1. Introduction

The Plan Journey process helps the User to do financial planning for the investor and propose a portfolio composition to meet the investor's financial needs and goals

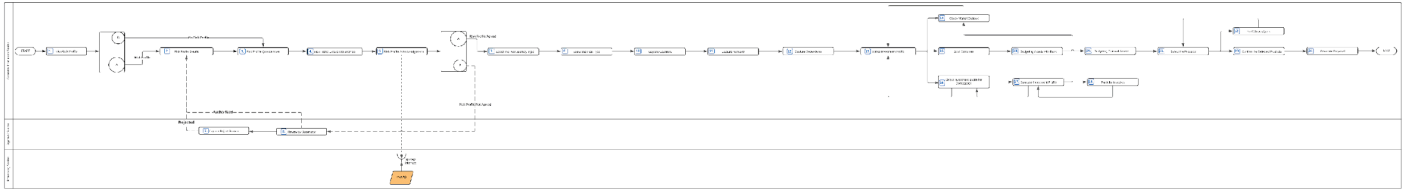

1. There are three types of Journeys available for selection:
 - a. **Set My Goals** - This will be selected if the customer is interested in doing financial planning, for e.g. Wealth, Education, Retirement, Tax and Protection planning
 - b. **I Like the Recommendation** - This will be selected if the customer wants to invest in the products recommended by the system based on the plan's investment profile
 - c. **Transact** - This will be selected if the customer is already aware of the products to invest or sell and does not require any recommendation
2. This document first describes the common process blocks for all three Journey types. Customer Data Capture and Administration of Risk Profile Questionnaire (Risk Profiling) are the common process blocks across the three plan journeys Investment Journey, Insurance Journey, and Execution Only journey. This is followed by Plan Selection through which system branches out into different plan journey flows. Each of the respective Plan journey types i.e. Set My Goals, I like the Recommendation, and Transact is also described in details in the document

2. Prerequisites

S No	Process	Reference Document
1	Customer/Prospect Onboarding	Lead to Prospect and Prospect to Customer Journey Document
2	Product Setup	Journey of Defining Maintenance
3	User Maintenance	Journey of Defining Maintenance
4	License Maintenance	Journey of Defining Maintenance
5	Risk Profile Questionnaire Maintenance	Journey of Defining Maintenance
6	Risk Appetite Mapping Maintenance	Journey of Defining Maintenance
7	Model Portfolio Maintenance	Journey of Defining Maintenance
8	Benchmark Maintenance	Journey of Defining Maintenance

3. Flow Diagram

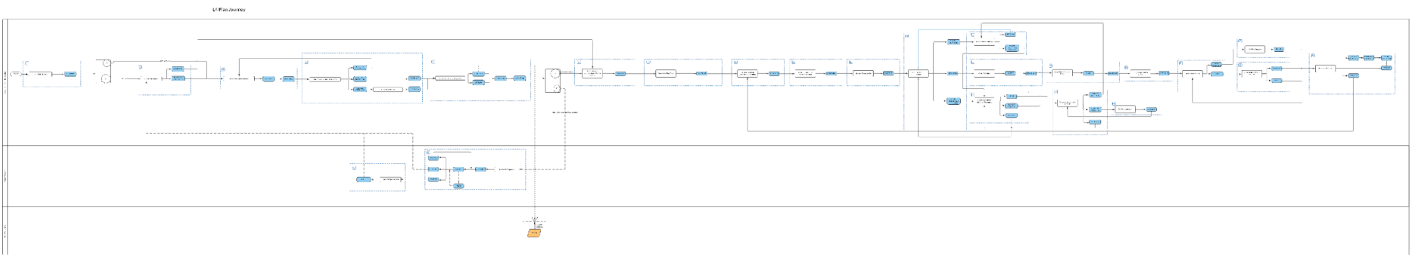

- The below three flow diagrams reflects the process flow for Set My Goals Journey at the L2, L3 and L4 levels. L1 is not applicable for “Journey of Customer Request to Request Closure” since there are no external interfaces (refer to Glossary for definitions)

4. Process Flow

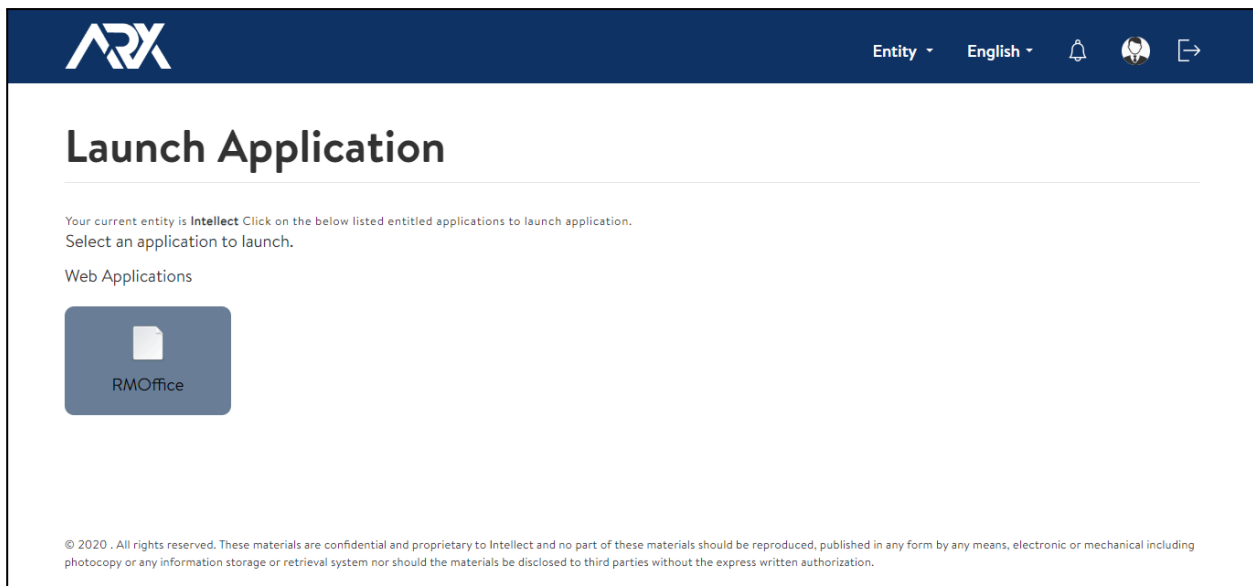

4.1. Login

1. The user enters their credentials and logs into the application

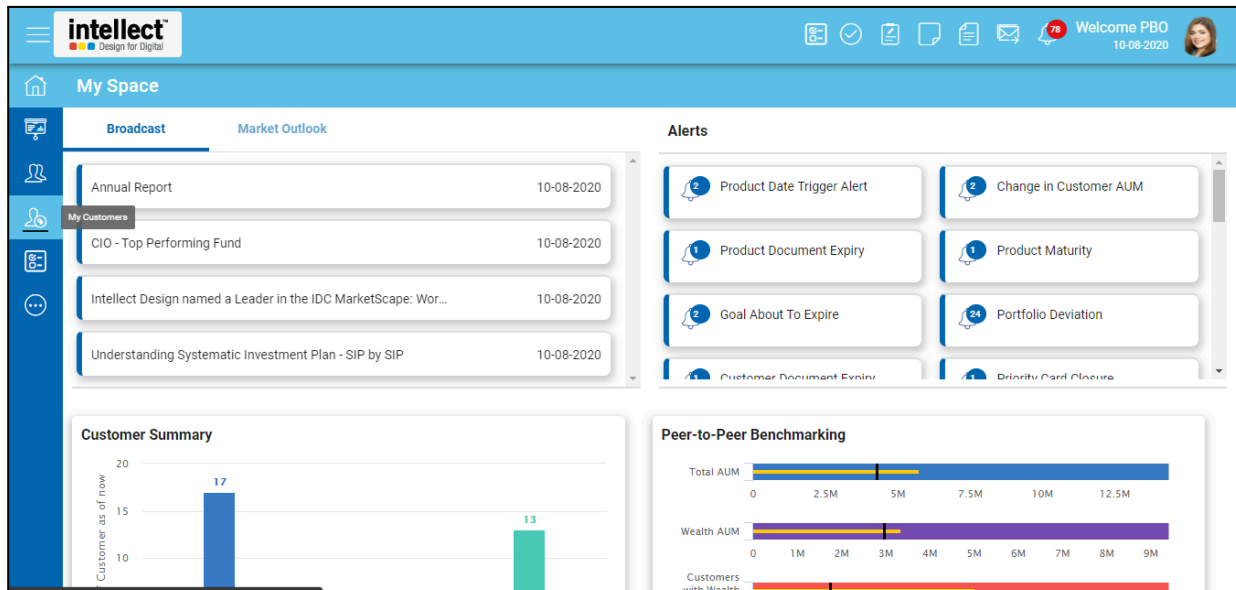

Screen: Launch the application

2. Once logged in, the user clicks on "Intellect_PMS" to launch PMS application

Screen: Select RM Office

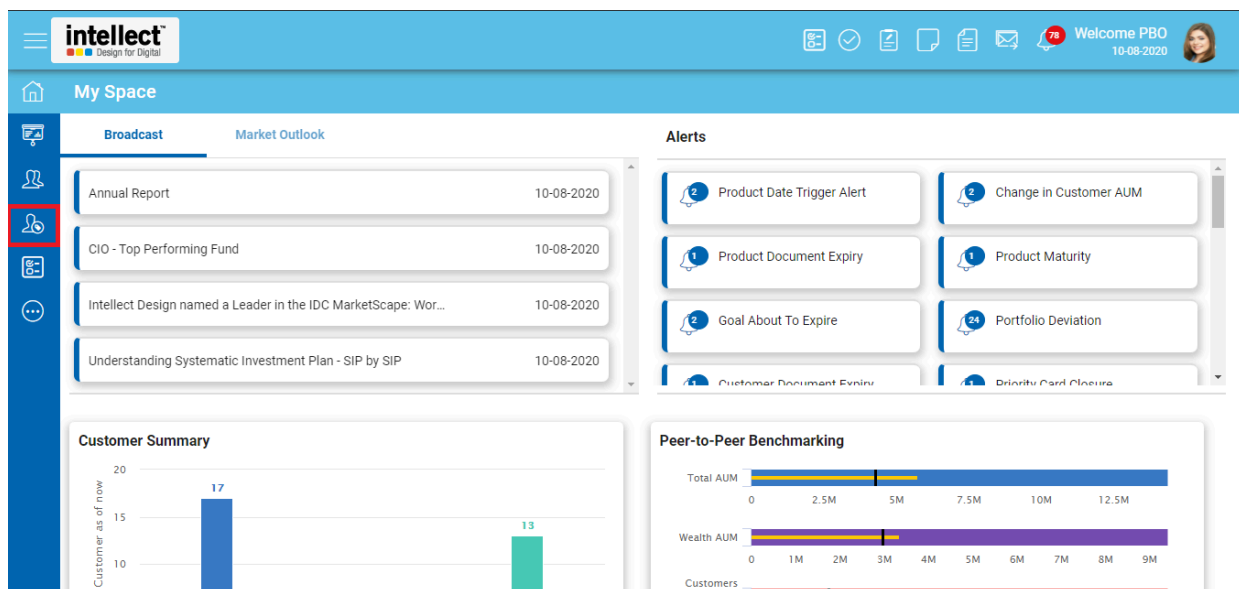

The following screen appears:

Screen: PMS Landing Page

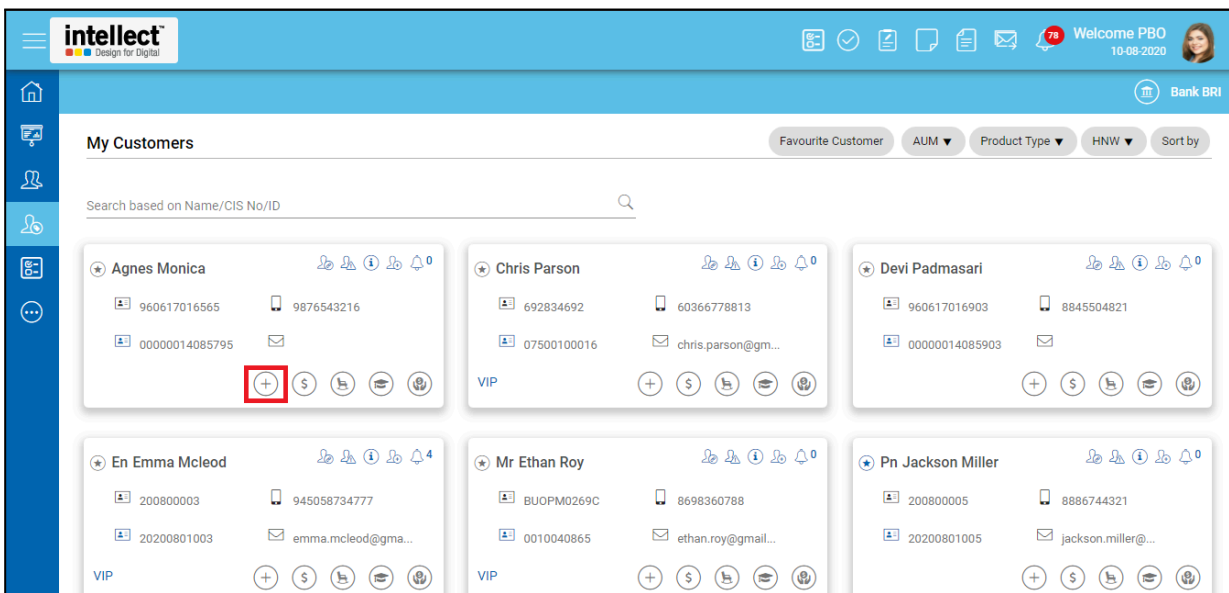

4.2. View/Edit Customer Profile

1. The user can click on the “My Customers” icon on the left navigation panel on My Space to navigate to the My Customers screen

Screen: View/Edit Profile Screen

2. Once on the My Customers screen, the user can click on “+” on the customer card to navigate to Plan Journey

Screen: Customer Card - Navigation to View/Edit Profile Screen

3. The user can choose to modify customer details should they wish to on the View/Edit Profile screen. The user can modify the following details:
 - A. Personal Details
 - B. Family Member Details
 - C. Address/Contact Details
 - D. Identification Details
 - E. Lifestyle Information
 - F. Document Details
 - G. Client Preferences

Screen: View/Edit Profile Screen

- A. Personal Details - The user can view/modify the personal details of the customer
 - a. Once the user has modified the details if any, they can click on the “Next” button to navigate to the next section of the screen

Screen: Personal Details

Internal to HSBC and IntellectPage 13

Screen: Family Member Details

- If existing Family members are already added, the user can view/modify their details
- If family members are not already added, the user can click on the “Add” button to add family member details and then click on the “Save” button to save the details
- The user can then click on the “Next” button to navigate to the next section

Screen: Add Family Member Details

- Address/Contact Details - View Address/Contact details of the Customer
 - The user can view the address/contact details of the customer by clicking on the three dots on the address card

- in the Address details tab
- b. The user can then click on the “Next” button to navigate to the next section

The screenshot shows the 'View Address Details Card' screen. The top header includes the Intellect logo and a welcome message 'Welcome PBO 10-08-2020'. The left sidebar contains navigation icons. The main content area has a list of sections: 'Personal Details', 'Family Member Details', and 'Address/Contact Details'. The 'Address/Contact Details' section is expanded, showing 'Address Details' and 'Contact Details' tabs. The 'Address Details' tab is active, displaying a 'Residence' card with the address 'JB, MALAYSIA' and '81000'. A red box highlights the 'Next' button at the bottom right.

Screen: View Address Details Card

The screenshot shows the 'View Address Details' screen. The top header includes the Intellect logo and a welcome message 'Welcome PBO 10-08-2020'. The left sidebar contains navigation icons. The main content area has a list of sections: 'Personal Details', 'Family Member Details', and 'Address/Contact Details'. The 'Address/Contact Details' section is expanded, showing 'Address Details' and 'Contact Details' tabs. The 'Address Details' tab is active, displaying a form with fields for 'Address Type', 'Address1', 'Address2', 'Address3', 'City/Town', 'State', 'Postcode', 'Country', and 'Preferred Correspondence Address'. A red box highlights the 'Confirm' button at the bottom right.

Screen: View Address Details

- D. Identification Details - View Identification details of the Customer
- a. The user can view Identification details of the Customer in this section by clicking on the three dots Once the user has seen the details, they can click on the “Confirm” button
- b. The user can then click on the “Next” button to navigate to the next section

- E. Lifestyle Information - View/Update/Modify Lifestyle Information of the Customer
 - a. Once the user has viewed/updated/modified the Lifestyle Information, they can click on the “Next” button to navigate to the next section

The screenshot shows the 'View/Add/Modify Lifestyle Information' screen. The top header includes the Intellect logo and a welcome message for PBO. The sidebar on the left contains navigation icons. The main content area has the following sections:

- Address/Contact Details** (dropdown)
- Identification Details** (dropdown)
- Lifestyle Information** (dropdown)
- Hobbies/Interests** (dropdown)
- Religion** (dropdown)
- Zodiac** (dropdown)
- Education** (dropdown)
- Favourite Sport** (dropdown)
- Favourite Colour** (dropdown)
- Favourite Food/Snack** (dropdown)

At the bottom right, there are two buttons: 'Cancel' and 'Next'. The 'Next' button is highlighted with a red box.

Screen: View/Add/Modify Lifestyle Information

- F. Document Details - View/Add/Modify Documents of the Customer
- If existing documents are already added, the user can view/modify the details
 - If existing documents are not added, the user can click on the “Add” button to add documents details and upload the document by clicking on the “Upload” button, and then click on the “Save” button to save the document
 - The user can then click on the “Next” button to navigate to the next section

The screenshot shows the 'View/Add/Modify Documents' screen. The top header includes the Intellect logo and a welcome message for PBO. The sidebar on the left contains navigation icons. The main content area has the following sections:

- Family Member Details** (dropdown)
- Address/Contact Details** (dropdown)
- Identification Details** (dropdown)
- Lifestyle Information** (dropdown)
- Document Details** (dropdown)

At the bottom right, there are three buttons: 'Cancel', 'Next', and 'Add'. The 'Add' button is highlighted with a red box. At the bottom left, there is a 'Back' button, and at the bottom right, there is a 'Confirm' button.

Screen: View/Add/Modify Documents

The screenshot displays the 'Add/Modify Document details' screen. The top header includes the Intellect logo and a welcome message for user PBO. The sidebar on the left contains navigation icons. The main content area has a 'Document Details' section with the following fields: Document Group **, Document Name **, Status **, Submission/Later Submission Date, Expiry Date, and Remarks. A red box highlights the 'Upload Document' button. At the bottom right, there are 'Cancel' and 'Save' buttons, with the 'Save' button also highlighted by a red box.

Screen: Add/Modify Document details

G. Client Preferences - View/Update/Modify Communication Preferences and Reporting Preferences of the customer

- a. The user can View/Update/Modify communication preferences of the customer in this section

The screenshot displays the 'Add/View/Modify Client Preferences' screen. The top header includes the Intellect logo and a welcome message for user PBO. The sidebar on the left contains navigation icons. The main content area has a 'Client Preferences' section with the following fields: Preferred Communication Channel, Preferred Contact Times, From, To, Customer Language Preference (English), Preferred Location, Hold Mail, Hold Mail Period From **, Hold Mail Period To **, Hold Call, Hold Call Period From **, and Hold Call Period To **. A red box highlights the '+ Add' button. At the bottom right, there are 'Cancel' and 'Next' buttons, with the 'Next' button also highlighted by a red box.

Screen: Add/View/Modify Client Preferences

- b. The user can also add/view/modify reporting preferences of the customer
- c. The user can add reporting preferences of the customer by clicking on the “+Add” button and click on the “Save” and then “Confirm” button to add the reporting preferences. This reporting preference can now be viewed as a card and modified if needed

The screenshot displays the 'Add/View/Modify Client Preferences' screen. The top header includes the Intellect logo and a user profile with the text 'Welcome PBO 10-08-2020'. The left sidebar contains navigation icons. The main content area is divided into three sections: 'Document Details', 'Client Preferences', and 'Reporting Preferences'. The 'Client Preferences' section is expanded, revealing various fields for client information. A red box highlights the '+ Add' button located at the bottom right of the Client Preferences section.

Screen: Add/View/Modify Client Preferences

The screenshot displays the 'Add/View/Modify Reporting Preferences' screen. The top header includes the Intellect logo and a user profile with the text 'Welcome PBO 10-08-2020'. The left sidebar contains navigation icons. The main content area is divided into six sections: 'Family Member Details', 'Address/Contact Details', 'Identification Details', 'Lifestyle Information', 'Document Details', and 'Client Preferences'. The 'Client Preferences' section is expanded, revealing fields for 'Report Name', 'Reporting Date', 'Reporting Frequency', and 'Dispatch Mode'. A red box highlights the 'Save' button located at the bottom right of the Client Preferences section.

Screen: Add/View/Modify Reporting Preferences

- After the user has entered/modified all the relevant details in these sections, they can click on the "Confirm" button to navigate to the Risk profile section

Screen: Confirm Customer Details

4.3. Risk Profile Questionnaire

1. The user after confirming customer details, lands on the Risk Profile Questionnaire screen **if the customer's Risk Profile has not been done previously**. Here, the user performs customer risk profiling by answering predetermined questions in the Risk Profile Questionnaire (Suitability Assessment Form)

NOTE: If the Risk Profiling for the customer is already complete, the system will navigate the user to the Recommended Risk Profile screen (refer to section number 4.7)

2. The Suitability Form consists of two parts:
 - a. Personal Information
 - b. Suitability Assessment Questionnaire
3. The user can view the Personal Information and then move onto the Suitability Assessment Questionnaire where they answer a set of questions to determine their risk profile

Part A - Risk Profile (Suitability Assessment Form)

Description

Looking for a high rate of return from the portfolio through products with a high level of risk in the short-long period.

Mencari tingkat pengembalian yang tinggi dari portofolio melalui produk dengan tingkat risiko tinggi dalam jangka pendek

Screen: Recommended Risk Profile with Override screen

- If the user wants to answer the risk profile questionnaire/suitability assessment questionnaire again, they can click on the “Reassess Risk Profile” button to go back to the Risk Profile Questionnaire

Screen: Reassess Risk Profile

- If the user agrees with their Risk Profile, they can select the “Yes” radio button and click on the “Continue” button to navigate to the Acknowledgement screen

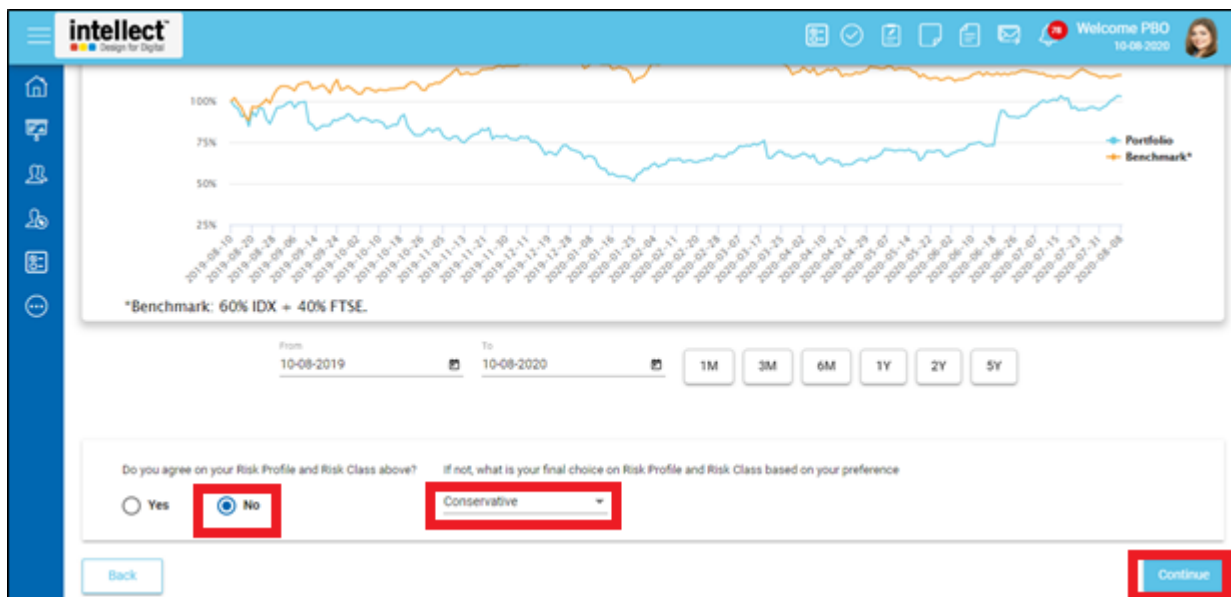

Screen: Agree with the Recommended Risk Profile

- In case, the user disagrees with the Risk Profile arrived at, they can select the relevant Risk Profile from the dropdown

(Risk Profiles only one step up and one step down from the assessed Risk Profile, along with the Assessed Risk Profile will be available in the dropdown) after selecting the “No” option, and click on the “Continue” button to navigate to the Acknowledgement screen

NOTE: After acknowledgement, Risk Profile will go to the **Supervisor for Approval** because of the deviation

Screen: Override the Recommended Risk Profile

4.5. Risk Profile Acknowledgment

1. If the Customer is doing their risk profile for the first time, or re-assessing their risk profile, they will land on the Acknowledgement screen on clicking on the “Continue” button on the Risk Profile details with Override screen. In this screen, they acknowledge the policies and disclaimers of the bank

The screenshot shows the Intellect app interface for a client named Chris Parson. The screen displays a progress bar with three steps: Edit Profile, Assess Risk, and Plan Goals. The 'Assess Risk' step is currently active. Below the progress bar, there is a section for 'Client's Acknowledgement' with a checkbox for acknowledging the investment policy and disclaimers.

Screen: Risk Profile Acknowledgement

- On the acknowledgement screen, the user can then authenticate the customer by capturing the customer's biometrics. Customer's fingerprint is validated from MyKAD. If Biometric validation is not feasible, the customer's ID is captured through a camera

Screen: Biometrics/Image Capture

Screen: Take Snapshot

- The customer will then enter his/her signature

Screen: Capture E-Signature

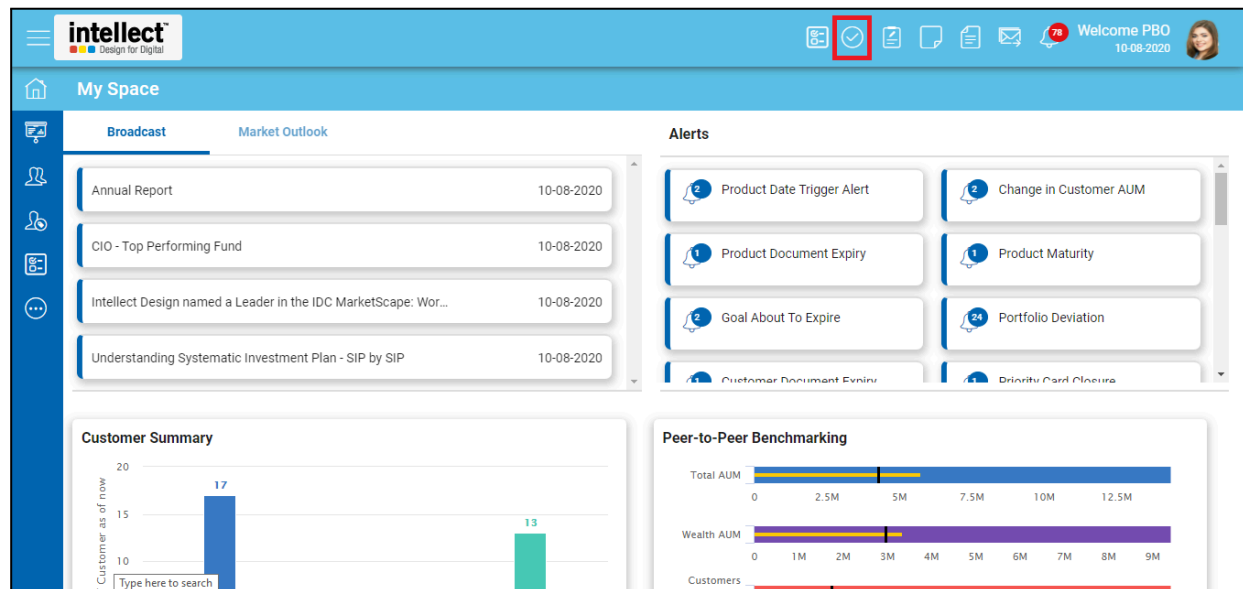

Screen: Acknowledgement - E-Signature

- After acknowledging the details and capturing the customer's Biometrics and E-Signature, the user can click on the "Continue" button to move to the "Select Plan Journey Type" screen if there is no risk profile deviation, else system notifies the user that risk profile deviation is sent for authorization. The user can revisit the flow after the authorization process is completed from the "Edit Profile" screen

Screen: Risk Profile Sent for Authorization

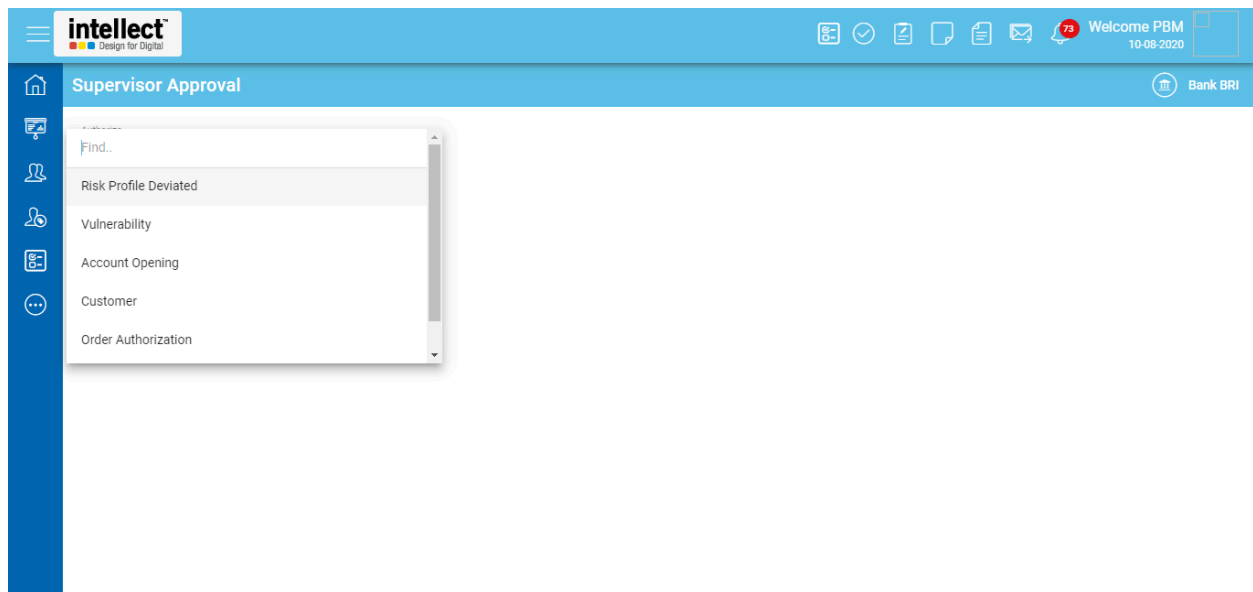

4.6. Supervisor Approval

1. After Risk Profile Deviation has been sent to the Supervisor for Approval, the Supervisor can authorize/reject the same
2. Once logged into their account, the Supervisor can click on the “Supervisor Approval” button on the top panel to go to the Supervisor Approval screen

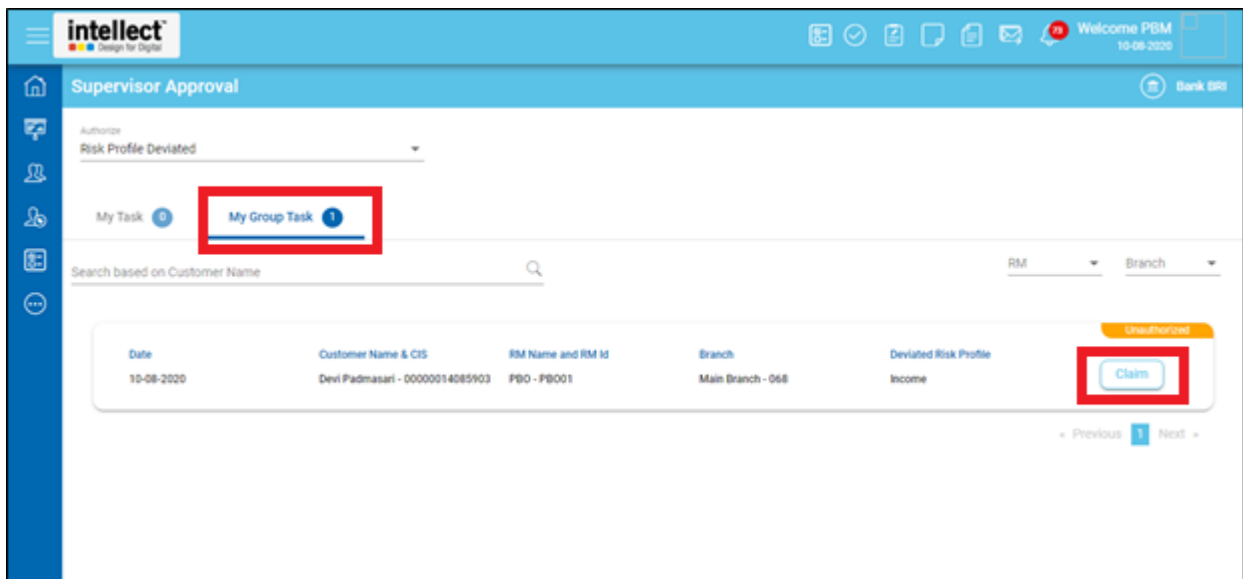

Screen: My Space - Supervisor Approval

3. The Supervisor can then click on the dropdown and select the “Risk Profile Deviated” option to authorize or reject risk profile deviations

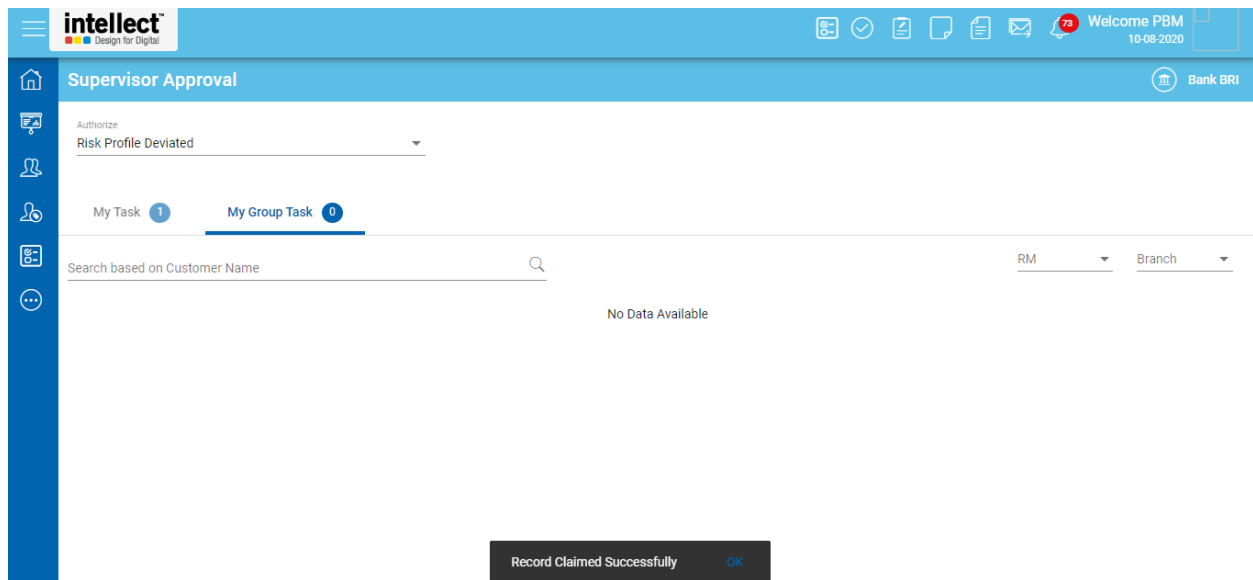

Screen: Select Risk Profile Deviated

- Once the Supervisor arrives on this screen, they can click on the “My Group Task” Tab to view the common pool and click on the “Claim” button to claim a particular record

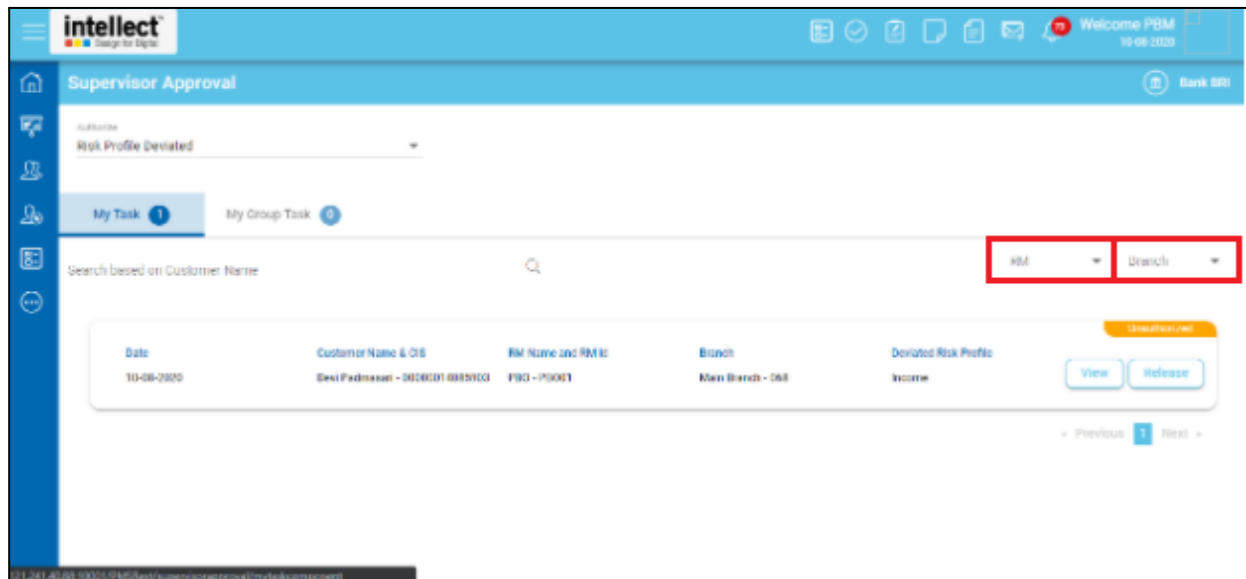

Screen: Claim a Record from the Common Queue

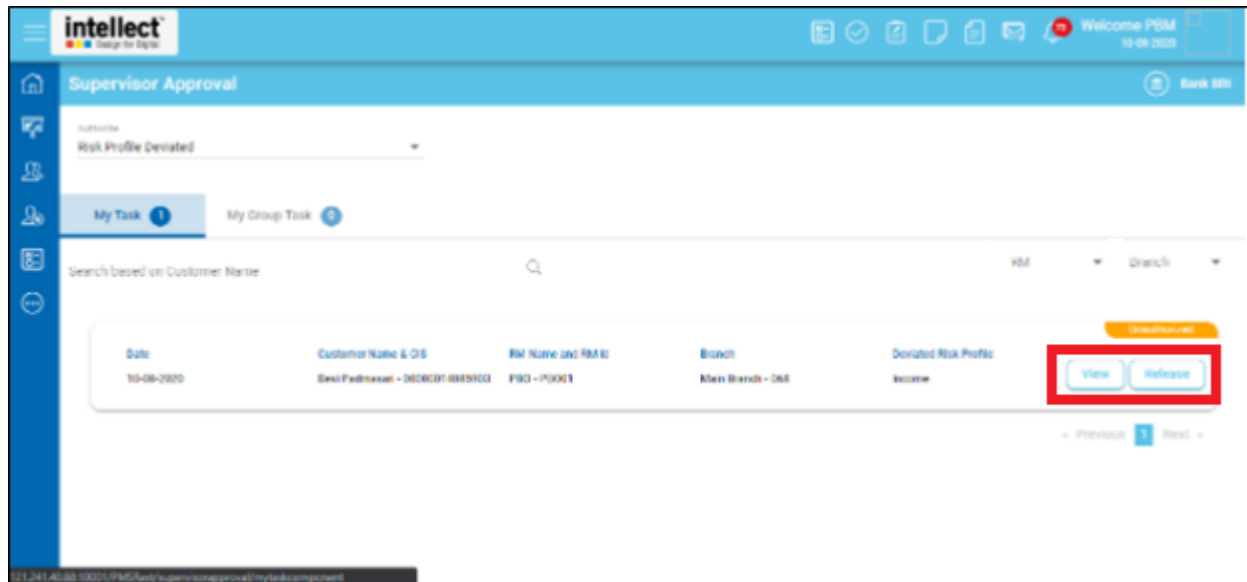

Screen: Record successfully claimed

- After a record has been claimed successfully, it moves to the “My Task” tab , which is personal queue of the Supervisor where supervisor can filter using “RM” and “Branch” filters

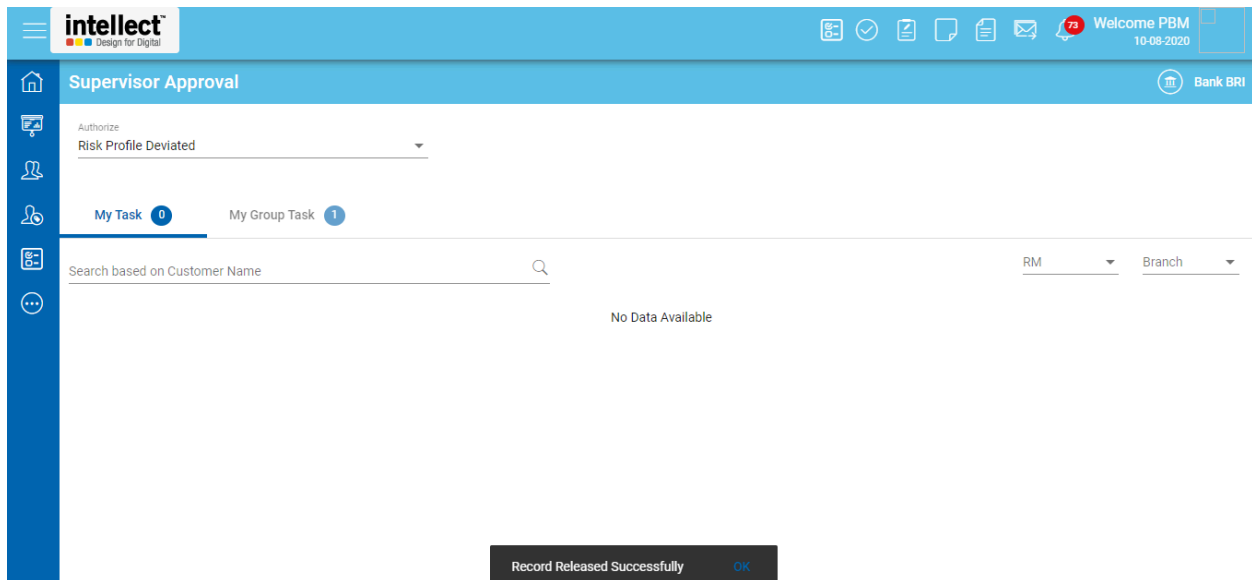

Screen: Filters in My Task Menu

- On this screen, the Supervisor will have the option to either View the record, or Release it if it was added to their pool erroneously. If the record is Released, it goes back to the common pool, and can be viewed in the “My Group Task” tab

Screen: View/Release a Record

Screen: Release a Record from the Personal Pool

7. If the Supervisor clicks on the “View” button, they can View the details of the selected record, and either Authorize or Reject the record after scrutiny. The Supervisor can view the following details:
 - a. Questionnaire
 - b. Portfolio
 - c. Acknowledgement

8. The Supervisor can now Authorize or Reject the record
9. If the Supervisor clicks on the "Reject" button, they have to capture the reason for Rejection, and then click on the "Submit" button. The record is successfully rejected. This would be available to the maker in read only mode and after making the necessary changes, it can be submitted again

Screen: Capture Reject Reason

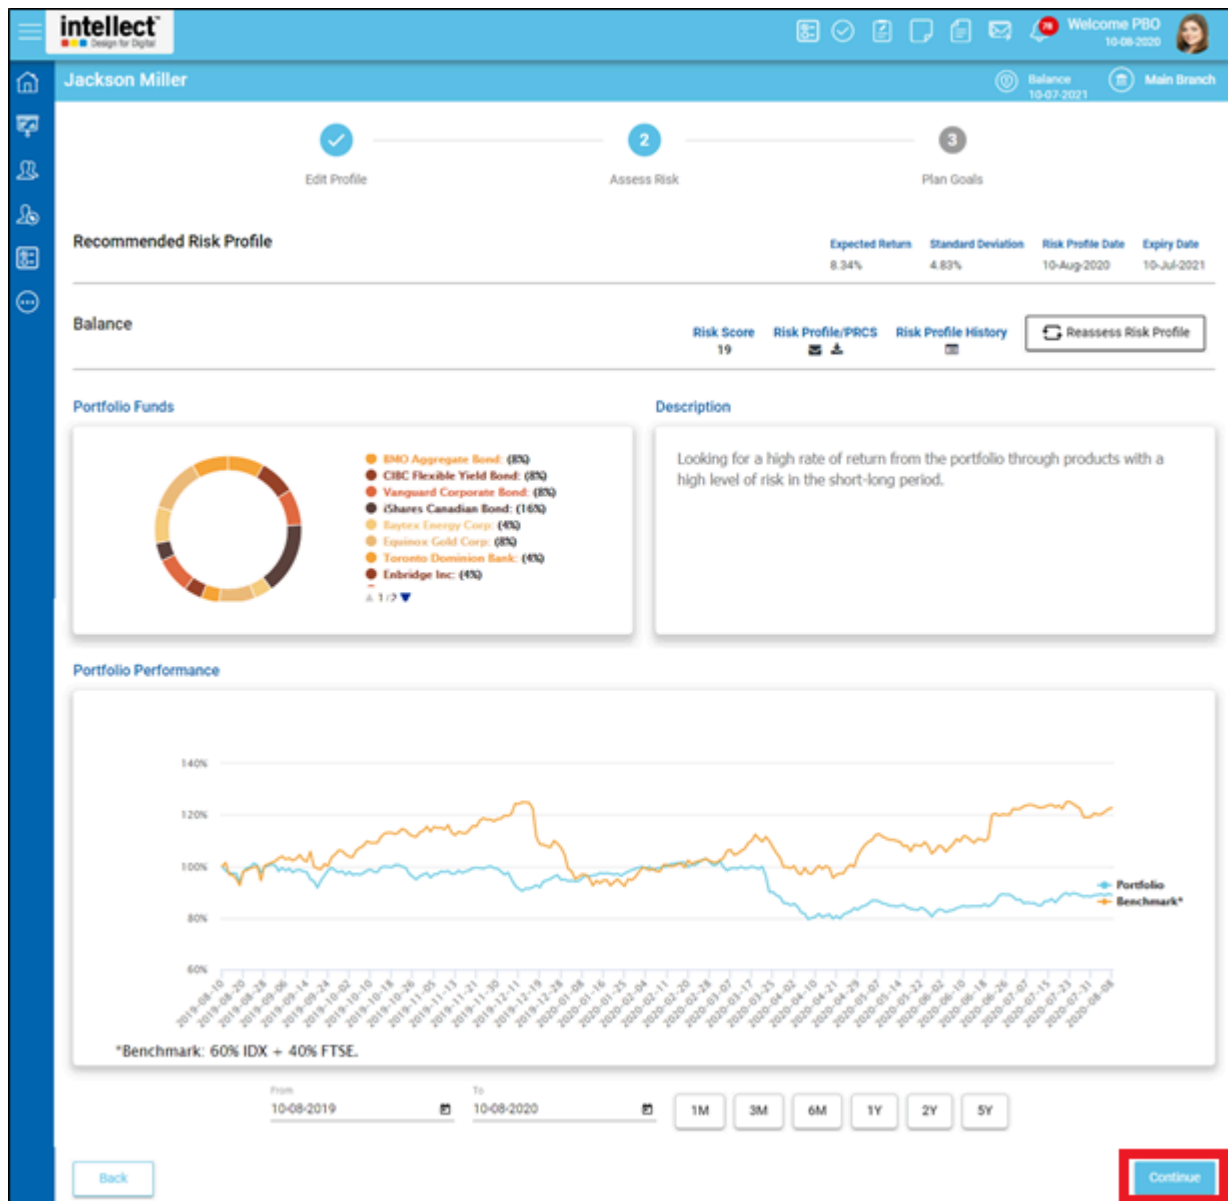

10. If the Supervisor clicks on the “Authorize” button, the record gets successfully authorized

Screen: Record Successfully Authorized

4.7. Recommended Risk Profile

Customers who have an existing Risk Profile would land on the Recommended Risk Profile screen after clicking on the “Confirm” button on the View/Edit Profile screen (refer to section 4.2 View/Edit Customer Profile)

