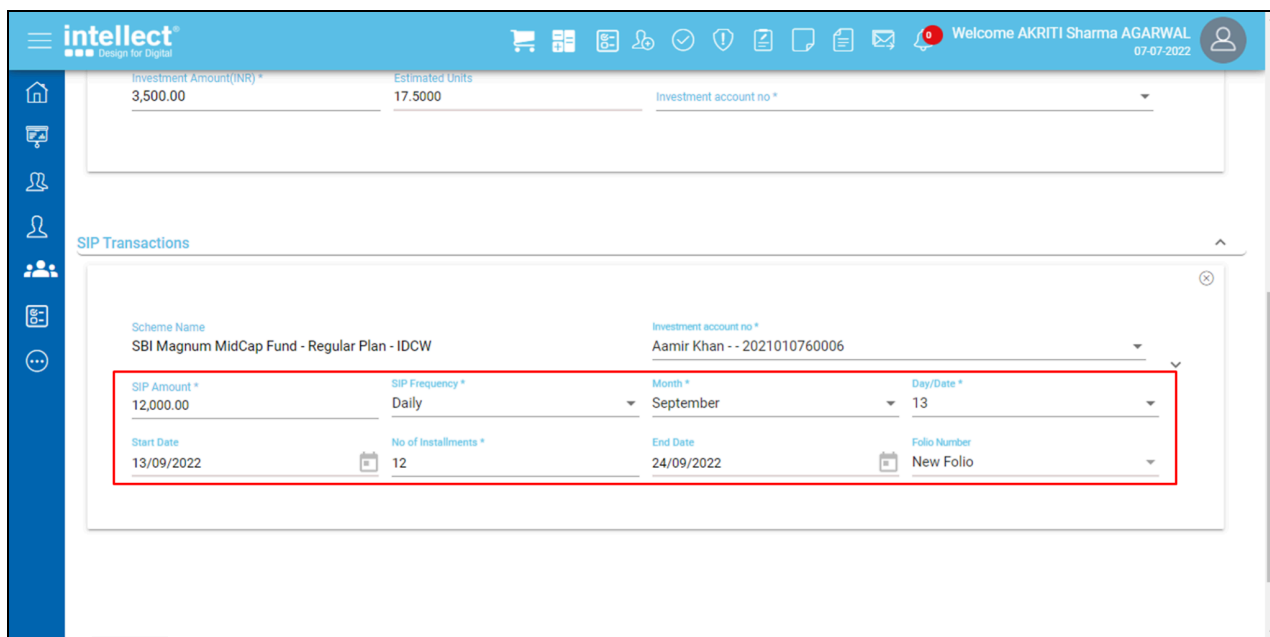

Screen: SIP transaction product card (Expanded View)

3. User selects the desired investment account from the dropdown and can view the Folio Number. If the fund is selected from “Existing Holdings” section, Folio Number would be pre populated by the system and if the fund is selected from the “Other Funds” section, New Folio would be displayed. All the active accounts except closed would be available for selection

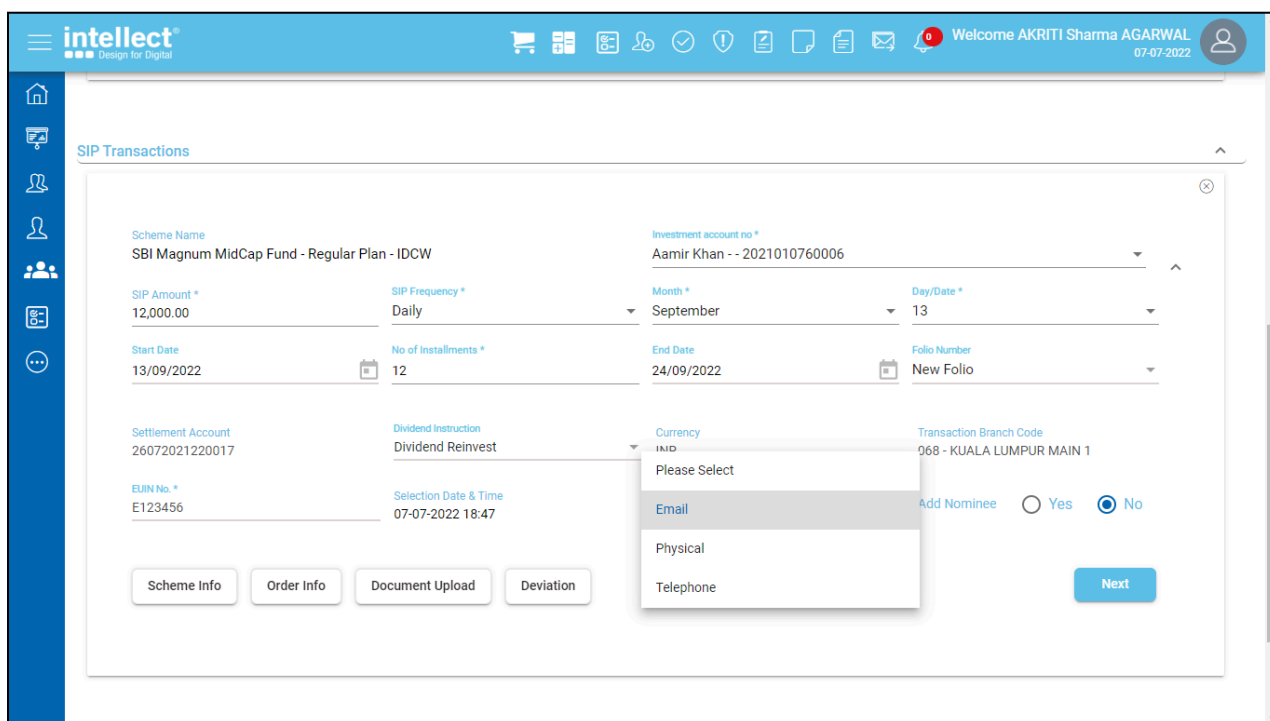

Screen: Mutual Fund - Order details

4. User will then select the below details
 - a. SIP Amount- This is will displayed as the amount which was entered in Product selection summary screen but this can be modified by the User
 - b. SIP Frequency- User will select the frequency of the SIP i.e. Annual, Monthly, Daily etc.
 - c. Month- User will select the start month of the SIP
 - d. Day/Date- User will select the start date of the SIP
 - e. Start Date- Start Date will be calculated based on the Month and Date selected above
 - f. No. of Installments- User will input the no. of Installments of the SIP
 - g. End Date- End Date will be calculated based on the No of Installments and Start date of the SIP