1. The user lands directly on the Recommended Risk Profile Screen instead of the Suitability Assessment Questionnaire after clicking on “Confirm” button in the View/Edit Profile screen
2. On clicking the “Reassess Risk Profile” button, the user navigates to the Risk Profile Questionnaire
3. On clicking the “Continue” button the user navigates directly to the “Select Plan Journey Type” screen

Screen: Risk Profile Result Screen

4.8. Select the Plan Journey Type

Plan Journey Type selection will determine the flow of the Plan Journey. There are three types of Journeys available for selection (Transact, I like the Recommendation and Set My Goals). Three plan journey types are covered in the below sections (refer to the section number 4.8.1, 4.8.2 and 4.8.3)

Set My Goals - This will be selected if the customer is interested in doing goal planning, for eg. Wealth, Education, Retirement, Tax and Protection planning

I Like the Recommendation - This will be selected if the customer wants to invest in the products recommended by the system based on the plan's investment profile

Transact - This will be selected if the customer is already aware of the products to invest or sell and does not require any recommendation

4.8.1. Set My Goals

1. User selects the “Set My Goals” Plan Journey type and clicks on “Continue”

Screen: Select the Plan Journey Type

4.8.1.1. Select the Plan Type

There are six plan types available for selection. Each plan has attributes like plan objective and plan purpose

Plan Type, Plan Objective and Plan Purpose - This selection determines the goal calculator to be used for the planning and the products to be invested by the customer to reach their goal objectives

The below table provides the details of combinations of Plan Type, Plan Objective and Plan Purpose

Plan Type	Plan Objective	Plan Purpose
Wealth Planning	Grow Wealth	Investment, Insurance
Wealth Planning	Preserve Wealth	Investment
Education Planning	Education	Investment, Insurance
Retirement Planning	Retirement	Investment, Insurance
Tax Planning	Tax	Investment, Insurance
Protection Planning	Death and	Insurance

	Disability	
Protection Planning	Critical Illness	Insurance
Protection Planning	Hospitalization and Health	Insurance
Protection Planning	Legacy Tax	Insurance
Protection Planning	Credit Life	Insurance
Protection Planning	Property	Insurance
Execution Only	Not Applicable	Investment

1. User selects the plan type, plan objective, plan purpose, inputs the plan name and clicks on “Continue”

Screen: Select the Plan Type

4.8.1.2. Capture Cash flow

The annual cash flow of the customer is computed by capturing the income and expense components details

Total Annual Income - The below income components are captured from the customer to compute the total annual income of the customer:

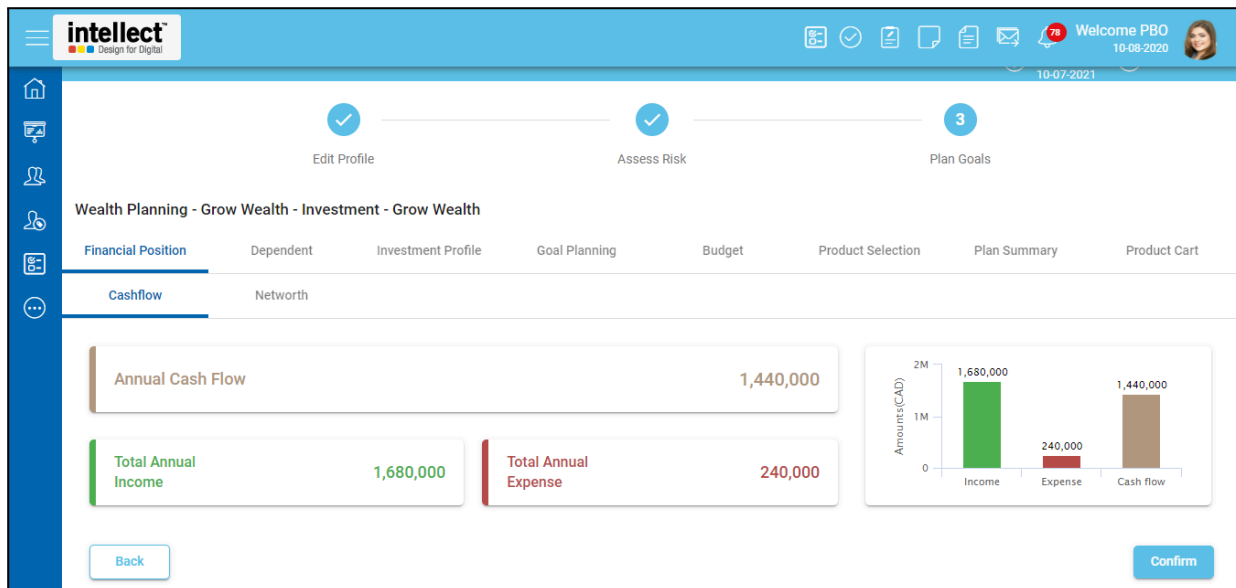

- a. Salary
- b. Rental
- c. Business
- d. Others

Total Annual Expense - The below expense components are captured from the customer to compute the total annual expense of the customer:

- Household
- Loan Repayment
- Loan Repayment (With Other Bank)
- Insurance/Medical
- Others

Annual Cash Flow = Total Annual Income - Total Annual Expense

- View/Capture Income details:
 - The graph of the Income, Expenses and Cash flow is shown
 - The aggregate annual amount of income from all the income sources will be calculated by the system and is shown in the card labeled "Total Annual Income"
 - To enter the income source details, the user needs to click on the "Total Annual Income" card

Screen: View Cash Flow - Income

- The first level provides the source of income (Salary, Rental, Business and Others) details with the aggregated monthly income displayed on top right corner

Screen: View Income Source Details

- Three dots on the Salary is clicked in the above picture, the window opens up to capture multiple salary type details by clicking on the “Add” button. If the salary income details are already captured, it will be available in the form of a card which can be viewed/modified

Screen: Add Multiple Salary Details

- “Add” button is clicked as shown in the above picture and the user can capture the Salary details

The screenshot shows the Intellect Retirement Planning interface. At the top, there's a navigation bar with the Intellect logo and a user profile section showing 'Welcome PBO' and the date '10-08-2020'. Below the navigation bar, there are three main steps: 'Edit Profile', 'Assess Risk', and 'Plan Goals' (the third step is highlighted with a blue circle and the number 3). The main content area is titled 'Retirement Planning - Retirement - Investment - Retirement'. It has a sub-navigation bar with 'Financial Position', 'Dependent', 'Investment Profile', 'Goal Planning', 'Budget', 'Product Selection', 'Plan Summary', and 'Product Cart'. The 'Financial Position' section is active, showing 'Cashflow' and 'Networth'. Below this, there's a form titled 'ADD SALARY'. The form has several fields: 'placeholder1 *' with the value '200000', 'Frequency *' with the value 'Monthly', 'Description *' with the value 'Salary2', 'Start Year *' with the value '2020', 'End Year *' with the value '2022', 'Owner*' with the value 'Agnes', and 'Growth Rate*' with the value '8'. There are 'Back' and 'Continue' buttons at the bottom of the form.

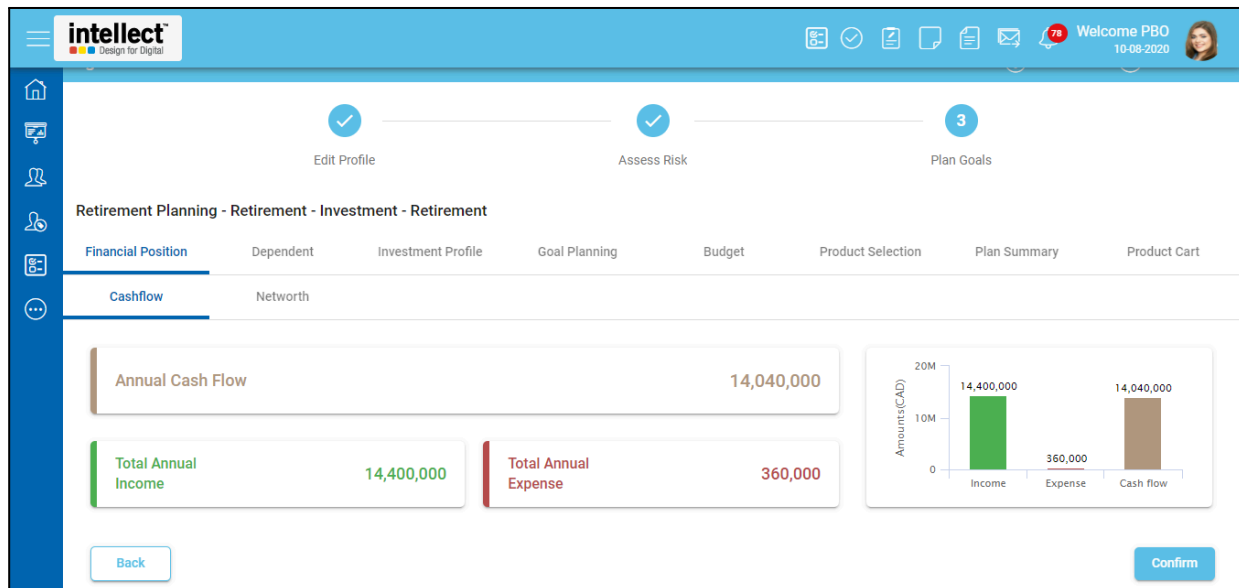

Screen: Capture Salary Details

4. Once the details have been entered and if the user clicks on “Continue” a new salary entry is added. The above steps are repeated to capture the income source details for Rental, Business and Others

The screenshot shows the Intellect Retirement Planning interface after adding salary details. The 'ADD SALARY' form is now replaced by a 'SALARY' section. This section contains two salary entries, 'Salary1' and 'Salary2', each with a card showing the amount in CAD. 'Salary1' has an amount of '1,000,000' and 'Salary2' has an amount of '200,000'. There are 'Back' and '+ Add' buttons at the bottom of the section. The rest of the interface, including the navigation bar and sub-navigation bar, remains the same as in the previous screenshot.

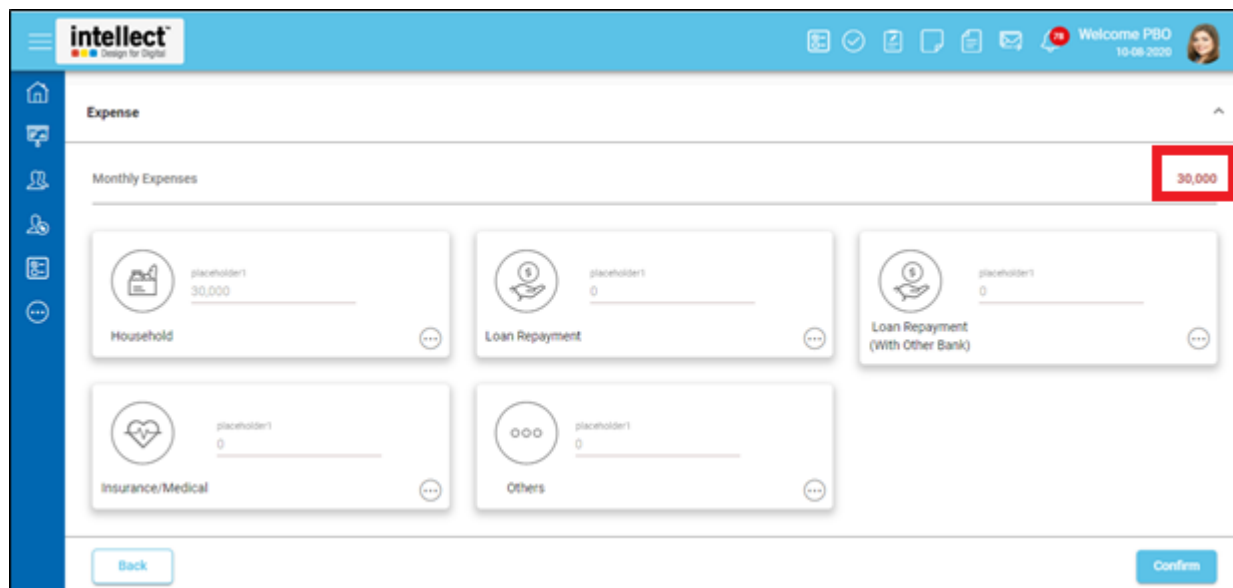

Screen: New Salary Type Income Added

5. View/Capture Expense details :
 - a. The graph of the Income, Expenses and Cash flow is shown
 - b. The aggregate annual amount of expense from all the expense sources will be calculated by the system and is shown in the card labeled “Total Annual Expense”
 - c. To enter the expense source details, the user needs to click on the “Total Annual Expense” card

Screen: View Cash Flow - Expense

- d. The first level provides the source of expense (Household, Loan Repayment, Loan Repayment (With Other bank), Insurance/Medical and Others) details with the aggregated monthly expense displayed on top right corner
- e. Three dots on the Household is clicked in the below screen

Screen: View Expense Source Details

6. The window opens up to capture multiple household type details by clicking on the “Add” button. If the household expense details are already captured, it will be available in the form of a card which can be viewed/modified

The screenshot shows the Intellect Retirement Planning interface. The top navigation bar includes the Intellect logo, a user profile section with 'Welcome PBO' and '10-08-2020', and a series of icons. Below the navigation bar, there are three main steps: 'Edit Profile', 'Assess Risk', and 'Plan Goals'. The 'Plan Goals' step is currently active, indicated by a blue circle with the number '3'. The main content area is titled 'Retirement Planning - Retirement - Investment - Retirement'. It contains several tabs: 'Financial Position', 'Dependent', 'Investment Profile', 'Goal Planning', 'Budget', 'Product Selection', 'Plan Summary', and 'Product Cart'. The 'Financial Position' tab is selected, and within it, the 'Cashflow' sub-tab is active. The 'Cashflow' section shows a 'Household Expense' entry with a value of '30,000'. A red box highlights the '+ Add' button in the top right corner of the 'Household Expense' section.

Screen: Add Multiple Household Details

7. User can capture the Expense details. Once the details have been entered ,user clicks on “continue”

The screenshot shows the Intellect Retirement Planning interface, similar to the previous one, but with the 'ADD HOUSEHOLD' section expanded. This section contains a form with the following fields: 'placeholder1 *' (value: 20000), 'Frequency *' (value: Yearly), 'Description *' (value: Yearly Expense), 'Start Year *' (value: 2020), 'End Year *' (value: 2023), 'Owner *' (value: Agnes), and 'Growth Rate *' (value: 7). A red box highlights the 'Continue' button in the bottom right corner of the 'ADD HOUSEHOLD' section.

Screen: Capture Household Details

8. New entry is added under the “Household Expense”. The above steps are repeated to capture the expense source details for Loan Repayment, Loan Repayment (With Other Bank), Insurance/Medical and Other Loan

Screen: New Household Type Expense Added

- Once the Income and Expense details are captured then the Annual Cash Flow is computed by the system. User clicks on "Continue" to go to the next screen to capture the Net worth details

Screen: Net Worth Navigation

4.8.1.3. Capture Net Worth

The net worth of the customer is computed by capturing the asset and liability components details

Assets - The assets details of the customer are shown under two broad categories: Assets Held with the Bank and External Assets.

The below Asset details are captured from the customer to compute the total assets of the customer

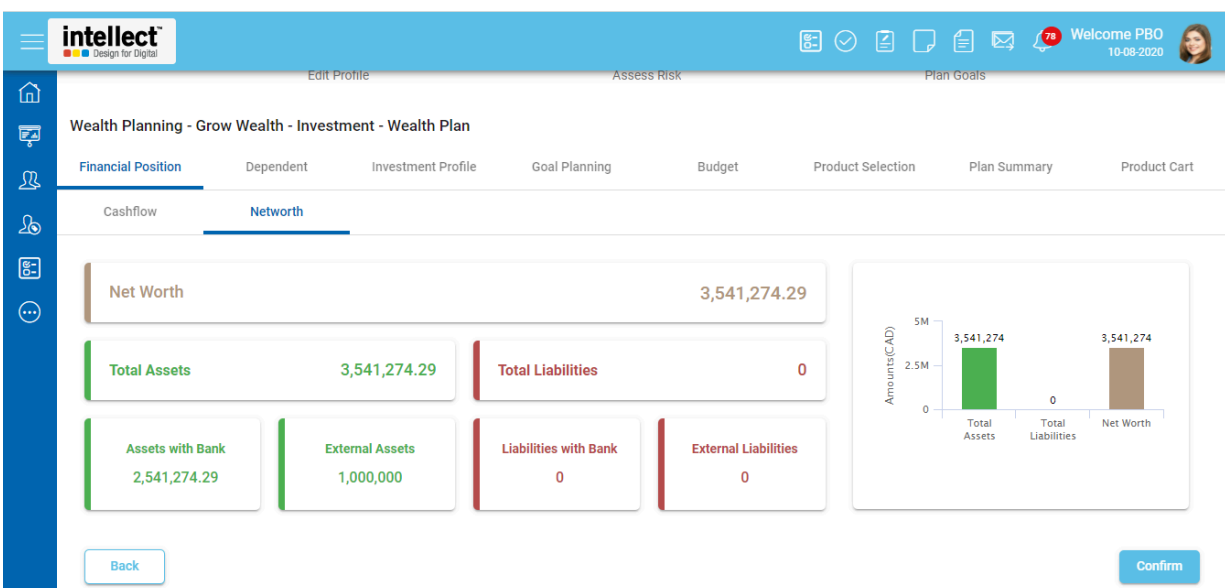

- a. Assets with Bank
- b. External Assets
 - i. Liquid Assets
 1. Cash and Bank Deposits
 2. Investments
 3. Insurance
 - ii. Fixed Assets
 1. Property
 2. Motor Vehicle
 3. Others

Liabilities - The liabilities details of the customer is shown under two broad categories: Liabilities Held with the Bank and External Liabilities. The below Liability details are captured from the customer to compute the total liabilities of the customer

- a. Liabilities with Bank
- b. External Liabilities
 1. Mortgage Loan
 2. Motor Vehicle Loan
 3. Overdraft/Personal Loan
 4. Other Loan

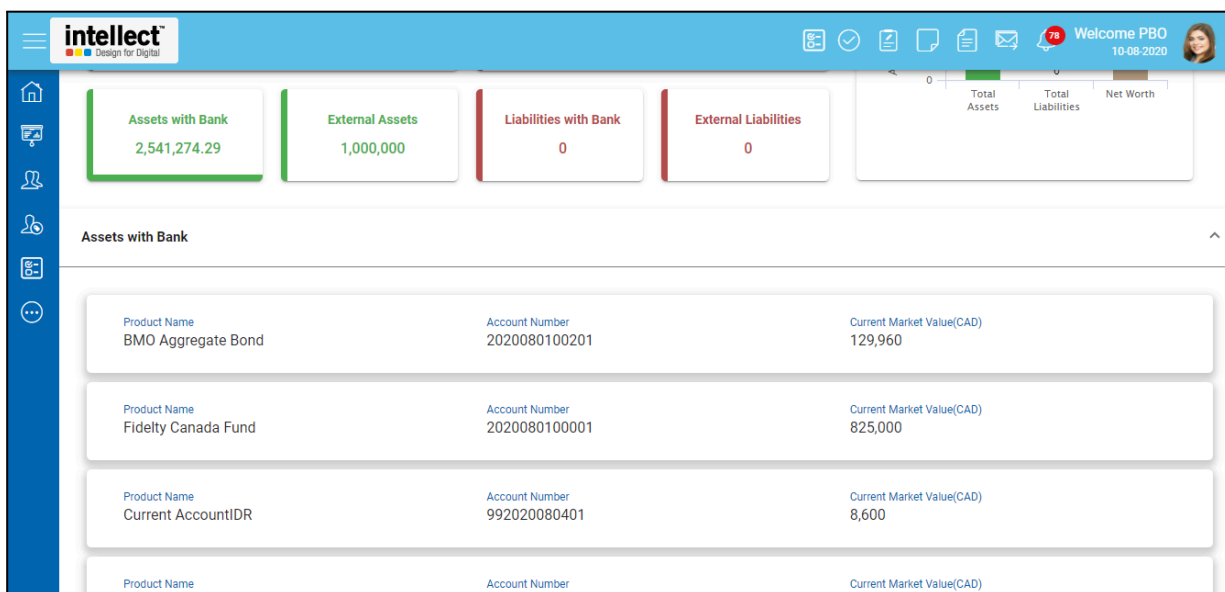

Net Worth = Total Assets - Total Liabilities

1. View/Capture Asset details:
 - a. The graph of the Total Assets, Total Liabilities and Net Worth is shown
 - b. The aggregate amount of assets from "Assets with Bank" and "External Assets" will be calculated by the system and is shown in the card labeled "Total Assets"
 - c. To view the "Assets with Bank" details, the user needs to click on "Assets with Bank" card
 - d. To input the external assets details, the user needs to click on the "External Assets" card

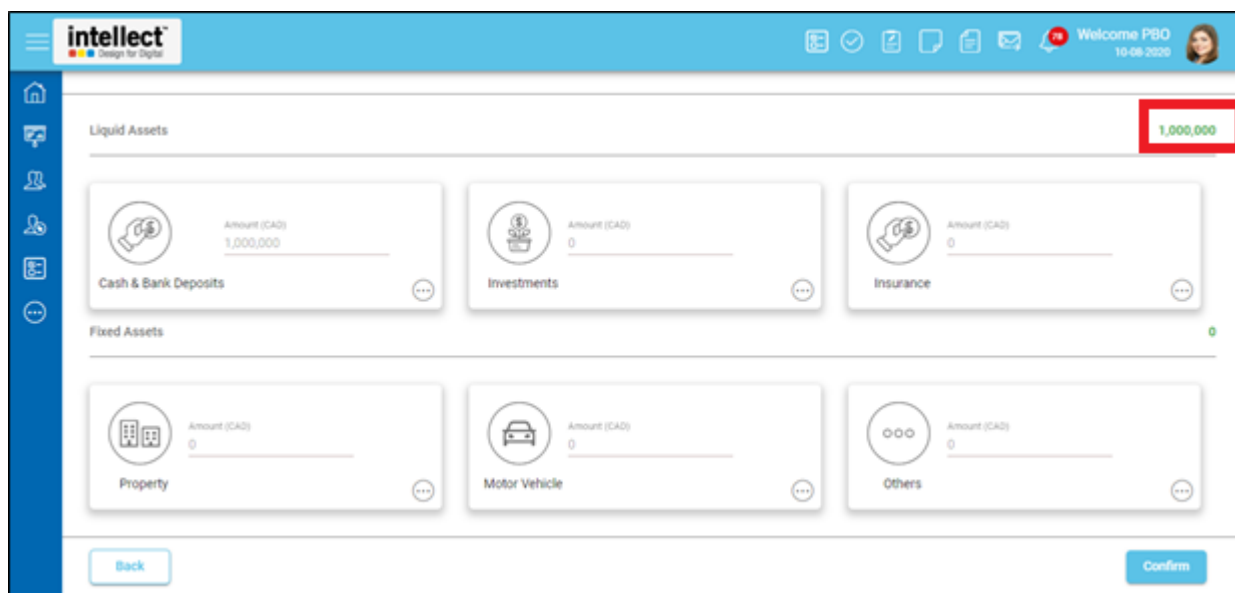

Screen: View Net Worth - Assets

- Assets with Bank - The assets that are held within the bank are automatically fetched by the system, aggregated and shown in the “Assets held with Bank” card. These details are not editable

Screen: View Net Worth - Assets with Bank

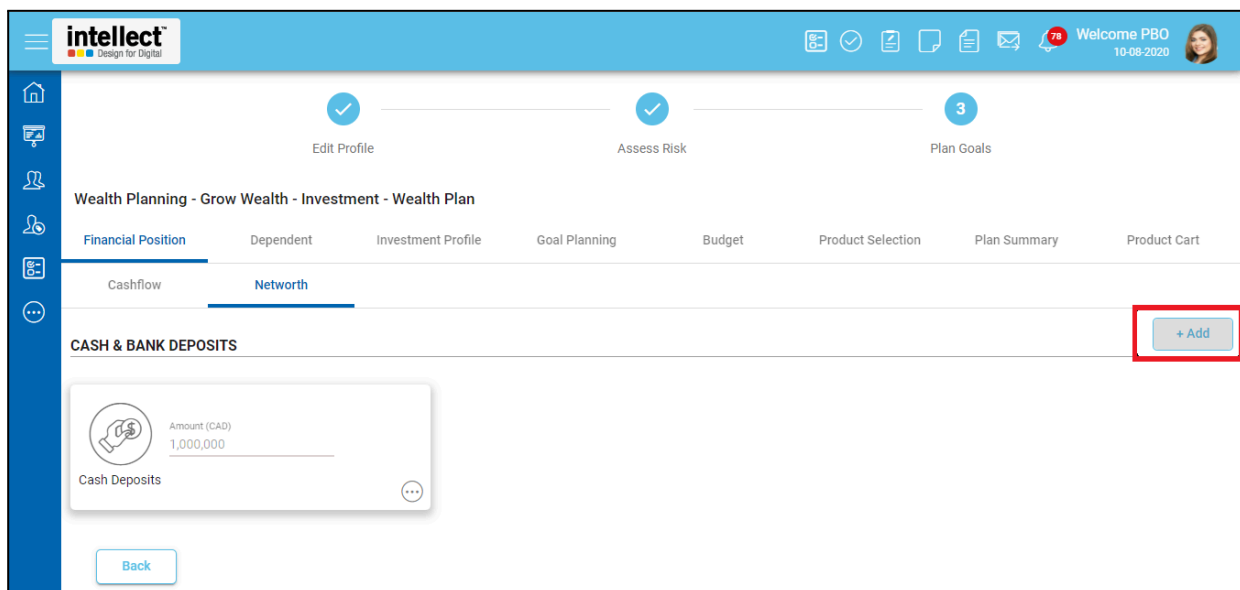

- External Assets - The first level provides the external asset components (Cash and Bank Deposits, Investments, Insurance, Property, Motor Vehicle and Others) with the aggregated amount for Liquid and Fixed Assets displayed on top right corner

Screen: View Net Worth - External Assets

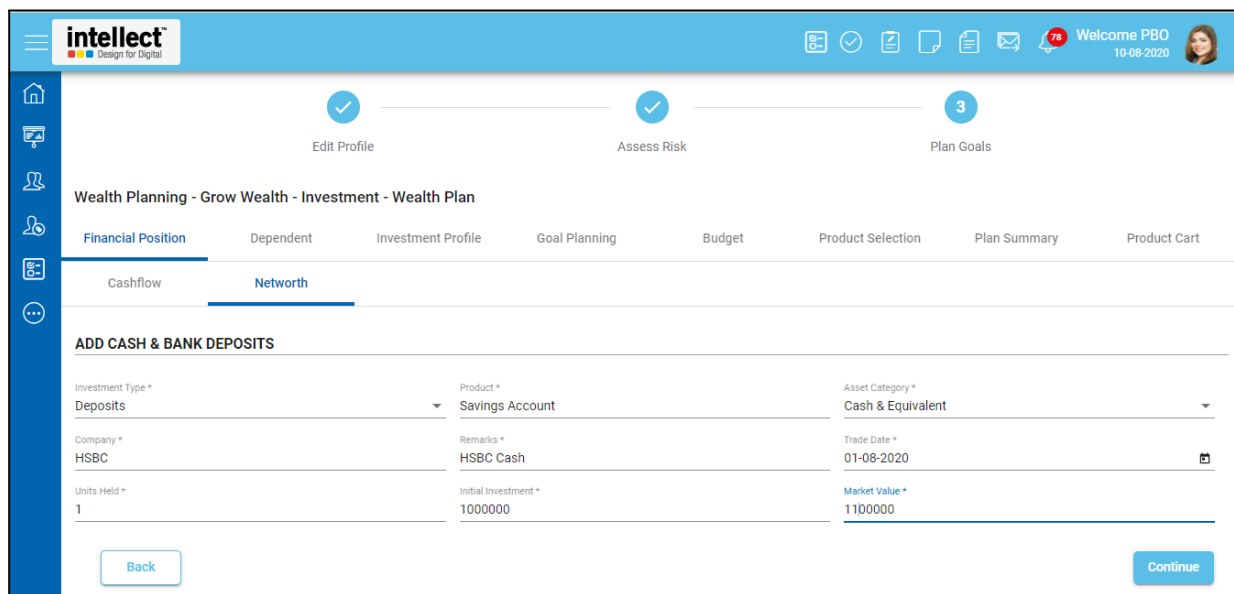

- Three dots on the Cash and Bank Deposits is clicked in the above picture, the window opens up to capture multiple Cash

and Bank Deposits details by clicking on the “Add” button. If the Cash and Bank Deposits details are already captured, it will be available in the form of a card which can be viewed/modified

Screen: Add Cash and Bank Deposits

- “Add” button is clicked as shown in the above picture and the user can capture the asset details

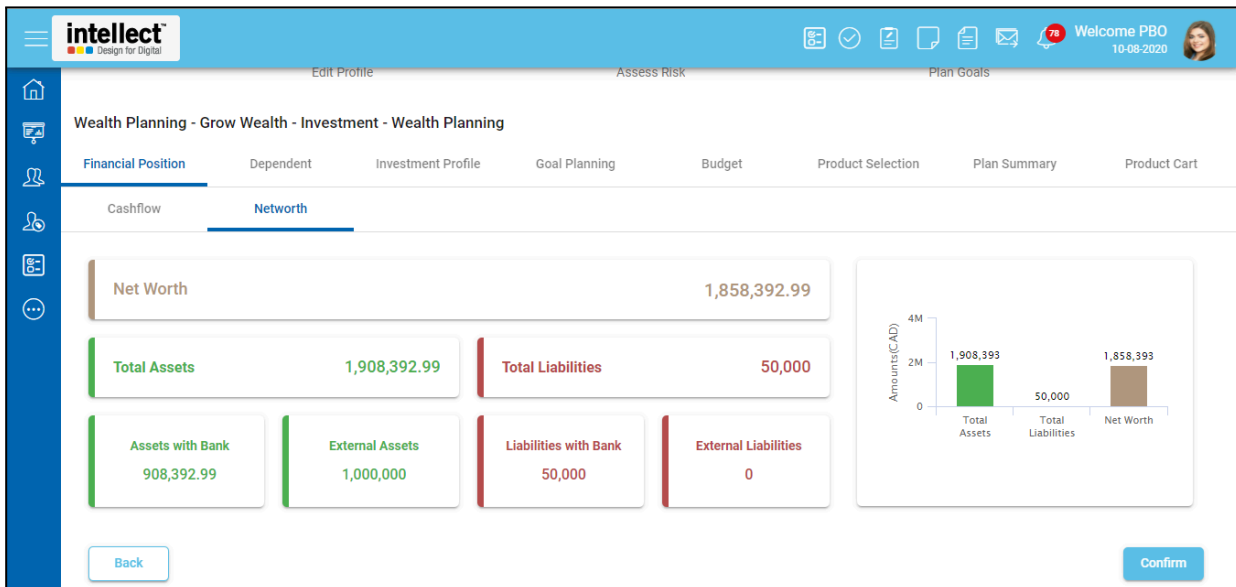

Screen: Capture Cash and Bank Deposits Details

- Once the details have been entered and if the user clicks on “continue” a new entry is added under the CASH & BANK DEPOSITS. The above steps can be repeated for other asset components like Investments, Insurance, Property, Motor vehicle and Others

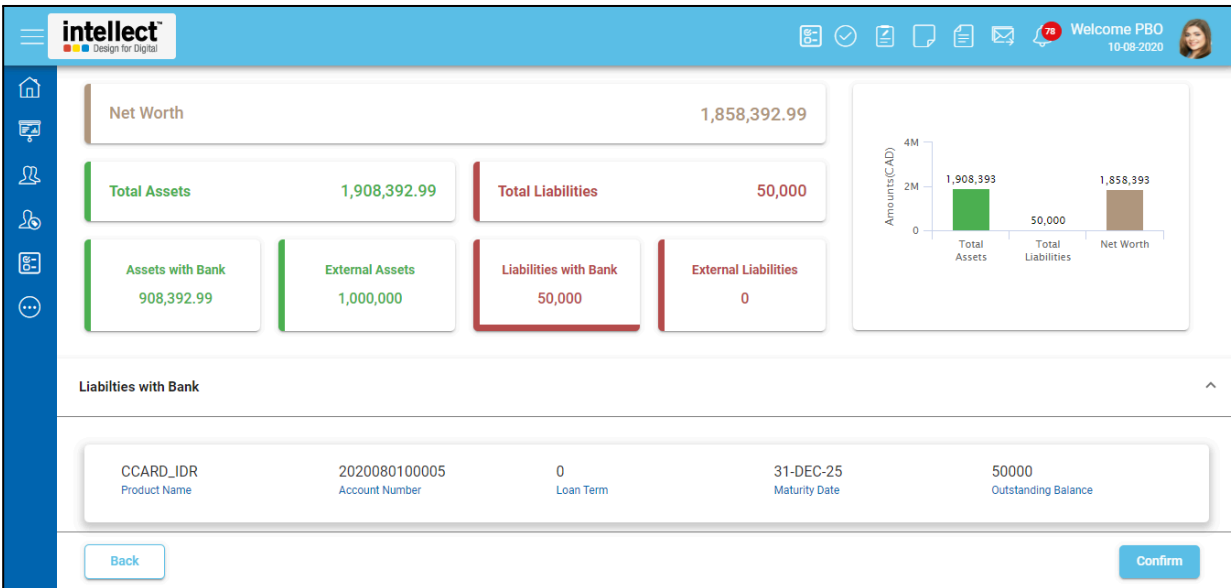

Screen: New Cash and Bank Deposits Entry Added

7. View/Capture Liability details:
 - a. The graph of the Total Assets, Total Liabilities and Net Worth is shown
 - b. The aggregate amount of liabilities from “Liabilities with Bank” and “External Liabilities” will be calculated by the system and is shown in the card labeled “Total Liabilities”
 - c. To view the “Liabilities with Bank” details, the user needs to click on “Liabilities with Bank” card
 - d. To input the external liabilities details, the user needs to click on the “External Liabilities” card

Screen: View Net Worth - Liabilities

8. Liabilities with Bank - The liabilities that are held within the bank are automatically fetched by the system, aggregated and shown in the “Liabilities With Bank” card. These details are not editable

Screen: View Net Worth - Liabilities with Bank

9. External Liabilities - If the External Liabilities details are already captured, it will be available in the form of a card which can be viewed/modified

Assets with Bank 908,392.99 **External Assets** 1,000,000 **Liabilities with Bank** 50,000 **External Liabilities** 120,000

External Liabilities

Mortgage Loan Amount (CAD) 100000	Motor Vehicle Loan Amount (CAD) 20000	Overdraft / Personal Loan Amount (CAD) 0
Other Loan Amount (CAD) 0		

Back Confirm

Screen: View External Liabilities Details

10. User can edit the external liability component details by inputting the loan amount for each card as shown in the below picture

The screenshot displays the 'Capture External Liabilities Details' screen. At the top, there's a header with the Intellect logo and a navigation bar. Below the header, a summary section shows four categories: 'Assets with Bank' (908,392.99), 'External Assets' (1,000,000), 'Liabilities with Bank' (50,000), and 'External Liabilities' (120,000). The 'External Liabilities' section is expanded, showing four input fields for different types of loans: 'Mortgage Loan' (Amount (CAD) 100000), 'Motor Vehicle Loan' (Amount (CAD) 20000), 'Overdraft / Personal Loan' (Amount (CAD) 0), and 'Other Loan' (Amount (CAD) 0). At the bottom, there are 'Back' and 'Confirm' buttons.

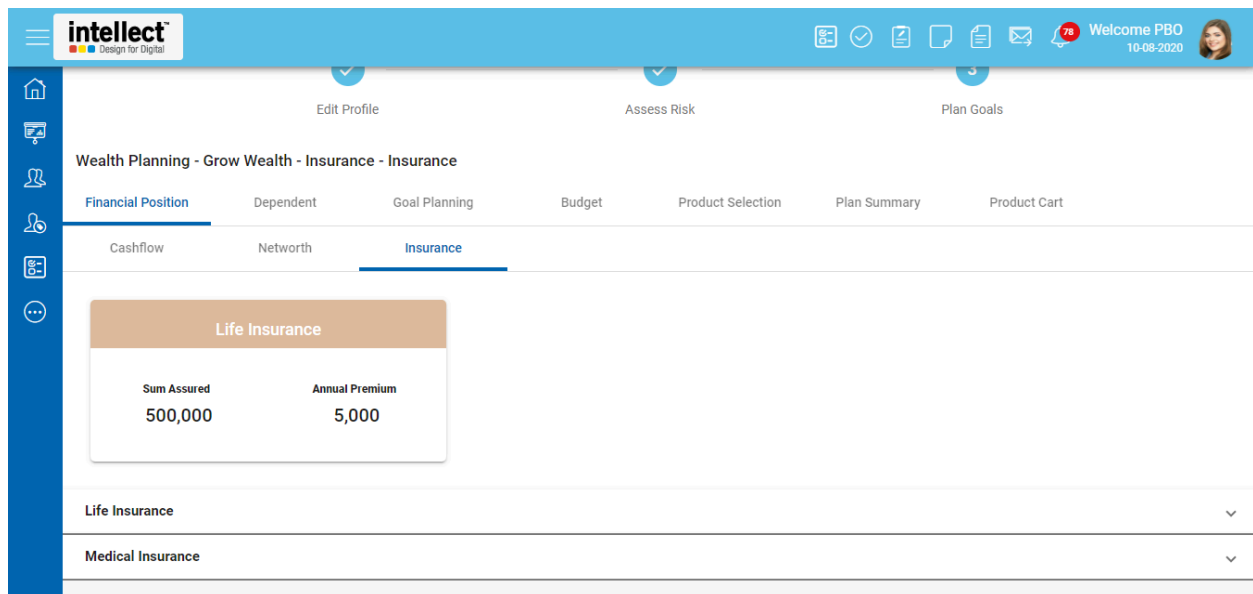

Screen: Capture External Liabilities Details

11. Once the Assets and Liabilities details are captured then the Net Worth is computed by the system. User clicks on "Confirm" to go to the next screen to capture the Dependents details. In case of Insurance plan purpose, "Confirm" will navigate the user to the Capture Insurance screen

4.8.1.4. Capture Insurance (Applicable only for Insurance Plan Purpose)

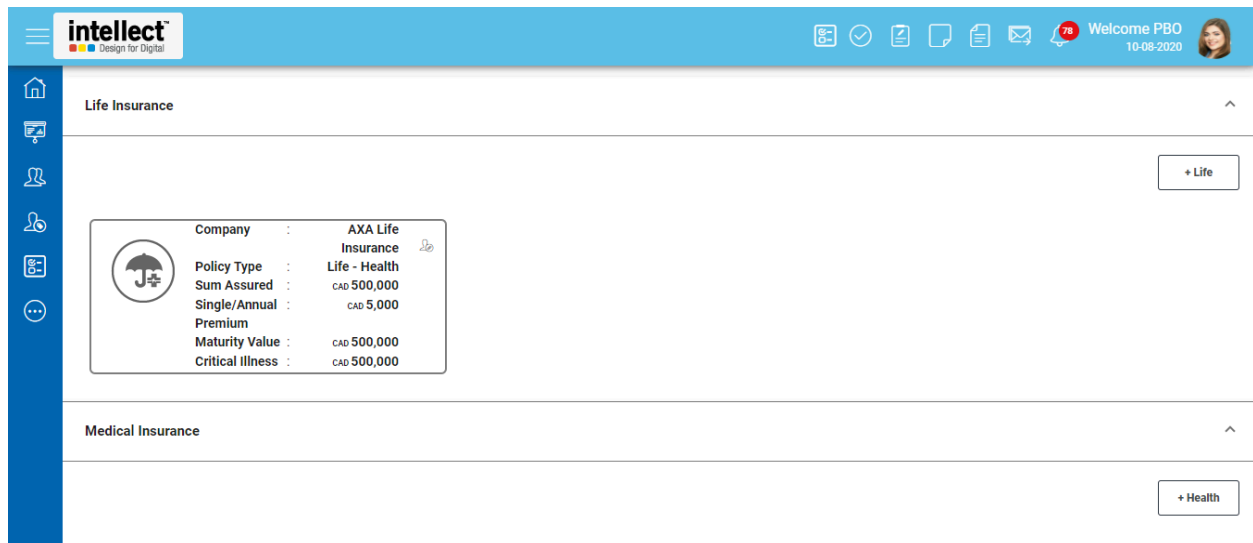

Insurance policies held by the customer can be captured in the Capture Insurance screen

1. View/Capture Insurance Details
 - a. The aggregate sum assured and annual premium of Life Insurance policies and Medical Insurance policies will be calculated by the system and displayed
 - b. To input the Life and Medical insurance details, the user needs to click on the "Life Insurance" and "Medical Insurance" tabs

Screen: View Insurance Summary

- The first level provides the Life and Health Insurance policies if already captured for the customer

Screen: View Insurance Policy

- "Life" button is clicked as shown in the above picture and the user can capture the Life Insurance Policy details. Once the details have been entered and if the user clicks on "Save " button

5. User clicks on "Continue" to go to the next screen to capture the Dependents details

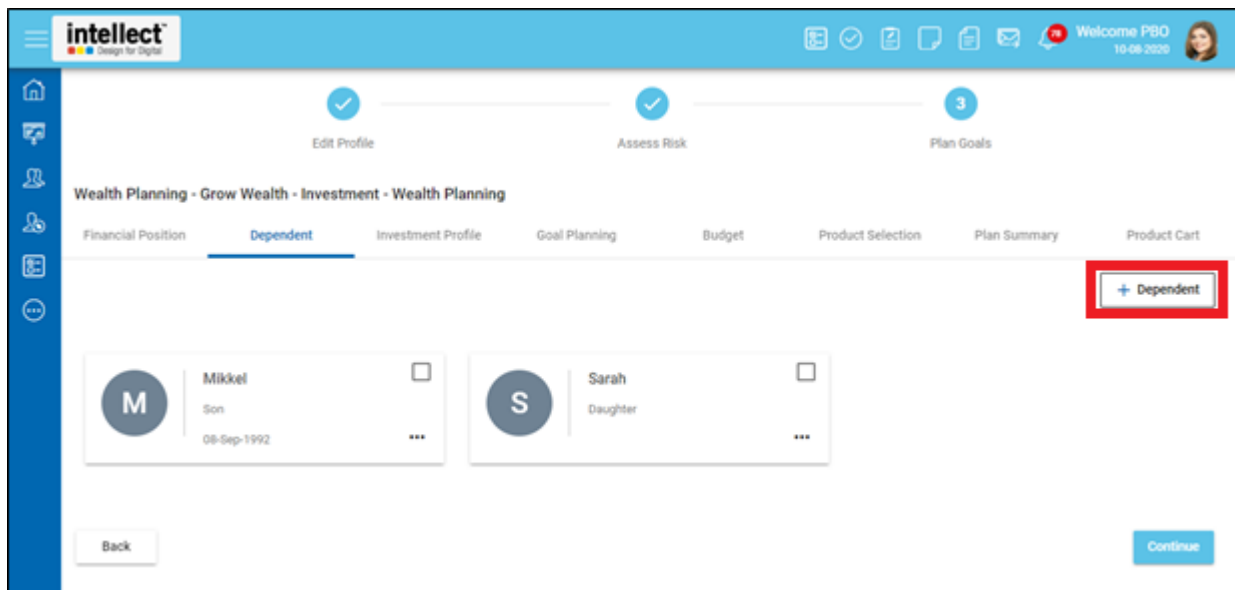

Screen: Capture Dependents Navigation

4.8.1.5. Capture Dependents

Dependents can be captured for the plan journey if the planning is done by the customer on behalf of the dependent. Dependents can be family members or friends of the customer

1. Dependent details are captured by clicking on the “+ Dependent” button. If the Dependent details are already captured, it will be available in the form of a card which can be viewed/modified by clicking on 3 dots

Screen: View Dependents

2. “+Dependent” button is clicked as shown in the above picture and the user can capture the dependent details. Input the dependent details and user clicks on “continue” button

Screen: Capture Dependent Details

3. New Dependent entry is added. The user can select the dependent for the plan by clicking on the check box available on the card

Screen: New Dependent Added

4. Once the Dependent details are captured, user clicks on "Continue" to go to the next screen to select the Investment Profile

The screenshot displays the 'Dependent' tab within a navigation menu. The menu includes 'Financial Position', 'Dependent', 'Goal Planning', 'Budget', 'Product Selection', 'Plan Summary', and 'Product Cart'. On the left, a vertical sidebar contains icons for a person, a list, a menu, and a bar chart. The main content area shows three dependent profiles, each with a circular icon containing a letter, a name, a relationship, a date of birth, and a selection checkbox. James (Son, 14-Feb-2017) and Mikkel (Daughter, 24-May-1994) have unchecked checkboxes, while Sarah (Daughter, 08-Jan-2016) has a checked checkbox. A '+ Dependent' button is located in the top right corner. At the bottom, there are 'Back' and 'Continue' buttons, with the 'Continue' button highlighted by a red rectangular box.

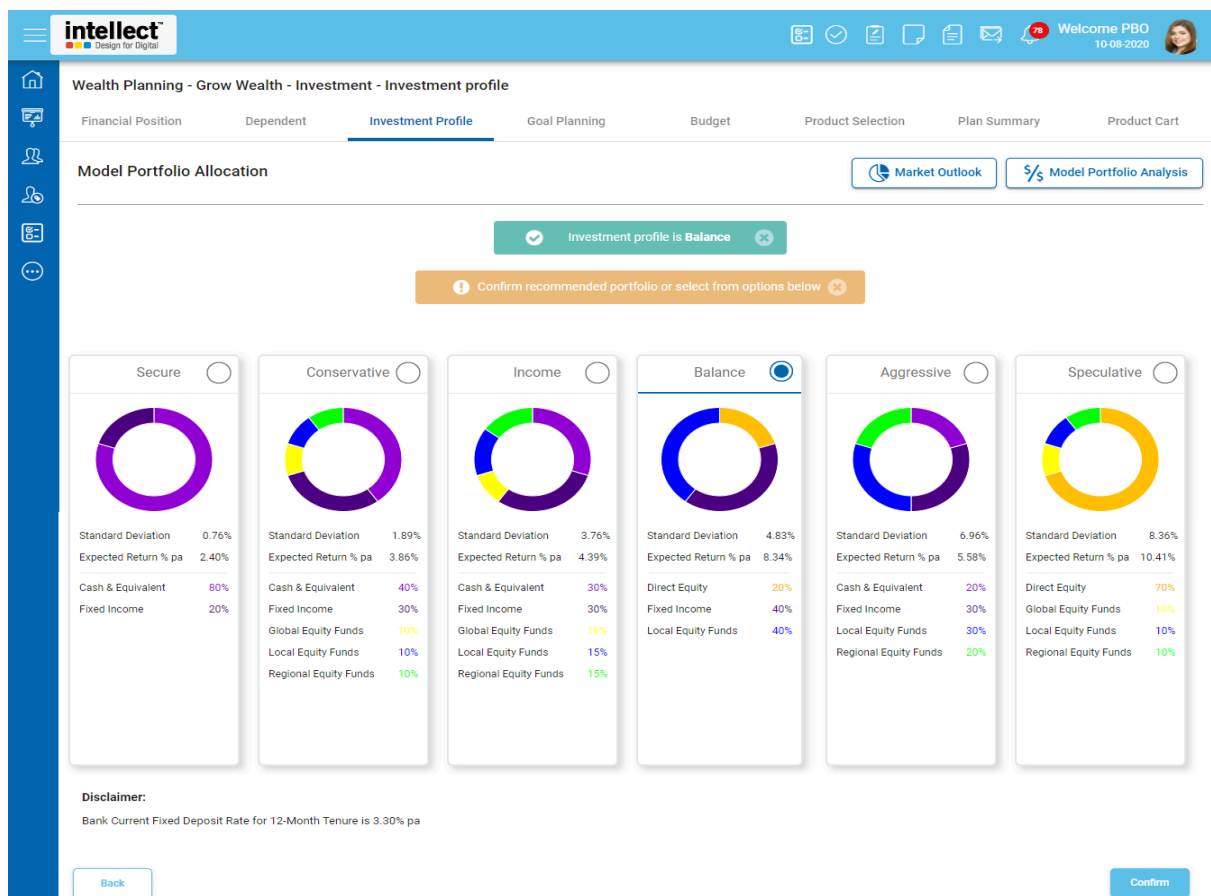

Screen: Select Investment Profile Navigation

4.8.1.6. Select Investment Profile (Not Applicable for Insurance Plan Purpose)

Investment Profile page is used to align the Risk Profile of the Customer for their goals. On this page the customer can view the entire array of investment profiles available and their underlying asset allocations along with their personal Risk Profile. They can also compare 2 investment profiles and check the market outlook through this page

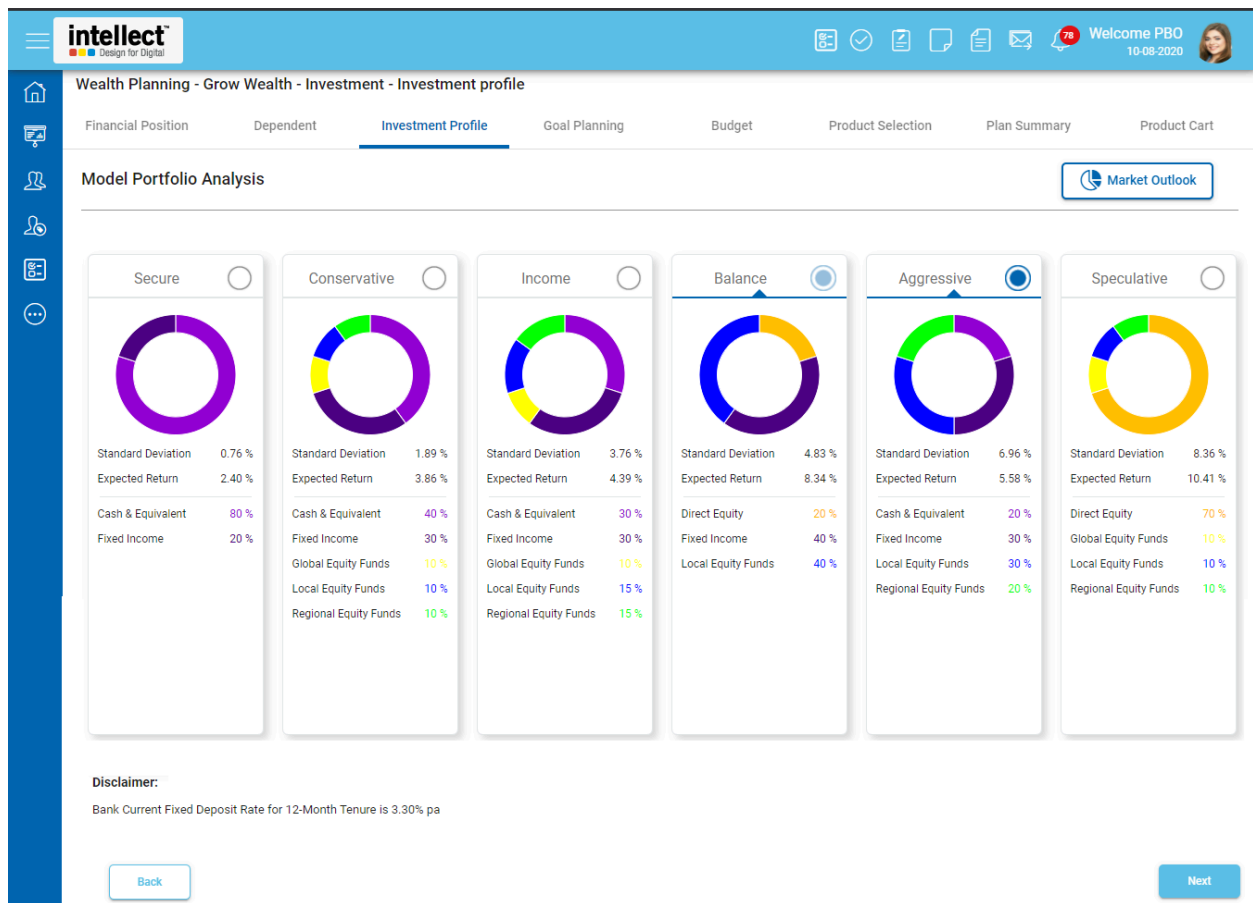

Selection of Model Portfolio for Plan

1. Upon landing on this page, the user can view the various risk profiles and applicable model portfolio (Asset Allocations) under each of these risk profiles
2. By default the risk profile of the customer becomes the risk profile of the plan itself but the user can choose any of the risk profile that seems to be aligned to the customer's goal purpose and objective

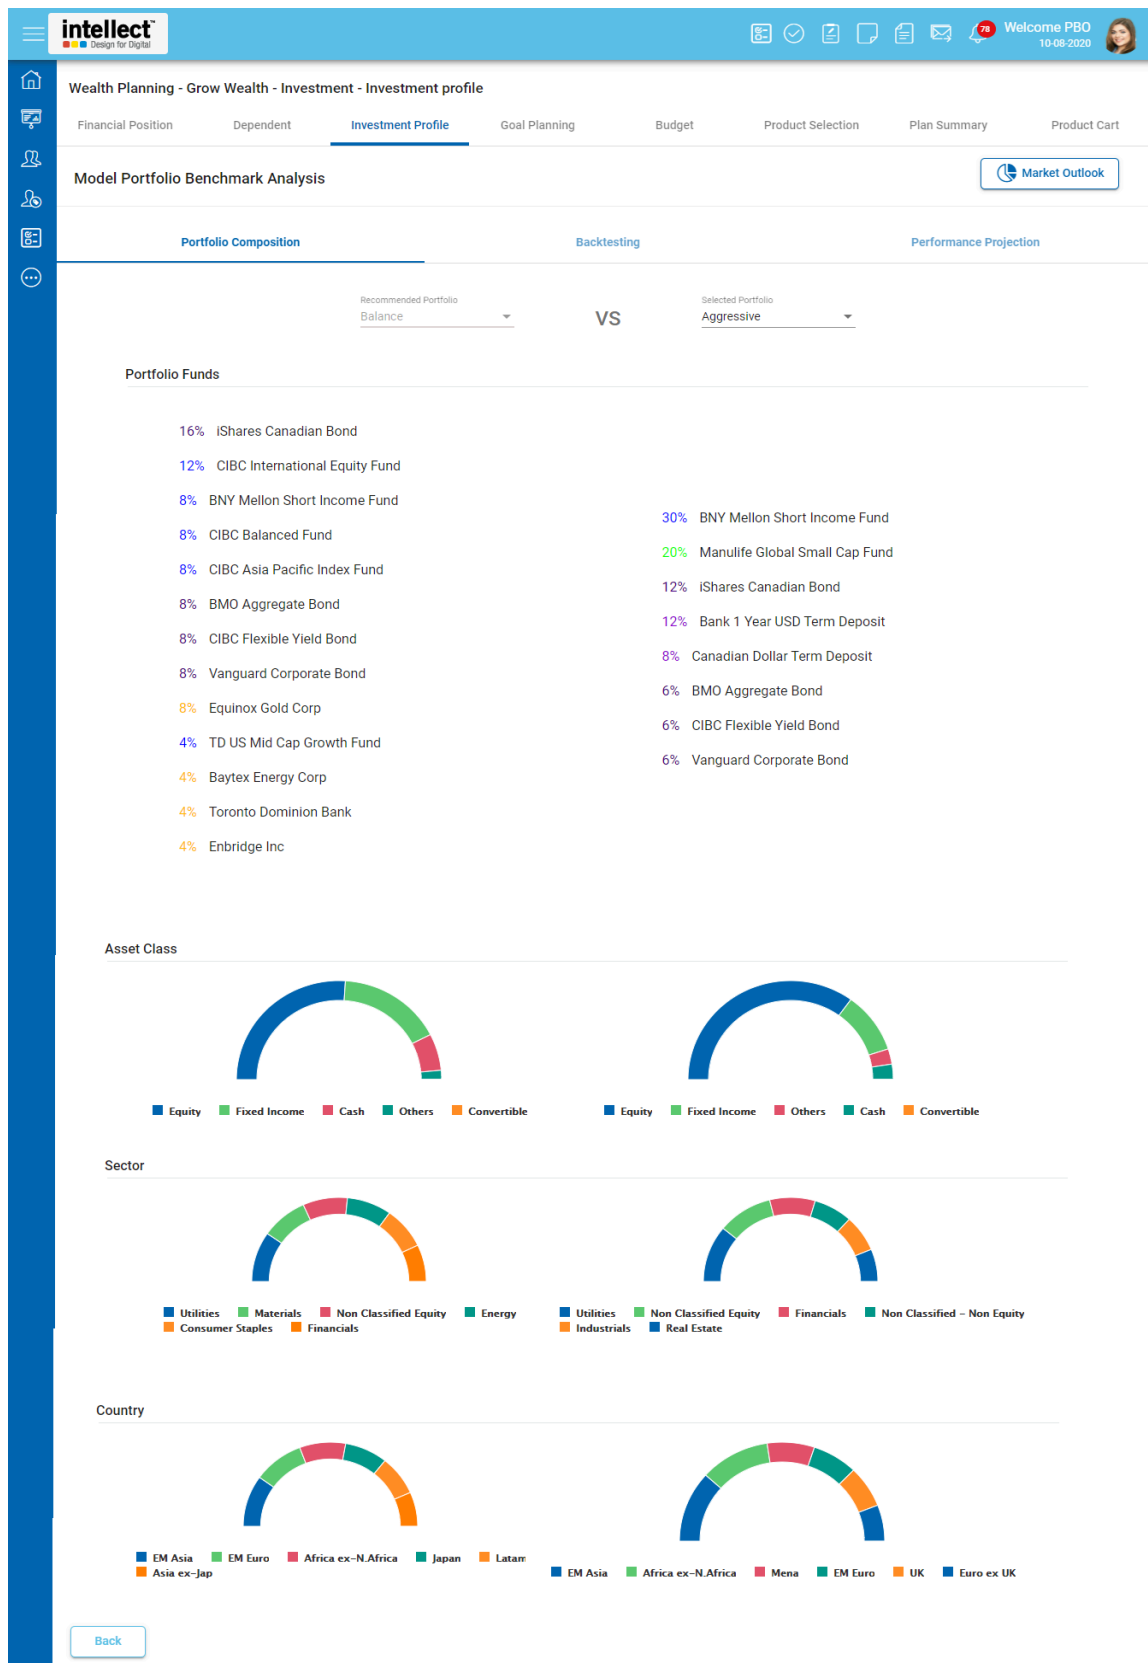

Screen: Investment Profile Landing Page - Default Model Portfolio

3. Portfolio Comparison - The user can compare investment profiles by selecting any Investment profile and then clicking on the “Model Portfolio Analysis” button to navigate to the Model Portfolio Analysis screen. Once on this screen, the user can select any investment profile and click on “Next” to navigate to the Benchmark analysis screen and compare the default and the selected investment profiles
 - a. Within the Analysis screen, the user will be able to view the following for both the profiles:
 - i. Portfolio Composition - View Fund details, asset class, sector wise and country wise break up for both profiles
 - ii. Back testing results - View Back testing results for both the profiles which provides the ‘portfolio performance’ for the selected historical period for a given portfolio of securities
 - iii. Performance Projection - View Performance projections for a definite period of time into the future

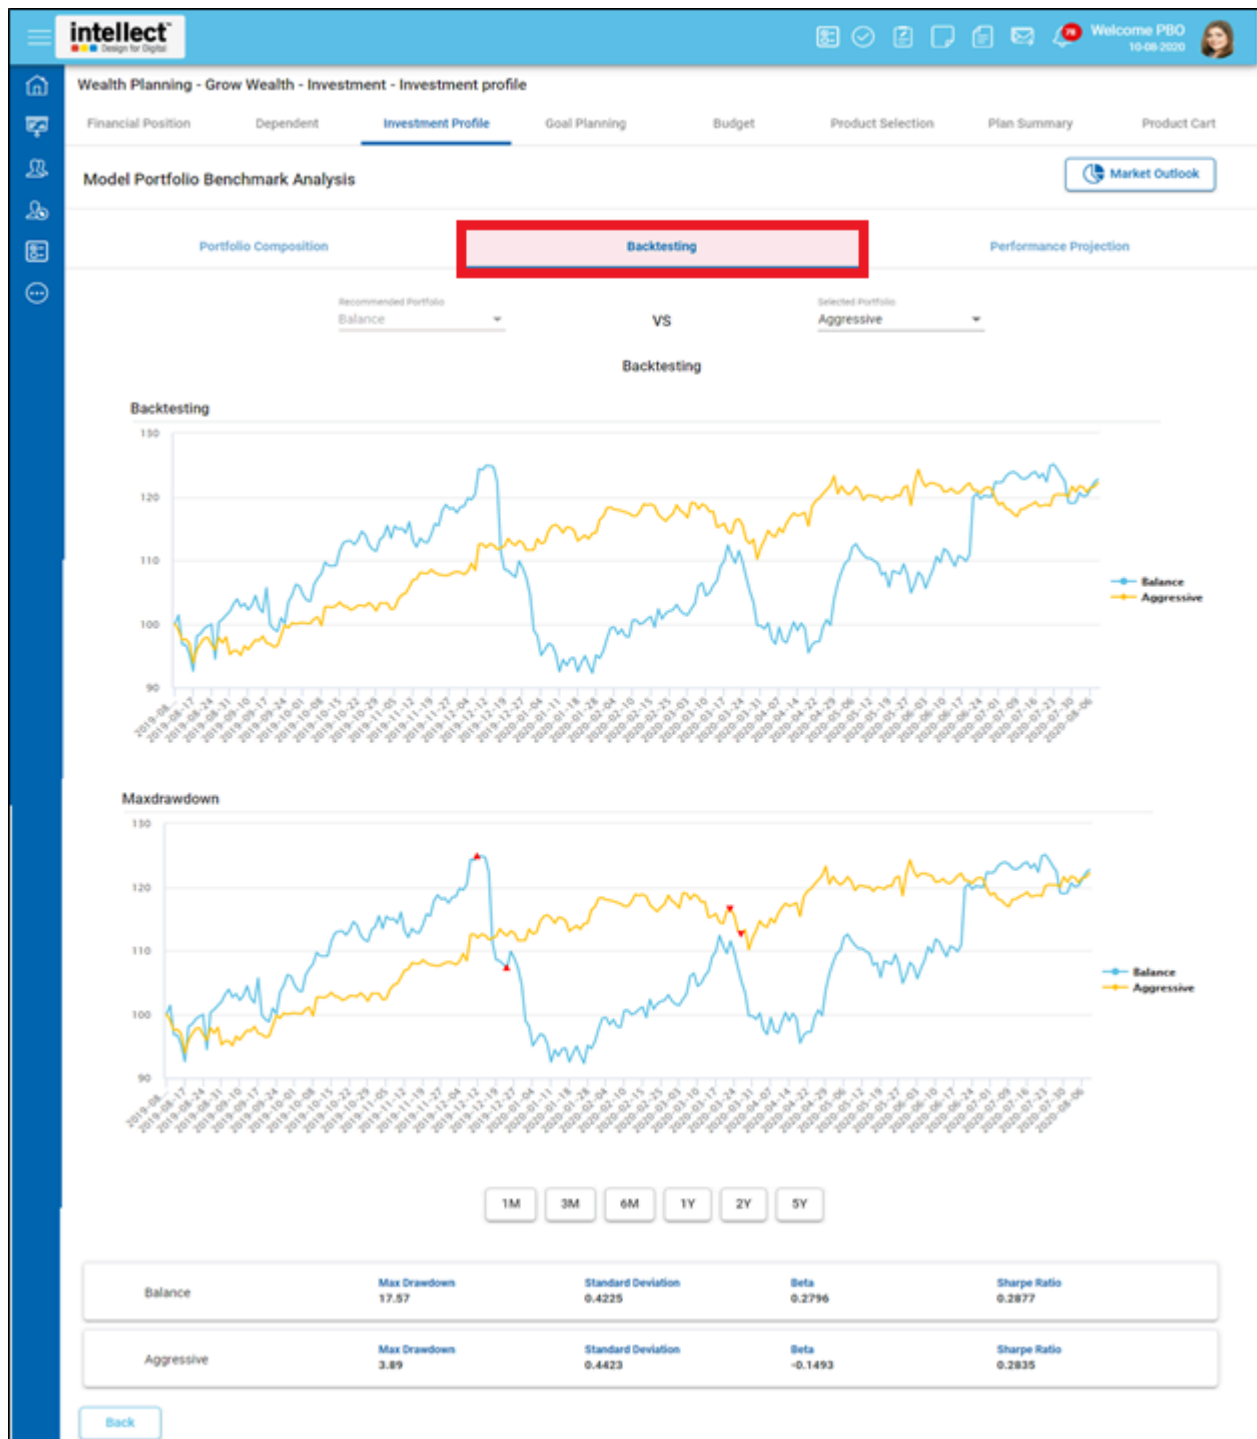

Screen: Model Portfolio Analysis

4. The user views the Portfolio Composition of the Investment profiles selected for comparison
 - a. **Portfolio Composition** - View Fund details, asset class, sector wise and country wise break up for both profiles. Asset, Sector and Country wise comparison for the Investment Profiles is based on the Mutual Funds present in the respective investment profiles

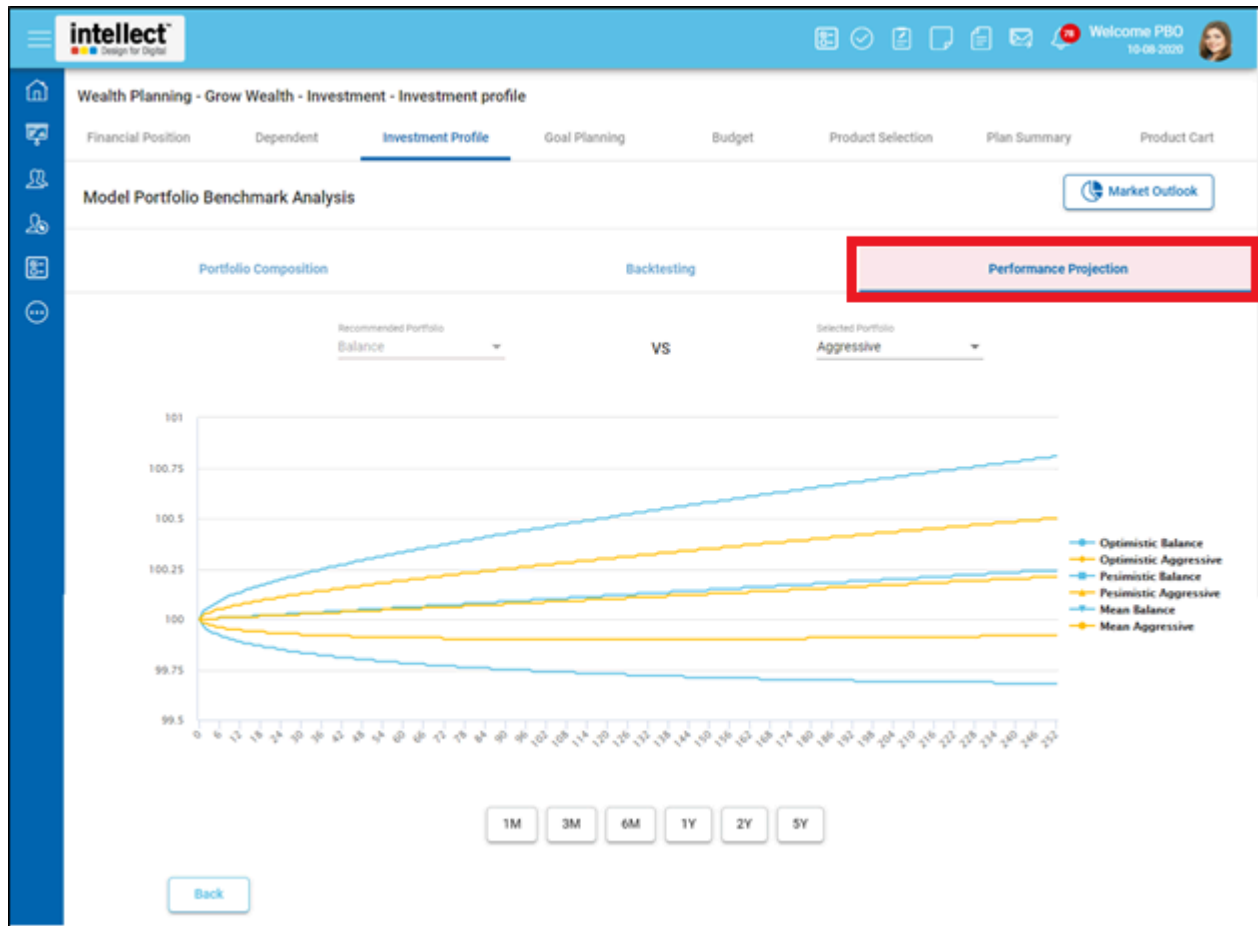

Screen: Model Portfolio comparison - Product Composition

5. User clicks on the “Back testing” tab. The user views the back testing results for the investment profiles selected for comparison
 - a. **Back testing results** - View Back testing and Max Drawdown results for both the profiles which provide the ‘portfolio performance’ for the selected historical period for a given portfolio of securities. Backtesting comparison results for the Investment Profiles is based on the Mutual Funds present in the respective investment profiles (refer to section 8 Annexure for computation logic details)

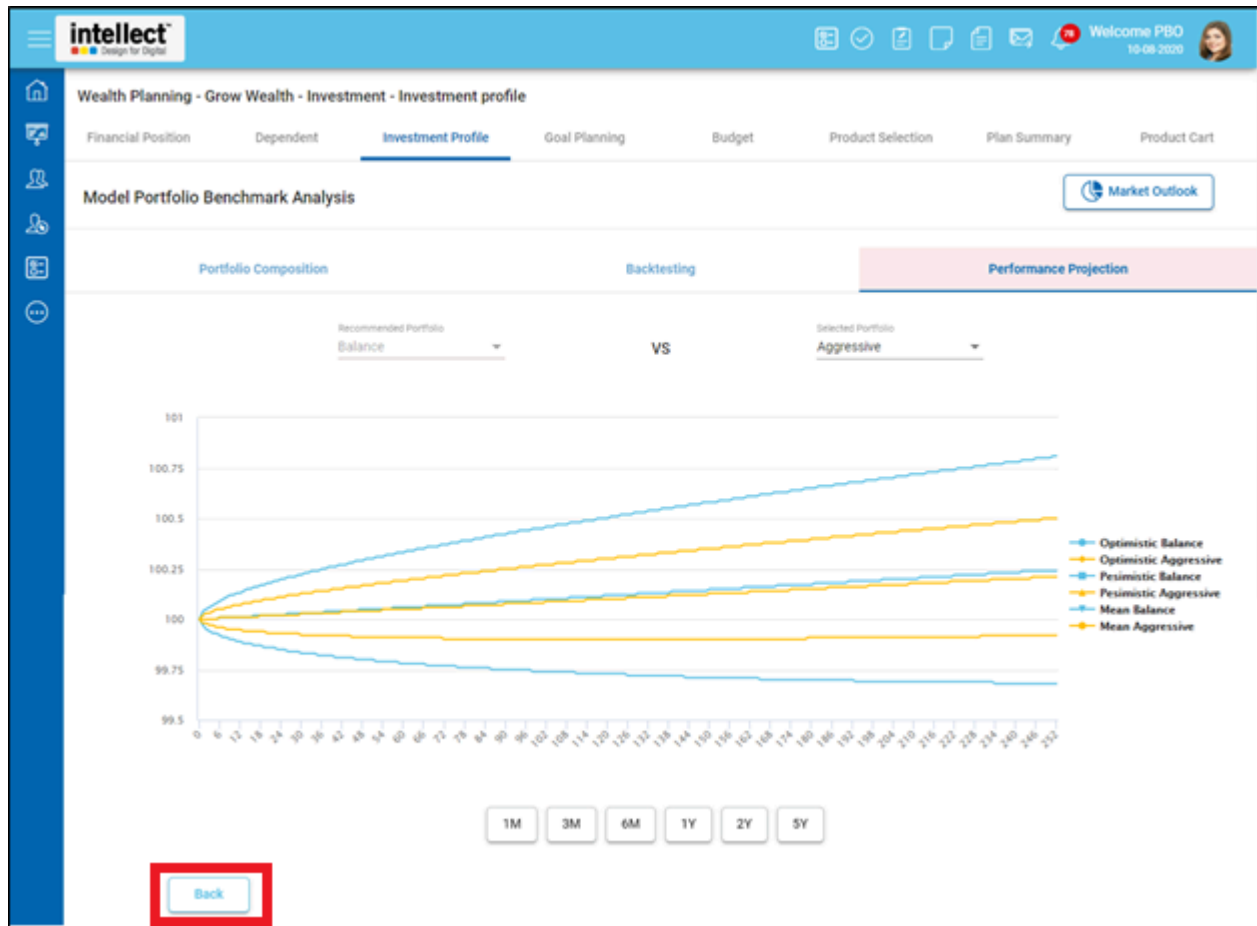

Screen: Model Portfolio comparison – Back testing

6. User clicks on the Performance Projection tab. The user views the performance projection results for the investment profiles selected for comparison
 - a. **Performance Projection** - View Performance projections for a definite period of time into the future (refer to section 8 Annexure for computation logic details)

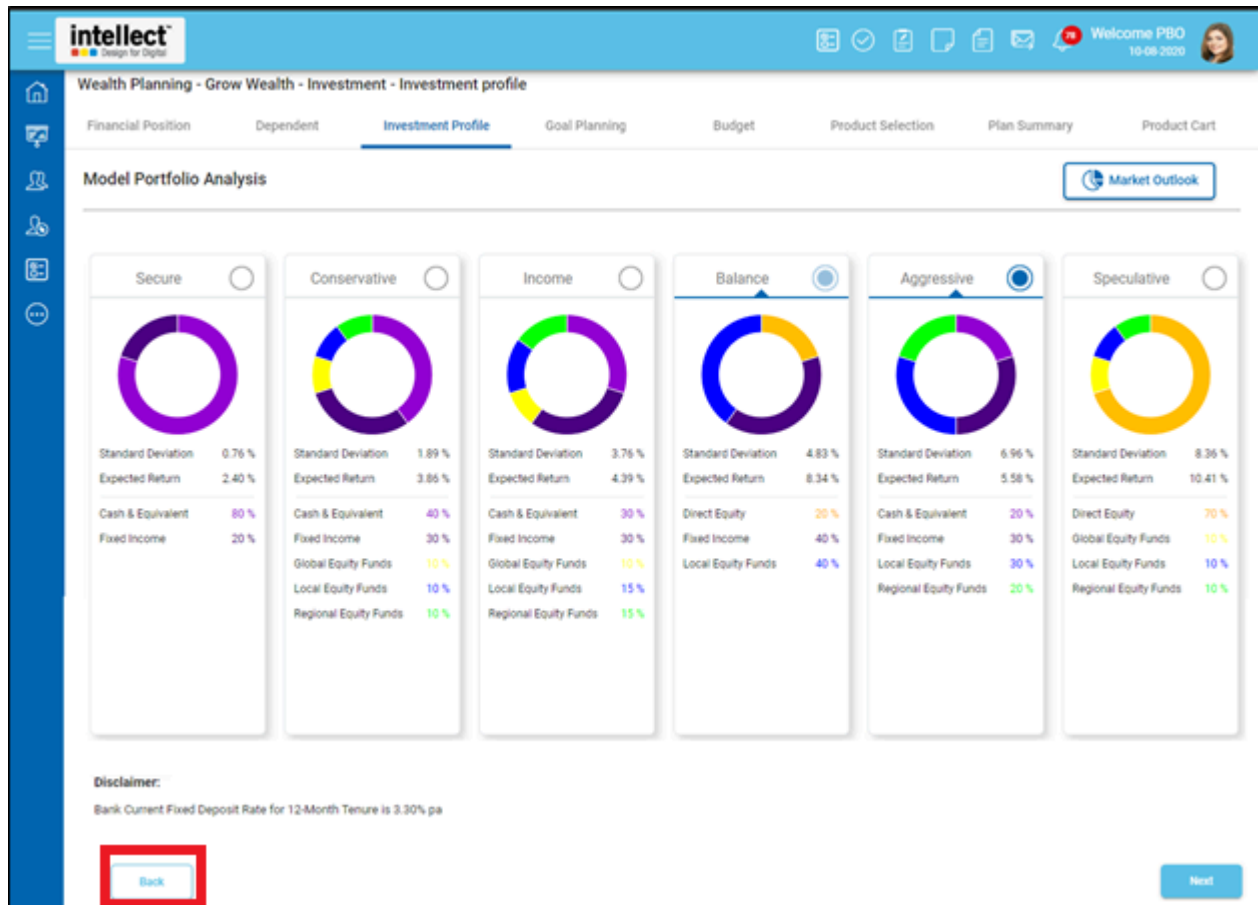

Screen: Model Portfolio Comparison - Performance Projection

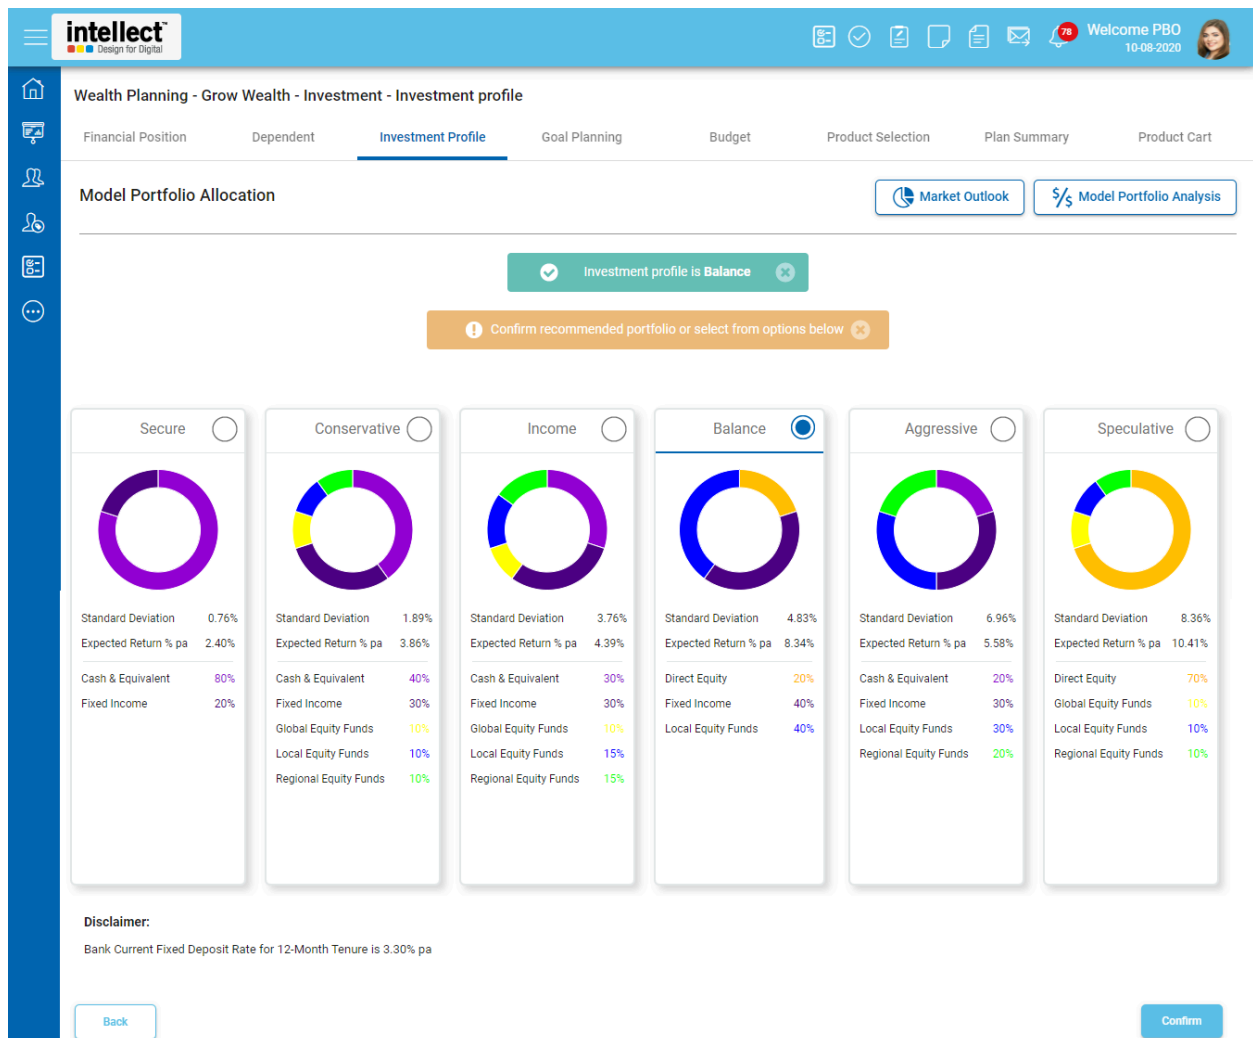

- The user can navigate back to the Investment Profile screen by clicking on the “Back” button and then again the subsequent “Back” button

Screen: Model Portfolio Analysis Navigation

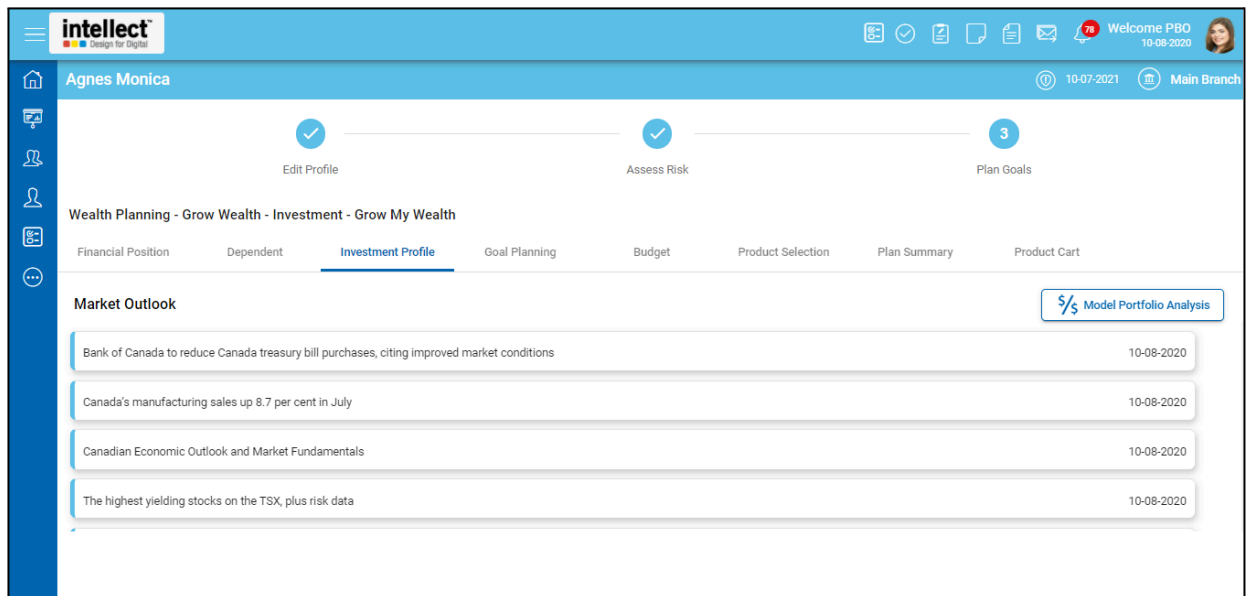

Screen: Investment Profile Navigation

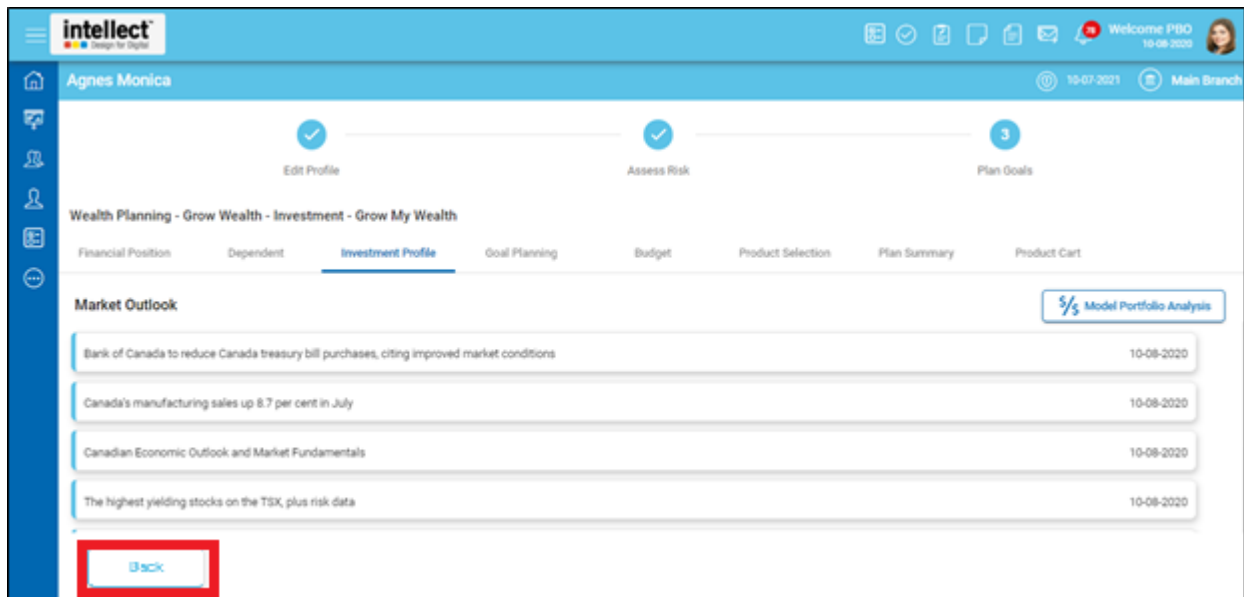

Screen: Investment Profile selection for Plan

8. The user can navigate to the Market Outlook page by clicking on the “Market Outlook” button present in the Investment Profile screen if they wish to. The market outlook screen can also be accessed from the Model Portfolio Analysis screen by clicking on the “Market Outlook” button present there
 - a. The Market Outlook screen shows the most recent news pertaining to the market to the user. This would help them take more informed decisions. This screen also has the “Model Portfolio Analysis” button present in it that allows the user to navigate directly to the comparison screen should they wish to. Hence, both the Market Outlook and the Model Portfolio Analysis screens are accessible from one another

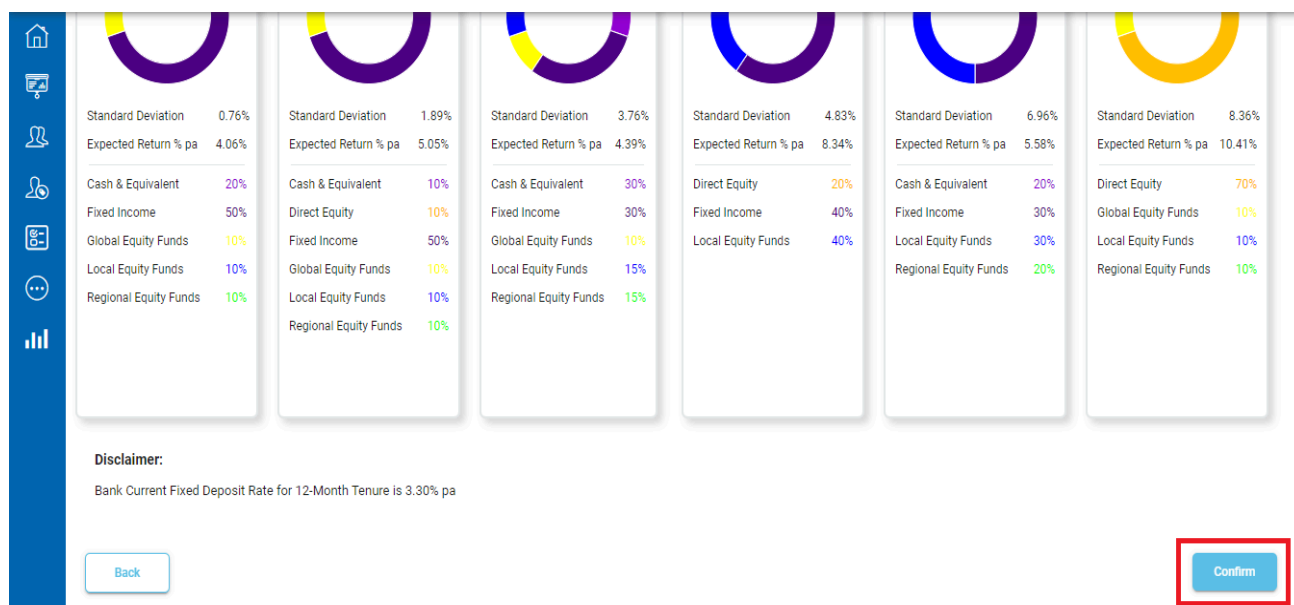

Screen: Investment Profile - Market Outlook

- The user can navigate back to the Investment Profile screen from the Market Outlook screen by clicking on the “Back” button

Screen: Investment Profile Navigation

- Once on the Investment profile screen, the user can click on the “Confirm” button after selecting the Investment profile that they wish to proceed with, to move on to the Goal Planning stage of the Plan Journey

Screen: Goal Planning Navigation

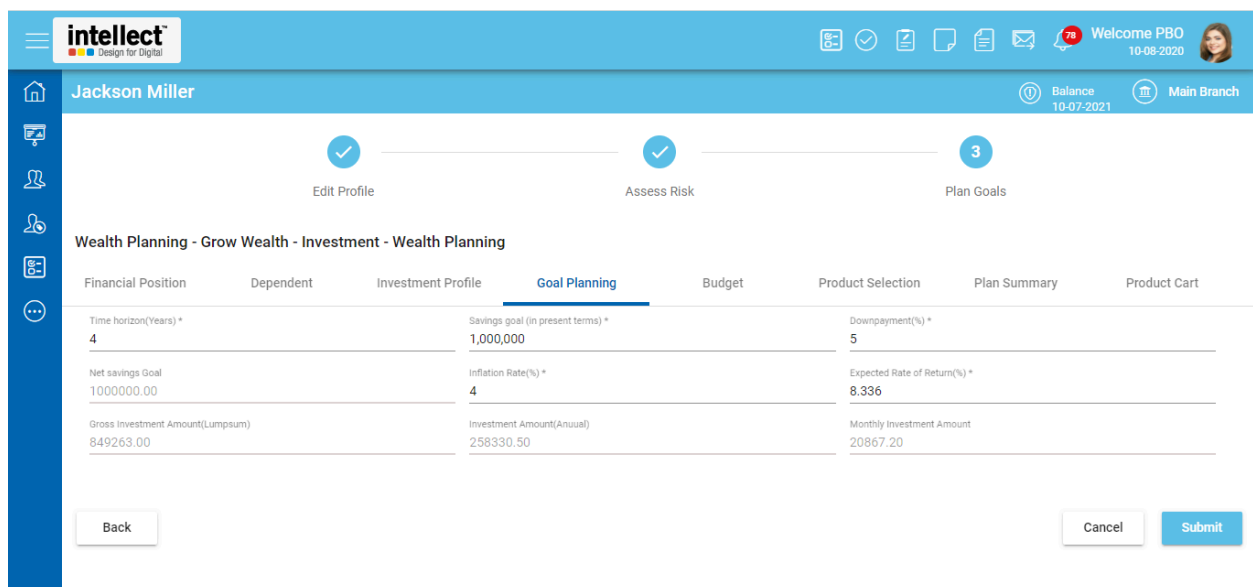

4.8.1.7. Goal Planning

Goal Planning is used for determining the goal amount for the plan. The calculation logic and input fields would be different for the combination of plan type, plan objective and plan purpose. The below table provides the information about different calculators used for goal planning (refer to the section 8 Annexure for Calculator Computation Logic details)

Plan Type	Plan Objective	Plan Purpose	Calculator
Wealth Planning	Grow Wealth	Investment	Savings Calculator - Investment
Wealth Planning	Grow Wealth	Insurance	Savings Calculator - Insurance
Wealth Planning	Preserve Wealth	Investment	Not Applicable
Education Planning	Education	Investment	Education Calculator - Investment
Education Planning	Education	Insurance	Education Calculator - Insurance
Retirement Planning	Retirement	Investment	Retirement Calculator - Investment
Retirement Planning	Retirement	Insurance	Retirement Calculator - Insurance
Tax Planning	Tax	Investment	Tax Calculator - Investment
Tax Planning	Tax	Insurance	Tax Calculator - Insurance
Protection Planning	Death and Disability	Insurance	Death and Disability Calculator
Protection Planning	Critical Illness	Insurance	Critical Illness Calculator

Protection Planning	Hospitalization and Health	Insurance	Hospitalization and Health Calculator
Protection Planning	Legacy Tax	Insurance	Legacy Tax Calculator
Protection Planning	Credit Life	Insurance	Not Applicable
Protection Planning	Property	Insurance	Not Applicable

1. The user on this page is provided with a plan specific calculator to calculate the amount of investment needed for the plan
2. The user will enter the details specific to the plan calculator to calculate the amount of investment needed for the fulfilling the plan needs

The screenshot shows the Intellect Wealth Planning interface for user Jackson Miller. The top navigation bar includes the Intellect logo, a user profile section with 'Welcome PBO' and '10-08-2020', and a 'Main Branch' link. The main content area is titled 'Wealth Planning - Grow Wealth - Investment - Wealth Planning'. Below this, there are three steps: 'Edit Profile', 'Assess Risk', and 'Plan Goals' (the current step, indicated by a blue circle with the number 3). The 'Plan Goals' section is divided into several tabs: 'Financial Position', 'Dependent', 'Investment Profile', 'Goal Planning' (selected), 'Budget', 'Product Selection', 'Plan Summary', and 'Product Cart'. The 'Goal Planning' tab contains a form with the following fields and values:

Financial Position	Dependent	Investment Profile	Goal Planning	Budget	Product Selection	Plan Summary	Product Cart
Time horizon(Years) *		Savings goal (in present terms) *		Downpayment(%) *			
4		1,000,000		5			
Net savings Goal		Inflation Rate(%) *		Expected Rate of Return(%) *			
1000000.00		4		8.336			
Gross Investment Amount(Lumpsum)		Investment Amount(Annual)		Monthly Investment Amount			
849263.00		258330.50		20867.20			

At the bottom of the form, there are three buttons: 'Back', 'Cancel', and 'Submit'.