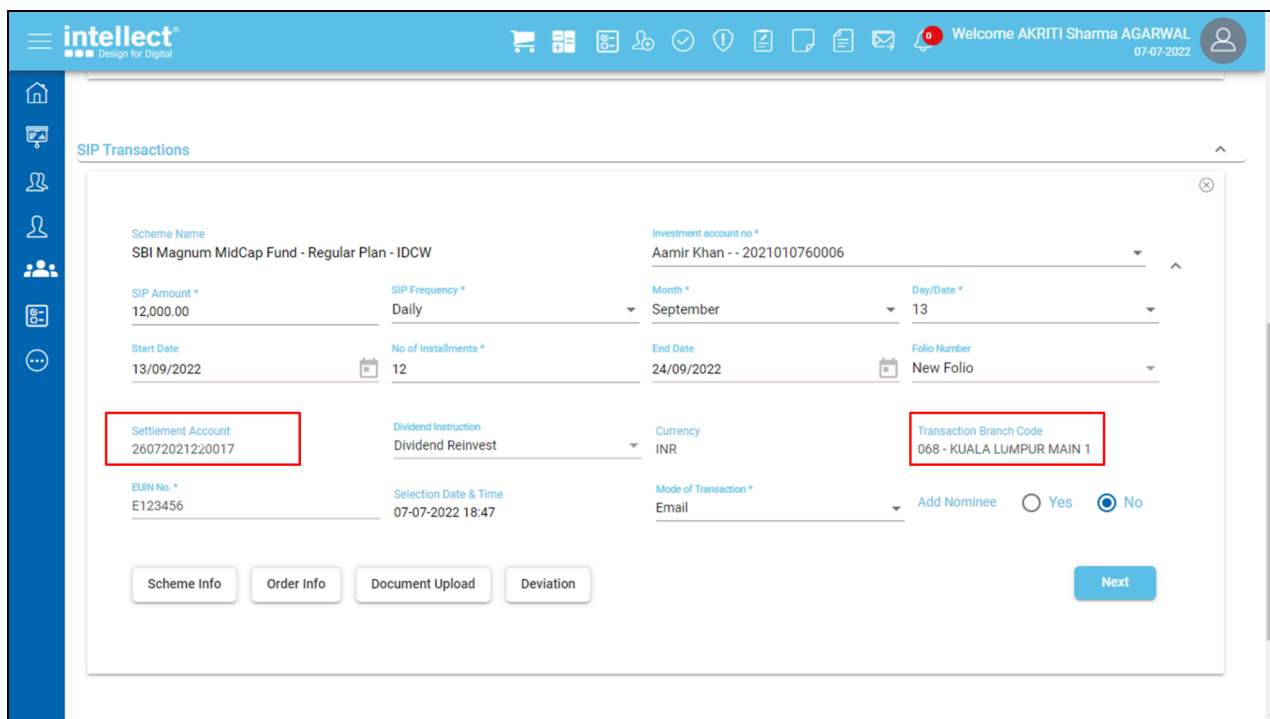

Screen: Mutual Fund - Input SIP Details

5. User selects the mode of Transaction i.e. Physical, Email or Telephone

Screen: Mutual Fund - Mode of Transaction

6. The settlement (debit) account will be auto populated based on the settlement account linked to the investment account selected for the transaction. The transaction Branch code will be displayed as per the settlement account selected

Screen: SIP Installment Details - SIP end date filter

7.6.1. View SIP Schedule

1. User can view the past SIP Orders (Installments) and the immediate next SIP Order for the SIP Instruction by clicking on the SIP Scheduler along with the status
2. The latest SIP Order (Installment) will be displayed on the top along with the status as mentioned in the below screenshot

SIP Scheduler

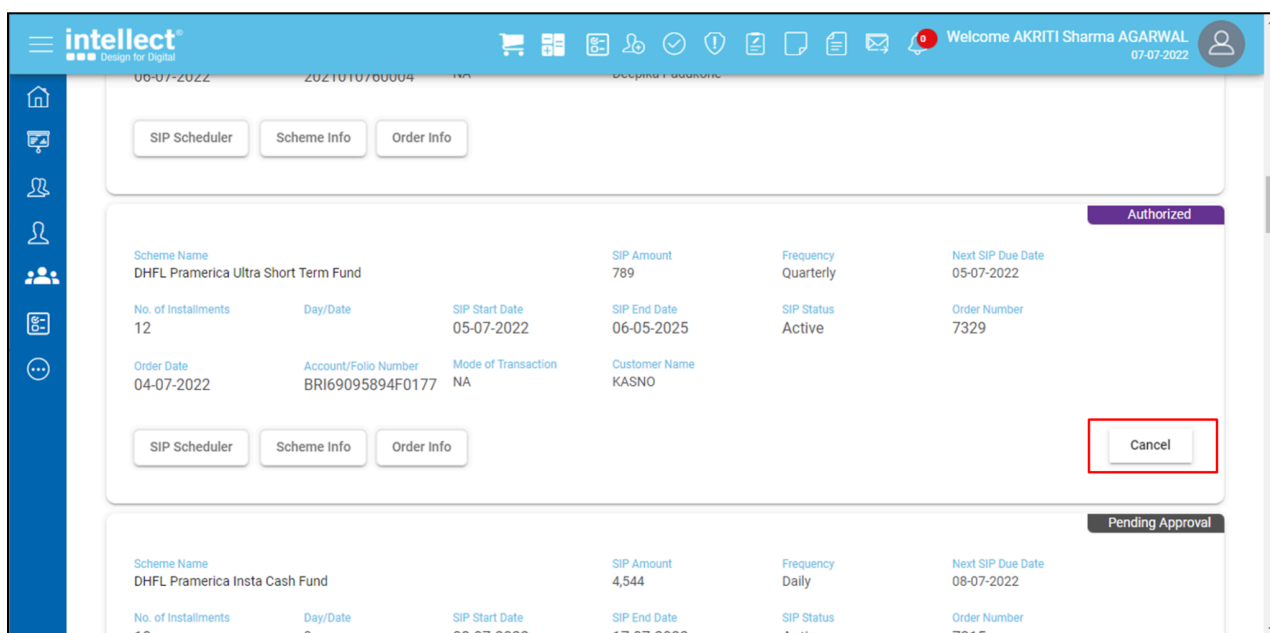

Order Number	SIP Date	SIP Amount	Status
7449_SIP	13-09-2022	12000	Upcoming

Screen: STP Installment Details - STP end date filter

- SIP Orders which are placed successfully by the system will have the status as "Completed"
- Failed SIP Orders because of insufficient funds will be displayed with the status as "Failed"
- The immediate next SIP Due Date will also be displayed in the SIP Schedule

7.6.2. Cancel SIP Instruction

- The SIP Instruction details can be canceled by clicking on the "Cancel" button available on the card