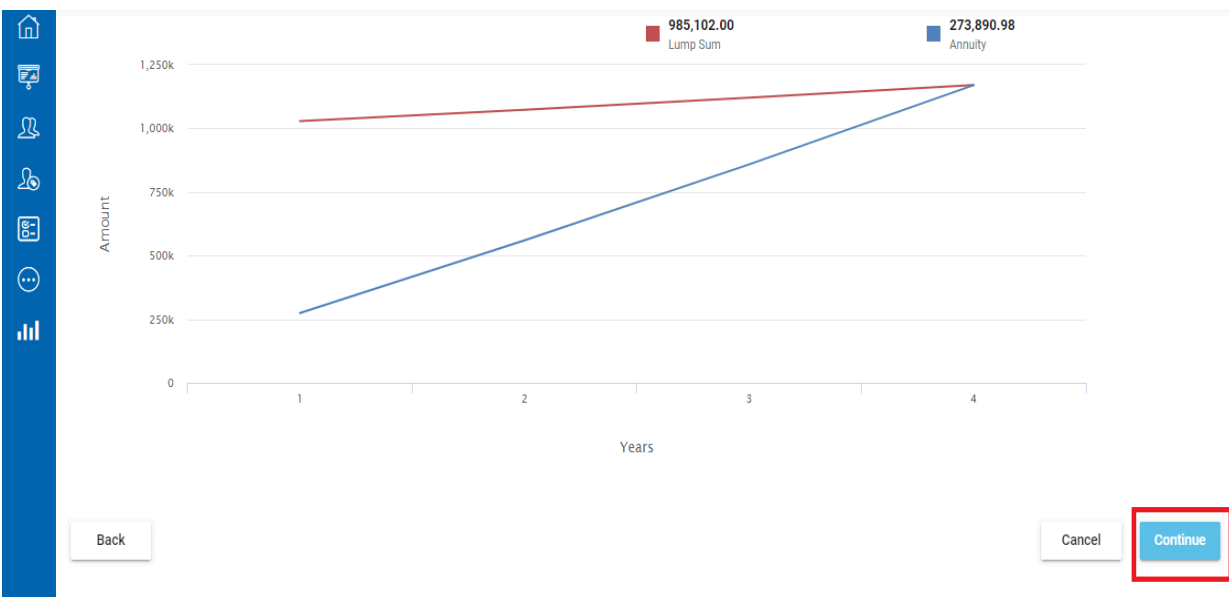

Screen: Capture Goal Calculation Input Details

3. The amount calculated will then be compared with the existing assets or coverage to determine the shortfall or surplus in target amount
4. The calculation of the investment amount will vary from one plan type to another as each plan type will have its own unique calculator

Screen: View Goal Amount Required

- User clicks on “Continue” to navigate to the Budgeting Assets with the Bank

Screen: Budgeting Assets with the Bank Navigation

4.8.1.8. Budgeting Assets with the Bank

“Budgeting Assets with the Bank” allows the user to assign/tag their “existing assets with the bank” to the current plan to fund the plan. The process of assigning/tagging would be useful for marking the asset to fulfill the plan objective and track the completion status of the plan based on the performance of the assets tagged to the plan

- User can view the summary of assets tagged to different plans and the untagged assets amount. The available assets and assigned assets graphs are shown

- a. Available for Tagging = Available for Tagging (Internal) + Available for Tagging (External)
- b. Total Assets tagged to other plans = Tagged Assets to Other Plans (Internal) + Tagged Assets to Other Plans (External)
- c. Total Assets with Bank = Total Assets (Internal)
- d. Available for Tagging (Internal) = Total Assets (Internal) - Tagged Assets to Other Plans (Internal)
- e. Tagged to Other Plans = Tagged Assets to Other Plans (Internal)
- f. External Assets = Total Assets (External)
- g. Available for Tagging (External) = Total Assets (External) - Tagged Assets to Other Plans (External)
- h. Assigned Not With Bank = Tagged Assets to Other Plans (External)

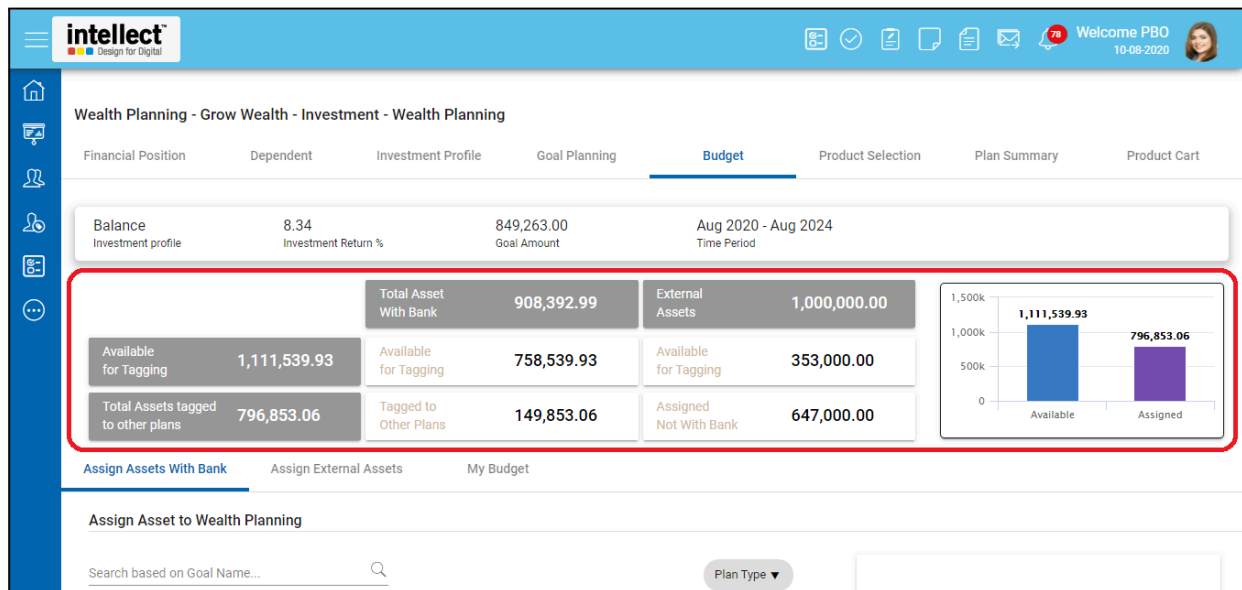

Example:

In the below example, for the customer

- i. Total Assets (Internal) – 908,392.99
- ii. Total Assets (External) – 1,000,000.00
- iii. Tagged Assets to Other Plans (Internal) – 149,853.06
- iv. Tagged Assets to Other Plans (External) – 647,000.00

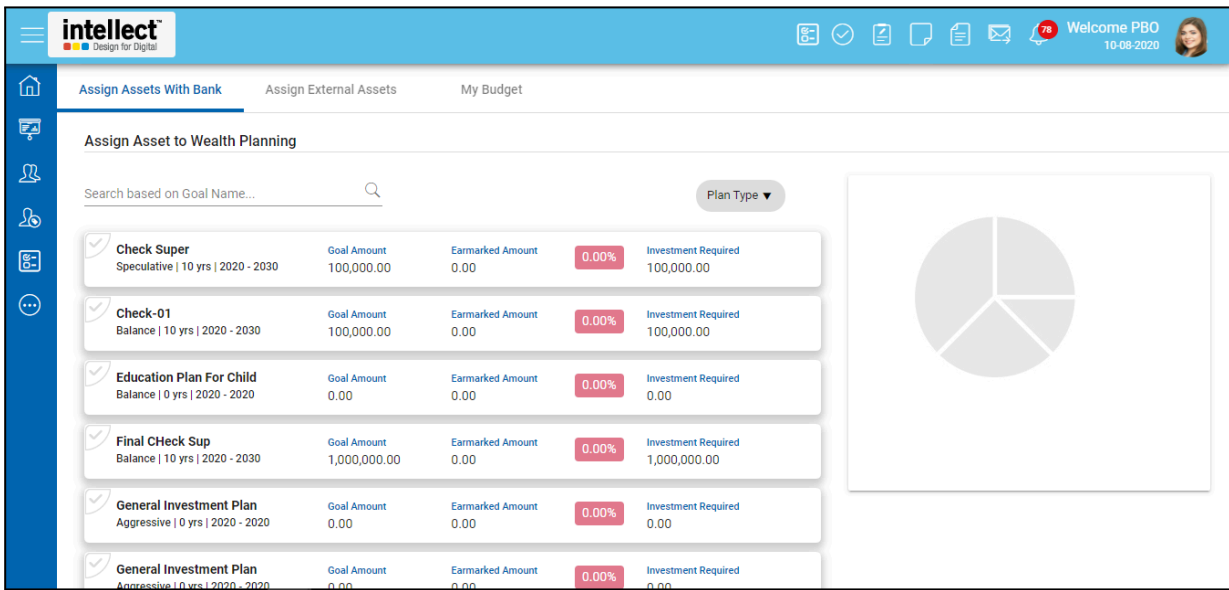

System computes the following details for the budgeting

- i. Available for Tagging (Internal) = 908,392.99 – 149,853.06 = 758,539.93
- ii. Available for Tagging (External) = 1,000,000.00 - 647,000.00 = 353,000.00
- iii. Available for Tagging = 758,539.93 + 353,000.00 = 1,111,539.93
- iv. Total Assets tagged to other plans = 149,853.06 + 647,000.00

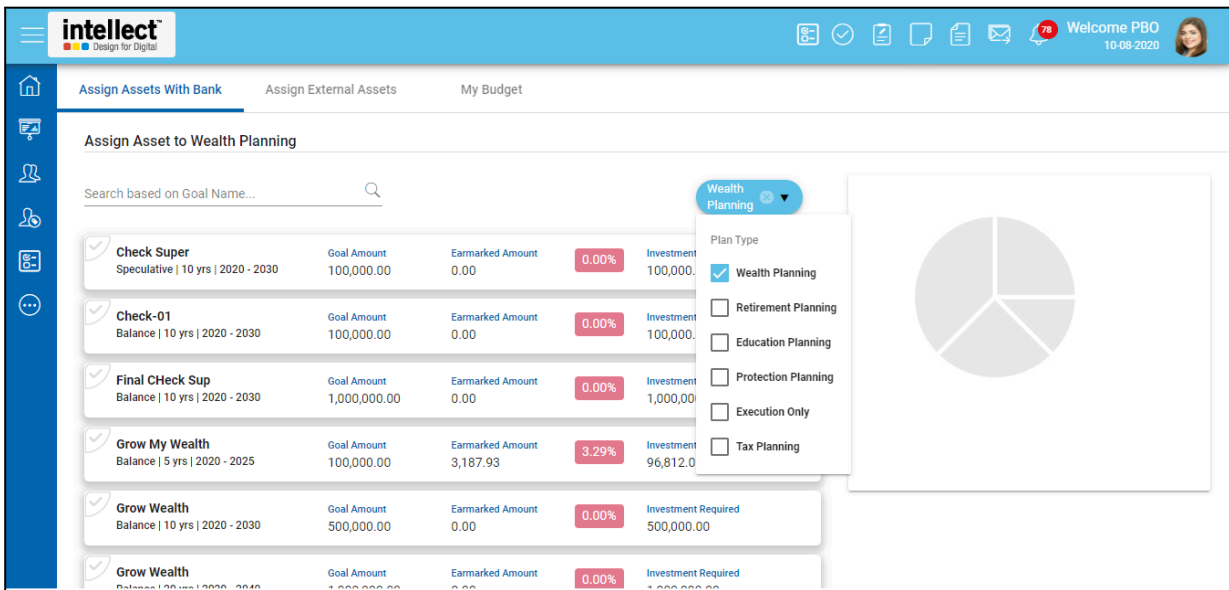

Screen: Assignment Overall Summary

2. System displays the existing assignment of assets tagged to the other plans which are already planned or under planning

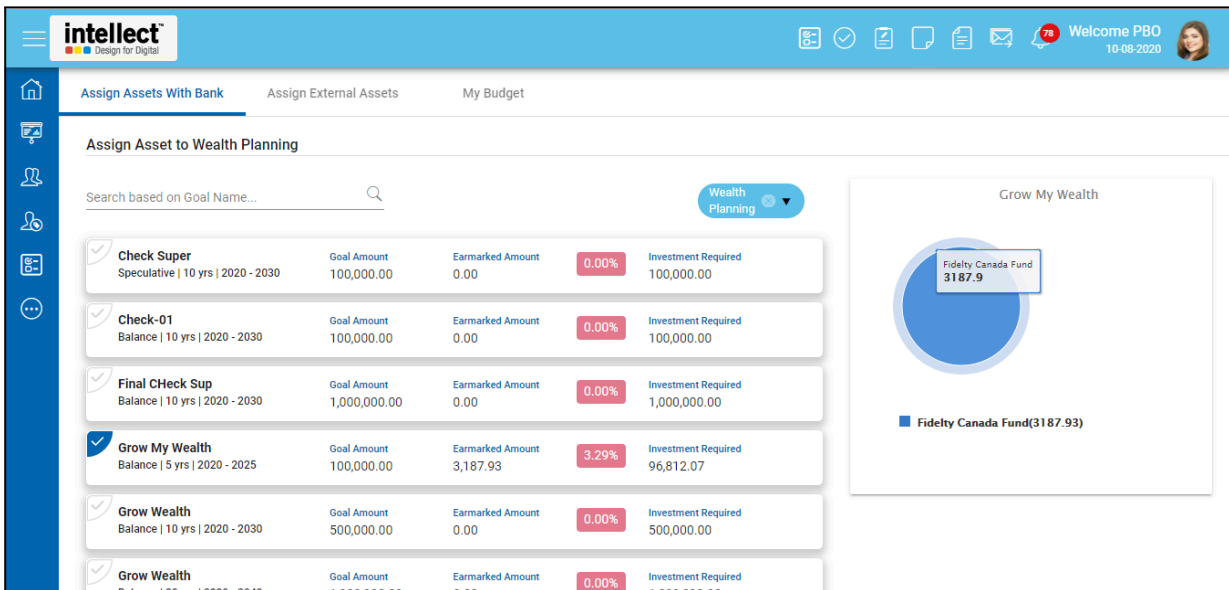

Screen: Summary of Assets tagged to Other Plans

- User can filter based on the plan type to see percentage of assets tagged to other plans

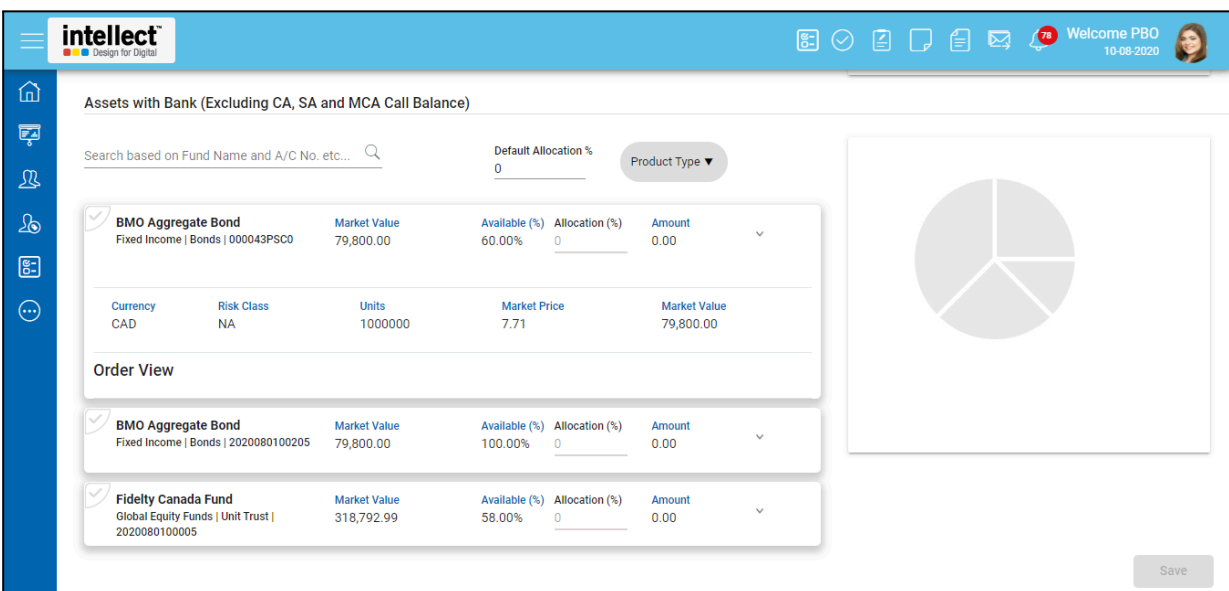

Screen: Summary of Assets tagged to Other Plans - Filter by Plan Type

- User can check the assets tagged to the individual plan by selecting the specific plan. The pie chart on the right side displays the composition of assets tagged to that specific plan

Screen: Assets tagged to Specific Plan - View

- List of all existing assets with the bank are displayed for assigning to the current plan. The available percentage of asset value for assignment is displayed on the card

Screen: Available Assets with Bank for Assignment to Current Plan

- User can filter based on the product type to assign assets to the current plan

4.8.1.10. Select the Products

This process allows the user to see the products available to the customer for composing the plan portfolio. Before a user selects a product as part of their plan, there are different sets of questions and doubts that appear in their minds. User can view and analyze

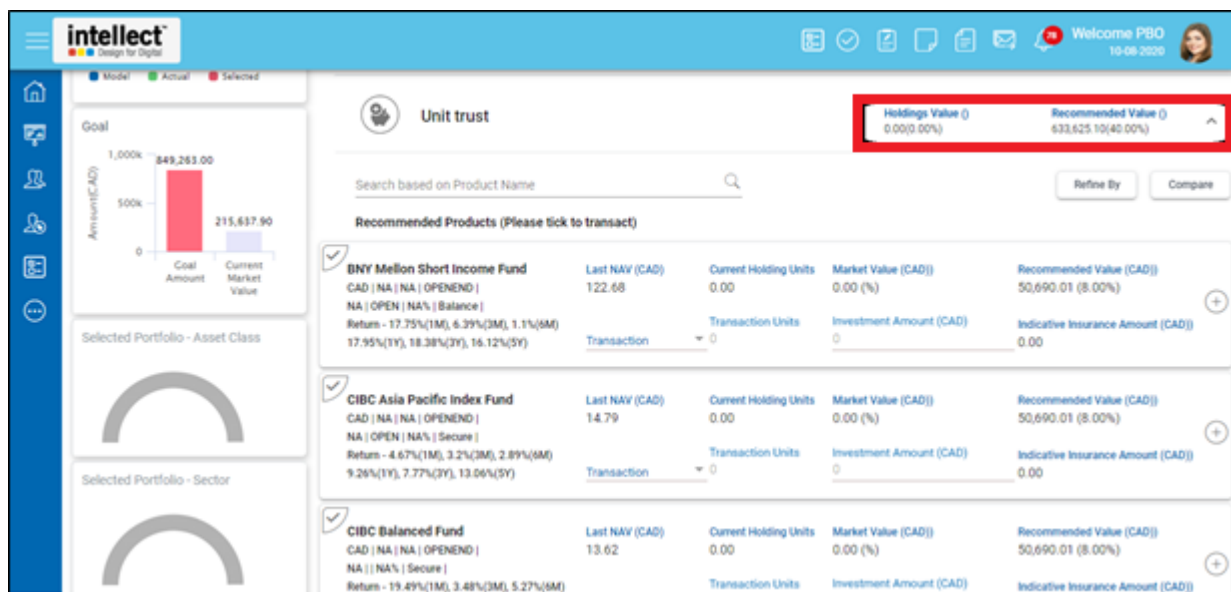

detailed information on each of the products

1. The user can see the list of product types which the customer can choose for investing
2. These products are grouped by Product Types i.e. all the products maintained in the application will be displayed under the following product types:
 - a. Bonds
 - b. Unit Trust
 - c. Insurance

Screen: Product Selection – Product Type View

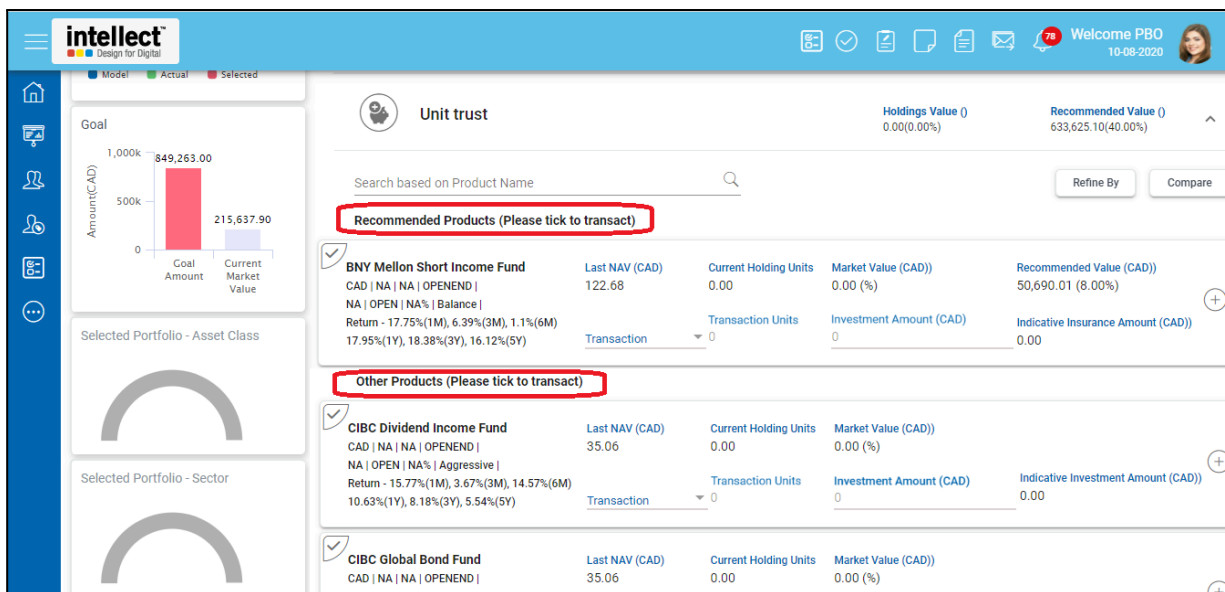

3. At each of the product type levels, user can click on the down arrow to view the list of products. The following fields will be shown at each product type level:
 - a. Holdings value: This field will display the current holdings value if the customer already holds this product type
 - b. Recommended Value: System recommends how much the customer should invest in each of the product types and also for the individual product as well. The system displays the recommended products and other products

Screen: Product Selection - Expanding the Product Type View

3. Under each of the Product Type, system displays the list of products in further sub grouping:

- a. Recommended Products
- b. Other Products

Screen: Product Selection - Recommended and Other Products

4. For the recommended products, system displays the recommended value at the product type level and at each product level as well. The following points explains the functionality of Recommendation Engine:

- a. Recommended Products: The products recommended by the bank for the investment profile selected by the customer will be displayed under the recommended products section

- b. Recommended Value: The additional investment amount required for the customer to fulfill the plan objective would be distributed proportionately based on the % allocation recommended by the bank for each product in the investment profile selected by the customer for the plan. Additional Investment Amount required for the plan is derived by subtracting the internal and external assets tagged to the plan in the budgeting screen from the plan amount

Investment Profile	Target Return % pa	Investment Required	Allocated Amount	Additional Investment	Goal Period

Screen: Product Recommended Products – Recommendation Value at Product Type and Individual Product

5. User can search the specific product by searching the product name using the search available at the product type level

Screen: Product Selection - Searching by Product Name

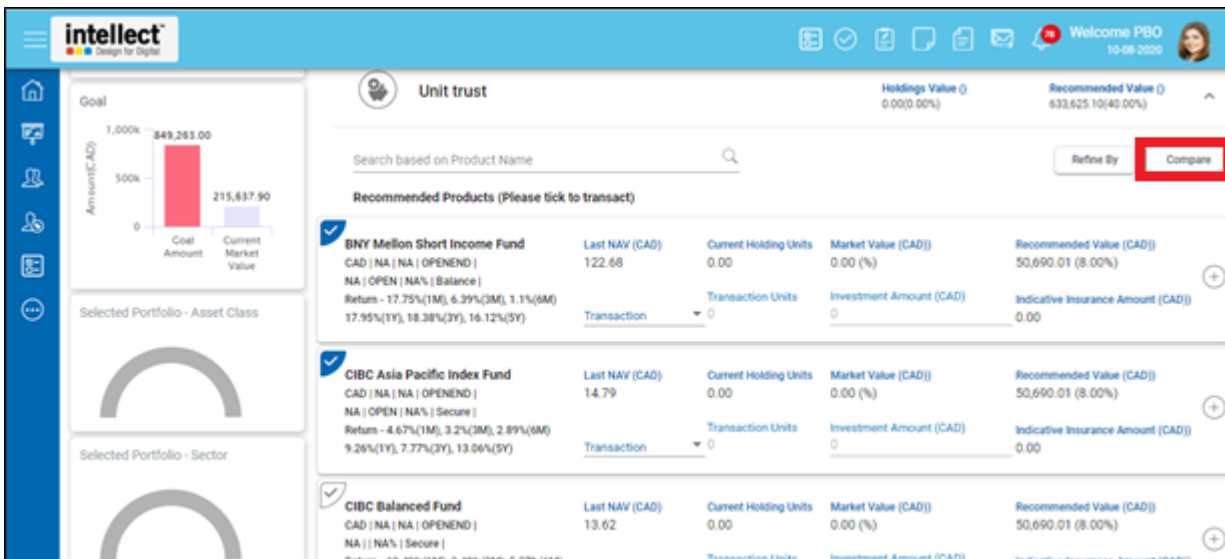

6. User clicks on the Product Card to view additional details of the product
 - a. Product Overlay: This is the section that is available for each product and it gives more detail about the selected product. The product overlay can be accessed for a product by clicking on the Product name on the Product Card. The content of the product overlay will depend upon the specific product type. The following details on the Product Overlay are common across the product types:
 - i. Selected Product composition – Asset Class
 - ii. Selected Product Composition – Sector
 - iii. Selected Product Composition – Country

Screen: Product Selection - Viewing Product Details

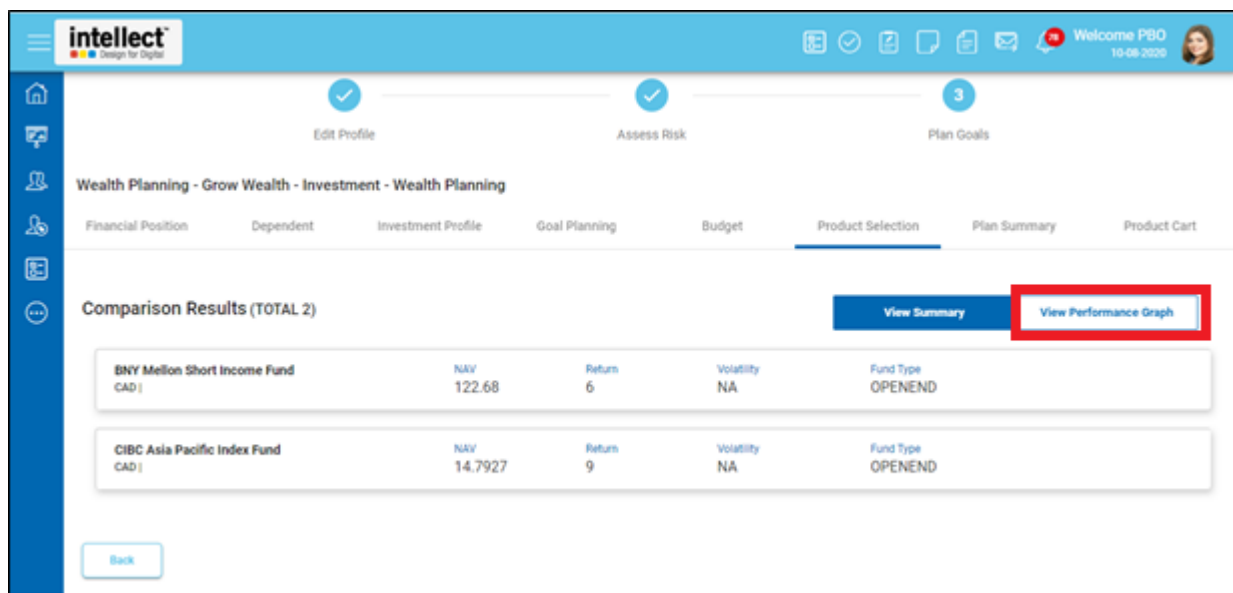

7. User can compare up to three products by selecting the products using the check box and clicking on the Compare button. System navigates the user to the "View Summary" screen for Comparison. The product comparison can only be carried

out for products of the same product type. Minimum of two products and Maximum of three products can be selected for the comparison

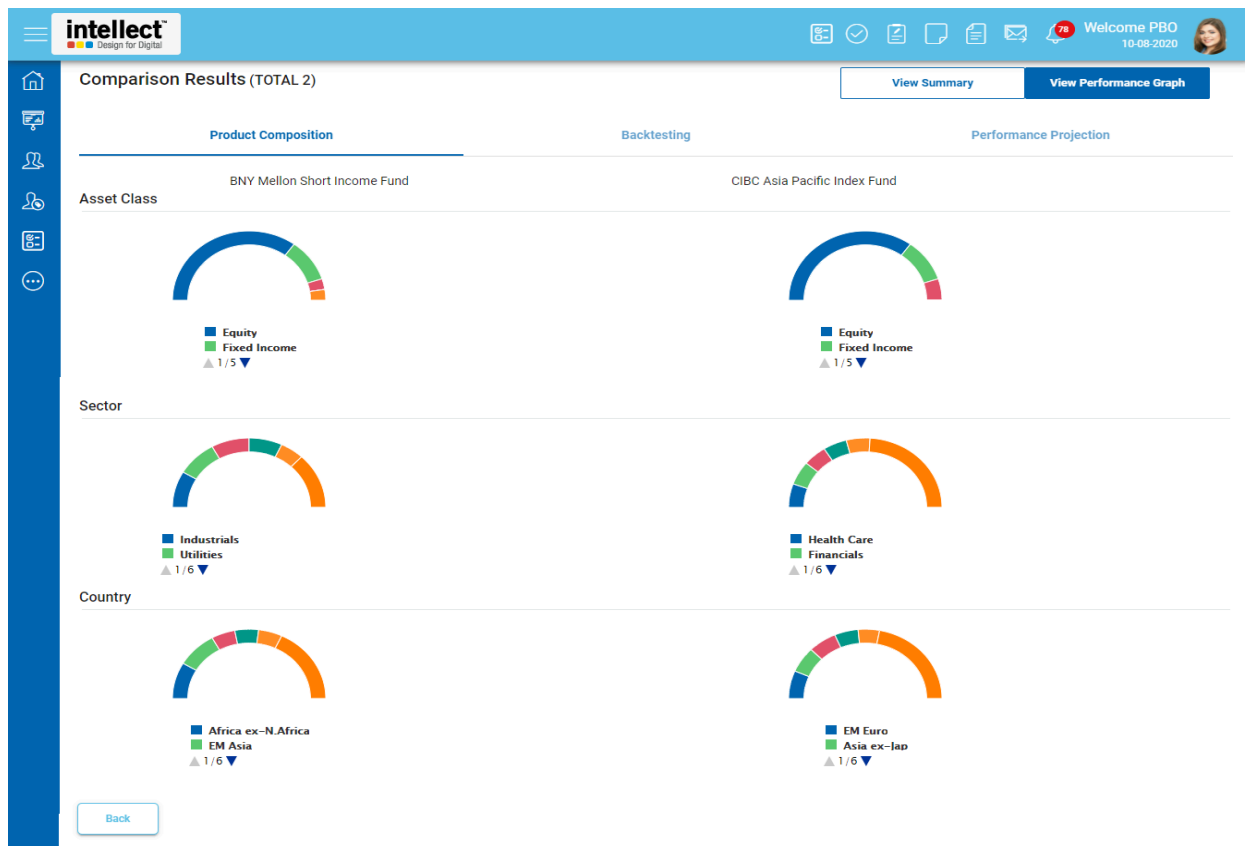

Screen: Product Selection - Compare Products

8. Users can see the product comparison summary. User can click on the View Performance Graph to navigate to the Product Composition screen to compare the performance of the products

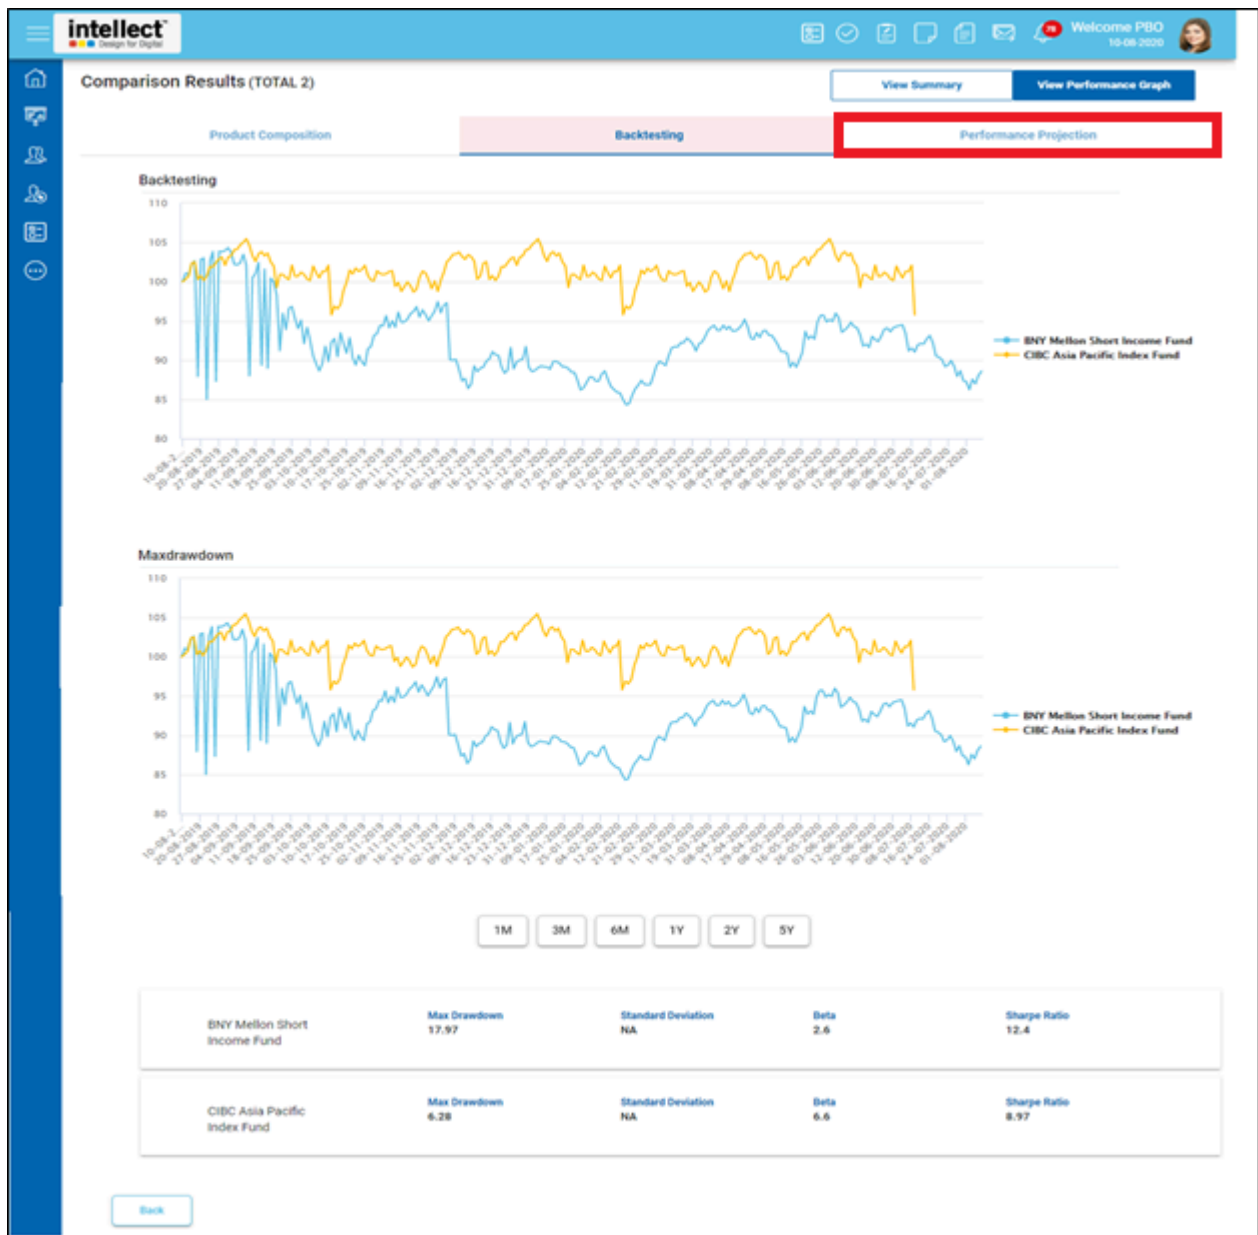

Screen: Product Comparison - View Summary

9. User lands on the Product Composition screen to view
 - a. Product Composition by Asset Class
 - b. Product Composition by Sector
 - c. Product Composition by Country

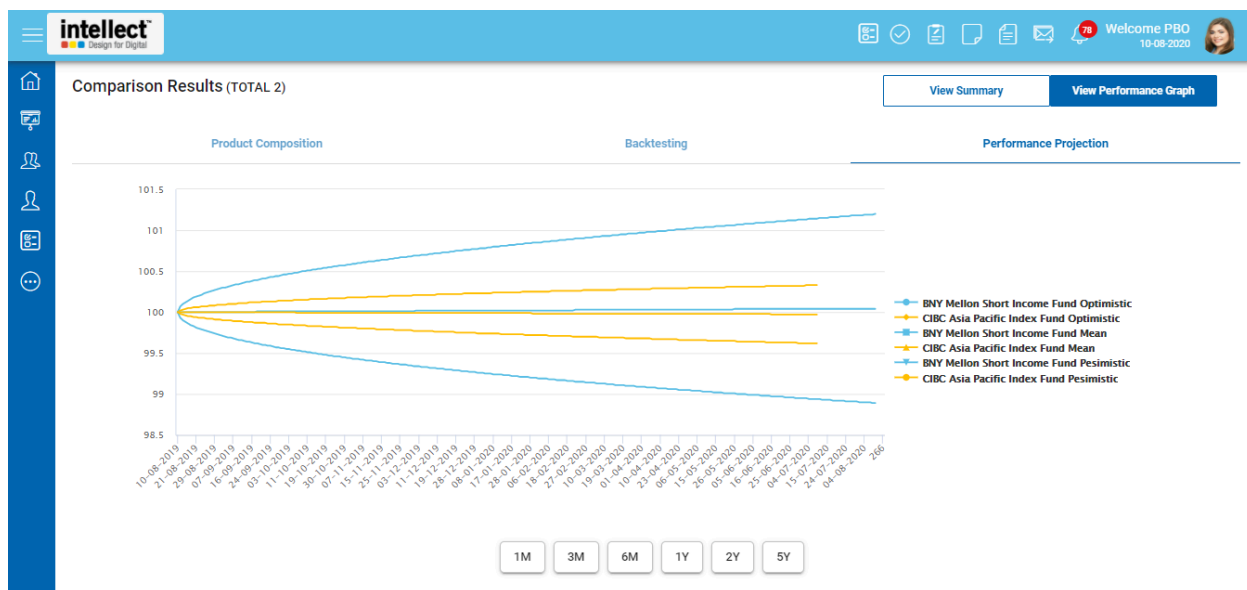

Screen: Product Comparison - Product Composition

10. User clicks on back testing to view the back testing results for the comparison (refer to section 8 Annexure for computation logic details)
 - a. Back testing: System compares the performance of selected products using Back testing technique. This widget provides the 'product performance' for the selected historical period for the given products
 - b. Max Drawdown: Displays the maximum observed loss from a peak to a trough of a portfolio, before a new peak is attained. Maximum drawdown is an indicator of downside risk over a specified time period. System also displays the Standard Deviation, Beta, and Sharpe Ratio of the respective portfolios (refer to section 8 Annexure for computation logic details)
 - i. Standard Deviation: It measures the volatility of an investment. It measures the investment's risk and helps in analyzing the stability of returns of a portfolio
 - ii. Beta: It measures the volatility—or systematic risk—of a security or portfolio compared to the market as a whole
 - iii. Sharpe Ratio: It measures the excess portfolio return over the risk-free rate relative to its standard deviation
11. User clicks on Performance Projection to navigate to the Performance Projection screen

Screen: Product Comparison - Back testing Results

12. User views the future performance projection results for the comparison. User clicks back to return to the product selection screen

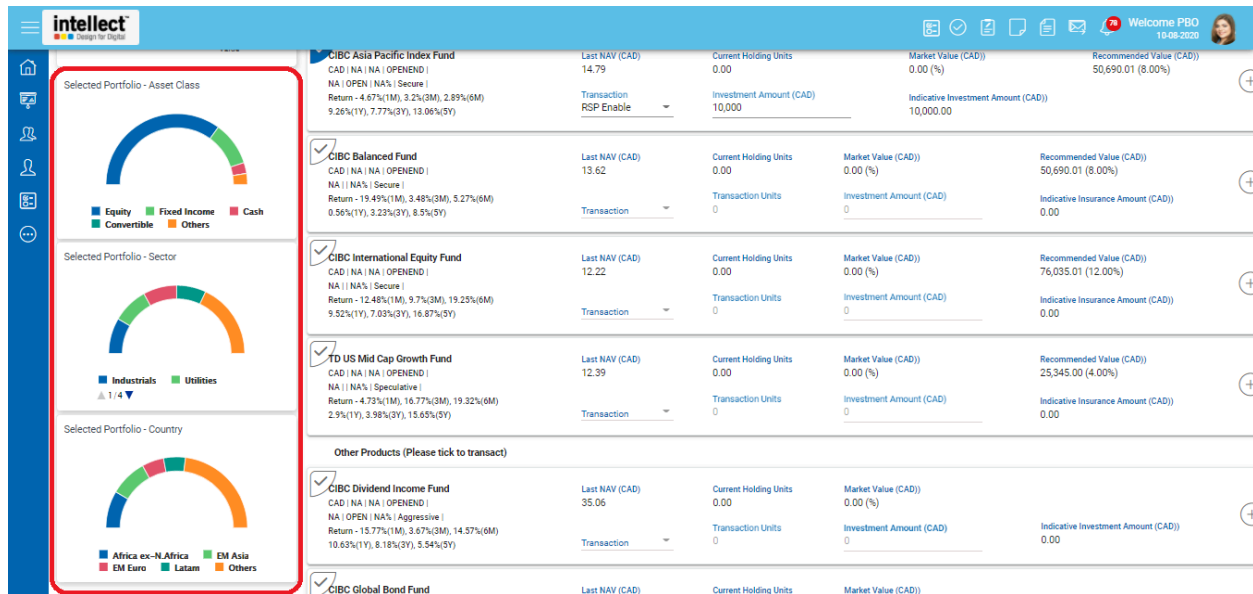

Screen: Product Comparison - Performance Projection Results

Screen: Product Selection - Input Transaction Type and Amount

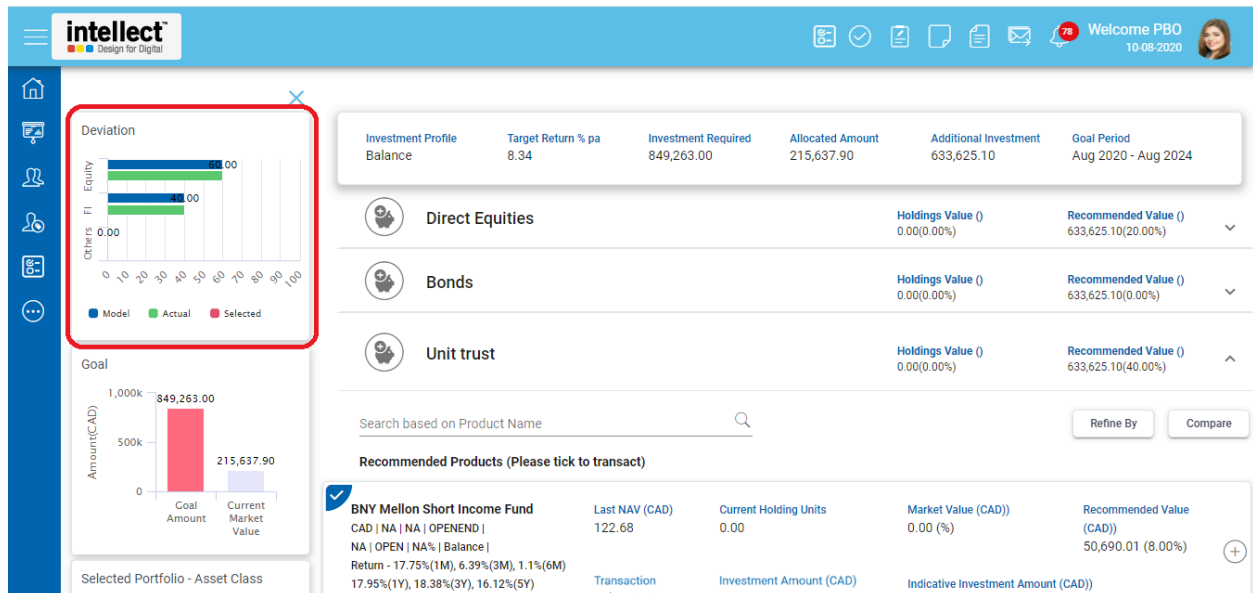

14. The product selection screen allows the user to simulate the composition of their portfolio in the following three ways after entering the amount for each of the products
 - a. Selected Portfolio – Asset
 - b. Selected Portfolio – Sector
 - c. Selected Portfolio – Country

Screen: Product Selection - Simulation

15. User can check the deviation graph reflecting Model Portfolio vs. Actual Portfolio vs. Selected Portfolio comparison

- Model Portfolio - Model Portfolio displays the composition of asset classes for the Investment Portfolio selected
- Actual Portfolio - Actual Portfolio displays the composition of asset classes for the assigned assets to the current plan
- Selected Portfolio - Selected Portfolio displays the composition of asset classes for the assigned assets to the plan and products selected for investment

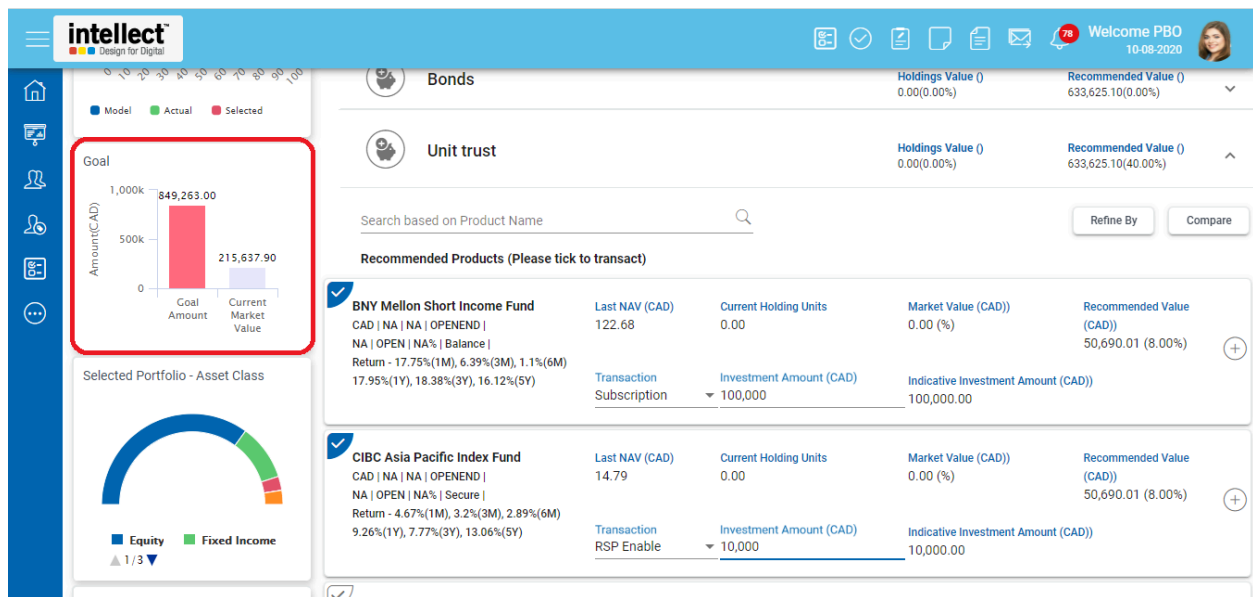

Screen: Product Selection - Deviations

16. User can check the Goal Chart which displays the following information :

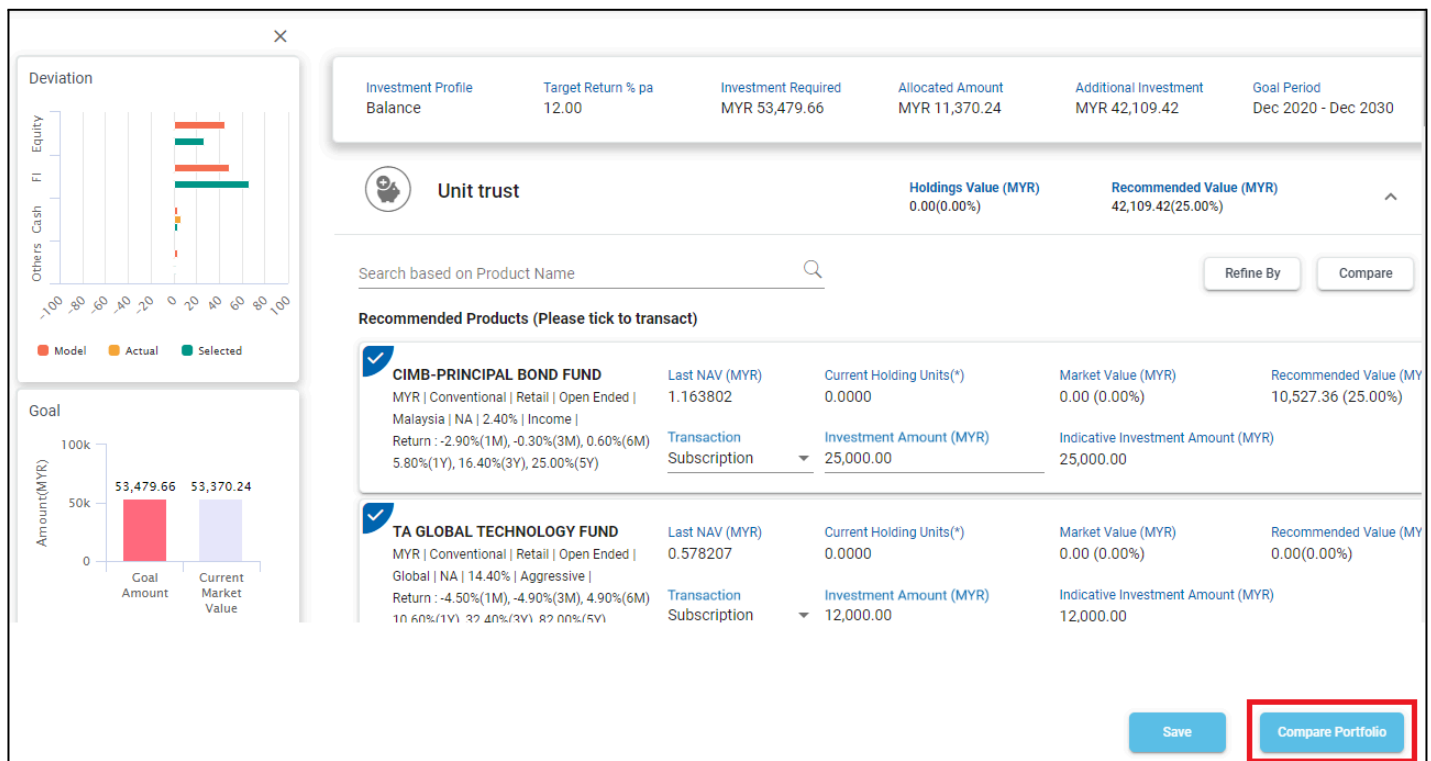

- Goal Amount: Recommended amount based on the Goal Calculator

b. Current Market Value: Sum of Assigned Assets and Allocated External Assets to the Plan

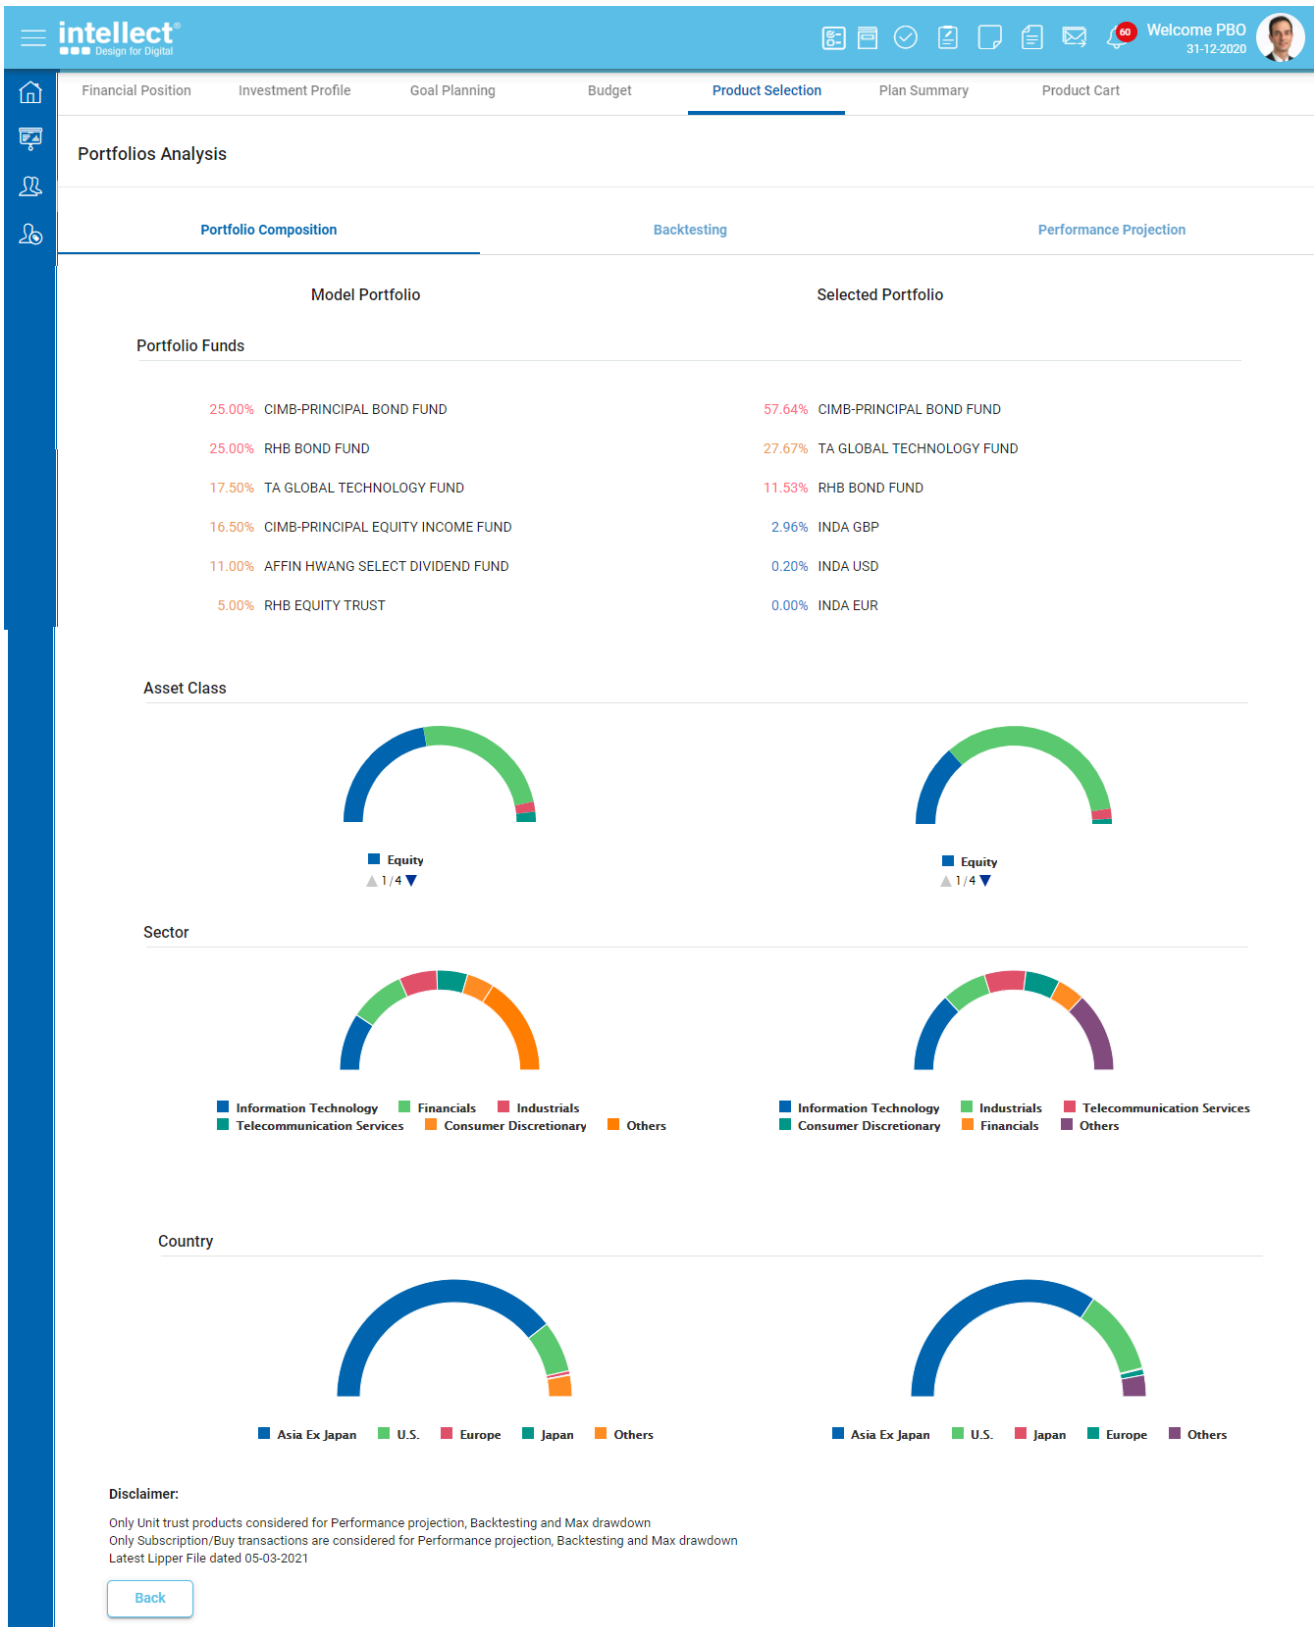

Screen: Product Selection - Goal Chart

17. User can check the analytics for the selected portfolio (Products selected in the Product Selection + Assets with bank tagged to the Plan) by clicking on the compare portfolio. This allows the user to compare Investment Profile and Selected Portfolio of the Customer (refer to section 8 Annexure for computation logic details)

18. In this screen, the user will be able to view the following for the Investment Profile Model Portfolio and Selected Portfolio:
- i. Portfolio Composition - View Fund details, asset class, sector wise and country wise break up for both profiles
 - ii. Back testing results - View Back testing results for both the profiles which provides the 'portfolio performance' for the selected historical period for a given portfolio of securities
 - iii. Performance Projection - View Performance projections for a definite period of time into the future
19. The user views the Portfolio Composition of the Investment profile and customer selected portfolio
- a. **Portfolio Composition** - View Fund details, asset class, sector wise and country wise break up for both profiles. Asset, Sector and Country wise comparison for the Investment Profiles is based on the Mutual Funds present in the respective investment profile model portfolio and customer selected portfolio

20. User clicks on the “Back testing” tab. The user views the back testing results for the investment profile and customer selected portfolio
 - a. **Back testing results** - View Back testing and Max Drawdown results for both the profiles which provide the ‘portfolio performance’ for the selected historical period for a given portfolio of securities. Backtesting comparison results for the Investment Profile and Customer Selected Portfolio is based on the Mutual Funds present in the respective profiles

Screen: Compare Portfolio - Backtesting

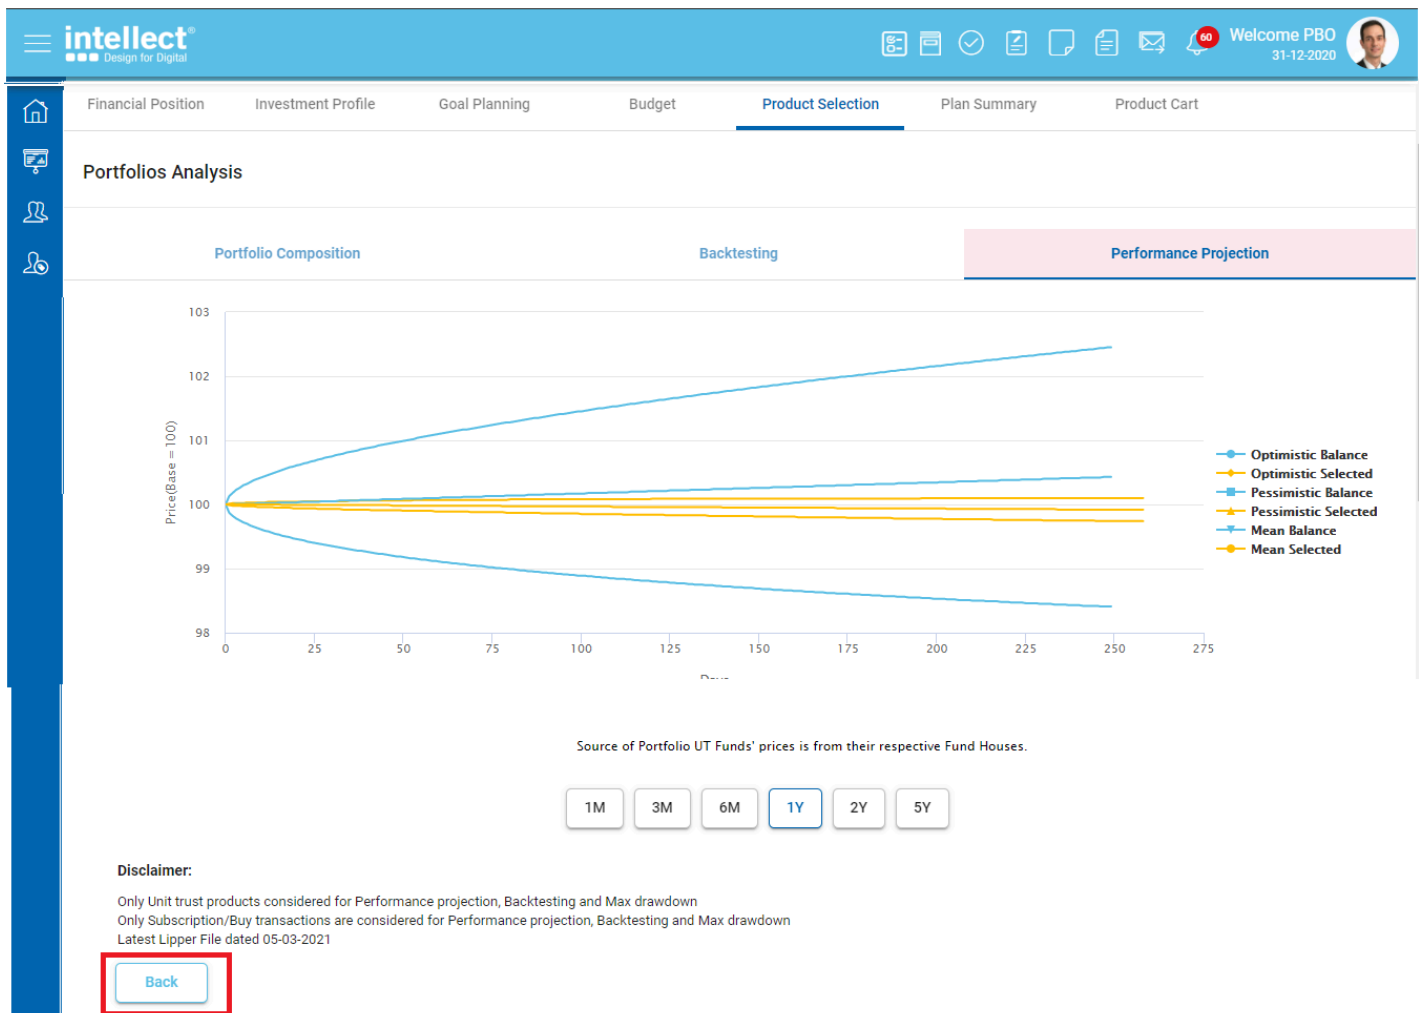

21. User clicks on the Performance Projection tab. The user views the performance projection results for the investment profile selected and customer selected portfolio

a. **Performance Projection** - View Performance projections for a definite period of time into the future

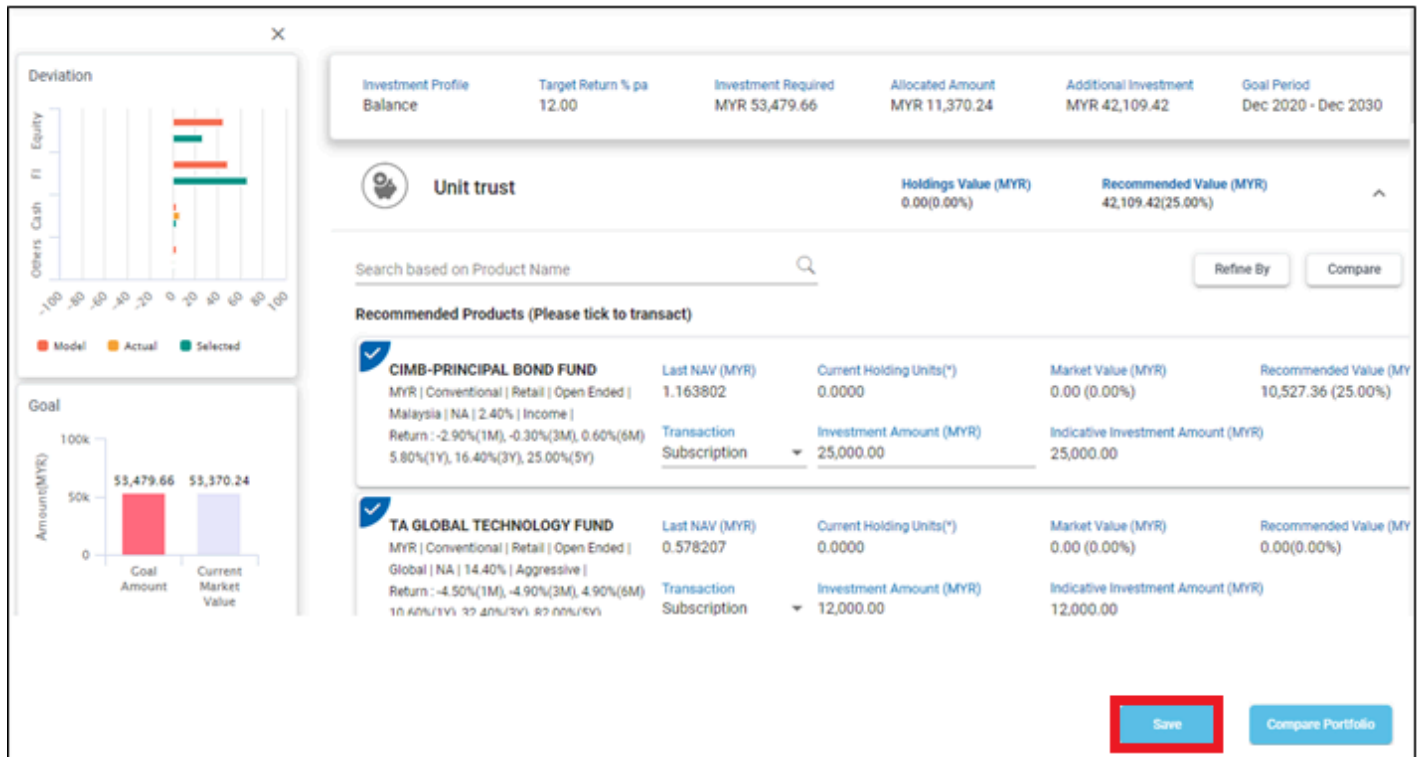

Screen: Compare Portfolio – Performance Projection

22. User clicks on the “Back” button to navigate back to the product selection screen

Screen: Product Selection Navigation

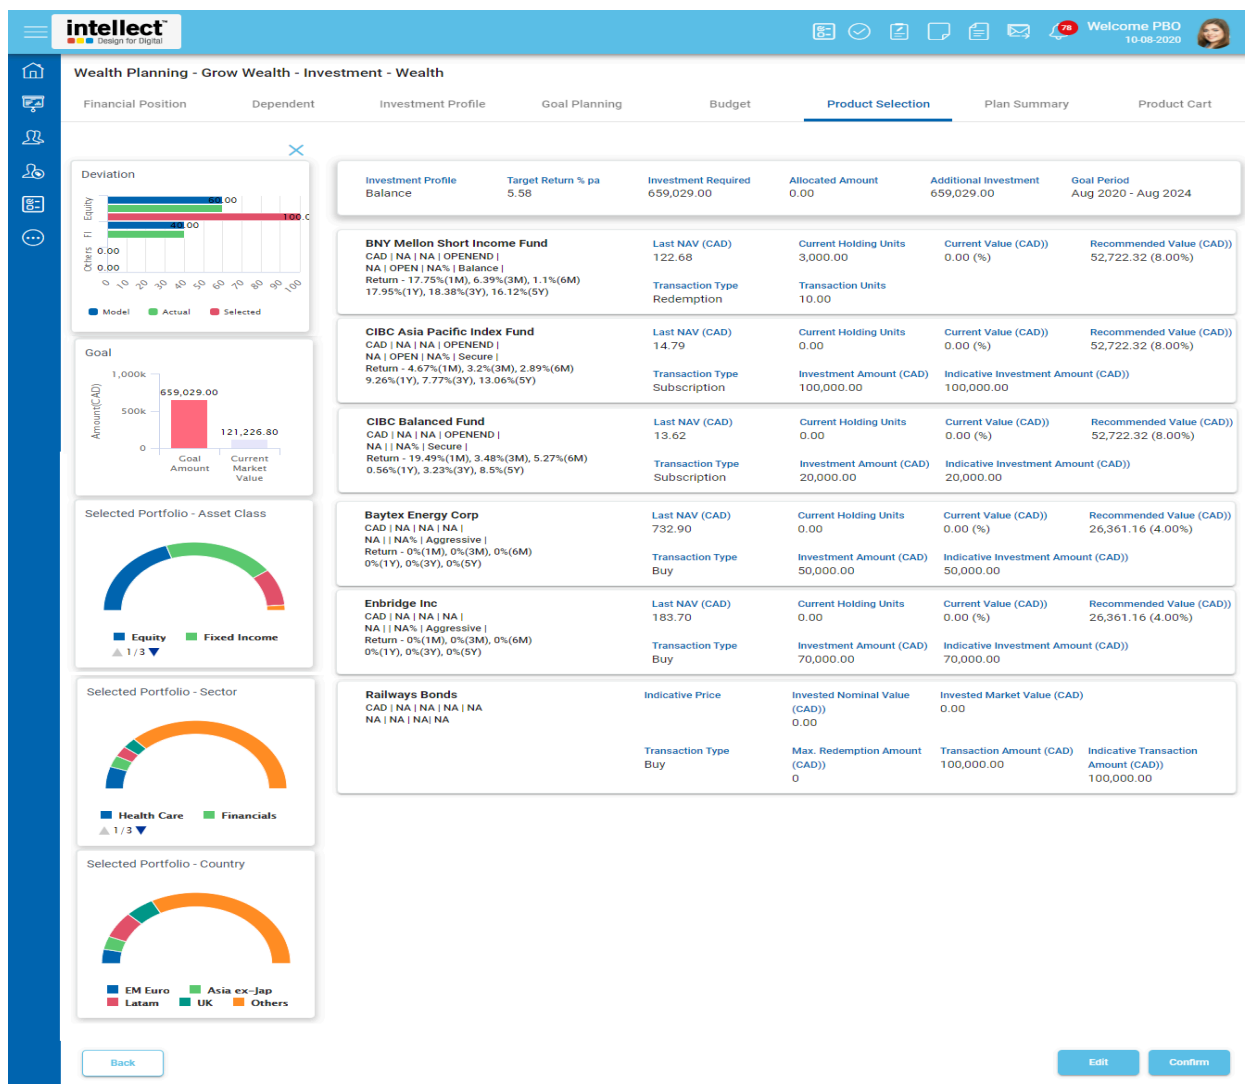

- After the comparison and analysis, the user clicks on "Save" to navigate to the "Confirm the Selected Products" screen

Screen: Product Selection Save – Navigate to Confirm the Product Selection

4.8.1.11. Confirm the Selected Products

1. The summary of the products selected for the transaction will be viewed in the confirmation screen
2. User clicks on “Edit” to edit the transaction details by navigating back to the “Product Selection” screen. User clicks on “Confirm” to navigate to the “Plan Summary” screen to generate the proposal for the plan

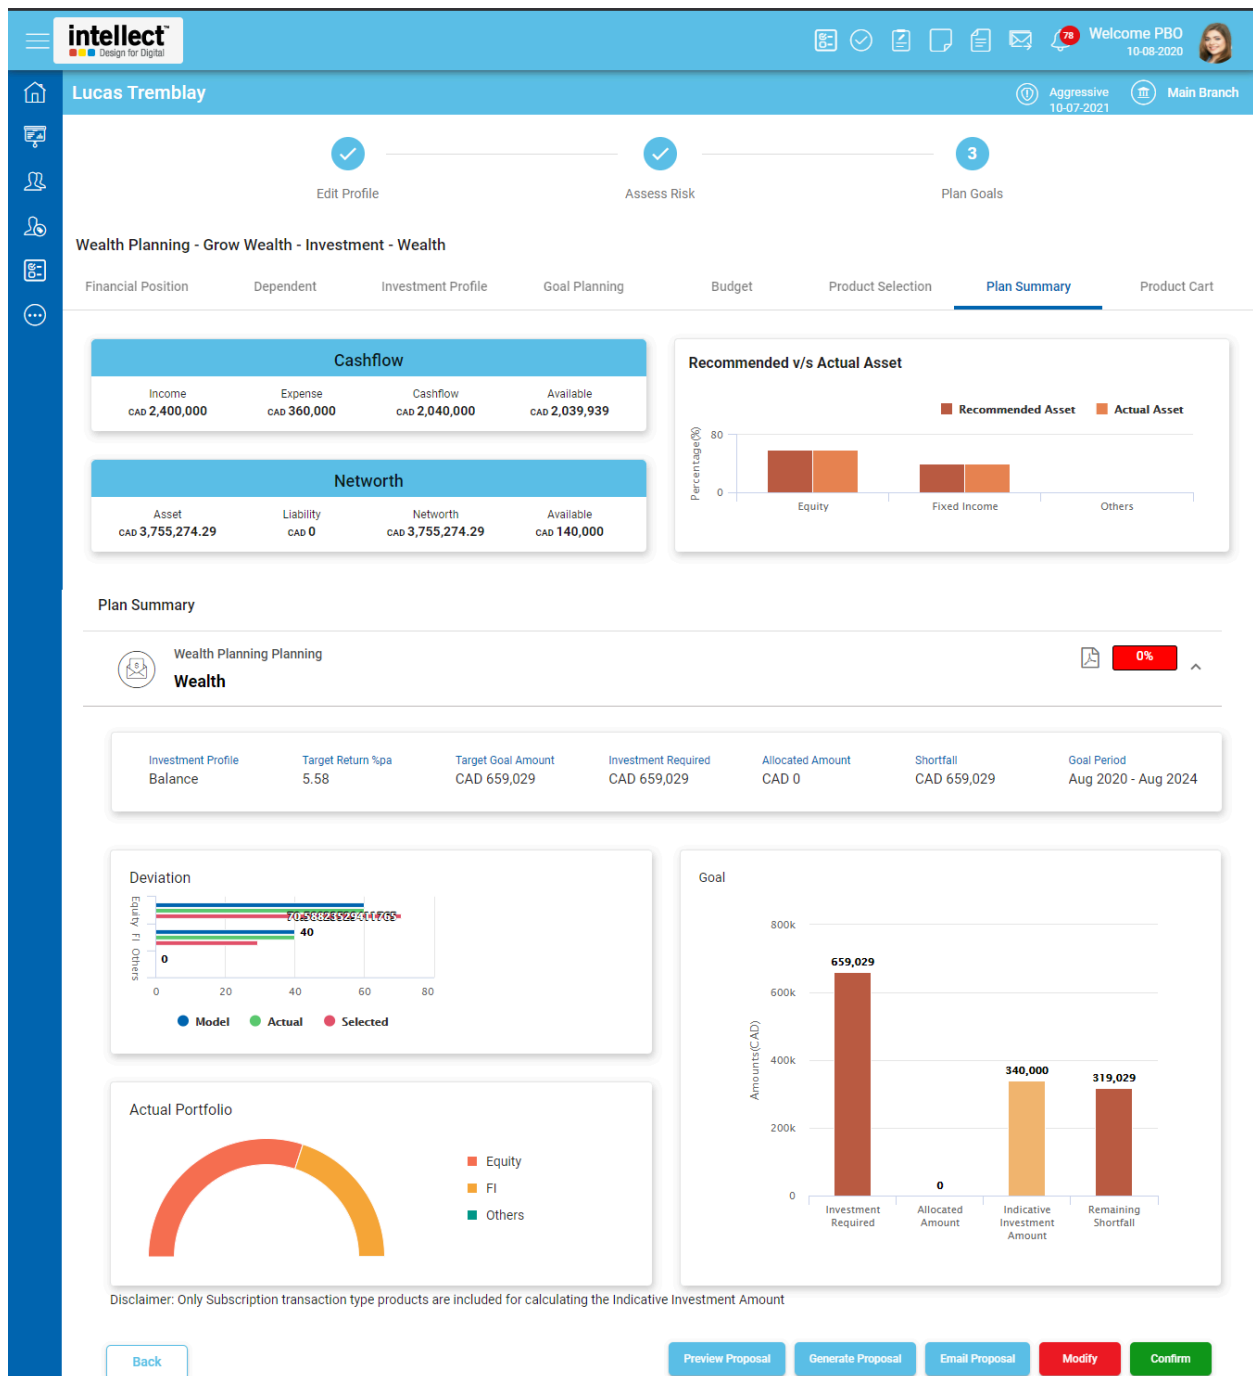

Screen: Confirm the Product Selection

4.8.1.12. Plan Summary/Generate the Proposal

Plan Summary allows the user to view the summary of the plan and generate the plan proposal. Generation of Proposal marks the completion of the plan journey process

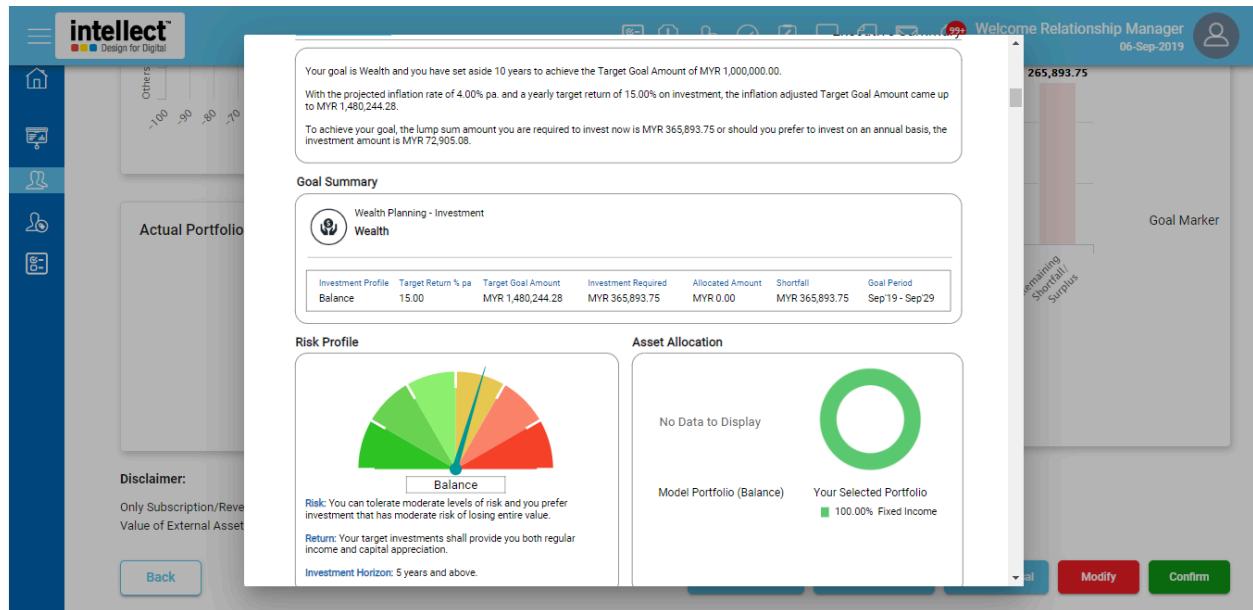

1. User views the summary of the plan. The following details will be displayed:
 - a. Cash flow
 - b. Net worth
 - c. Recommended vs. Actual Asset
 - d. Plan Details
 - e. Portfolio Deviations
 - f. Actual Portfolio

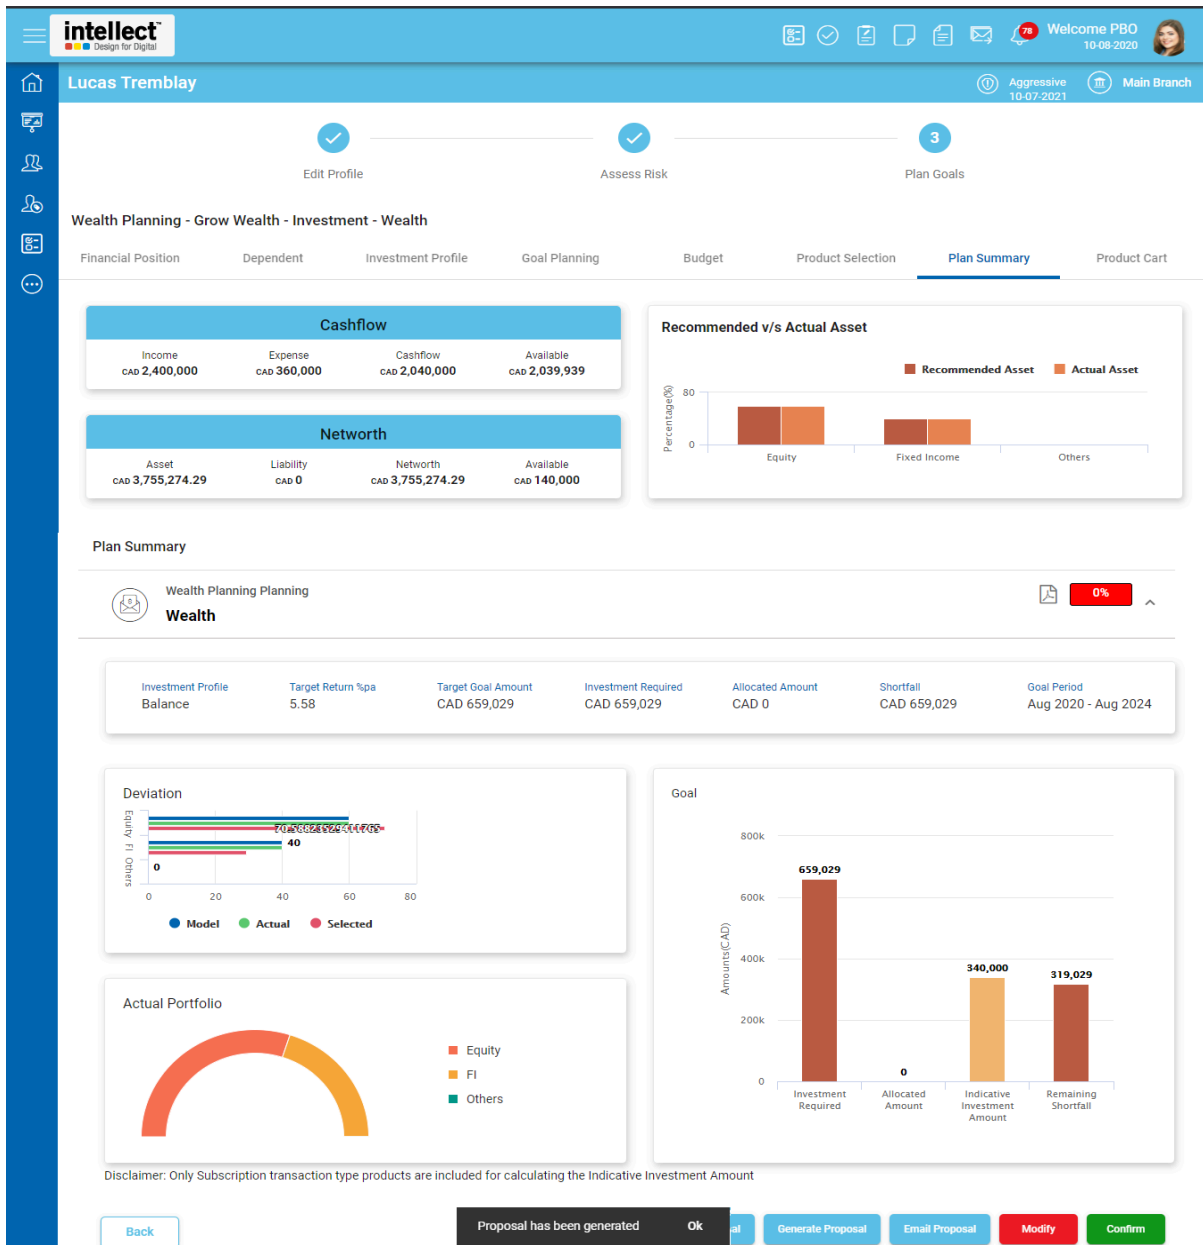

Screen: Plan Summary

- The user can modify the plan from the plan summary page by clicking on “Modify” which navigates the user to the “Capture Cash flow” screen
- The proposal can be generated by clicking on the ‘Generate Proposal’ button at the bottom of the Plan Summary page. The information in the final proposal will become the basis on which the portfolio of the customer for that plan will be composed and executed

- The proposal can be previewed by the user by clicking on the “Preview Proposal” button

Screen: Preview Proposal

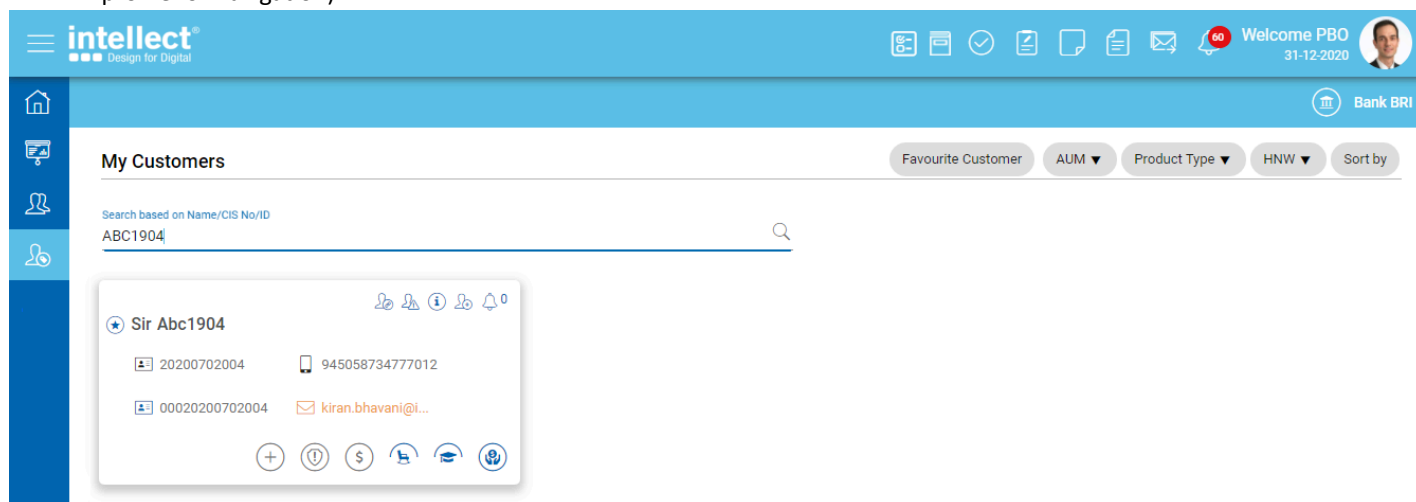

Screen: Generate Proposal

- The proposal can be sent via email to the customer directly by clicking on the “Email Proposal”
- If a User clicks on the “Continue”, the system navigates the user to the “Order Cart” screen for order placement (refer to Journey from Order Placement till Settlement document for details)

4.8.1.13. Goal Summary

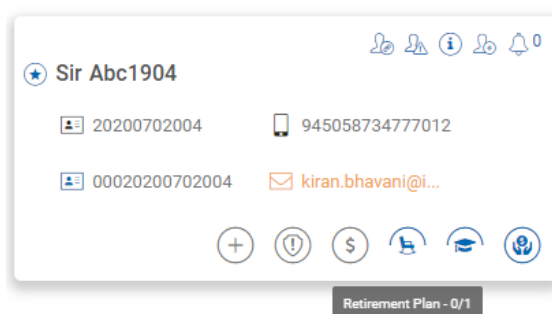

Goal Summary section provides the summary of all the goals initiated for the customer. Plan status can be monitored, new investments can be added for the completed plans and incomplete plans can be modified using the goal summary

1. User navigates to the “My Customers” to view the goal summary of the customer (refer to section 4.2 View/Edit Customer profile for navigation)

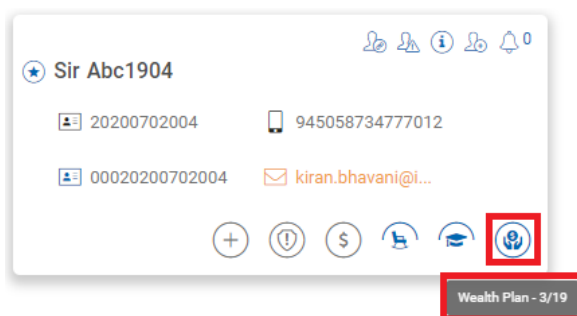

Screen: Customer Card – Goal Summary

2. User can view the broad summary of the number of plans initiated for the customer on the customer card (Retirement, Education and Wealth Plans). The mouse hover on each icon will give the information of “Number of Plans Completed”/“Number of Plans Started”. Generation of Proposal marks the completion of the plan

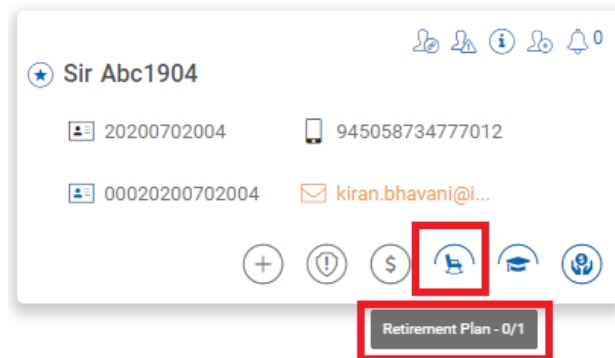

Screen: Customer Card – Plan Status

3. If the Plan Icon is fully colored, this represents at least one plan of the plan type is completed

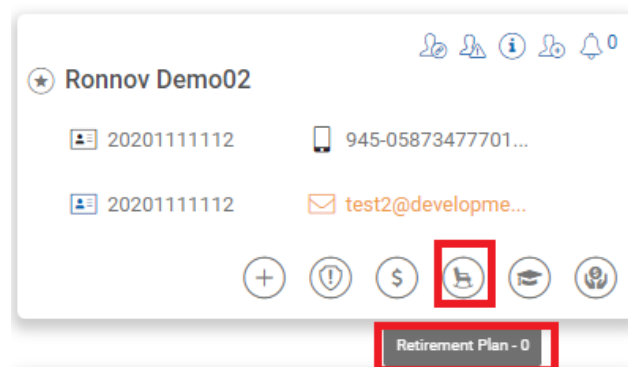

Screen: Plan Status Full Colored

4. If the Plan Icon is half colored, this represents none of the plans initiated are complete for the plan type

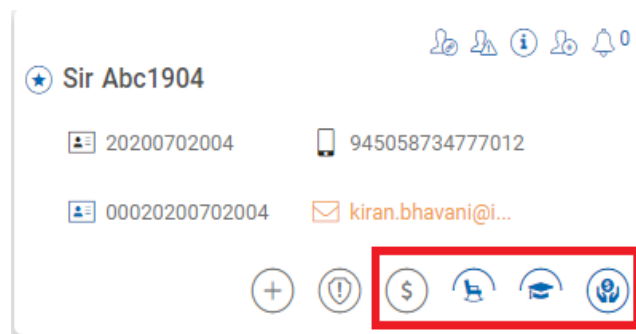

Screen: Plan Status Half Colored

5. If the Plan Icon is greyed, this represents no plan is initiated for the plan type

Screen: Plan Status Greyed

6. User can click on any of the three plan type icons to navigate to the Goal Summary screen to view the detailed summary of all the plans

Screen: Goal Summary Navigation

7. User views the summary of cash flow and net worth details. The three plan journey types will be visible to the user, they can click on the down arrow button “” on the Plan Summary card to view the summary of all the plans under Set My Goals Journey type

4.8.1.14. I Like the Recommendation

1. User selects the "I like the Recommendation" Plan Journey type and clicks on "Continue"

The screenshot displays the Intellect user interface. At the top, there is a blue header bar with the Intellect logo on the left and user information 'Welcome BRNRM 06-Sep-2019' on the right. Below the header, a light blue bar shows the user ID 'Abc1902' and the location 'KUALA LUMPUR MAIN 1'. The main content area features a progress bar with three steps: 'Edit Profile' (completed), 'Assess Risk' (completed), and 'Plan Goals' (active, indicated by a '3' in a blue circle). Below the progress bar, the text 'Please select' is followed by three radio button options: 'Transact', 'I Like the Recommendation' (which is selected and highlighted with a red rectangular box), and 'Set My Goals'. At the bottom left is a 'Back' button, and at the bottom right is a 'Continue' button, also highlighted with a red rectangular box.