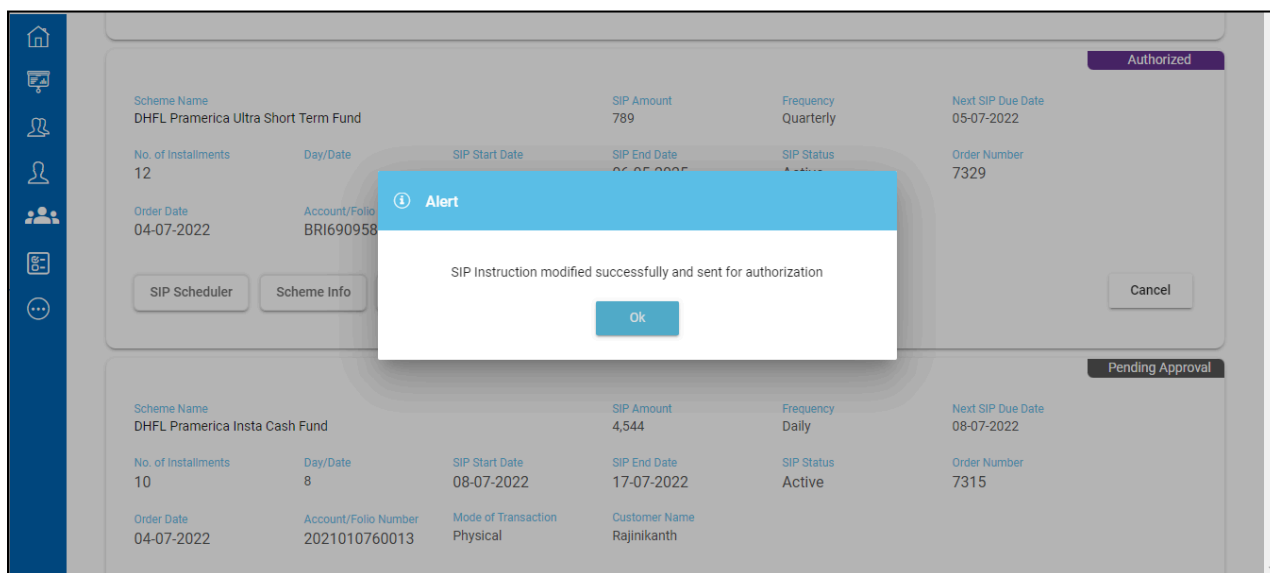

SIP Scheduler

Order Number	SIP Date	SIP Amount	Status
7329	06-05-2025	789	Active

Cancel

Screen: SIP Installment Details - Cancel SIP

- Once the User clicks on the cancel button below the message will be displayed. The cancellation will be sent for Authorization to the supervisor
- Once the SIP is cancelled, this is sent to supervisor authorization (Refer to Section 10 Supervisor Approval in this document)

The screenshot displays the 'SIP Installment Details' screen. A modal alert box is centered, stating 'Alert: SIP Instruction modified successfully and sent for authorization' with an 'Ok' button. The background is dimmed, showing two SIP entries. The top entry is 'DHFL Pramerica Ultra Short Term Fund' with a status of 'Authorized'. The bottom entry is 'DHFL Pramerica Insta Cash Fund' with a status of 'Pending Approval'. A sidebar on the left contains navigation icons.

10. Supervisor Approval

- After an order is placed, the supervisor needs to approve the same. Order will be routed to the Product Processor after the authorization
- If the Product Risk Profile is 2 levels higher than the Customer Risk Profile (**PRR=CRR+2**). The Order will go first to Circle head/ Zonal head for approval and after they have approved the order will go for further authorization to the Supervisor. This is applicable for Purchase, Switch, SIP and STP transactions
- To authorize an order, supervisor needs to log in to the application and click on the supervisor approval icon  in the top panel
- The supervisor then selects "Order Authorization" from the drop down in the Supervisor Approval screen

Screen: Supervisor selects Order Authorization from the dropdown

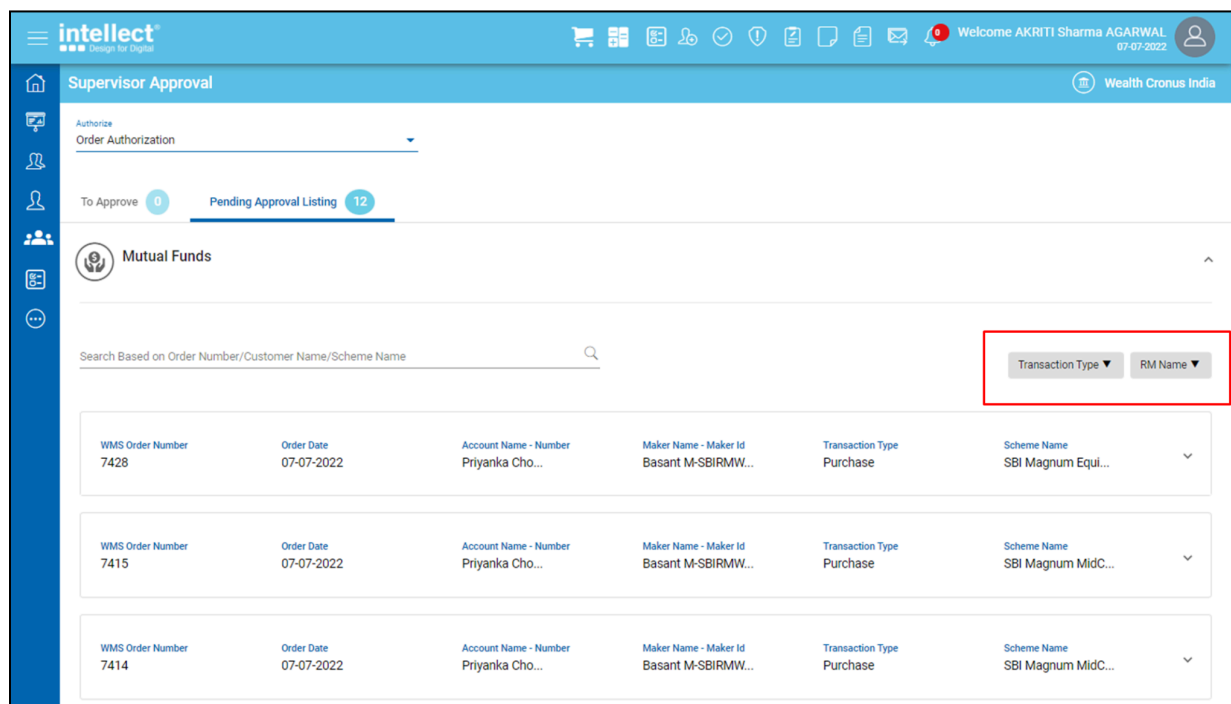

5. Once selected, the list of orders currently pending for approval is displayed
6. Supervisor can search for a specific card by entering the Order Number/Scheme Name/Customer Name

Screen: List of orders currently pending for approval

7. To further filter the list, supervisor has access to the following filter criteria:
 - a. Transaction Type – Allows the supervisor to filter based on the Transaction Type

- b. User Name – Allows the supervisor to filter as per the User's

Screen: Order Card at approval queue – Security info

The screenshot shows the Intellect web interface. At the top, there's a blue header with the Intellect logo and a navigation bar. The main content area displays transaction details for a customer named Priyanka Chopra. The details are organized into sections: Customer Names-Signing, Settlement Account, User Remarks, Nominee Details, and Holding Details. Below these sections, there are buttons for 'Scheme Info', 'Order Info', 'Release', 'Reject', and 'Authorize'. The 'Order Info' button is highlighted, and a modal window is open showing the 'Order Info' details, including Request Date, Settlement Date, Transaction Number, and Transaction Status.