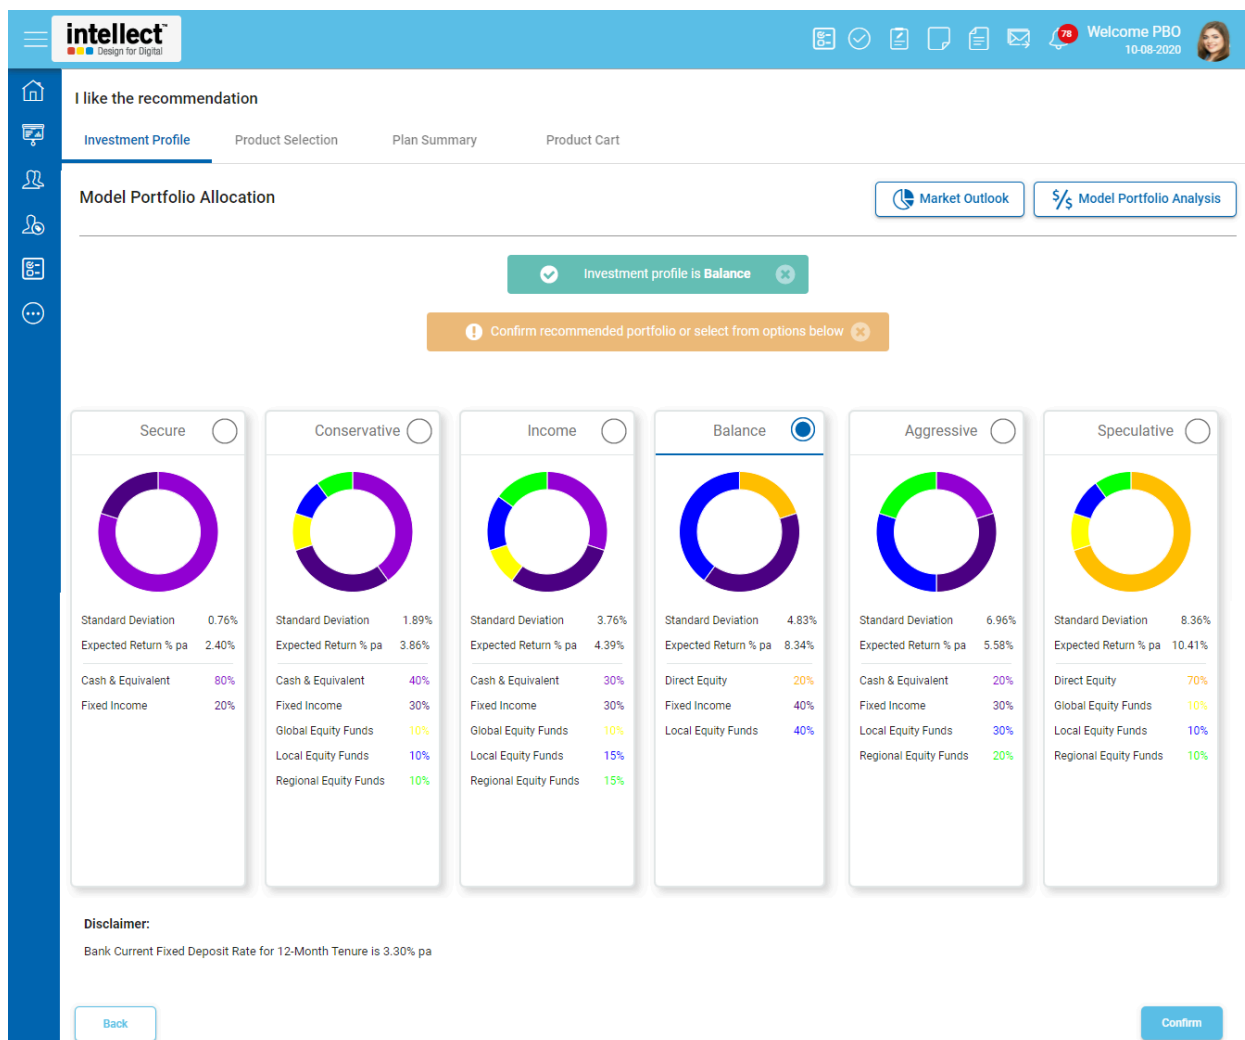

Screen: Select the Plan Journey Type

4.8.1.15. Select Investment Profile

Investment Profile page is used to align the Risk Profile of the Customer with their goals. On this page the customer can view the entire array of investment profiles available and their underlying asset allocations along with their personal Risk Profile. They can also compare 2 investment profiles and check the market outlook through this page

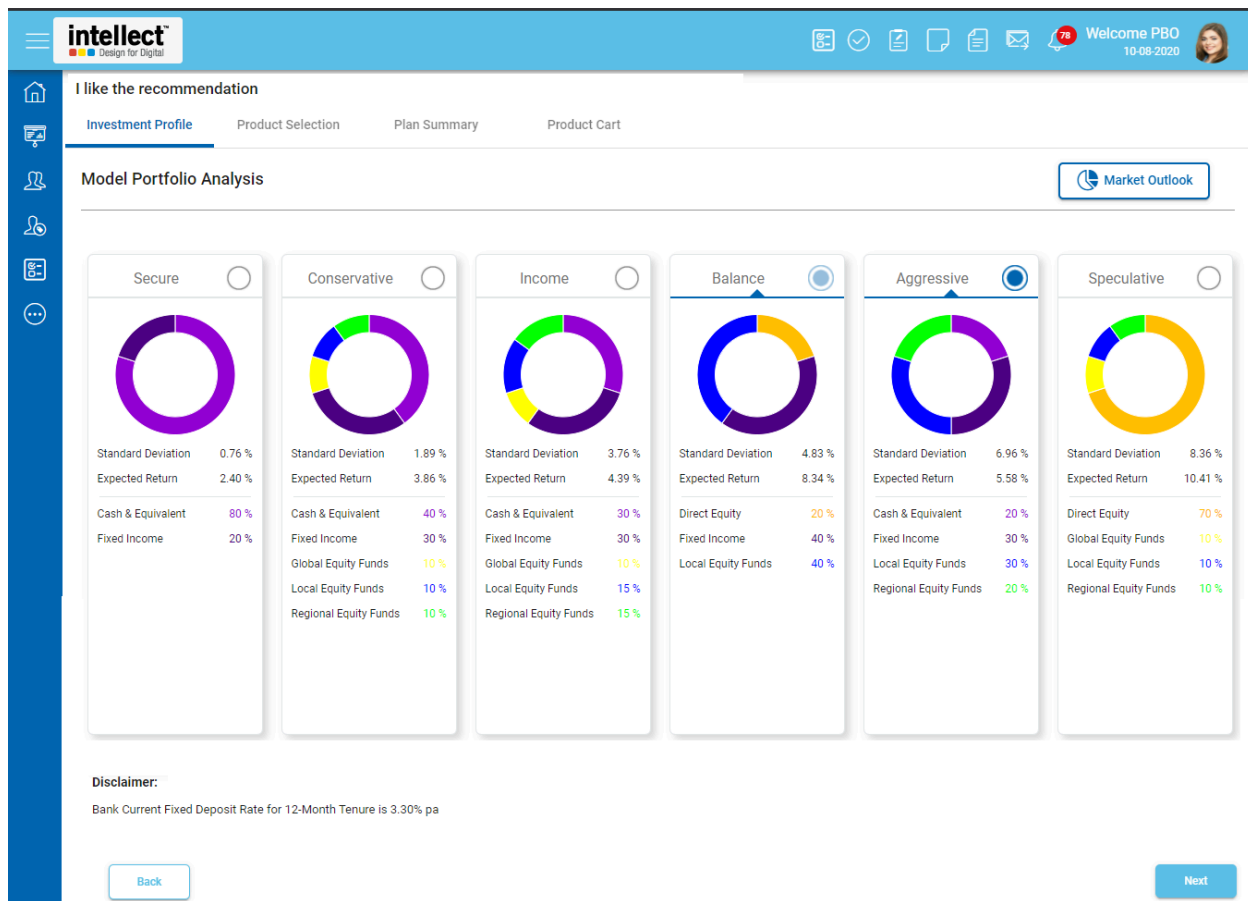

Selection of Model Portfolio for Plan

1. Upon landing on this page, the user can view the various risk profiles and applicable model portfolio (Asset Allocations) under each of these risk profiles
2. By default the risk profile of the customer becomes the risk profile of the plan itself but the user can choose any of the risk profile that seems to be aligned to the customer's goal purpose and objective

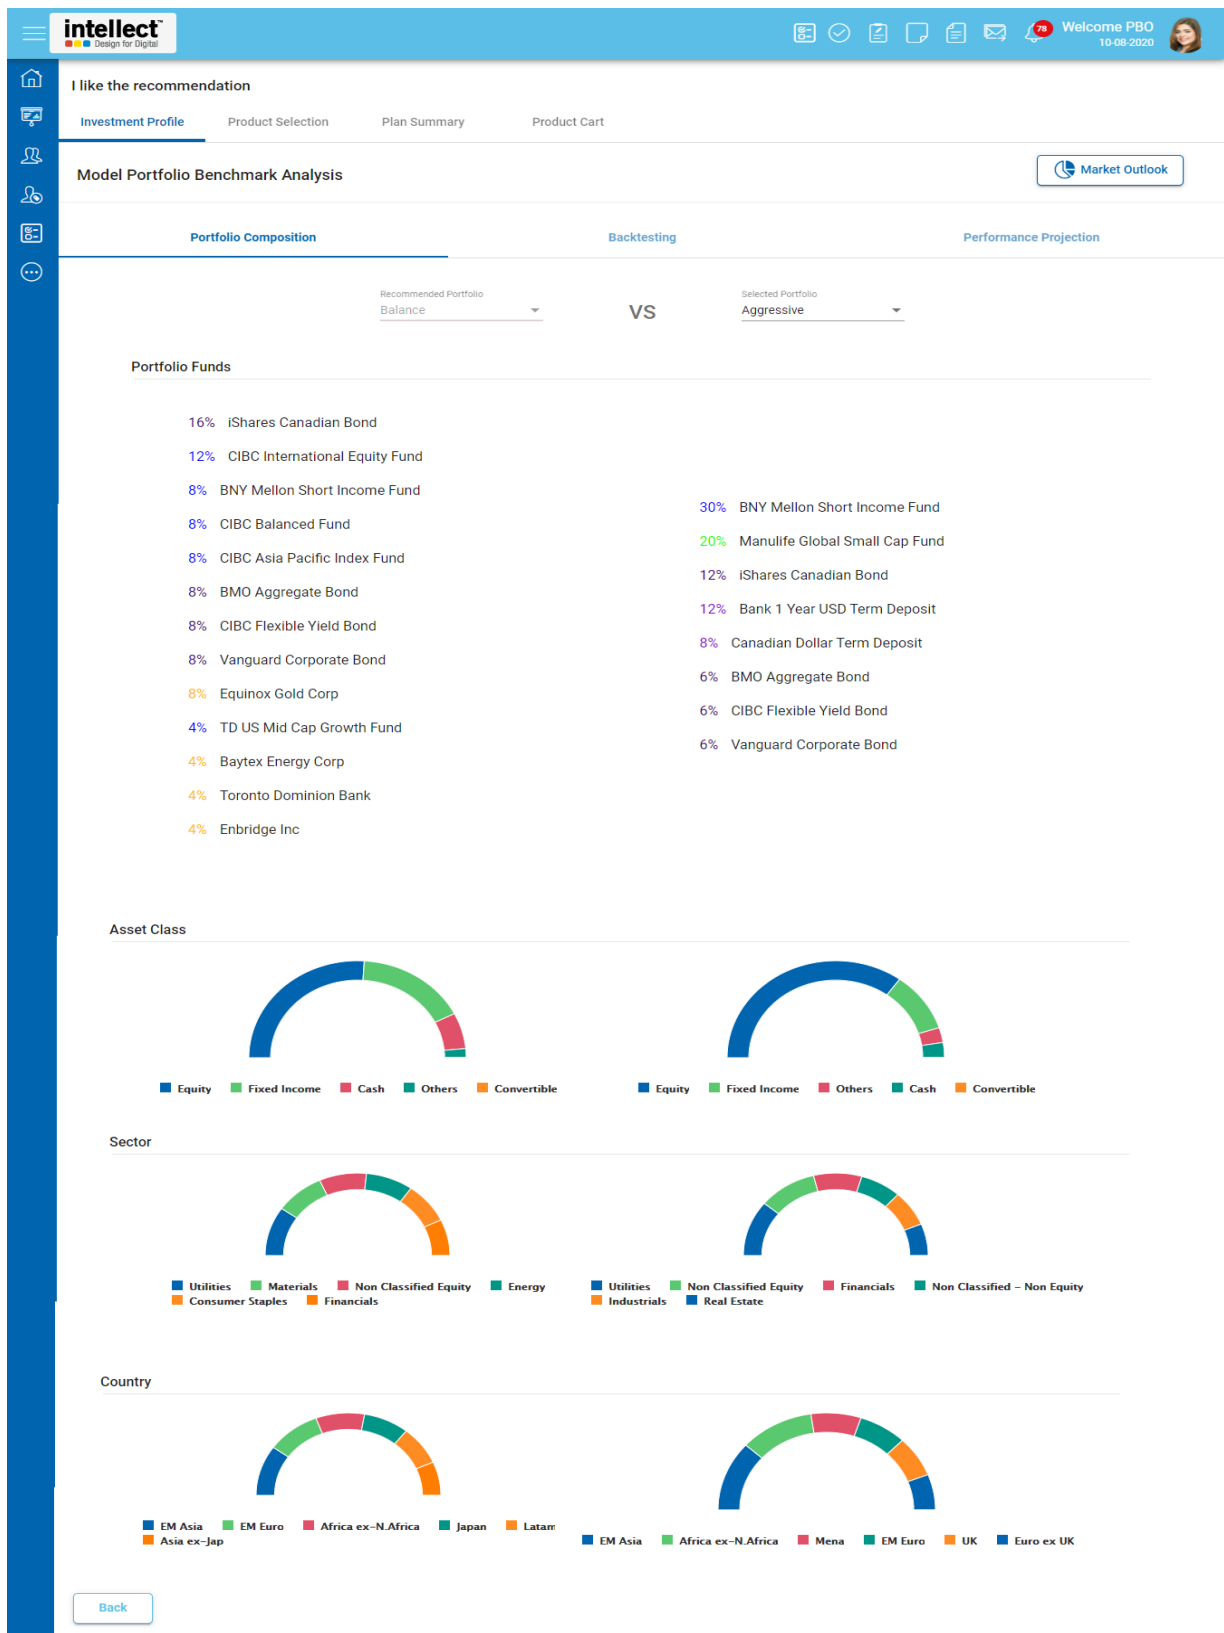

Screen: Investment Profile Landing Page - Default Model Portfolio

3. Portfolio Comparison - The user can compare investment profiles by selecting any Investment profile and then clicking on the “Model Portfolio Analysis” button to navigate to the Model Portfolio Analysis screen. Once on this screen, the user can select any investment profile and click on “Next” to navigate to the Benchmark analysis screen and compare the default and the selected investment profiles
 - a. Within the Analysis screen, the user will be able to view the following for both the profiles:
 - i. Portfolio Composition - View Fund details, asset class, sector wise and country wise break up for both profiles
 - ii. Back testing results - View Back testing results for both the profiles which provides the ‘portfolio performance’ for the selected historical period for a given portfolio of securities
 - iii. Performance Projection - View Performance projections for a definite period of time into the future

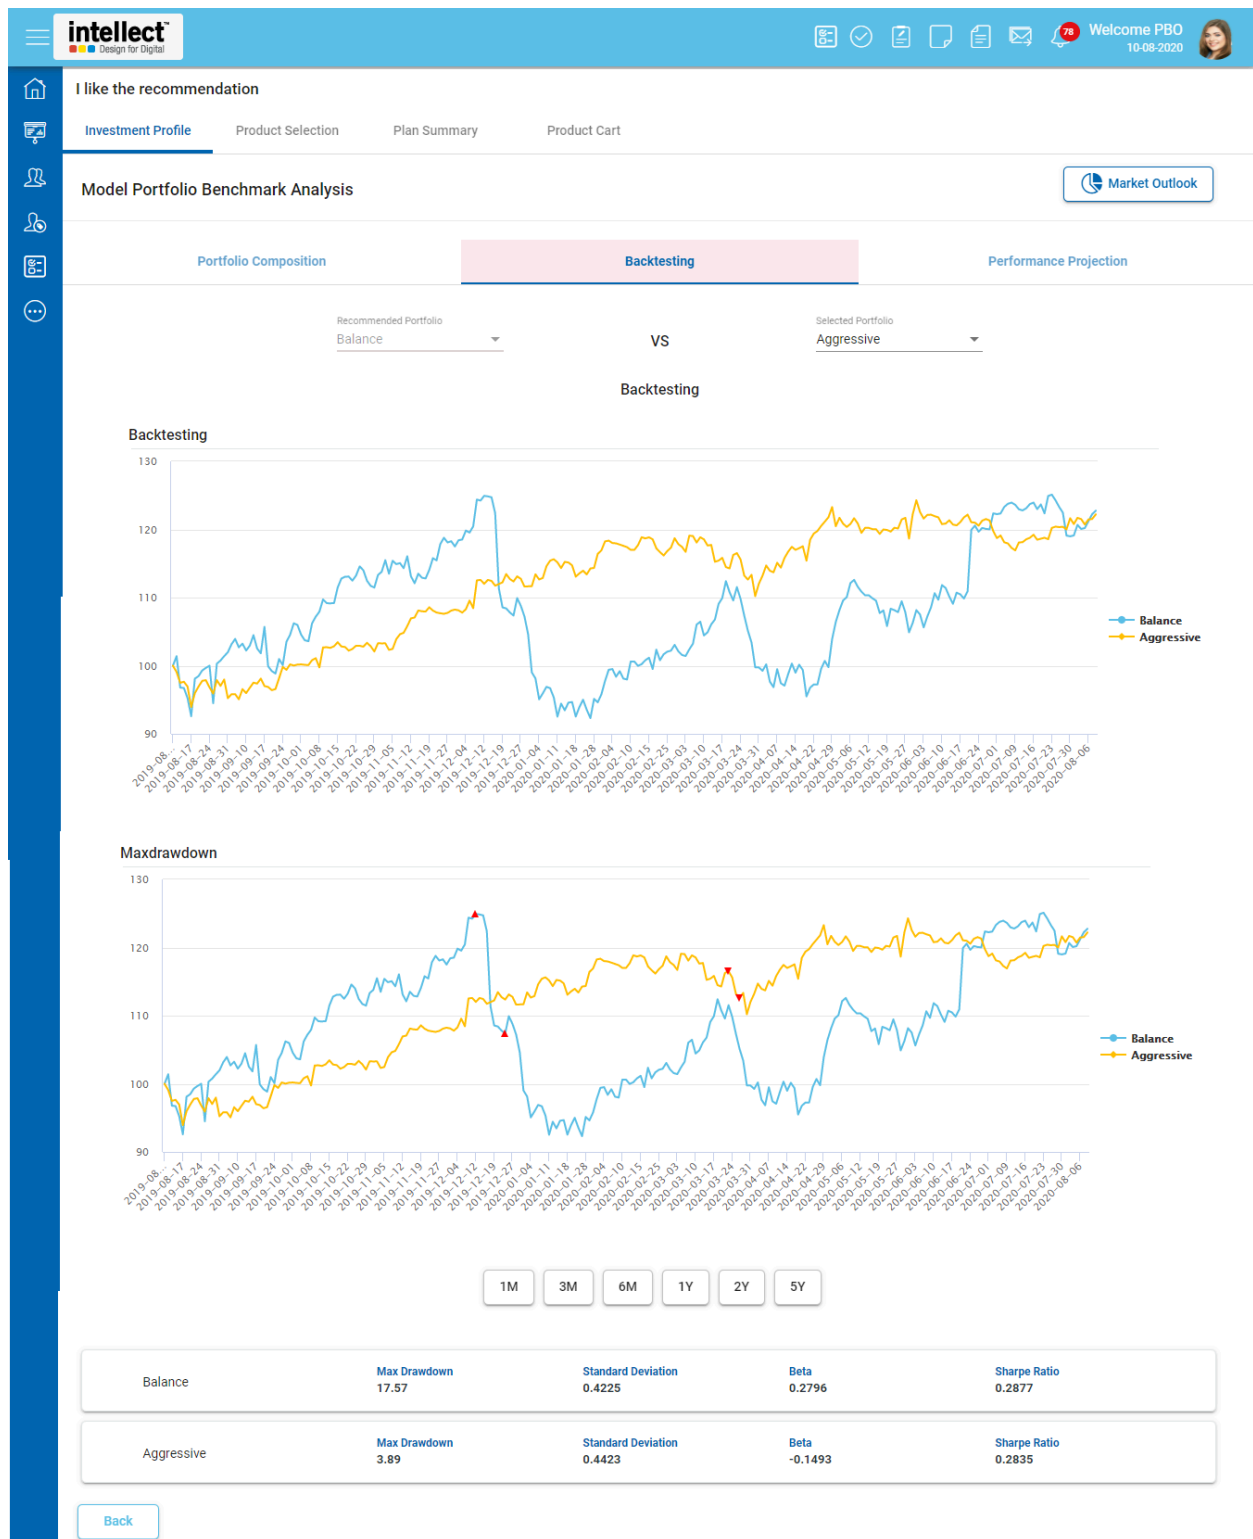

Screen: Model Portfolio Analysis

4. The user views the Portfolio Composition of the Investment profiles selected for comparison. User clicks on the “Back testing” tab to view the back testing results
 - a. **Portfolio Composition** - View Fund details, asset class, sector wise and country wise break up for both profiles. Asset, Sector and Country wise comparison for the Investment Profiles is based on the Mutual Funds present in the respective investment profiles

Screen: Model Portfolio comparison - Product Composition

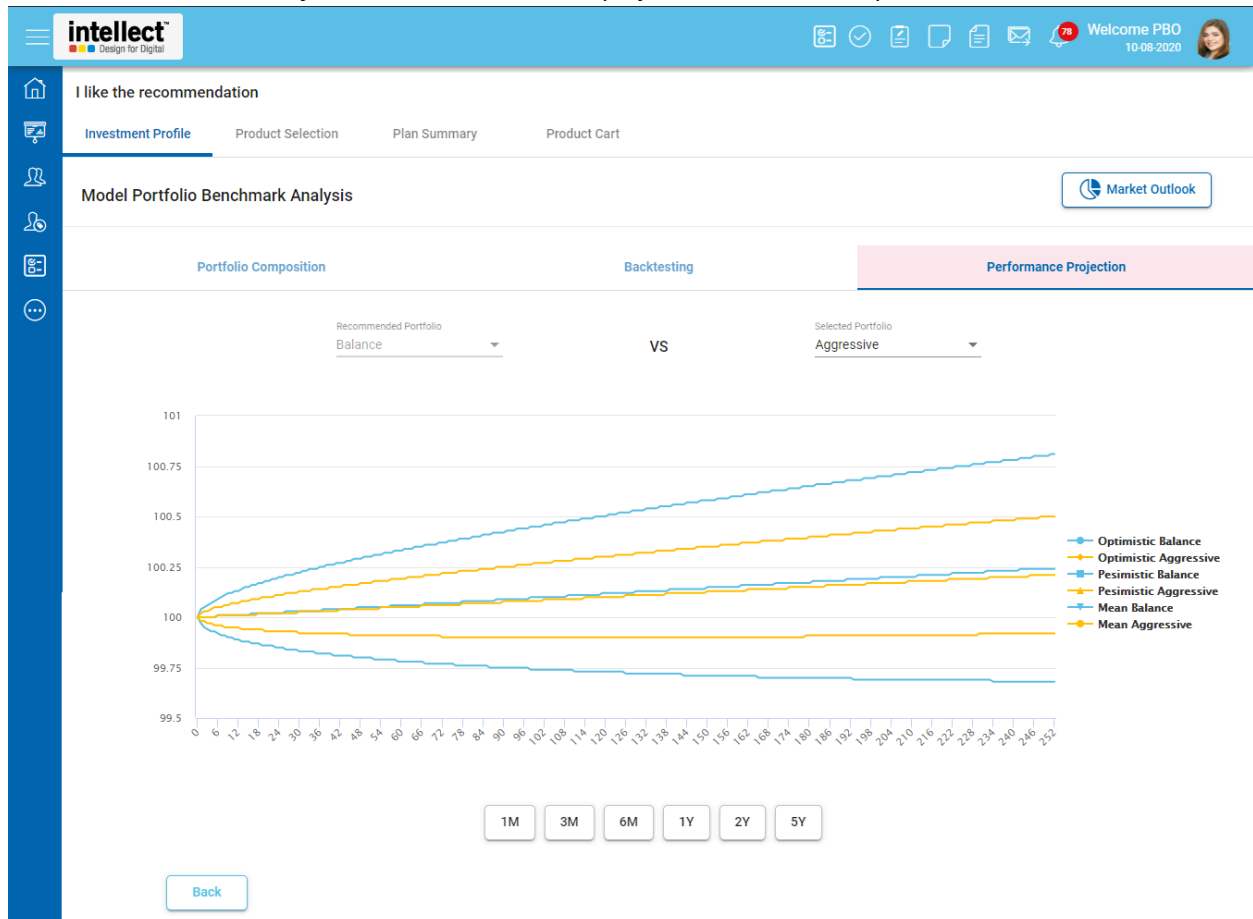

5. The user views the back testing results for the investment profiles selected for comparison. User clicks on the Performance Projection to view performance projection results
 - a. **Back testing and Max Drawdown results** - View Back testing and Max Drawdown results for both the profiles which provides the 'portfolio performance' for the selected historical period for a given portfolio of securities. Backtesting comparison results for the Investment Profiles is based on the Mutual Funds present in the respective investment profiles

Screen: Model Portfolio comparison – Back testing

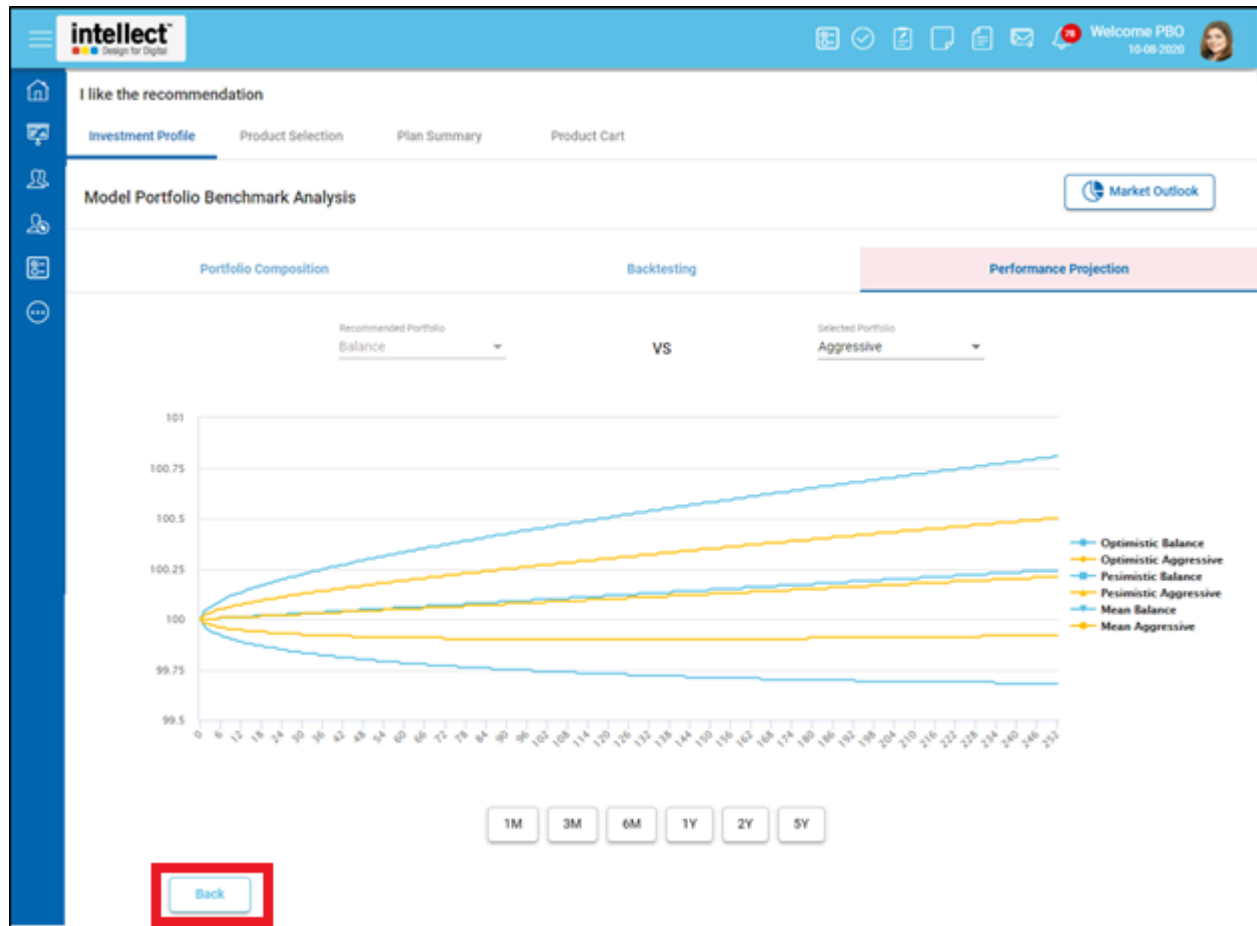

- The user views the performance projection results for the investment profiles selected for comparison

a. **Performance Projection** - View Performance projections for a definite period of time into the future

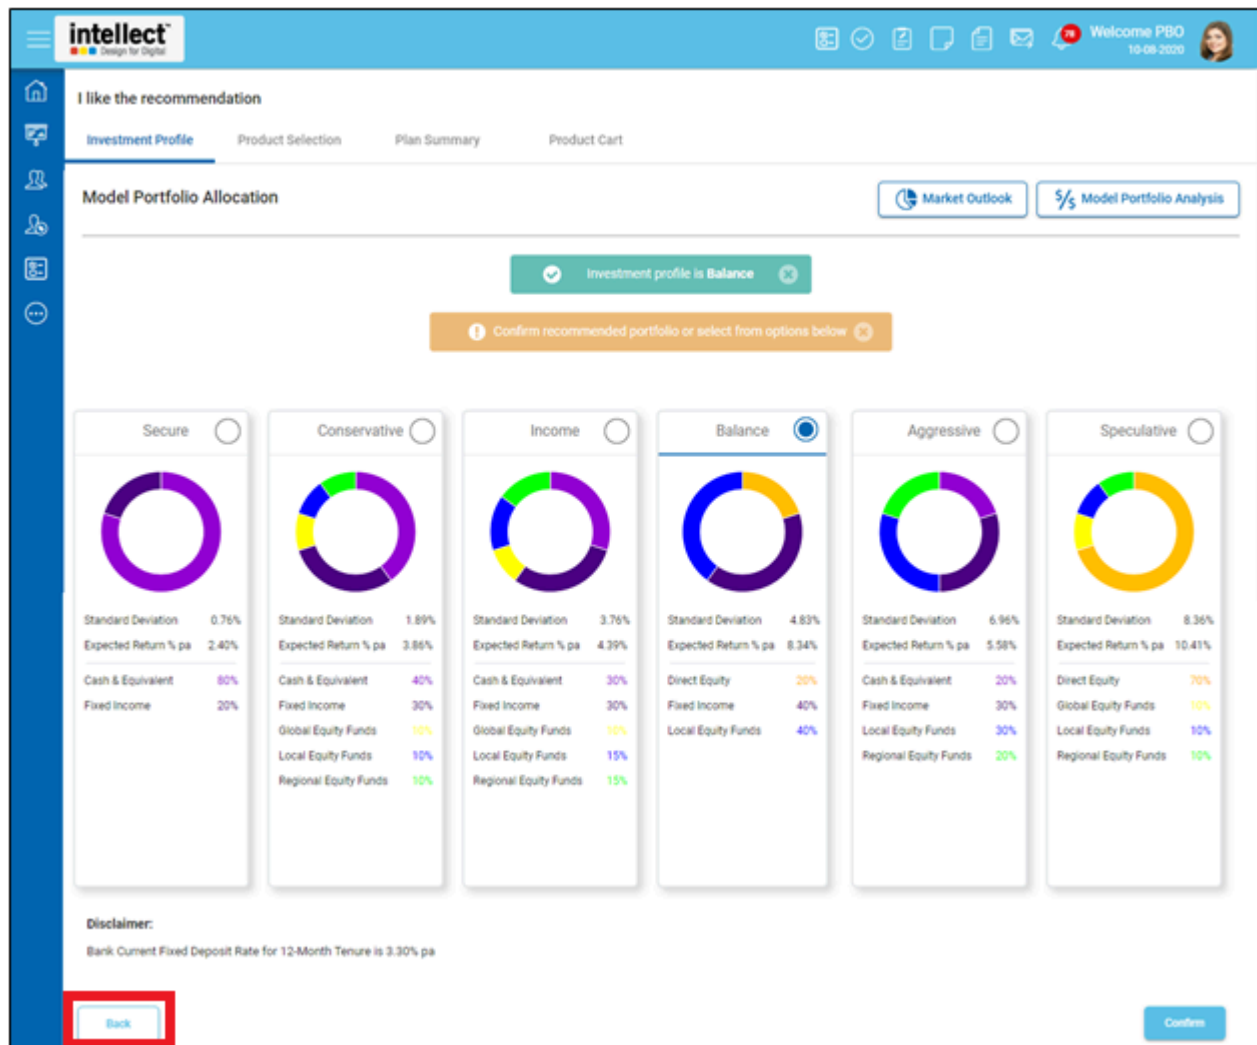

Screen: Model Portfolio Comparison - Performance Projection

- The user can navigate back to the Investment Profile screen by clicking on the “Back” button and then again the subsequent “Back” button

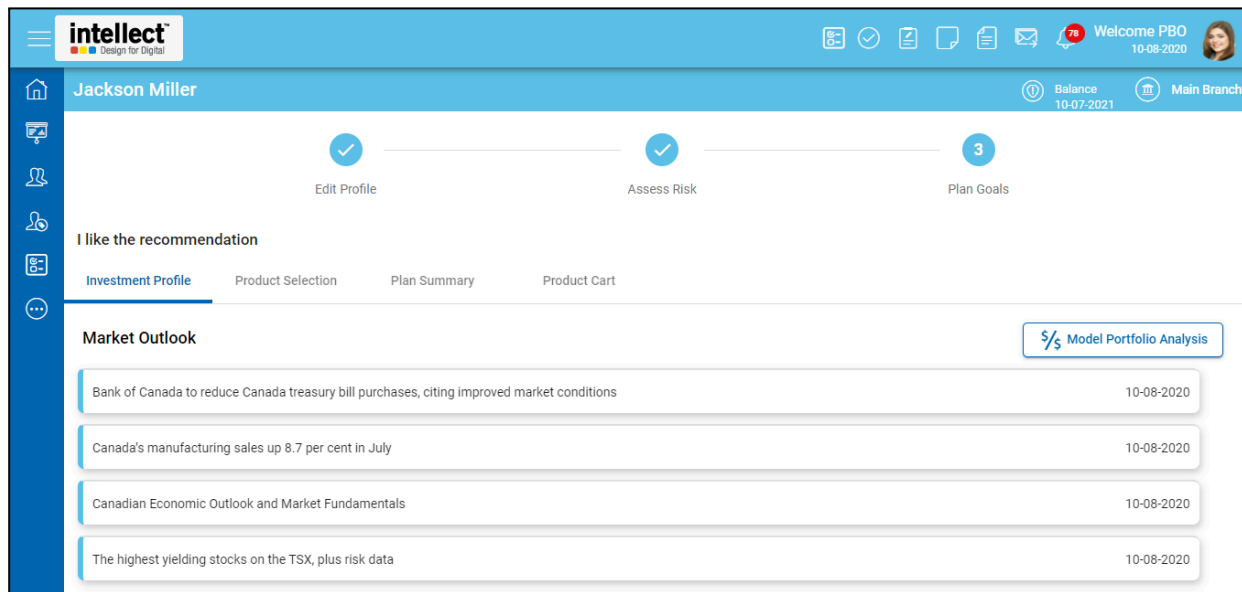

Screen: Model Portfolio Allocation Navigation

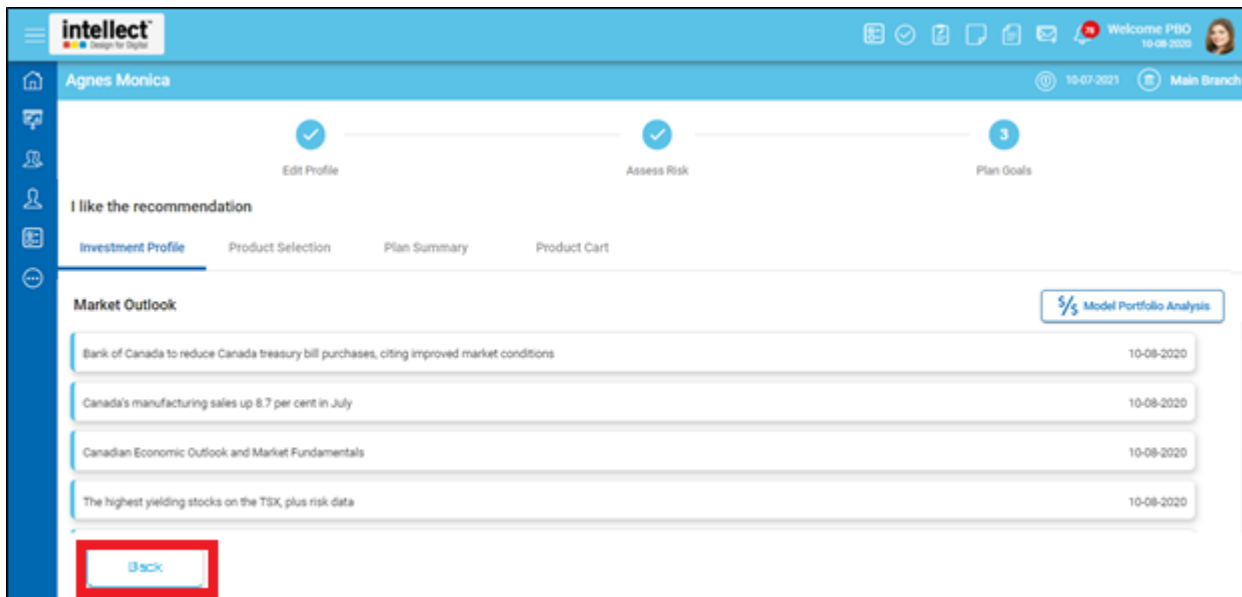

Screen: Investment Profile Navigation

8. The user can navigate to the Market Outlook page by clicking on the “Market Outlook” button present in the Investment Profile screen if they wish to. The market outlook screen can also be accessed from the Model Portfolio Analysis screen by clicking on the “Market Outlook” button present there
 - a. The Market Outlook screen shows the most recent news pertaining to the market to the user. This would help them take more informed decisions. This screen also has the “Model Portfolio Analysis” button present in it that allows the user to navigate directly to the comparison screen should they wish to. Hence, both the Market Outlook and the Model Portfolio Analysis screens are accessible from one another

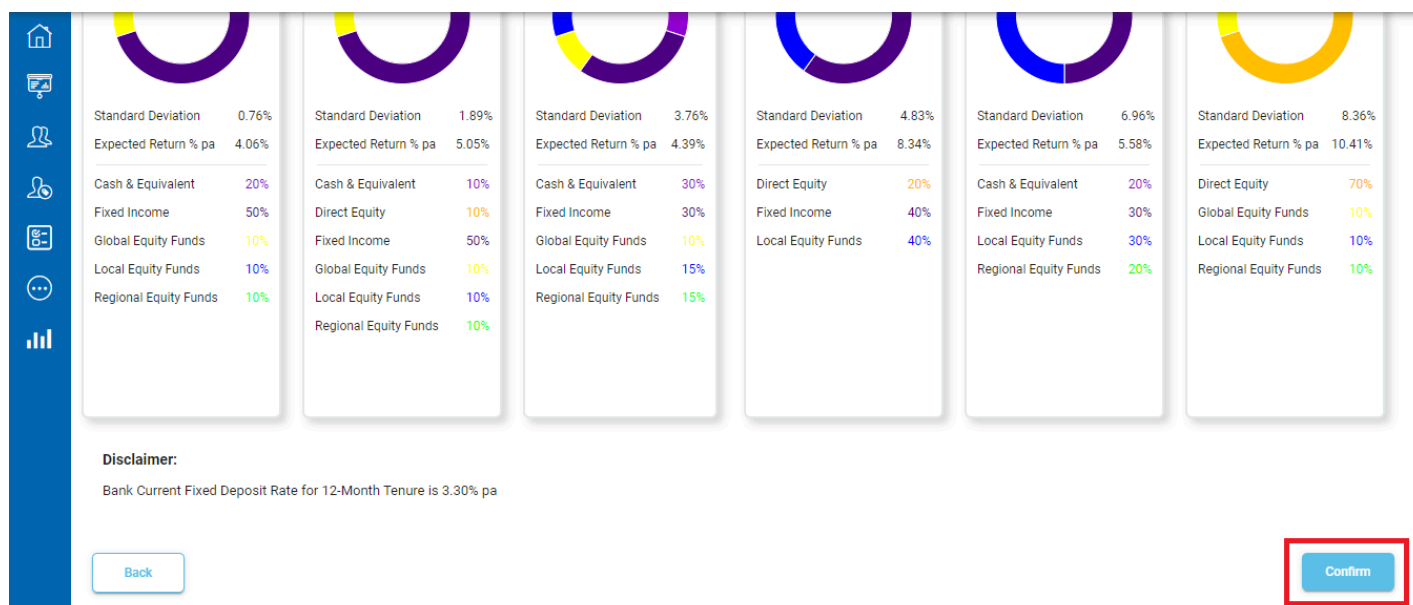

Screen: Investment Profile - Market Outlook

9. The user can navigate back to the Investment Profile screen from the Market Outlook screen by clicking on the “Back” button

Screen: Investment Profile Navigation

10. Once on the Investment profile screen, the user can click on the “Confirm” button after selecting the Investment profile that they wish to proceed with, to move on to the Product Selection screen

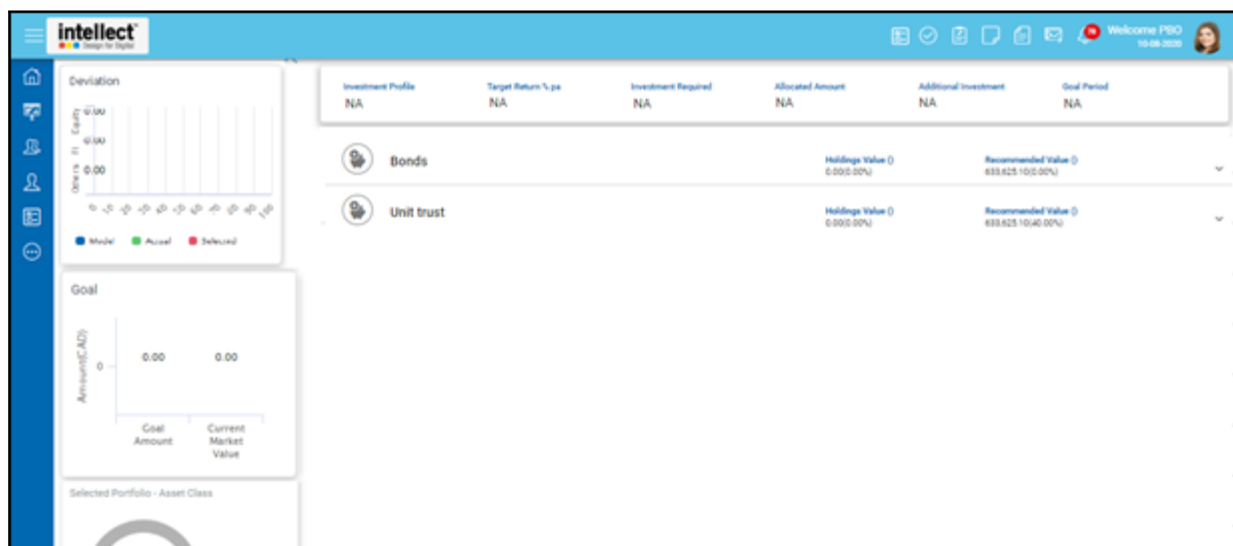

Screen: Goal Planning Navigation

4.8.1.16. Select the Products

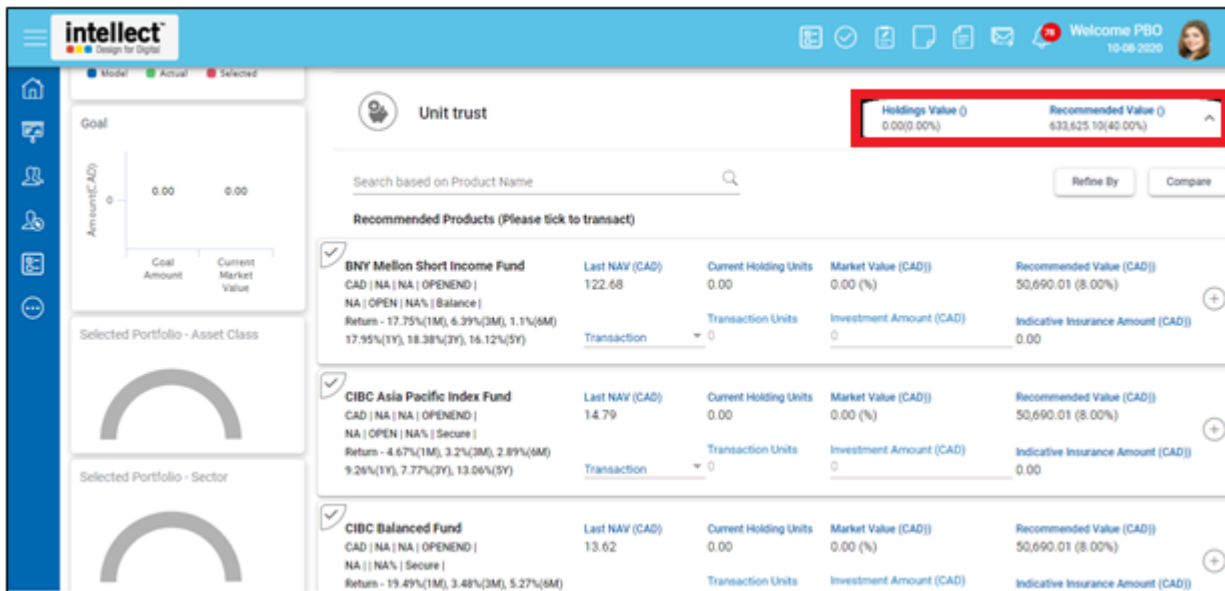

This process allows the user to see the products available to the customer for composing the plan portfolio. Before a user selects a product as part of their plan, there are different sets of questions and doubts that appear in their minds. User can view and analyze detailed information on each of the products

1. The user can see the list of product types which the customer can choose for investing
2. These products are grouped by Product Types i.e. all the products maintained in the application will be displayed under the following product types:
 - a. Bonds
 - b. Unit Trust
 - c. Insurance

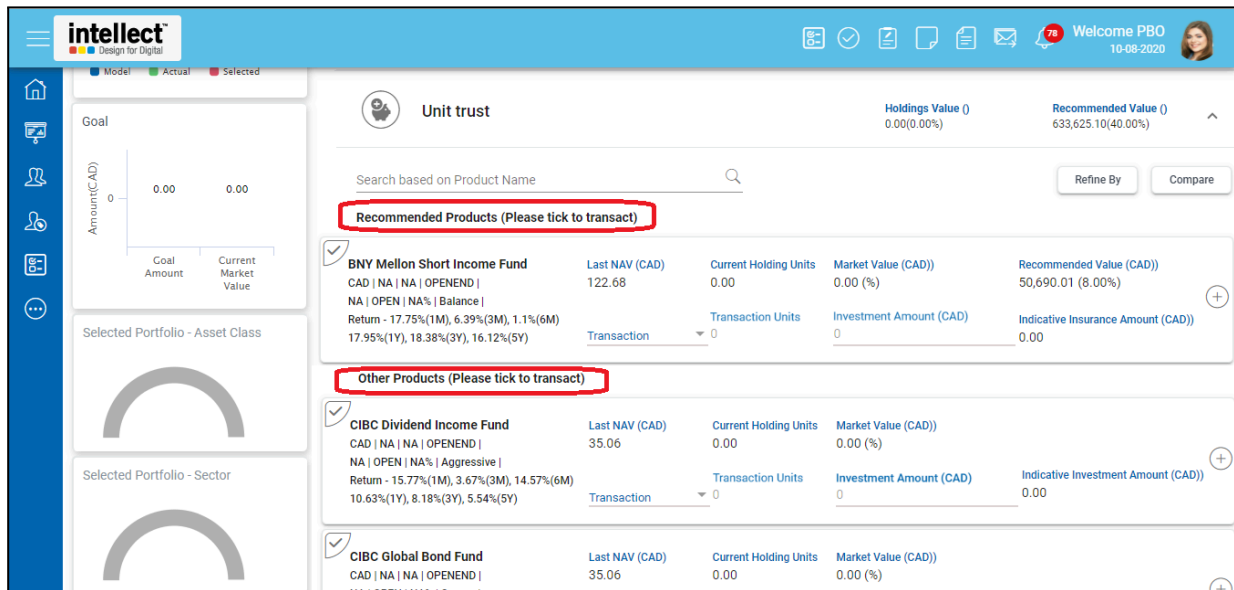

Screen: Product Selection - View by Product Type

3. At each of the product type levels, user can click on the down arrow to view the list of products. The following fields will be shown at each product type level:
 - a. Holdings value: This field will display the current holdings value if the customer already holds this product type
 - b. Recommended Value: This field is not applicable for “I Like the Recommendation”

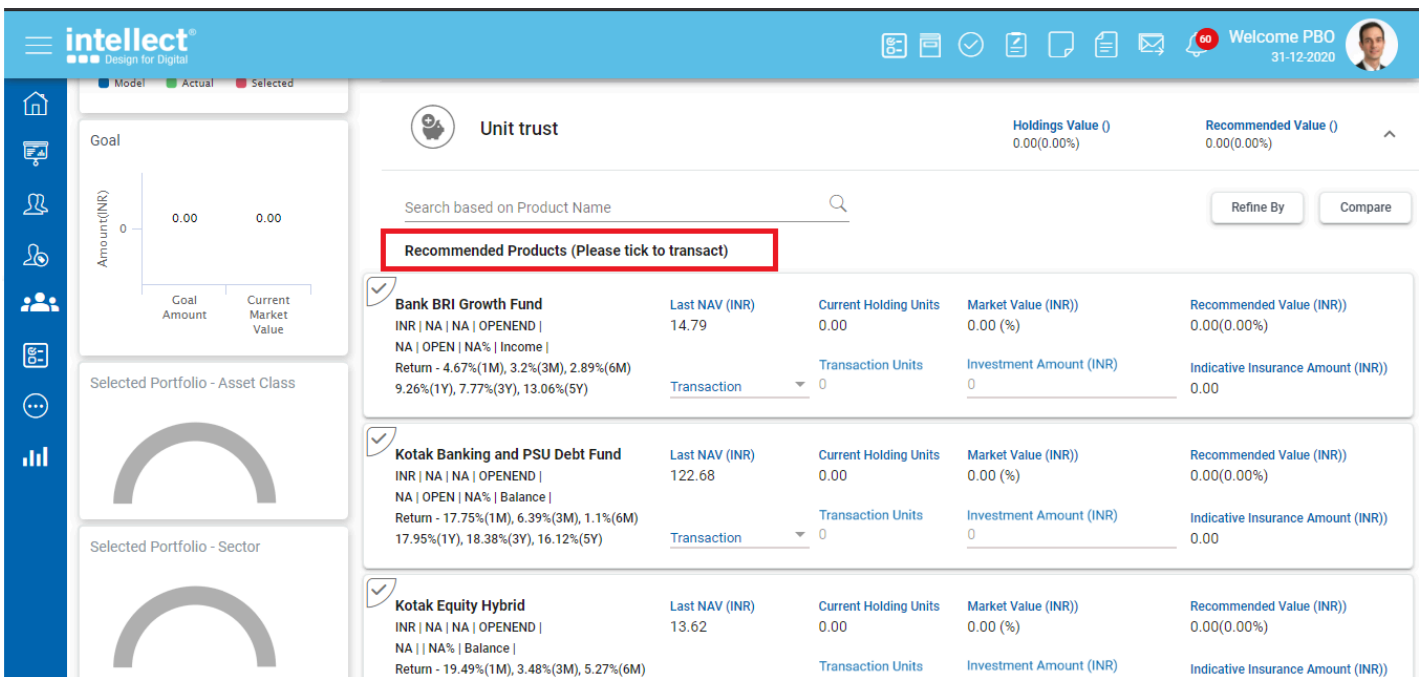

Screen: Product Selection - Expanding the Product Type View

4. Under each of the Product Type, system displays the list of products in further sub grouping:
 - a. Recommended Products
 - b. Other Products

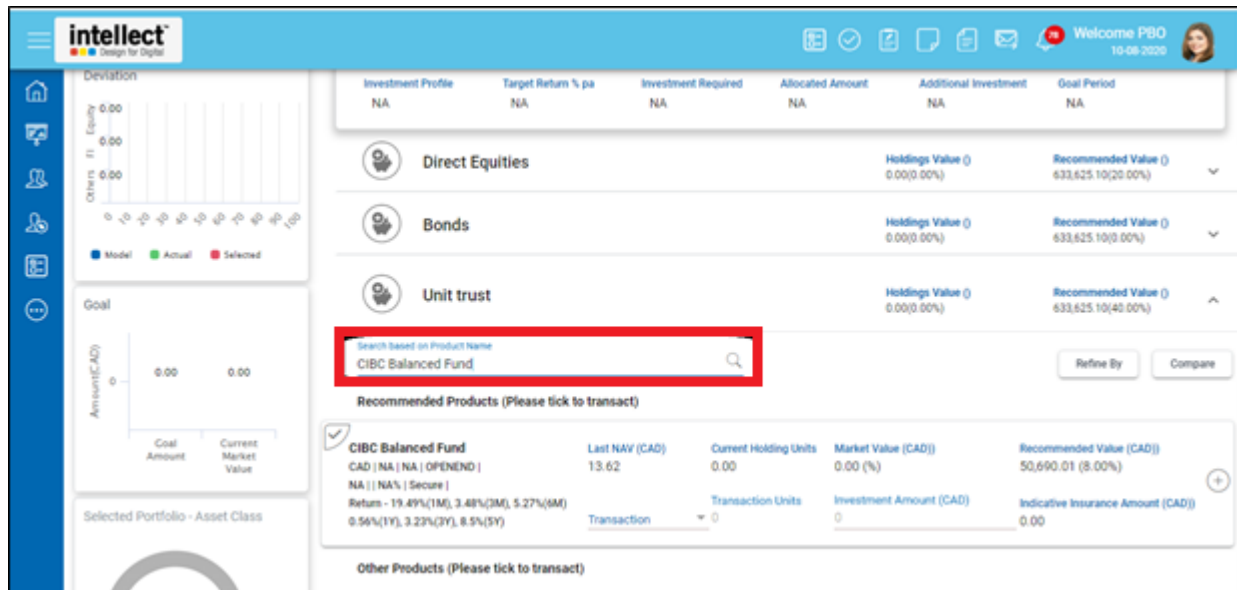

Screen: Product Selection - Recommended and Other Products

- Recommended Products: The products recommended by the bank for the investment profile selected by the customer will be displayed under the recommended products section

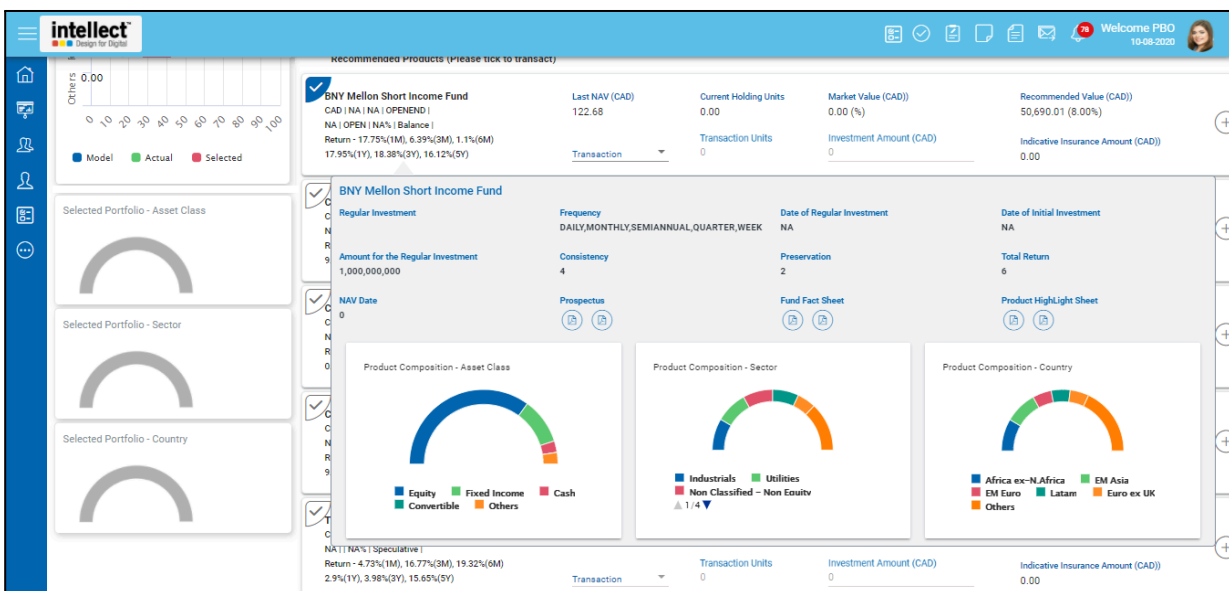

Screen: Product Selection - Recommended Products

- User can search the specific product by searching the product name using the search available at the product type level

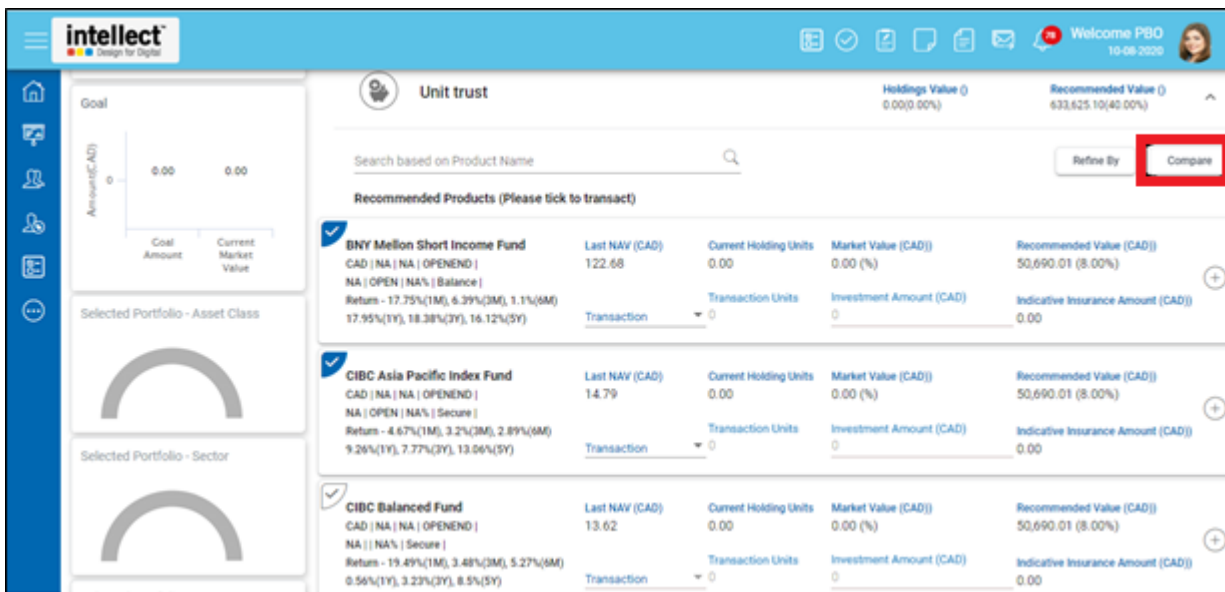

Screen: Product Selection - Searching by Product Name

7. User clicks on the Product Card to view additional details of the product
 - a. Product Overlay: This is the section that is available for each product and it gives more detail about the selected product. The product overlay can be accessed for a product by clicking on the Product name on the Product Card. The content of the product overlay will depend upon the specific product type. The following details on the Product Overlay are common across the product types:
 - i. Selected Product composition – Asset Class
 - ii. Selected Product Composition – Sector
 - iii. Selected Product Composition – Country

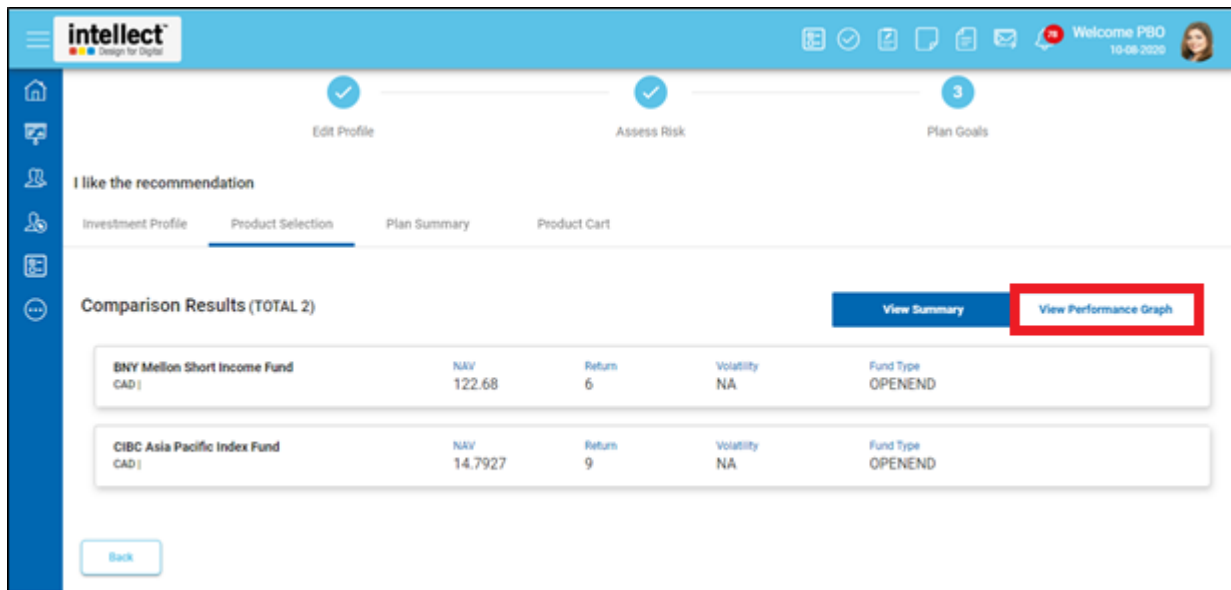

Screen: Product Selection - Viewing Product Details

8. User can compare up to three products by selecting the products using the check box and clicking on the Compare button. System navigates the user to the “View Summary” screen for Comparison. The product comparison can only be carried out for products of the same product type. Minimum of two products and Maximum of three products can be selected for comparison

Screen: Product Selection - Compare Products

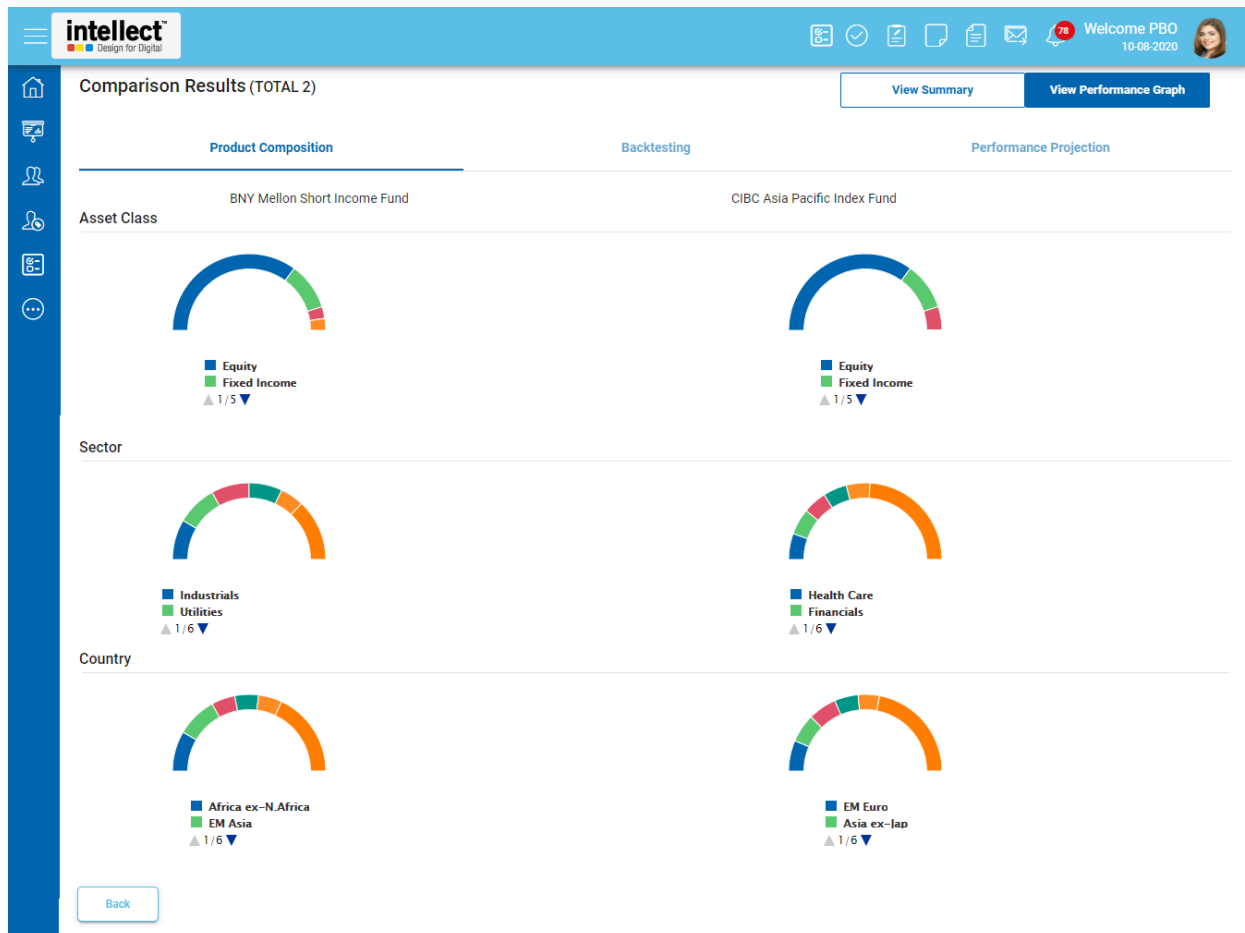

9. Users can see the product comparison summary. User can click on the View Performance Graph to navigate to the Product Composition screen to compare the performance of the products

Screen: Product Comparison - View Summary

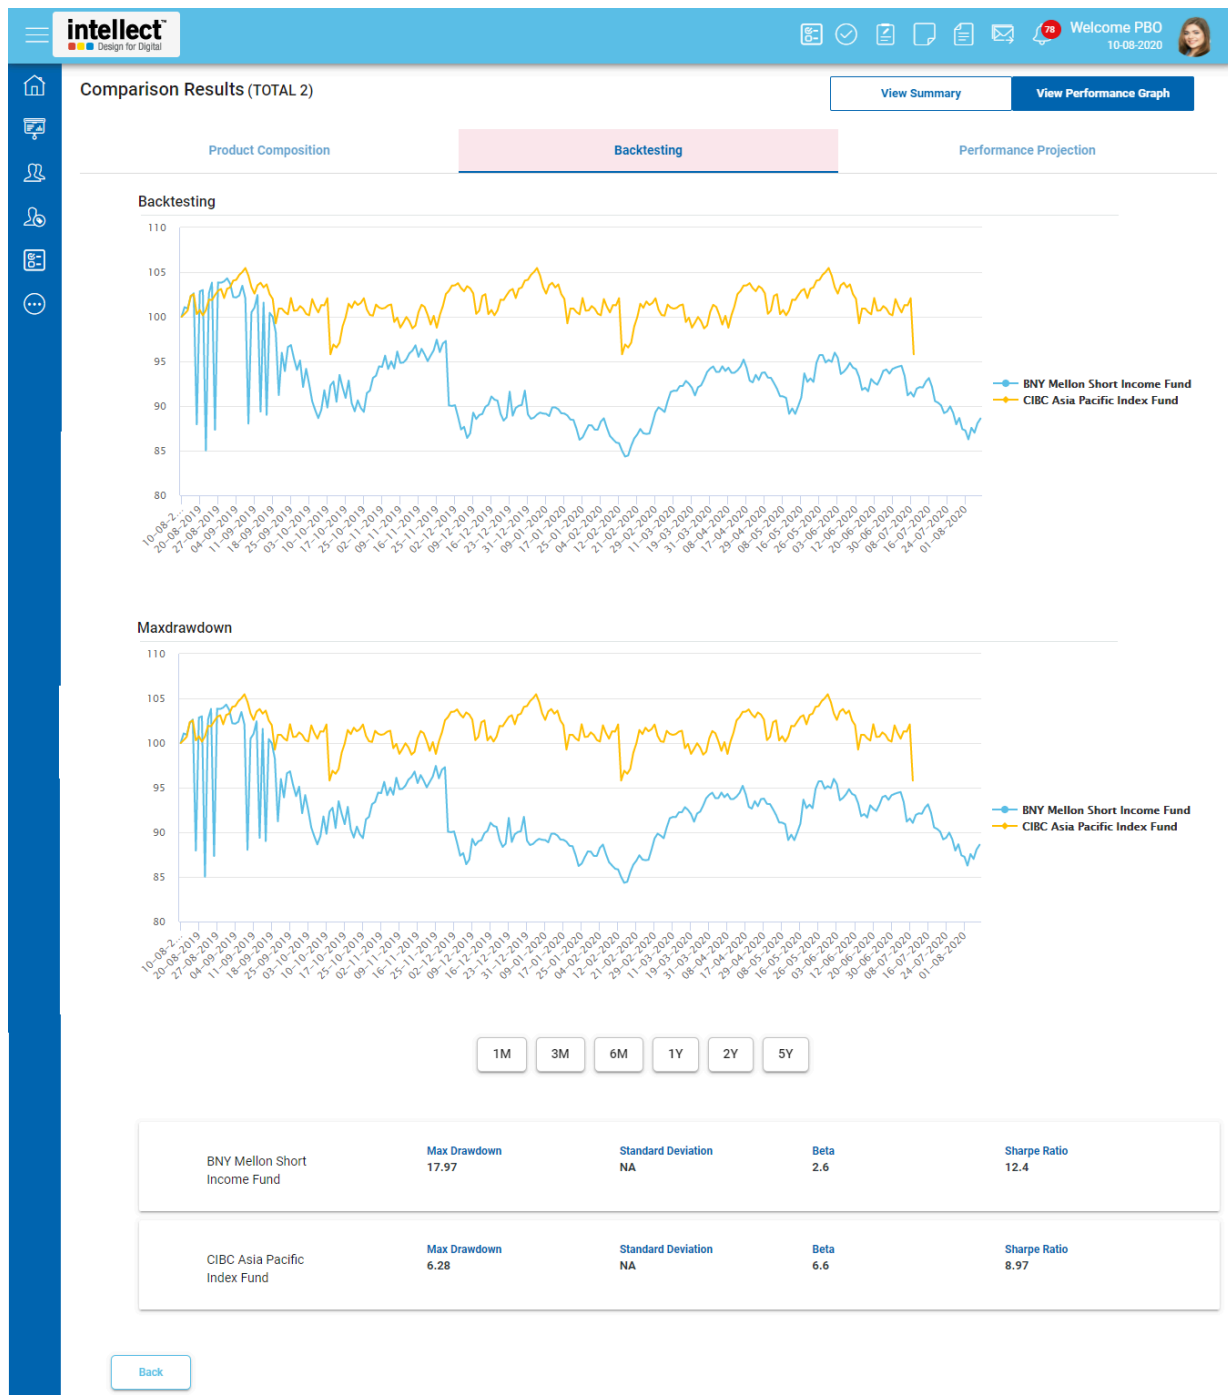

10. User lands on the Product Composition screen to view
 - a. Product Composition by Asset Class

- b. Product Composition by Sector
- c. Product Composition by Country

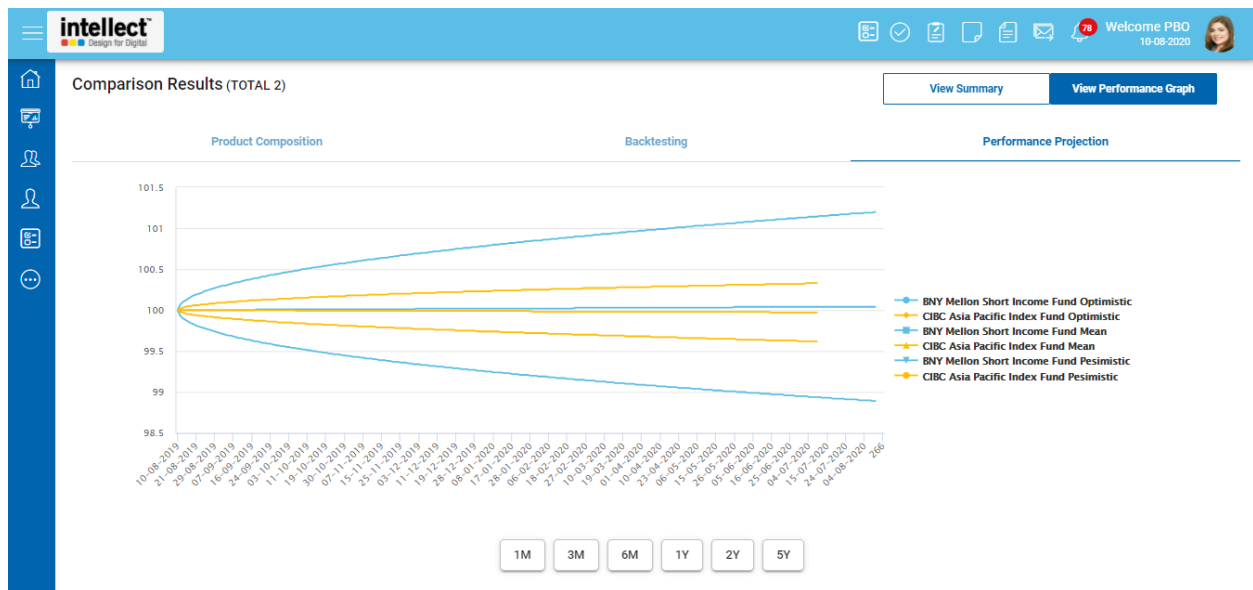

Screen: Product Comparison - Product Composition

11. User clicks on back testing to view the back testing results for the comparison
 - a. Back testing: System compares the performance of selected products using Back testing technique. This widget provides the 'product performance' for the selected historical period for the given products
 - b. Max Drawdown: Displays the maximum observed loss from a peak to a trough of a portfolio, before a new peak is attained. Maximum drawdown is an indicator of downside risk over a specified time period. System also displays the Standard Deviation, Beta, and Sharpe Ratio of the respective portfolios
 - i. Standard Deviation: It measures the volatility of an investment. It measures the investment's risk and helps in analyzing the stability of returns of a portfolio
 - ii. Beta: It measures the volatility—or systematic risk—of a security or portfolio compared to the market as a whole
 - iii. Sharpe Ratio: It measures the excess portfolio return over the risk-free rate relative to its standard deviation
12. User clicks on Performance Projection to navigate to the Performance Projection screen

Screen: Product Comparison - Back testing Results

- User clicks on Performance Projection to view the future performance projection results for the comparison. User clicks back to return to the product selection screen

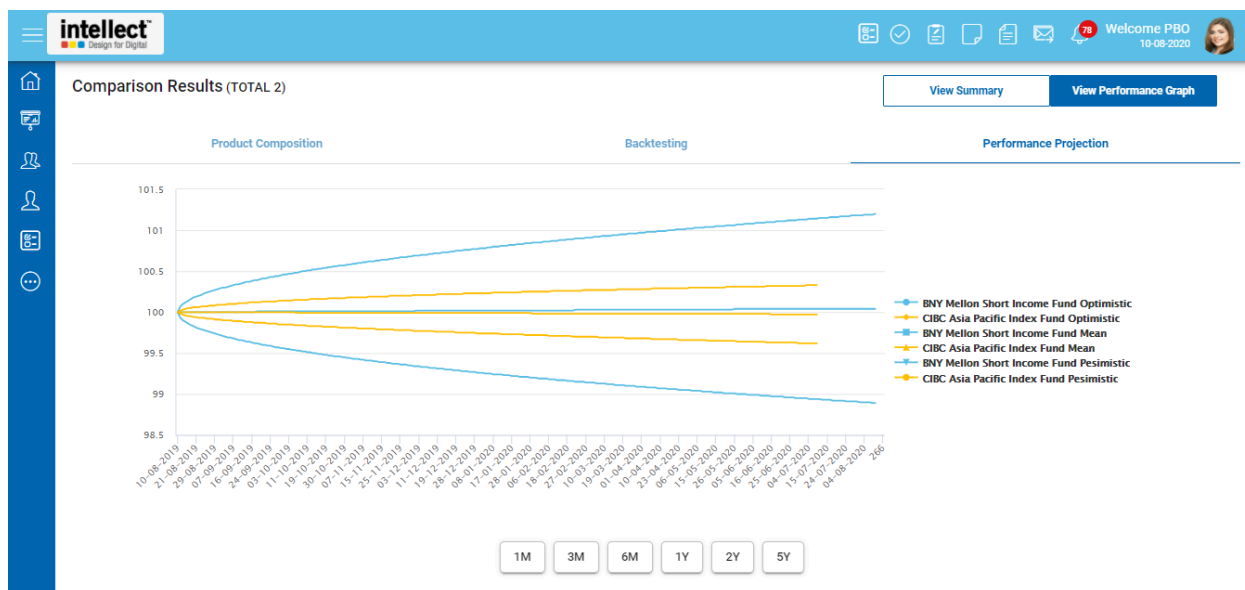

Screen: Product Comparison - Performance Projection Results

14. The user clicks the checkbox on the product card to select the product and inputs the transaction type and amount for the transaction

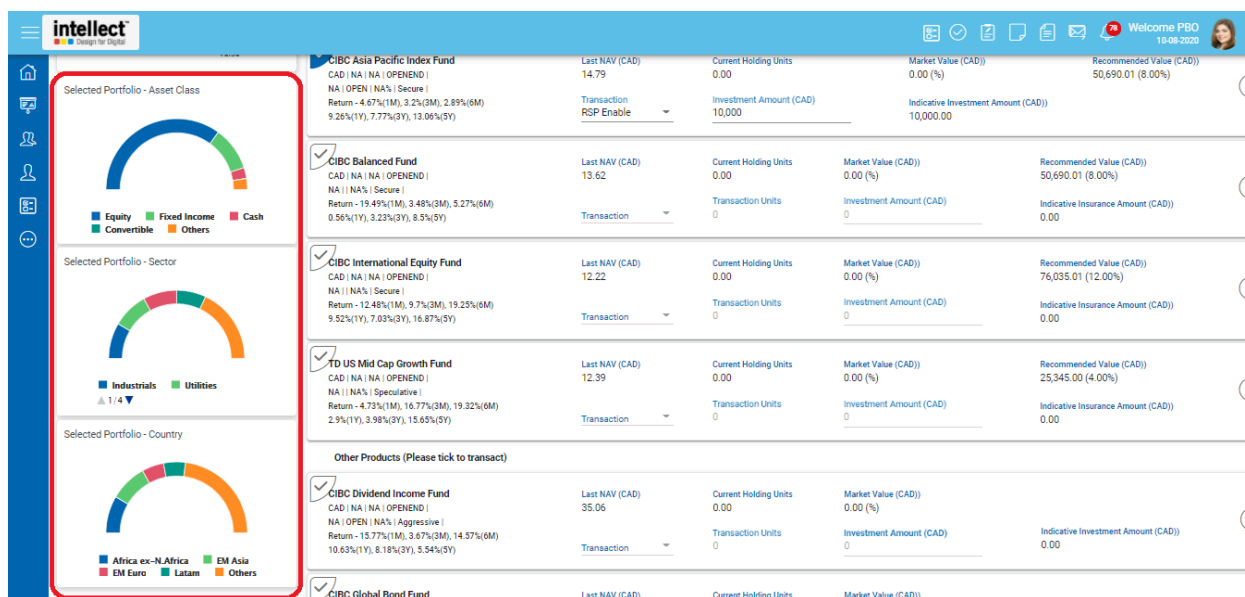

Screen: Product Selection- Input Transaction Type and Amount

15. User views the future performance projection results for the comparison. User clicks back to return to the product selection screen

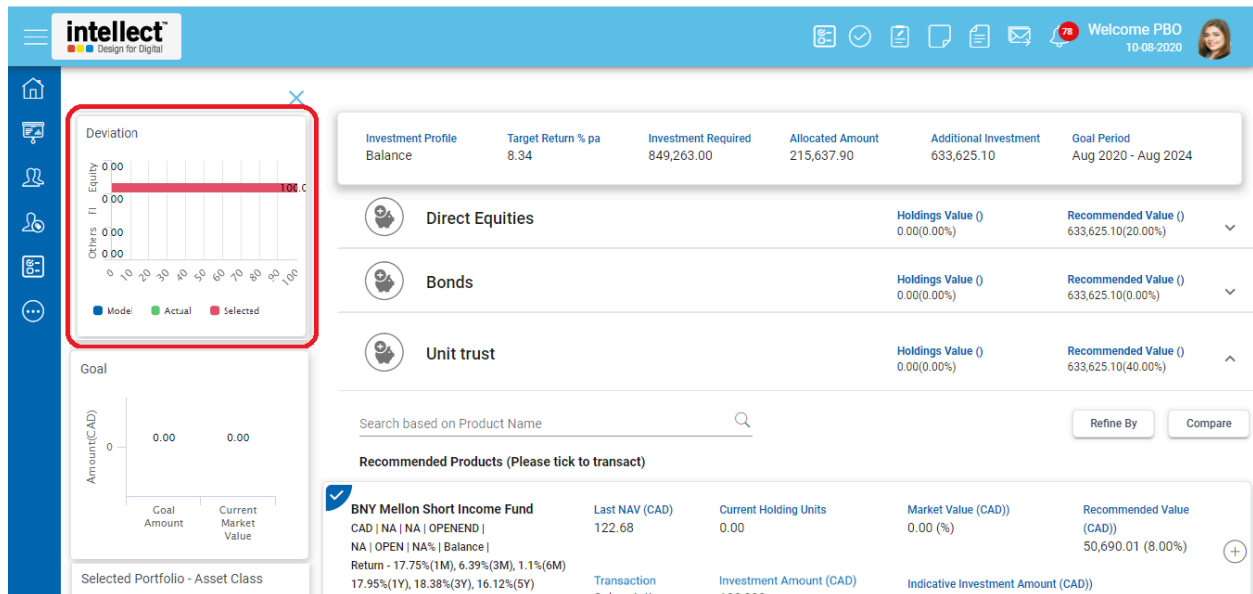

Screen: Product Comparison - Performance Projection Results

16. The product selection screen allows the user to simulate the composition of their portfolio in the following three ways by entering the amount for each of the products
- Selected Portfolio – Asset
 - Selected Portfolio – Sector
 - Selected Portfolio – Country

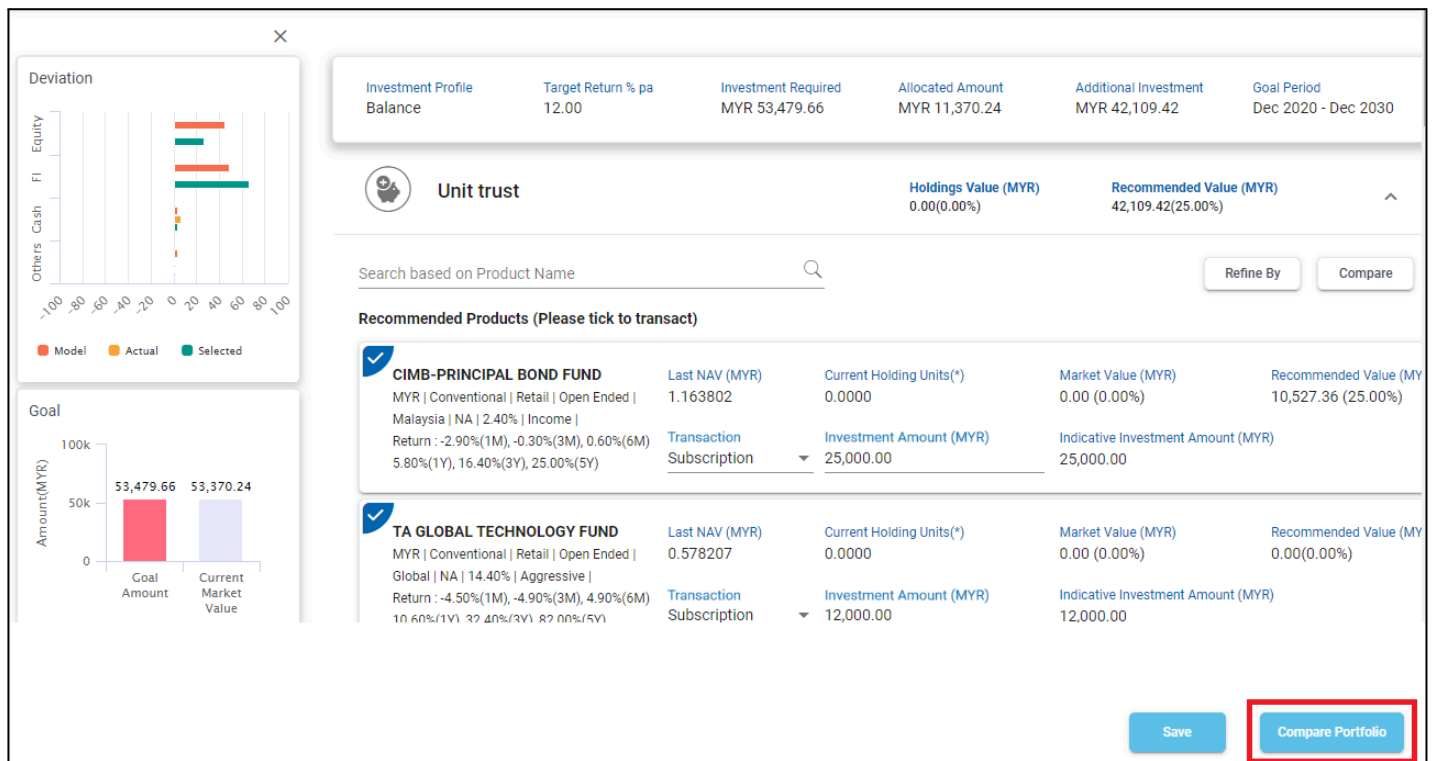

Screen: Product Selection- Simulation

17. User can check the deviation graph reflecting Model Portfolio vs. Actual Portfolio vs. Selected Portfolio comparison
- Model Portfolio - Model Portfolio displays the composition of asset classes for the Investment Portfolio selected
 - Selected Portfolio - Selected Portfolio displays the composition of asset classes for the products selected for investment

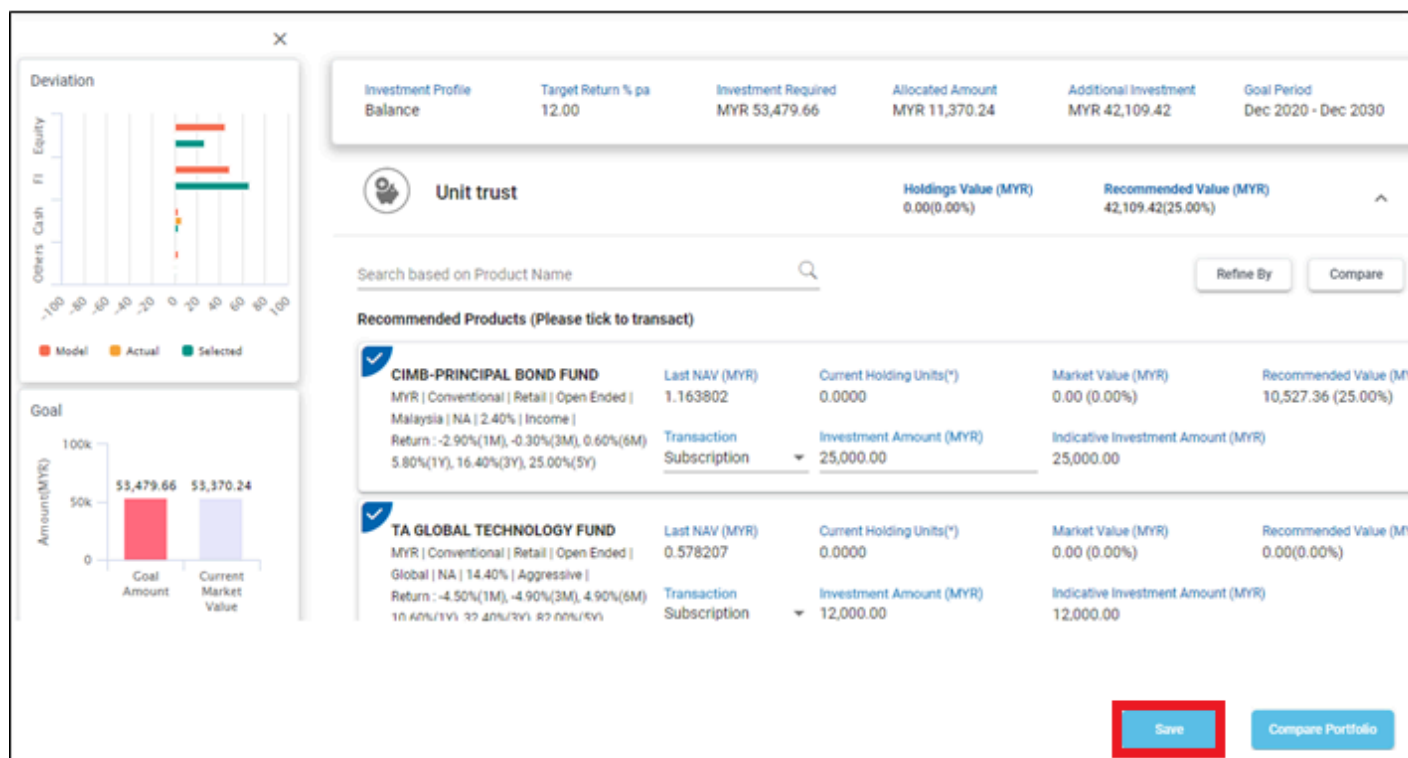

Screen: Product Selection- Deviations

18. User can check the analytics for the selected portfolio (Products selected in the Product Selection) by clicking on the compare portfolio. This allows the user to compare Investment Profile and Selected Portfolio of the Customer (refer to the section 4.8.1.10 Set My Goals – Select the Products for more details on Compare Model Portfolio)