Screen: Order Authorization

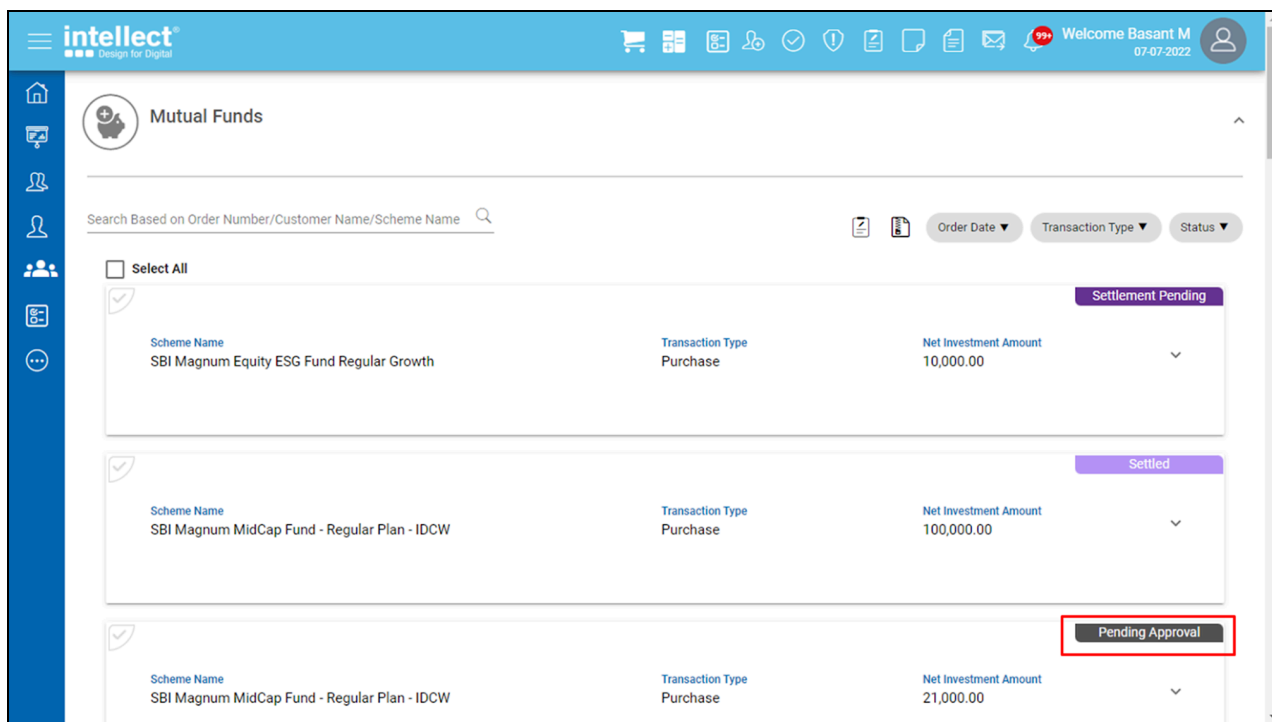

11. Order Book

All the Orders initiated from the wealth system can be viewed from the Order Book by the User for the customers mapped to them. The status of the order is displayed against each order

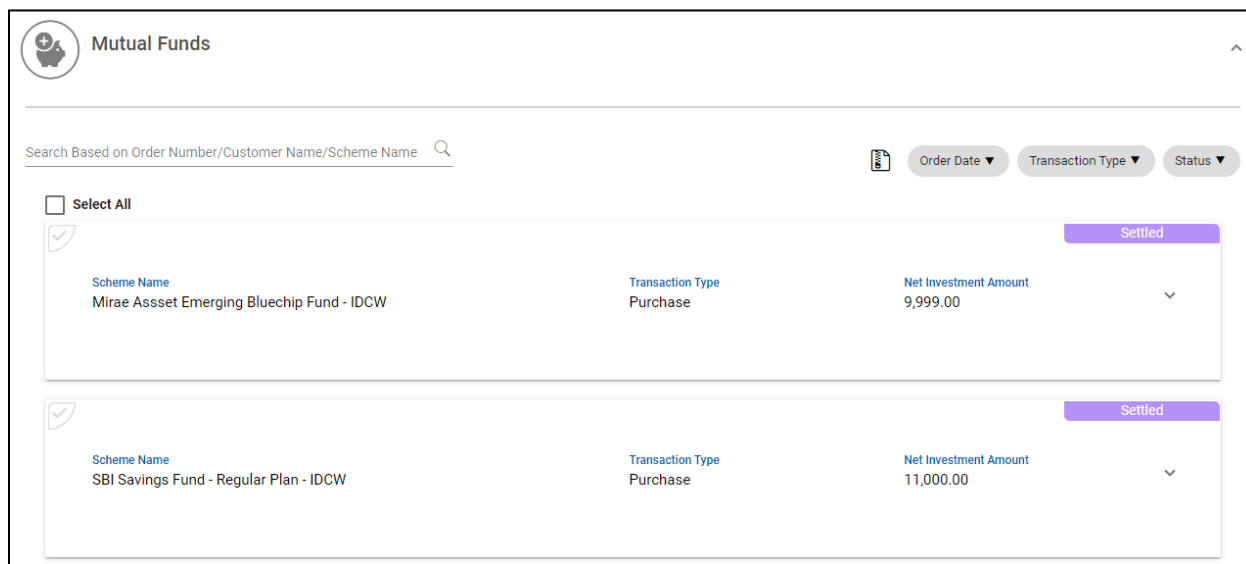

Screen: Order Book Navigation

1. The various stages of the Order Life Cycle along with the status for each is illustrated below
 - a. **Pending** - Orders that are not submitted and pending in the product cart for submission for Approval
 - b. **Pending Approval** - Orders that are pending for approval by the Approver
 - c. **Rejected** - Orders that have been rejected by the Approver
 - d. **In Progress** - Orders which are approved by the approver and routed to the Product Processor but cash debit confirmation is pending
 - e. **Settlement Pending** - Orders which are routed successfully by the Product Processor to RTA and are yet to be executed by RTA
 - f. **Executed**- Orders that are executed (received in the RTA Transaction File) by RTA. Example Switch out leg is settled and Switch in leg is pending for settlement
 - g. **Settled**- Executed orders that are settled as per settlement date
 - h. **Settlement Reversal** - Orders that are sent back by RTA as Reversal in the transaction file
 - i. **Failed** - Orders that are in "In progress" status are converted as Failed when the debit of cash is not successful

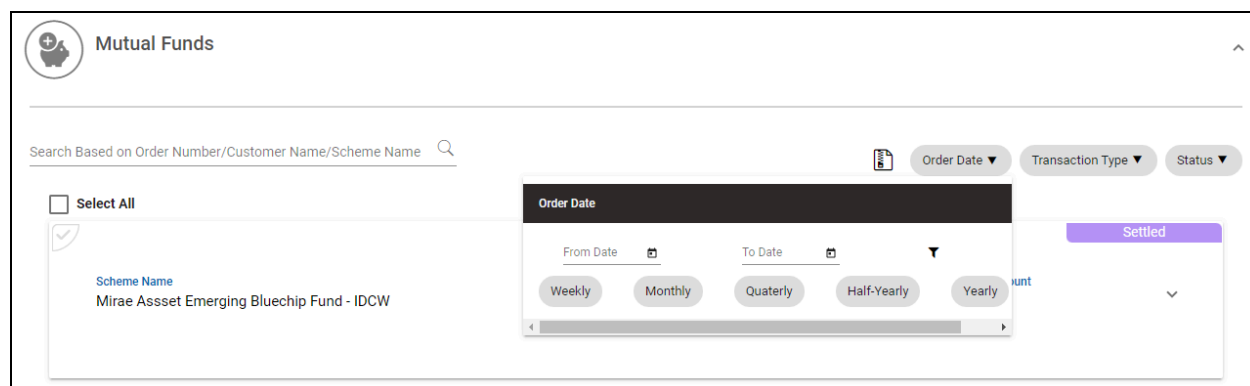

Screen: Order Book- Status

2. User can view various filters to filter and search the orders in the order book
 - a. Search – User can search based on Order Number, Customer Name, Scheme Name

Screen: Order Book- Search

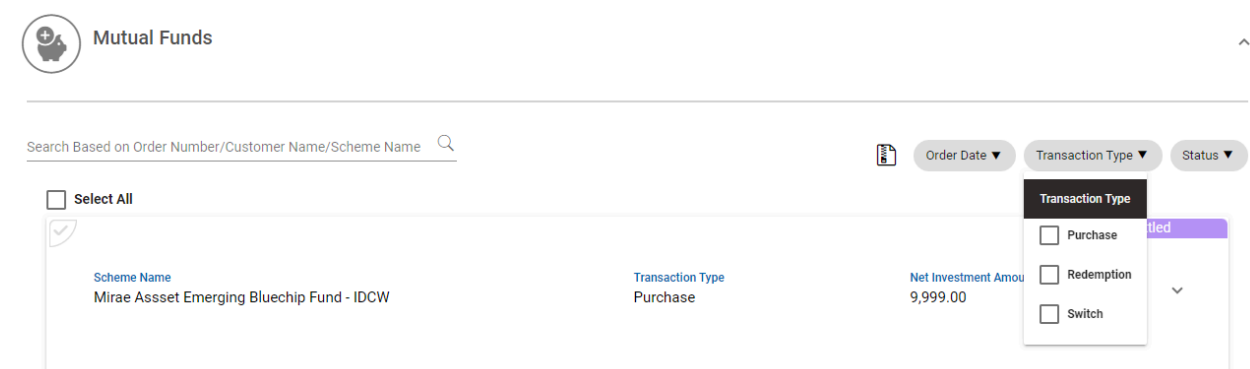

- b. Order Date - User can select a date range to view the orders as per the selected date range. User can select date ranges as Weekly, Monthly, and Yearly etc.

The screenshot shows the 'Mutual Funds' interface. At the top, there's a search bar labeled 'Search Based on Order Number/Customer Name/Scheme Name'. Below it, a table lists mutual funds. The first row is 'Mirae Asset Emerging Bluechip Fund - IDCW'. To the right of the table, there are three filter buttons: 'Order Date', 'Transaction Type', and 'Status'. The 'Order Date' filter is open, showing a date range selector with 'From Date' and 'To Date' fields, and a list of frequency options: 'Weekly', 'Monthly', 'Quarterly', 'Half-Yearly', and 'Yearly'. The 'Transaction Type' filter is also open, showing a list of options: 'Purchase', 'Redemption', and 'Switch'. The 'Status' filter is open, showing a list of options: 'Pending', 'Pending Approval', 'Settlement Pending', 'Expired', 'Rejected', 'Executed', 'Settled', 'Settlement Reversal', 'In Progress', and 'Failed'.

Screen: Order Date Filter

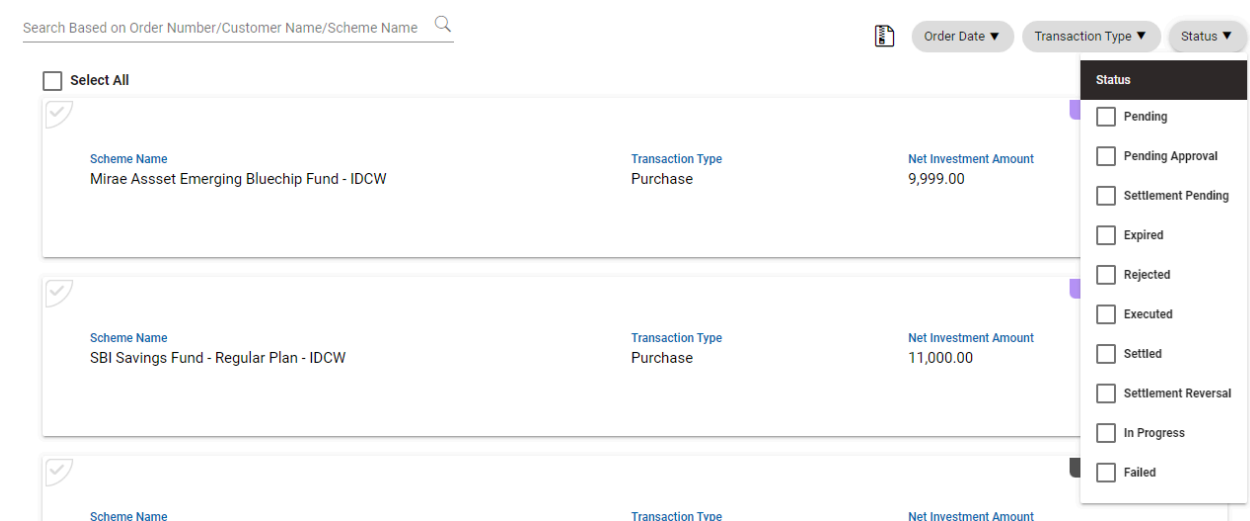

- c. Transaction type- User can filter the order as per the transaction types like Purchase, Redemption, and Switch etc.

This screenshot is similar to the previous one, but the 'Transaction Type' filter is open. It shows a list of options: 'Purchase', 'Redemption', and 'Switch'. The 'Status' filter is also open, showing a list of options: 'Pending', 'Pending Approval', 'Settlement Pending', 'Expired', 'Rejected', 'Executed', 'Settled', 'Settlement Reversal', 'In Progress', and 'Failed'.

Screen: Order Transaction Type Filter

- d. Status - User can filter the order as per the Order Status like Pending, Pending Approval, Rejected, Settlement Pending, Executed, Settled, Failed, and Rejected etc.