Screen: Product Selection – Compare Portfolio

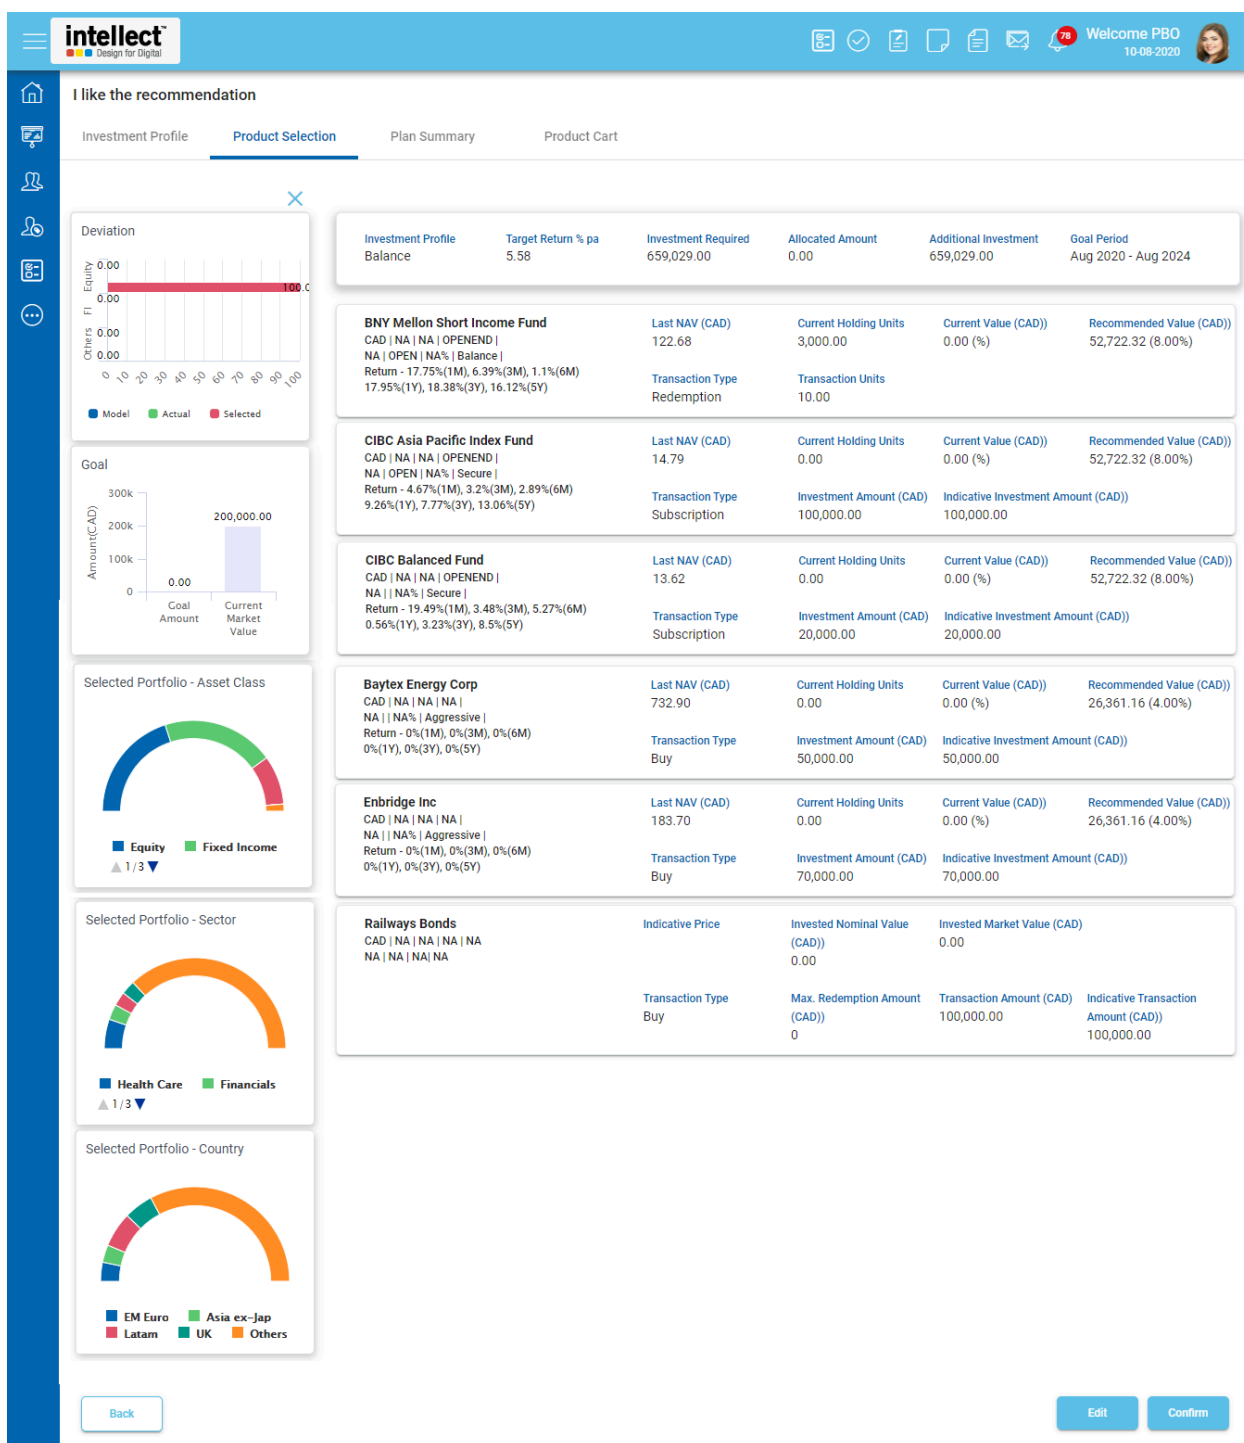

19. After the comparison and analysis, the user clicks on “Save” to navigate to the “Confirm the Selected Products” screen

Screen: Product Selection Save – Navigate to Confirm the Product Selection

4.8.1.17. Confirm the Selected Products

1. The summary of the products selected for the transaction will be viewed in the confirmation screen
2. User clicks on “Edit” to edit the transaction details by navigating back to the “Product Selection” screen. User clicks on “Confirm” to navigate to the “Plan Summary” screen to generate the proposal for the plan

Screen: Confirm the Product Selection

4.8.1.18. Plan Summary/Generate the Proposal

Plan Summary allows the user to view the summary of the plan and generate the plan proposal. Generation of Proposal marks the completion of the plan journey process

1. User views the summary of the plan. The following details will be displayed:
 - a. Cash flow
 - b. Net worth
 - c. Recommended vs. Actual Asset
 - d. Plan Details
 - e. Portfolio Deviations
 - f. Actual Portfolio

 - a. Back testing: System compares the performance of selected products using Back testing technique. This widget provides the 'product performance' for the selected historical period for the given products
 - b. Max Drawdown: Displays the maximum observed loss from a peak to a trough of a portfolio, before a new peak is attained. Maximum drawdown is an indicator of downside risk over a specified time period. System also displays the Standard Deviation, Beta, and Sharpe Ratio of the respective portfolios
 - i. Standard Deviation: It measures the volatility of an investment. It measures the investment's risk and helps in analyzing the stability of returns of a portfolio
 - ii. Beta: It measures the volatility—or systematic risk—of a security or portfolio compared to the market as a whole
 - iii. Sharpe Ratio: It measures the excess portfolio return over the risk-free rate relative to its standard deviation

Screen: Product Comparison - Back testing Results

- User clicks on Performance Projection to view the future performance projection results for the comparison. User clicks back to return to the product selection screen

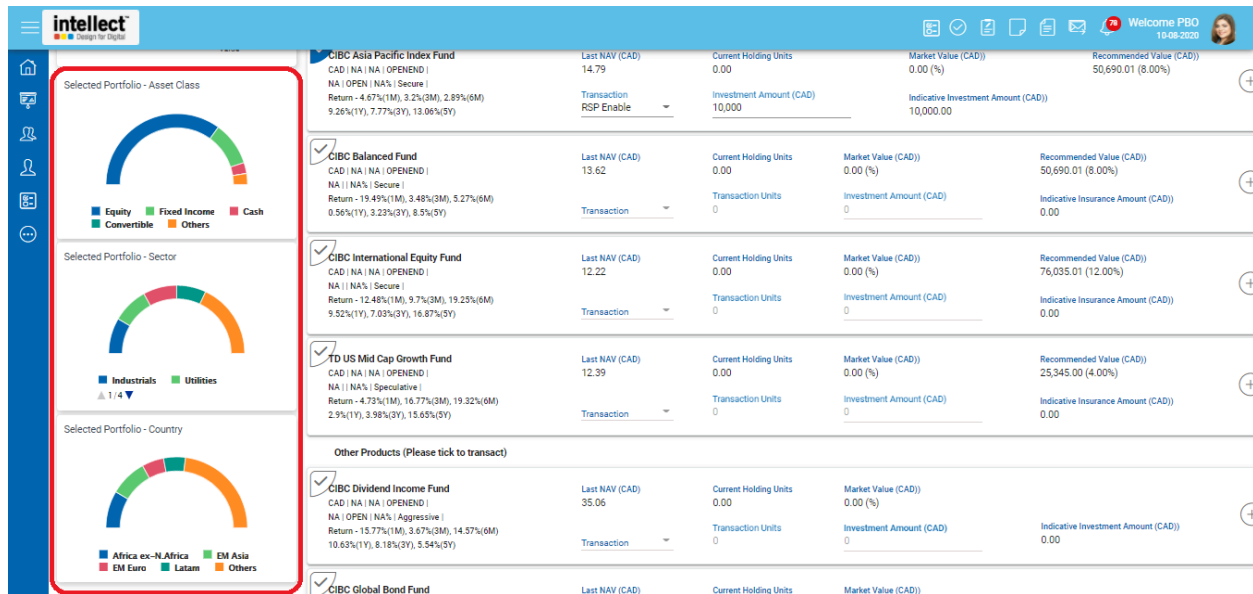

Screen: Product Comparison - Performance Projection Results

11. The user clicks the checkbox on the product card to select the product and inputs the transaction type and amount for the transaction

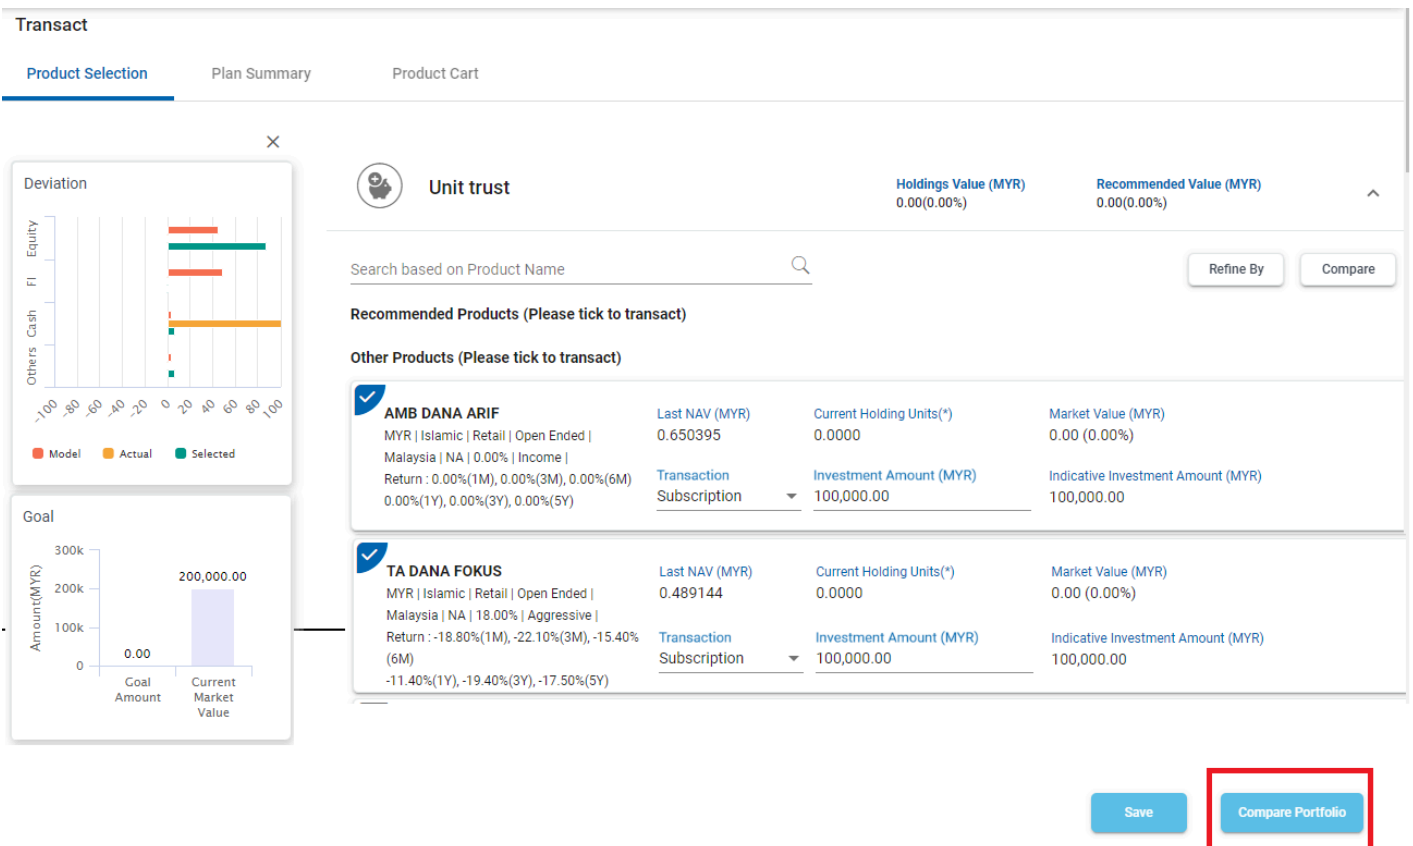

Screen: Product Selection- Input Transaction Type and Amount

12. The product selection screen allows the user to simulate the composition of their portfolio in the following three ways by entering the amount for each of the products
 - a. Selected Portfolio – Asset
 - b. Selected Portfolio – Sector
 - c. Selected Portfolio – Country

Screen: Product Selection- Simulation

13. User can check the analytics for the selected portfolio (Products selected in the Product Selection) by clicking on the compare portfolio. This allows the user to view the Selected Portfolio of the Customer analytics

14. In this screen, the user will be able to view the following for the Selected Portfolio:

- i. Portfolio Composition - View Fund details, asset class, sector wise and country wise break up for the selected portfolio
- ii. Back testing results - View Back testing results for both the selected portfolio which provides the 'portfolio performance' for the selected historical period for a given portfolio of securities
- iii. Performance Projection - View Performance projections for a definite period of time into the future

15. The user views the Portfolio Composition of the customer selected portfolio

- a. **Portfolio Composition** - View Fund details, asset class, sector wise and country wise break up for the selected portfolio. Asset, Sector and Country wise comparison for the Investment Profiles is based on the Mutual Funds present in the customer selected portfolio

Screen: Product Selection Save – Navigate to Confirm the Product Selection

4.8.2.2. Confirm the Selected Products

1. The summary of the products selected for the transaction will be viewed in the confirmation screen
2. User clicks on “Edit” to edit the transaction details by navigating back to the “Product Selection” screen. User clicks on “Confirm” to navigate to the “Plan Summary” screen to generate the proposal for the plan

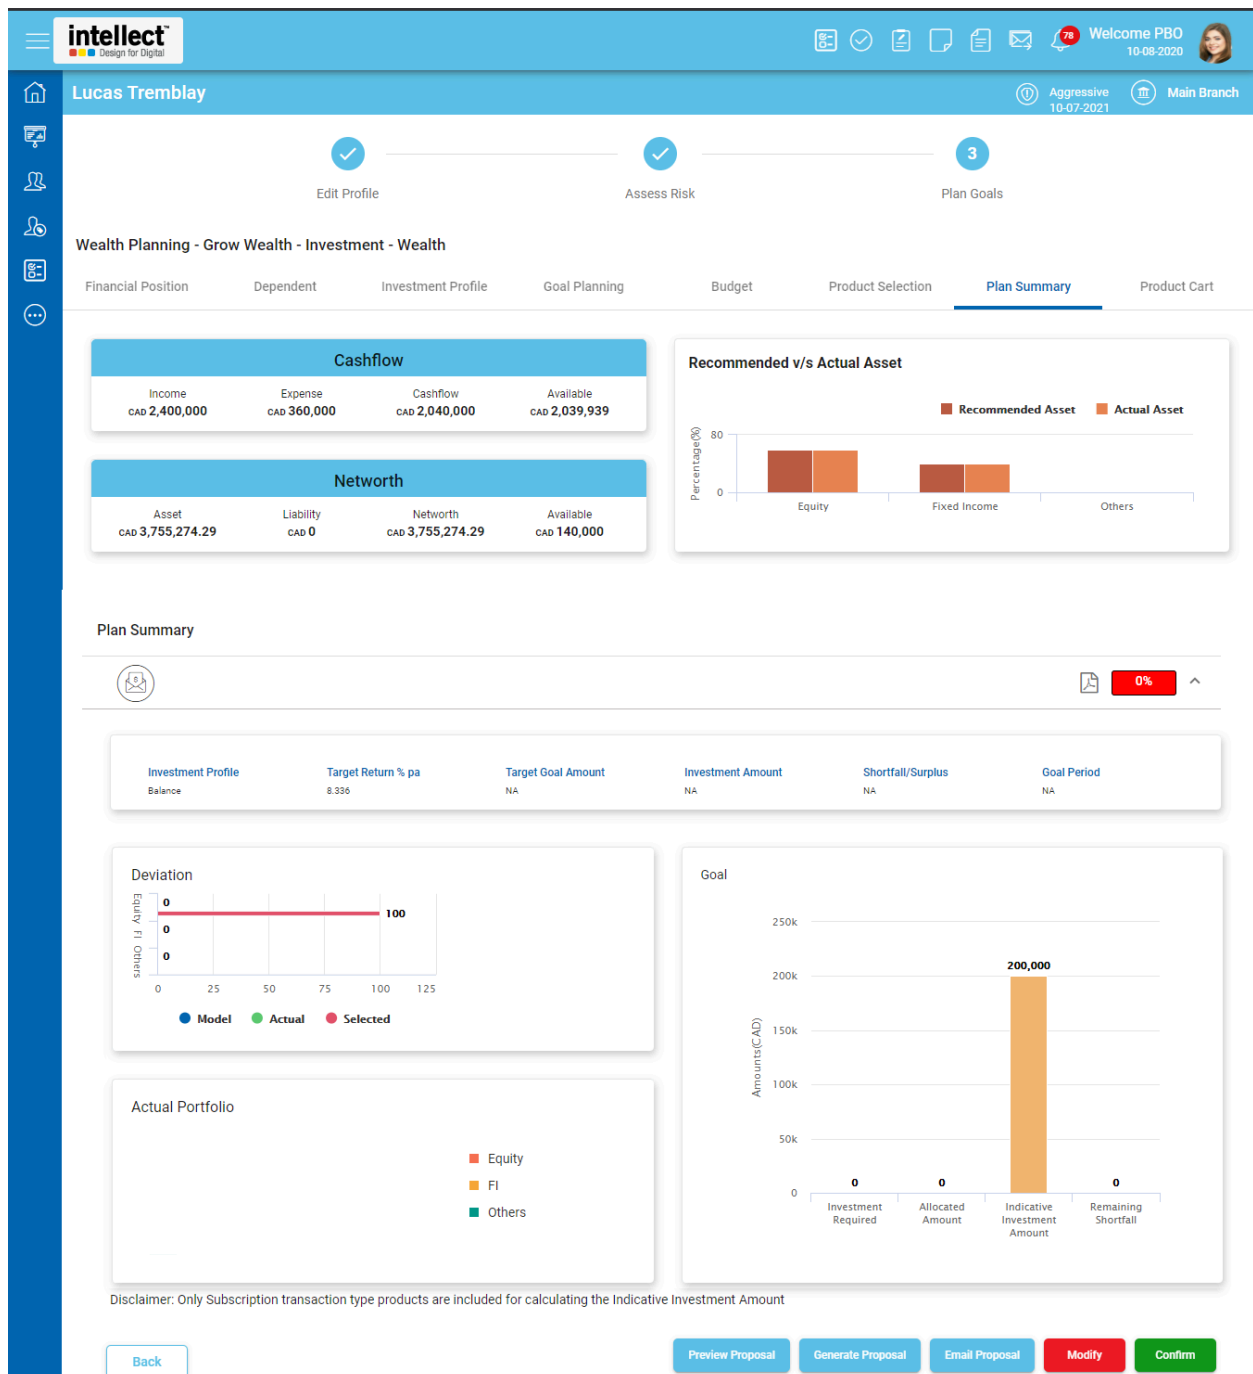

Screen: Confirm the Product Selection

4.8.2.3. Plan Summary/Generate the Proposal

Plan Summary allows the user to view the summary of the plan and generate the plan proposal. Generation of Proposal marks the completion of the plan journey process

1. User views the summary of the plan. The following details will be displayed:
 - a. Cash flow

- b. Net worth
- c. Recommended vs. Actual Asset
- d. Plan Details
- e. Portfolio Deviations
- f. Actual Portfolio

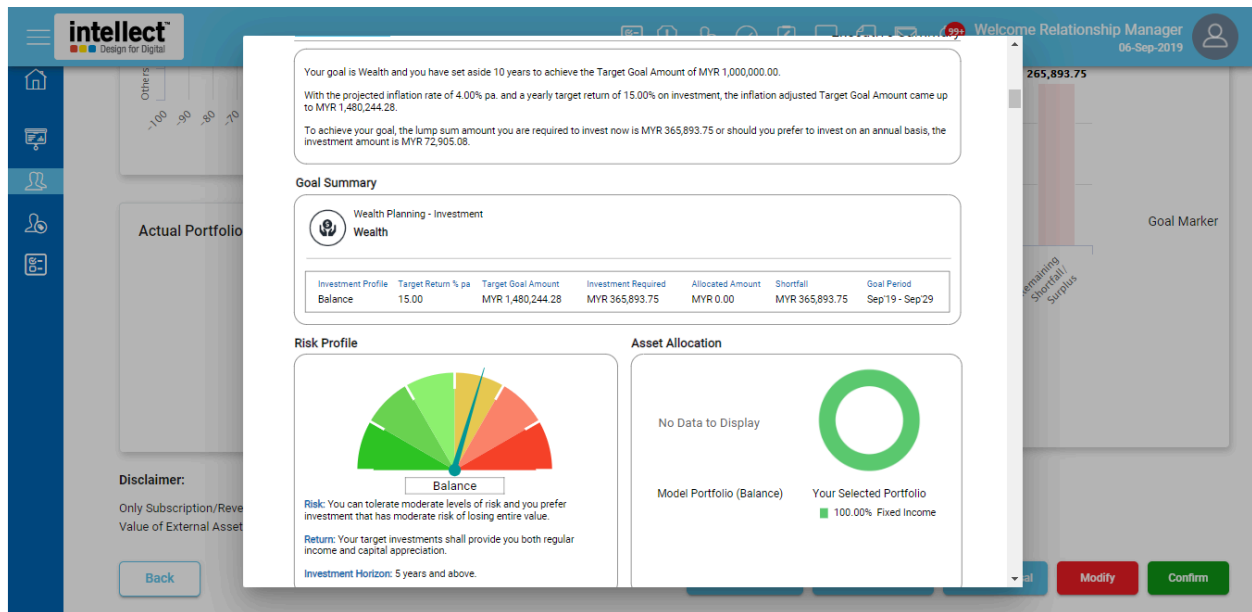

Screen: Plan Summary

2. The user can modify the plan from the plan summary page by clicking on “Modify” which navigates the user to the

“Product Selection” screen

3. The proposal can be generated by clicking on the ‘Generate Proposal’ button at the bottom of the Plan Summary page. The information in the final proposal will become the basis on which the portfolio of the customer for that plan will be composed and executed
4. The proposal can be previewed by the user by clicking on the “Preview Proposal” button

3	Description	Inputs the description of business income	Input	Yes	String	Yes	Not Applicable	
4	Start Year	Inputs the starting year of business income	Input	Yes	String	Yes	Not Applicable	
5	End Year	Inputs the ending year of business income	Input	Yes	String	Yes	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
6	Owner	Inputs the owner of business income	Input	Yes	String	Yes	Not Applicable	
7	Growth Rate	Inputs the growth rate of business income	Input	Yes	Numeric	Yes	Not Applicable	
Add Others								
1	Amount	Inputs the amount	Input	Yes	Numeric	Yes	Not Applicable	
2	Frequency	Selects the frequency of other income	Select	Yes	Numeric	Yes	1. Monthly 2. Half Yearly 3. Yearly	
3	Description	Inputs the description of other income	Input	Yes	String	Yes	Not Applicable	
4	Start Year	Inputs the starting year of other income	Input	Yes	String	Yes	Not Applicable	
5	End Year	Inputs the ending year of other income	Input	Yes	String	Yes	Not Applicable	
6	Owner	Inputs the owner of other income	Input	Yes	String	Yes	Not Applicable	
7	Growth Rate	Inputs the growth rate of other income	Input	Yes	Numeric	Yes	Not Applicable	
Expense								
1	Monthly expense	Displays monthly expense of the customer (Household + Loan Repayment + Loan Repayment (with other bank) + Insurance/Medical + Others)	Display	No	Numeric	No	Not Applicable	
2	Household	Displays monthly household expense of the customer	Display	No	Numeric	No	Not Applicable	
3	Loan Repayment	Displays monthly Loan Repayment	Display	No	Numeric	No	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
		expense of the customer						
4	Loan Repayment (with other bank)	Displays monthly Loan Repayment (with other bank) expense of the customer	Display	No	Numeric	No	Not Applicable	
5	Insurance/Medical	Displays monthly Insurance/Medical expense of the customer	Display	No	Numeric	No	Not Applicable	
6	Others	Displays monthly expense on other items of the customer	Display	No	Numeric	No	Not Applicable	
Add household								
1	Amount	Inputs the amount	Input	Yes	Numeric	Yes	Not Applicable	
2	Frequency	Selects the frequency of household expense	Select	Yes	Numeric	Yes	1. Monthly 2. Half Yearly 3. Yearly	
3	Description	Inputs the description of household expense	Input	Yes	String	Yes	Not Applicable	
4	Start Year	Inputs the starting year of household expense	Input	Yes	String	Yes	Not Applicable	
5	End Year	Inputs the ending year of household expense	Input	Yes	String	Yes	Not Applicable	
6	Owner	Inputs the owner of household expense	Input	Yes	String	Yes	Not Applicable	
7	Growth Rate	Inputs the growth rate of household expense	Input	Yes	Numeric	Yes	Not Applicable	
Add Loan repayment								
1	Amount	Inputs the amount	Input	Yes	Numeric	Yes	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
2	Frequency	Selects the frequency of loan repayment expense	Select	Yes	Numeric	Yes	1. Monthly 2. Half Yearly 3. Yearly	
3	Description	Inputs the description of loan repayment expense	Input	Yes	String	Yes	Not Applicable	
4	Start Year	Inputs the starting year of loan repayment expense	Input	Yes	String	Yes	Not Applicable	
5	End Year	Inputs the ending year of loan repayment expense	Input	Yes	String	Yes	Not Applicable	
6	Owner	Inputs the owner of loan repayment expense	Input	Yes	String	Yes	Not Applicable	
7	Growth Rate	Inputs the growth rate of loan repayment expense	Input	Yes	Numeric	Yes	Not Applicable	
Add Loan Repayment (with other bank)								
1	Amount	Inputs the amount	Input	Yes	Numeric	Yes	Not Applicable	
2	Frequency	Selects the frequency of loan repayment (with other bank) expense	Select	Yes	Numeric	Yes	1. Monthly 2. Half Yearly 3. Yearly	
3	Description	Inputs the description of loan repayment (with other bank) expense	Input	Yes	String	Yes	Not Applicable	
4	Start Year	Inputs the starting year of loan repayment (with other bank) expense	Input	Yes	String	Yes	Not Applicable	
5	End Year	Inputs the ending year of loan repayment (with	Input	Yes	String	Yes	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
		other bank) expense						
6	Owner	Inputs the owner of loan repayment (with other bank) expense	Input	Yes	String	Yes	Not Applicable	
7	Growth Rate	Inputs the growth rate of loan repayment (with other bank) expense	Input	Yes	Numeric	Yes	Not Applicable	
Add Insurance/Medical								
1	Amount	Inputs the amount	Input	Yes	Numeric	Yes	Not Applicable	
2	Frequency	Selects the frequency of Insurance/Medical expense	Select	Yes	Numeric	Yes	1. Monthly 2. Half Yearly 3. Yearly	
3	Description	Inputs the description of Insurance/Medical expense	Input	Yes	String	Yes	Not Applicable	
4	Start Year	Inputs the starting year of Insurance/Medical expense	Input	Yes	String	Yes	Not Applicable	
5	End Year	Inputs the ending year of Insurance/Medical expense	Input	Yes	String	Yes	Not Applicable	
6	Owner	Inputs the owner of Insurance/Medical expense	Input	Yes	String	Yes	Not Applicable	
7	Growth Rate	Inputs the growth rate of Insurance/Medical expense	Input	Yes	Numeric	Yes	Not Applicable	
Add Others								
1	Amount	Inputs the amount	Input	Yes	Numeric	Yes	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
2	Frequency	Selects the frequency of Other expense	Select	Yes	Numeric	Yes	1. Monthly 2. Half Yearly 3. Yearly	
3	Description	Inputs the description of Other expense	Input	Yes	String	Yes	Not Applicable	
4	Start Year	Inputs the starting year of Other expense	Input	Yes	String	Yes	Not Applicable	
5	End Year	Inputs the ending year of Other expense	Input	Yes	String	Yes	Not Applicable	
6	Owner	Inputs the owner of Other expense	Input	Yes	String	Yes	Not Applicable	
7	Growth Rate	Inputs the growth rate of Other expense	Input	Yes	Numeric	Yes	Not Applicable	
Financial Position - Net worth								
1	Net Worth	Displays the Net worth of the client	Display	No	Numeric	No	Not Applicable	
Assets								
1	Total Assets	Displays the Total assets of the client	Display	No	Numeric	No	Not Applicable	
2	Assets with bank	Displays the Total assets with the bank of the client	Display	No	Numeric	No	Not Applicable	
3	External Assets	Total external assets of the client	Display	No	Numeric	No	Not Applicable	
Liabilities								
4	Total Liabilities	Total liabilities of the client	Display	No	Numeric	No	Not Applicable	
5	Liabilities with bank	Total liabilities of the client with the bank	Display	No	Numeric	No	Not Applicable	
6	External Liabilities	Total external liabilities of the client	Display	No	Numeric	No	Not Applicable	
Add cash and bank deposits								

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
1	Investment type	Purpose of investment	Select	Yes	String	Yes	Investment Insurance Deposits	
2	Product	Description of the product of investment	Input	Yes	String	Yes	Not Applicable	
3	Assets Category	Category of asset	Select	Yes	String	Yes	Regional Equity Funds Alternatives Derivatives Others Fixed Income Local Equity Funds Funds Global Equity Funds Loans Cash & Equivalent Insurance Direct Equity	
4	Company	Company of which the asset is held	Input	Yes	String	Yes	Not Applicable	
5	Remarks	Remarks for the investment	Input	Yes	Alphanumeric	Yes	Not Applicable	
6	Trade date	Trade date of the investment	Input	Yes	String	Yes	Not Applicable	
7	Units held	Units held of the investment	Input	Yes	Numeric	Yes	Not Applicable	
8	Initial investment	Initial deposit made in the investment	Input	Yes	Numeric	Yes	Not Applicable	
9	Market value	Current market value of the investment	Input	Yes	Numeric	Yes	Not Applicable	
Add investments								
1	Investment type	Purpose of investment	Select	Yes	String	Yes	Investment Insurance Deposits	
2	Product	Description of the product of investment	Input	Yes	String	Yes	NA	
3	Assets Category	Category of asset	Select	Yes	String	Yes	Regional Equity Funds Alternatives Derivatives Others	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
							Fixed Income Local Equity Funds Funds Global Equity Funds Loans Cash & Equivalent Insurance Direct Equity	
4	Company	Company of which the asset is held	Input	Yes	String	Yes	Not Applicable	
5	Remarks	Remarks for the investment	Input	Yes	Alphanumeric	Yes	Not Applicable	
6	Trade date	Trade date of the investment	Input	Yes	String	Yes	Not Applicable	
7	Units held	Units held of the investment	Input	Yes	Numeric	Yes	Not Applicable	
8	Initial investment	Initial deposit made in the investment	Input	Yes	Numeric	Yes	Not Applicable	
9	Market value	Current market value of the investment	Input	Yes	Numeric	Yes	Not Applicable	
Add insurance								
1	Investment type	Purpose of investment	Select	Yes	String	Yes	Investment Insurance Deposits	
2	Product	Description of the product of investment	Input	Yes	String	Yes	Not Applicable	
3	Assets Category	Category of asset	Select	Yes	String	Yes	Regional Equity Funds Alternatives Derivatives Others Fixed Income Local Equity Funds Funds Global Equity Funds Loans Cash & Equivalent Insurance Direct Equity	
4	Company	Company of which the asset is held	Input	Yes	String	Yes	Not Applicable

5	Remarks	Remarks for the investment	Input	Yes	Alphanumeric	Yes	Not Applicable	
6	Trade date	Trade date of the investment	Input	Yes	String	Yes	Not Applicable	
7	Units held	Units held of the investment	Input	Yes	Numeric	Yes	Not Applicable	
8	Initial investment	Initial deposit made in the investment	Input	Yes	Numeric	Yes	Not Applicable	
9	Market value	Current market value of the investment	Input	Yes	Numeric	Yes	Not Applicable	
External Liabilities								
1	Mortgage Loan		Input	Yes	Numeric	No	Not Applicable	
2	Motor vehicle loan		Input	Yes	Numeric	No	Not Applicable	
3	Overdraft/personal loan		Input	Yes	Numeric	No	Not Applicable	
4	Other loan		Input	Yes	Numeric	No	Not Applicable	
Dependants								
1	Dependant Name	Displays the Dependant Name	Display	No	String	No	Not Applicable	
2	Relationship	Displays the Dependants relationship with Customer	Display	No	String	No	Not Applicable	
Dependant Details								

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
1	Name	Inputs the name of the dependant	Input	Yes	String	Yes	Not Applicable	
2	Relationship	Selects the relationship with the customer	Select	Yes	String	Yes	Brother Daughter Father-in-law Father Guardian Mother-in-law Mother Other Sister Son Spouse	
3	Date of birth	Inputs the date of birth of the dependant	Input	Yes	String	Yes	Not Applicable	
4	Age	Displays the age of the dependant	Compute	Yes	Numeric	Yes	Not Applicable	
5	Gender	Selects the gender of the dependant	Input	Yes	Character	Yes	1. Male 2. Female	
6	Years to support	Inputs the Years to support for the dependant	Input	Yes	Numeric	Yes	Not Applicable	
Investment Profile								
1	Recommended Portfolio	Displays the recommended portfolio based on the risk profile	Display	No	Character	No	List of Applicable Risk Profiles	
2	Selected Portfolio	Selects the investment portfolio for the current plan	Select	Yes	Character	No	List of Applicable Risk Profiles	
3	Investment Profiles	Displays the Investment Profiles with Expected Return, Standard Deviation and Model Asset Allocation	Display	No	String	No	List of Applicable Risk Profiles	
Model portfolio Analysis								
1	Display name of Recommended portfolio	Displays the Recommended portfolio	Display	No	String	No	List of Applicable Risk Profiles	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
2	Display name of Selected portfolio	Displays the Selected portfolio	Display	Yes	String	Yes	List of Applicable Risk Profiles	
Back Testing								
3	Back Testing and Max Drawdown Timeline	Selects the timeline for viewing the back testing and max drawdown results	Select	Yes	String	Yes	1. 1 month 2. 3 month 3. 6 month 4. 1 year 5. 2 year 6. 5 year	
4	Max drawdown	Displays the max drawdown ratio of the portfolio	Display	No	Numeric	No	Not Applicable	
5	Standard deviation	Displays Standard deviation of the portfolio	Display	No	Numeric	No	Not Applicable	
6	Beta	Displays the Beta of the portfolio	Display	No	Numeric	No	Not Applicable	
7	Sharpe ratio	Displays the Sharpe ratio of the portfolio	Display	No	Numeric	No	Not Applicable	
Performance Projection								
1	Performance Projection Timeline	Selects the timeline for viewing the performance projection results	Display	Yes	String	No	1. 1 month 2. 3 month 3. 6 month 4. 1 year 5. 2 year 6. 5 year	
Budgeting								
Goal Summary Card								
1	Investment Profile	Display of the name of the risk profile selected in the Investment Profile	Display	No	Character	No	List of Applicable Risk Profiles	
2	Investment Return %	Displays the expected rate of return for the Investment Profile	Display	No	String	No	Not Applicable	
3	Goal Amount	Displays the goal amount	Display	No	String	No	Not Applicable	
4	Time Period	Displays the time period of the goal	Display	No	String	No	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
Budgeting Summary Matrix								
1	Available for tagging	Displays the Total Assets (Internal + External) - Tagged Assets to Other Plans (Internal + External)	Computed	No	Numeric	No	Not Applicable	
2	Total assets tagged to other plan	Displays the Tagged Assets to Other Plans (Internal + External)	Computed	No	Numeric	No	Not Applicable	
3	Total assets with bank	Displays the Total Assets (Internal)	Computed	No	Numeric	No	Not Applicable	
4	Available for tagging	Displays the Total Assets (Internal) - Tagged Assets to Other Plans (Internal)	Computed	No	Numeric	No	Not Applicable	
5	Tagged to other plans	Displays the Tagged Assets to Other Plans (Internal)	Computed	No	Numeric	No	Not Applicable	
6	External assets	Displays the Total Assets (External)	Computed	No	Numeric	No	Not Applicable	
7	Available for tagging	Displays the Total Assets (External) - Tagged Assets to Other Plans (External)	Computed	No	Numeric	No	Not Applicable	
8	Assigned not with bank	Displays the Tagged Assets to Other Plans (External)	Computed	No	Numeric	No	Not Applicable	
Assign Assets with bank								
1	Plan Type Filter	Selects the type of plan for filtering the records	Select	No	Character	No	1. Wealth Planning 2. Retirement Planning 3. Education Planning 4. Protection Planning 5. Tax Planning 6. Execution Only	
2	Plan Name	Displays the name of the plan	Display	No	String	No	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
3	Goal amount	Displays the goal/plan amount	Display	No	String	No	Not Applicable	
4	Earmarked amount	Displays the amount earmarked for the goal	Display	No	String	No	Not Applicable	
5	Earmarked Amount %	Displays the earmarked amount percentage	Display	No	String	No	Not Applicable	
6	Investment required	Displays the investment amount required	Display	No	String	No	Not Applicable	
Assets with bank (excluding CA, SA and MCA call balance)								
1	Security Name	Displays the name of the security held by the customer	Display	No	Numeric	No	Not Applicable	
2	Asset Class	Displays the asset class					List of Assets Type	
3	Product type	Displays the Product Type	Display	No	String	No	List of Sub Product	
4	Account Number	Displays the account number	Display	No	Numeric	No	Not Applicable	
5	Market value	Market Value of the Security	Display	No	Numeric	No	Not Applicable	
6	Available (%)	Displays the available percentage of the market value for tagging	Display	No	Numeric	No	Not Applicable	
7	Allocation (%)	Inputs the allocation percentage for tagging	Input	No	Numeric	No	Not Applicable	
8	Amount	Displays the Allocated amount as per the percentage inputted	Computed	No	Numeric	No	Not Applicable	
9	Currency	Displays the security currency	Display	No	Character	No	List of all Currencies	
10	Risk Class	Displays the risk class	Display	No	String	No	List of Applicable Risk Profiles	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
11	Units	Displays the units held for the security	Display	No	String	No	Not Applicable	
12	Market Price	Displays the market price of the security	Display	No	String	No	Not Applicable	
Assign External Assets								
1	Available for assignment	Displays the Amount from external assets available for assignment	Computed	No	Numeric	No	Not Applicable	
2	Amount to assign	Inputs the Amount to be assigned from external assets to the plan	Input	Yes	Numeric	No	Not Applicable	
My Budget								
1	Annual Cash Flow	Displays the Annual Cash flow of the client	Display	No	Numeric	No	Not Applicable	
2	Cash	Displays the total cash with the customer	Display	No	Numeric	No	Not Applicable	
3	Insurance	Insurance amount held by the customer	Display	No	Numeric	No	Not Applicable	
4	Existing investments with bank	Displays the Investments with the bank of the customer	Display	No	Numeric	No	Not Applicable	
5	Single amount	Inputs the Single amount to be invested for the plan	Input	Yes	Numeric	No	Not Applicable	
6	Available for investment	Displays the Single Amount available	Input	Yes	Numeric	No	Not Applicable	
7	Annual amount	Inputs the Annual amount to be invested annually for the plan	Input	Yes	Numeric	No	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
8	Available for investment	Displays the Annual Amount available	Input	Yes	Numeric	No	Not Applicable	
9	My intended Investment will be funded from	Selects the Source of funds	Input	Yes	Button	Yes	1. Cash 2. Investments 3. Insurance	
Select the Products								
Plan Summary Card								
1	Investment profile	Display of the name of the risk profile selected in the Investment Profile	Display	No	String	No	List of Applicable Risk Profiles	
2	Target return % pa	Displays the expected rate of return for the Investment Profile	Display	No	Numeric	No	Not Applicable	
3	Investment required	Displays the goal amount	Display	No	Numeric	No	Not Applicable	
4	Allocated amount	Displays the amount allocated to achieve the goal	Display	No	Numeric	No	Not Applicable	
5	Additional investment	Displays the additional investment required to achieve the goal	Computed	No	Numeric	No	Not Applicable	
6	Goal Period	Displays the tenure of the goal	Display	No	String	No	Not Applicable	
Bonds								
1	Holding value	Displays the holdings value of the customer for the product type	Display	No	Numeric	No	Not Applicable	
2	Recommended value	Displays the Recommended value of investment for the product type	Display	No	Numeric	No	Not Applicable	
3	Security Details	Displays the name of the security and security details	Display	No	String	No	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
		Currency of the security regular investment frequency date of regular investment date of initial investment Total return % Name of risk profile Return - 0%(1M), 0%(3M), 0%(6M) 0%(1Y), 0%(3Y), 0%(5Y)						
4	Indicative price	Displays the market price of the security	Display	No	Numeric	No	Not Applicable	
5	Invested nominal value (IDR)	Displays the Nominal value invested in the security	Display	No	Numeric	No	Not Applicable	
6	Invested Market Value (IDR)	Displays the Market value of the invested security	Display	No	Numeric	No	NA	
7	Transaction	Selects the Type of transaction	Input	Yes	Select	Yes	1. Buy 2. Sell	
8	Max. Redemption amount (IDR)	Displays the Max amount of security that can be redeemed	Display	No	Numeric	No	Not Applicable	
9	Transaction amount (IDR)	Inputs the amount for the transaction	Input	Yes	Numeric	Yes	Not Applicable	
10	Indicative transaction amount (IDR)	Displays the indicative transaction amount in IDR	Display	No	Numeric	No	Not Applicable	
Unit Trust								
1	Holding value	Displays the holdings value of the customer for the product type	Display	No	Numeric	No	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
2	Recommended value	Displays the Recommended value of investment for the product type	Display	No	Numeric	No	Not Applicable	
3	Security Details	Displays the name of the security and security details Currency of the security regular investment frequency date of regular investment date of initial investment Total return % Name of risk profile Return - 0%(1M), 0%(3M), 0%(6M) 0%(1Y), 0%(3Y), 0%(5Y)	Display	No	String	No	Not Applicable	
4	Last NAV (IDR)	Displays the Last NAV of the security	Display	No	Numeric	No	Not Applicable	
5	Current Holding units	Displays the Current no. Of holding units of the security	Display	No	Numeric	No	Not Applicable	
6	Market Value (IDR)	Displays the Market Value of the security	Display	No	Numeric	No	Not Applicable	
7	Transaction	Selects the Type of transaction	Input	Yes	Select	Yes	1. Buy 2. Sell	
8	Transaction units	Displays the No. Of units to be transacted	Display	No	Numeric	No	Not Applicable	
9	Investment Amount	Inputs amount for the transaction	Input	Yes	Numeric	Yes	Not Applicable	
10	Indicative Investment Amount (IDR)	Displays the Investment Amount in IDR	Display	No	Numeric	No	Not Applicable	
Insurance								

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
1	Holding value	Displays the holdings value of the customer for the product type	Display	No	Numeric	No	Not Applicable	
2	Recommended value	Displays the Recommended value of investment for the product type	Display	No	Numeric	No	Not Applicable	
3	Security Details	Displays the name of the security and security details Currency of the security	Display	No	String	No	Not Applicable	
4	Sum Assured (IDR)	Displays the Sum Assured (IDR)	Display	No	Numeric	No	Not Applicable	
5	Transaction	Selects the Transaction type	Input	Yes	Select	Yes	Insurance buy	
6	Insurance amount	Inputs the Amount	Input	Yes	Numeric	Yes	Not Applicable	
7	Indicative Insurance amount (IDR)	Displays the Indicative insurance amount in IDR	Display	No	Numeric	No	Not Applicable	
Cash Flow								
1	Income	Displays the Income of the client	Display	No	Numeric	No	Not Applicable	
2	Expense	Displays the Expense of the client	Display	No	Numeric	No	Not Applicable	
3	Cash flow	Displays the Cash flow of the client	Display	No	Numeric	No	Not Applicable	
4	Available	Displays the Cash flow available to the client	Display	No	Numeric	No	Not Applicable	
Net Worth								
1	Asset	Displays the Asset of the client	Display	No	Numeric	No	Not Applicable	
2	Liability	Displays the Liability of the client	Display	No	Numeric	No	Not Applicable	

S No	Field Name	Field Description	Field Type	Editable	Data Type	Mandatory	List of Values	Remarks
3	Networth	Displays the Networth of the client	Display	No	Numeric	No	Not Applicable	
4	Available	Displays the Assets available to the client	Display	No	Numeric	No	Not Applicable	
Plan Summary								
1	Plan Name	Displays the name of the plan	Display	No	Alphanumeric	No	Not Applicable	
2	Investment Profile	Displays the selected investment profile	Display	No	String	No	1. Secure 2. Conservative 3. Income 4. Balance 5. Aggressive 6. Speculative	
3	Target return %pa	Displays the expected rate of return for the Investment Profile	Display	No	Numeric	No	Not Applicable	
4	Target goal amount	Displays the goal amount	Display	No	Numeric	No	Not Applicable	
5	Investment required	Displays the Investment required	Computed	No	Numeric	No	Not Applicable	
6	Allocated Amount	Displays the amount allocated to achieve the goal	Display	No	Numeric	No	Not Applicable	
7	Shortfall	Displays the Shortfall in investment in order to achieve goal amount	Computed	No	Numeric	No	Not Applicable	
8	Goal period	Displays the tenure of the goal	Display	No	String	No	Not Applicable	

6. Validations

1. Mandatory Field Verification - The system will validate whether the entire mandatory fields with the * mark are filled in by the user or not
2. System will check if the Risk Profile Override has been approved by the supervisor to proceed with selecting the plan types
3. System will validate that external assets allocation cannot not be more than available external assets
4. System checks if at least 1 product is selected for compare portfolio
5. User needs to generate the proposal before previewing the same in the system

7. Actors/Entitlements

1. RM
2. Supervisor

8. Annexure

1. The attached file contains the Common List of Value sheet for some of the field level data

Common LOV
Sheet.xlsx

2. The attached file below provides the computation logic for the Expected Return and Standard Deviation displayed in the Recommended Risk Profile and Investment Profile Screen

Expected Return and
Standard deviation C.

3. The attached files below provides the computation logic for the calculators used in the Goal Planning Section

Critical Illness
Calculator.xlsx

Death and Disability
Calculator.xlsx

Education
Calculator_Investmer

Hospitalization
Calculator.xlsx

Retirement
Calculator_Investmer

Savings