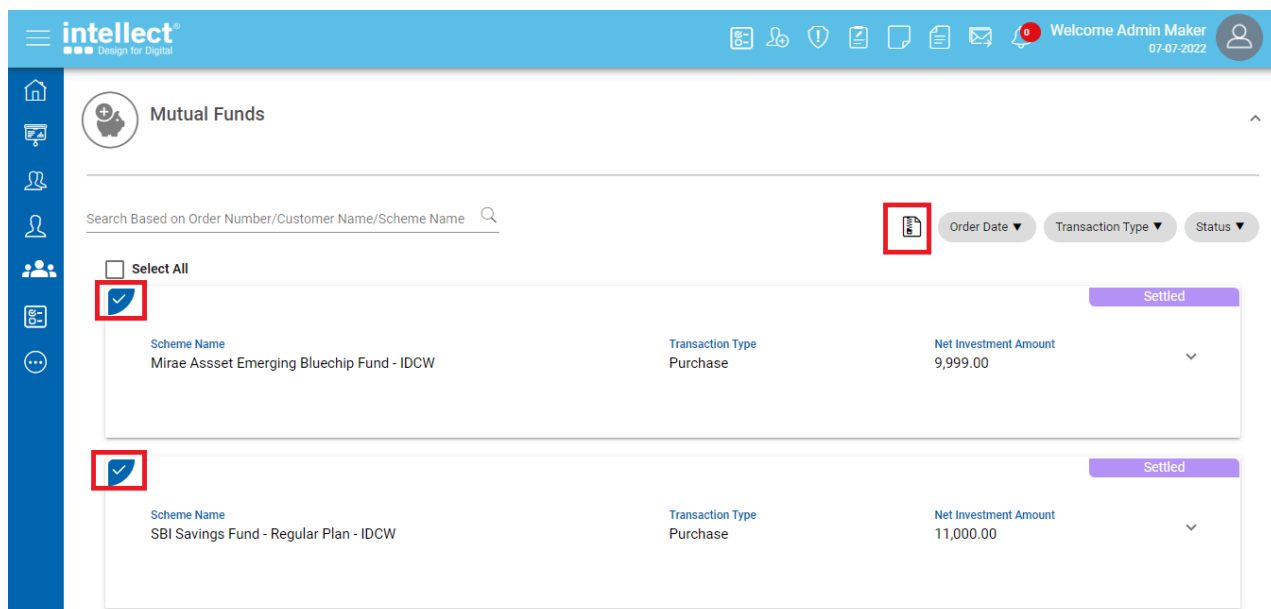

This screenshot shows the 'Mutual Funds' interface with the 'Status' filter open. It displays a list of mutual funds, including 'Mirae Asset Emerging Bluechip Fund - IDCW' and 'SBI Savings Fund - Regular Plan - IDCW'. The 'Status' filter is open, showing a list of options: 'Pending', 'Pending Approval', 'Settlement Pending', 'Expired', 'Rejected', 'Executed', 'Settled', 'Settlement Reversal', 'In Progress', and 'Failed'.

Screen: Order Status Filter

3. User can download the transaction slips uploaded for the orders. User can select the orders for which

transaction slips needs to be downloaded and click on the “” icon to download transaction slips in a zip file

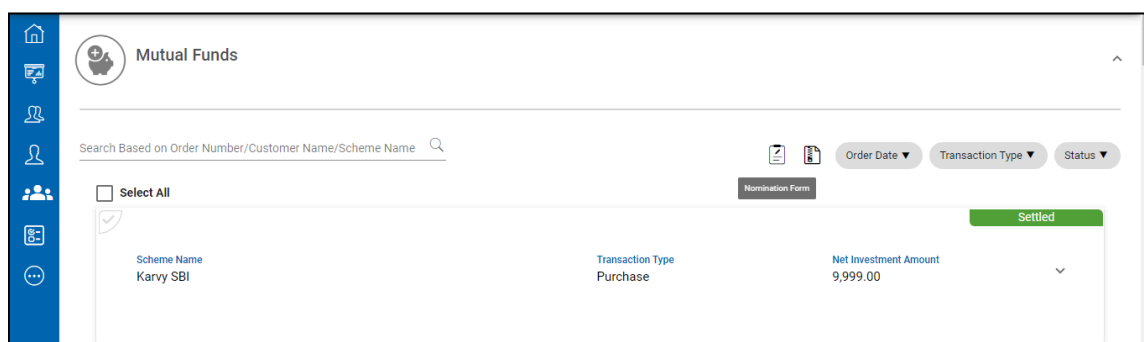

Screen: Order Book – Transaction Slips Download

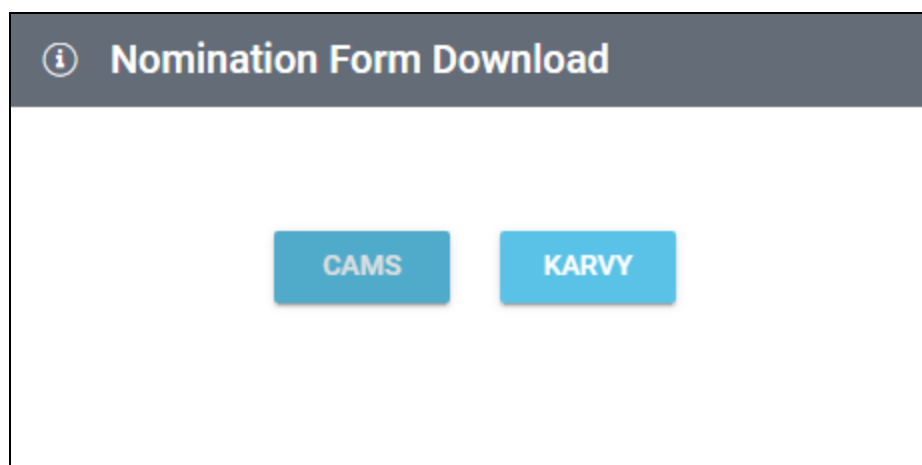

4. User can download the Nomination forms uploaded for the orders. User can select the orders for which nomination forms needs to be downloaded and click on the “” icon to download nomination forms in a zip file for the respective RTA

System will show the new Pop up Box where user has to select any one RTA for which Nomination forms needs to be downloaded(CAMS/KARVY)

- a. On selecting the CAMS, System will download the nominee form and data file for all the new folios as per CAMS Nomenclature
- b. On selecting the KARVY, System will download the nominee form for all the new folios as per KARVY Nomenclature

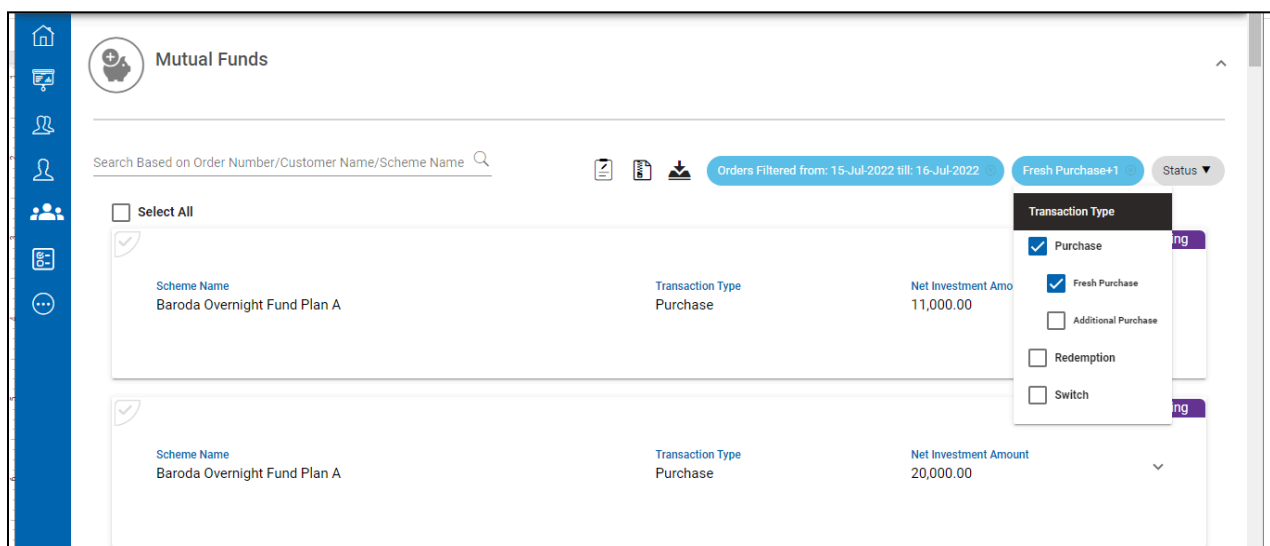

Screen: Nomination Form Download

Screen: Nomination Form Download – Select RTA

- Order Book Report can be downloaded by the user for the orders initiated during a particular time period. User selects the Order Date Filter and inputs the time period for which they want to download the report and additionally can apply other filters and clicks on the “” icon to download the orders in a report

12. Validations

The validations are categorized into 4 parts as described below

12.1. General Validation

- System would validate if all the mandatory fields, marked with * are filled or not
- System would validate if KYC status in Customer Profile Details is other than “KYC REGISTERED” or “UNDER PROCESS” there would be a hard stop
- System would validate if the tax status is NRE/NRO/Overseas/Foreign investor then there would be a hard stop for transactions

4. System would check the length of User input fields to validate if it is within the maximum allowed length

12.2. Product Selection

1. System validates if NAV is maintained for the fund selected
2. Displaying allowed transaction types as per Scheme master upload

12.3. Product Selection Summary

1. System generates a notification if product risk is greater than customer risk
2. If Risk Profile is Expired – Purchase/Switch/SIP Not Allowed
3. If the investor selected does not have a risk profile – Purchase/Switch/SIP Not Allowed
4. After user enters the transaction units, system validates if it is greater than the minimum redemption units
5. After user enters the transaction units, system validates if it is less than the current holdings unit
6. After selection of the investment account, system validates if the redemption unit is less than the Available Holdings (Unit) for the selected investment account
7. On selection of the investment account, system validates if all the holders for the investment account has a date of birth and PAN
8. The Day/Date field will display only those Day/Dates as defined in the Security Maintenance SIP Section for user to select in order card
9. The Month field will display only those months as defined in the Security Maintenance SIP Section for user to select in order card
10. No. of Installments should be greater than or equal to SIP/STP/SWP Min. No of Installments (defined in Security Maintenance SIP/STP/SWP Section)
11. No. of Installments should be less than or equal to SIP/STP/SWP Max. No of Installments (defined in Security Maintenance SIP/STP/SWP Section)
12. The Day/Date field will display only those Day/Dates as defined in the Switch-Out AND Switch-In Security Maintenance in STP section
13. The Month field will display only those Months as defined in the Switch-Out AND Switch-In Security Maintenance in STP section
14. SIP/STP/SWP Amount should be greater than or equal to SIP/STP/SWP Min. Transaction Amount (defined in Security Maintenance)
15. SIP/STP/SWP Amount should be less than or equal to SIP/STP/SWP Max. Transaction Amount (defined in Security Maintenance)
16. Switch-In Fund Dropdown will display those funds for which Switch In is Allowed and Switch Allowed Outside Fund Family flag is No in Security Maintenance just like Switch Transaction
17. Transaction Type will display “STP” if Yes in Scheme master upload, STP Allowed and Switch-Out Allowed is Yes else STP will not be displayed in the dropdown

12.4. Product Cart

1. System will validate the EUIN i.e. it should start with E and of total 7 characters.
2. Nominee Pan and Guardian Pan has the validation of first 5 character and Last characters as Alphabetical and next 4 characters as Numeric
3. After user enters the Investment Amount/units, system verifies if the investment amount is between the minimum investment amount and maximum investment amount and units is between minimum holdings unit and maximum holdings unit
4. After selection of the investment account, system validates if the number of units for the security after redemption is between minimum holdings unit and maximum holdings unit
5. After user enters the Investment Amount, system to validate if the investment amount entered is less than or equal to maximum amount allowed for Purchase
6. System validates that all nominee's percentage must be 100 only while placing the order

13. Actor/Entitlements

1. Relationship Manager
2. Supervisor
3. Branch Users
4. Operations User

14. Annexure

14.1. Backtesting, Performance Projection and Max drawdown

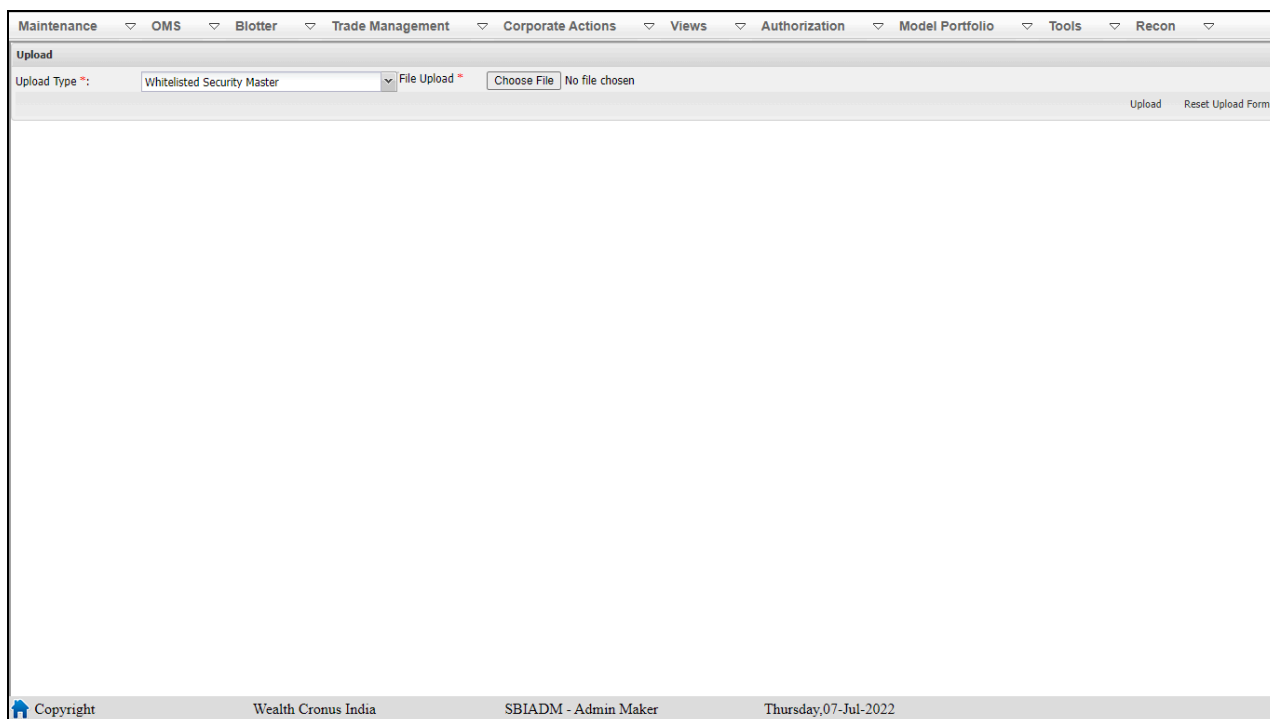

1. Attached are the sample calculations

Max Drawdown,
Performance Projecti

14.1. Scheme Master Upload

1. User will login to Intellect_PMX>> File Upload >> Whitelisted Security Master

Screen: White Listed Security Master Upload

2. Below fields are the columns which an operations user will need to input to display the security in “Other Funds” section and the respective transaction types for those funds. Funds will be displayed only if at least one of the transaction types Purchase or SIP is applicable
 - a. SCM_SCHEME_CD – This is the matching criteria as once Securities are uploaded from Crisil master, The 7 columns will be updated basis the Scheme Code only
 - b. SCM_SCHEME_NAME – This is for reference only. The Scheme name should be displayed as present in CRISIL file
 - c. SCM_PUR_AVAILABLE- In Security Maintenance “Open for” field will be opted as subscription if the column value is yes in the file
 - d. SCM_RED_AVAILABLE- In Security Maintenance “Open for” field will be opted as redemption if the column value is yes in the file
 - e. SCM_SIP_AVAILABLE- In Security Maintenance SIP allowed will be yes if the column value is yes in the file. The rest of the fields of SIP if yes will be fetched from CRISIL master
 - f. SCM_SWITCH_IN_AVAILABLE- In Security Maintenance “Switch IN Allowed” if the column value is yes in the file
 - g. SCM_SWITCH_OUT_AVAILABLE- In Security Maintenance “Switch OUT Allowed” will be yes if the column value is yes in the file
 - h. SCM_STP_AVAILABLE- In Security Maintenance “STP Allowed” will be yes if the column value is yes in the file. The rest of the fields of STP if yes will be fetched from CRISIL master. The rest of the fields of SIP if yes will be fetched from CRISIL master

- i. SCM_SWP_AVAILABLE – In Security Maintenance “SWP Allowed” will be yes if the column value is yes in the file. The rest of the fields of SWP if yes will be fetched from CRISIL master. The rest of the fields of SIP if yes will be fetched from CRISIL master
- j. Product Rating - In security maintenance “Risk rating” will be updated as per the uploaded file.

whiteList_Upload_02
20202101.xls

14.2. Cut off Timing

Principles

- a) Orders which are approved before the cutoff time, Order Date will be same as Authorization Date
- b) Orders which are approved after the cutoff time, Order Date will be Authorization Date + 1

The below table illustrates the examples to understand the above principles

- a) Request Date & Time refers to when the order was submitted for approval
- b) Authorization Date & Time refers to when the order was approved
- c) Order Date refers to the date that will be considered by RTA for determining NAV
- d) Assuming the Cutoff time is 2.30 PM

Request Date & Time	Authorization Date & Time	Order Date
01-Jan-2022 11.30 AM	01-Jan-2022 1.30 PM	01-Jan-2022
01-Jan-2022 11.30 AM	01-Jan-2022 4.30 PM	02-Jan-2022
01-Jan-2022 11.30 AM	02-Jan-2022 1.30 PM	02-Jan-2022
01-Jan-2022 11.30 AM	02-Jan-2022 4.30 PM	03-Jan-2022
01-Jan-2022 4.30 PM	01-Jan-2022 5.30 PM	02-Jan-2022
01-Jan-2022 4.30 PM	02-Jan-2022 1.30 PM	02-Jan-2022
01-Jan-2022 4.30 PM	02-Jan-2022 5.30 PM	03-Jan-2022

The cut off timing will be a single timing which will be 30 mins before the fund cutoff time . All the orders punched after the cut off time will be considered for the next business day and NAV applicable on that day.

14.3. Email Matrix

1. An email and SMS communication will be sent at the time of order settlement and Order rejection by RTA
2. Below is the attached list of Email and SMS which are sent to customer at the time of Order placement, Settlement and Rejection

Order-SMS_Email.xls
X

14.4. Order Book Report

Order Book Date
Filter Report.xlsx

14.5. ARN Transfer

ARN Transfer refers to transfer of holdings and transactions of a folio from one broker to another broker

CAMS

Transfer In

1. System processes all the “Transfer In” historical transactions. The historical transactions will have subscription/redemption/switch/dividend transactions
2. For all the historical transactions the Transfer Flag in the transaction card will be displayed as “ARN Transfer In” and the transactions are inserted into the folio.
3. The ARN Transfer In transactions will be treated like subscription/redemption/switch/dividend transactions for computing holdings, realized gain and unrealized gain

Transfer Out

1. For all the historical transactions present for the folio, system will insert the reversal transactions and the Transfer Flag as “ARN Transfer Out” in the transaction card. Holdings, realized gain, unrealized gain and dashboard will become 0 for this folio for all the schemes
2. System will mark this Folio’s Active Flag as “No” which has been transferred out. Folios with Active Flag = “No” cannot be used for placing orders

Karvy

Transfer In

1. System processes all the “Transfer In” historical transactions. The historical transactions will have subscription/redemption/switch/dividend transactions
2. For all these historical transactions, the Transfer Flag in transaction card will be displayed as “ARN Transfer In” and the transactions are inserted into the folio.
3. The ARN Transfer In transactions will be treated like normal subscription/redemption/switch/dividend transactions for computing holdings, realized gain and unrealized gain

Transfer Out

1. For all the historical transactions present for the folio, system will insert the reversal transactions and the Transfer Flag as “ARN Transfer Out” in the transaction card. Holdings, realized gain, unrealized gain and dashboard will become 0 for this folio for all the schemes
2. System will mark this Folio’s Active Flag as “No” which has been transferred out. Folios with Active Flag = “No” cannot be used for placing orders

15. Glossary

1. The terms User Office and PMS refer to the same application and have been used interchangeably throughout this document
2. The terms product and security refer to the same and have been used interchangeably throughout this document
3. **Primary Holder** – Is the account holder who is marked as primary while opening the account
4. **Secondary Holder(s)** – Is the holder who is not primary holder of the account but may have equal operating authority (depending on the signing condition) as the primary holder
5. **Authorized Signatory** – The person who is authorized to instruct the bank to debit the account either singly or jointly. Based on the signing condition the signatories have the privilege to place the order
6. **Funding Account (CA/SA excludes term deposits)** – Is the settlement account in which cash is maintained. All the cash debits with respect to an investment is expected to happen from this account.
7. **Investment Account** – Is the account where all investments other than cash are held.
8. **Fund Cutoff Time** – Is the time maintained at the fund level which indicates that the order placement and approval should be completed for this fund before this time if the order has to be considered as same day order.
